# GAME... Meets Three Legendary Eras

It's not always sunny on the gridiron - battle it out in snow, sleet, and rain. You'll have to adjust your gameplan to win.

Build a football dynasty like
Dallas or San Francisco. Draft,
trade, and manage players
throughout entire careers!

- All the NFL teams and players from four legendary eras of football: 1996, 1968, 1950, and 1932!
- Incredible 3D graphics
- Advanced A.I. with team specific styles and coaching strategies
- Intense multi-player action using the Gravis Grip Multi-player adapter
- "Time Travel" with teams to create fantasy matchups
- Action and Coach Mode play

- 20 man rosters require most of your players to play both offense and defense. Get ready to use Dan Marino as a defensive back or Junior Seau at running back!
- The football is larger and harder to throw. Do you take a chance on the pass or grind it out with a running attack?

- Rules favor the running game.
- Goal posts were placed in the front of the end zone. The "Post" pattern was commonly used to run defenders into the posts for an easy touchdown reception.

- Play a little rougher on the receivers. You can hit them anywhere on the field until the ball is thrown... and it's all legal!
- Players like Dick Butkus ruled the gridiron, paving the way for the modern day player.

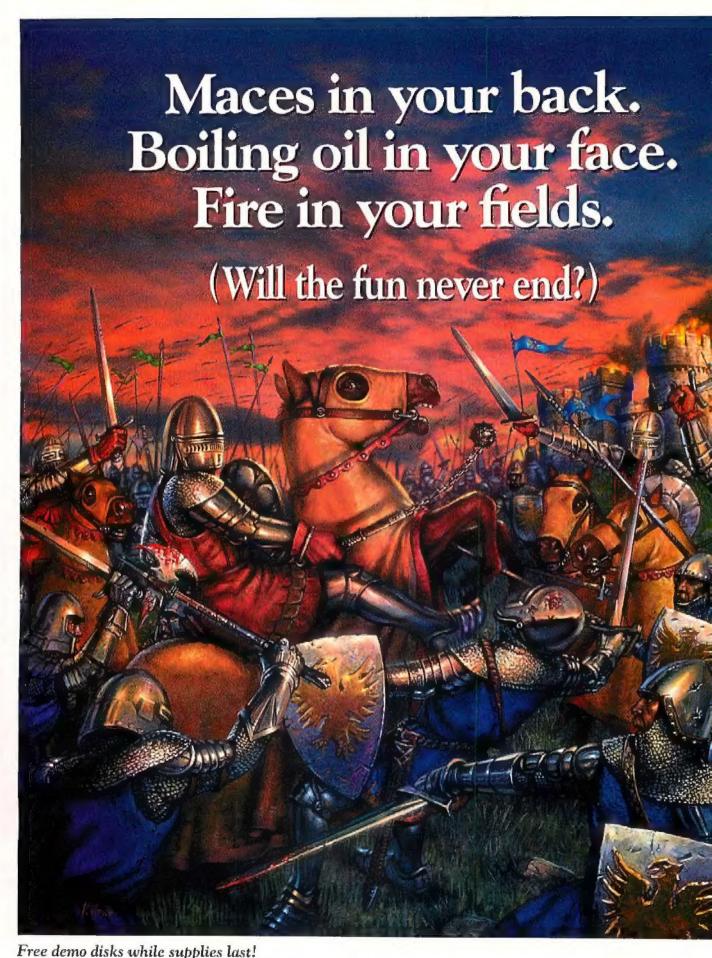

SAMERIKIL

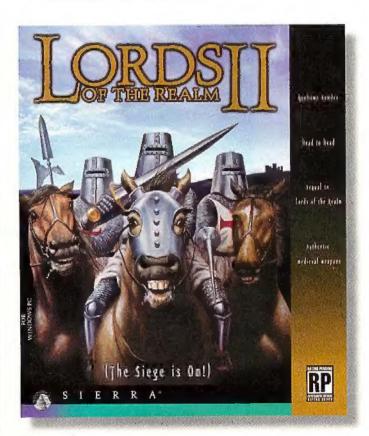

To get yours, visit your local retailer. Or download your free demo and custom Lords II theme pack from our Web site at http://www.sierra.com/games/lords2. Order your advance copy today by calling (800) 757-7707.

Impressions Designed by Impressions Software

All herald the arrival of Lords of the Realm II. It's the late 13th Century and the Crown of England is up for grabs. It's time to sharpen your pitchforks. Round up your archers. And fortify your garrison. It's a fight to the finish against your fellow lords. Where the winner becomes King. And the loser has bloody hell to pay.

A sequel to the award-winning Lords of the Realm, this medieval strategy/action game separates the men from the boys. With challenging new tactics. Rich animation. Armor-piercing weaponry. And real-time battles that are frighteningly authentic. An improved interface makes start-up easy. Plus, you can clash head-to-head via modem, or 4 lords can lay siege at one time via network.

Prepare to smash your way to the throne in the battle of your life. Because in the end, you're either King — or you're dead.

# The#1 Computer Game Magazine World

#### **FEATURES**

## 63 Cover Story 15th Anniversary Special Issue

fter 15 years of publishing the #1
Computer Game Magazine, we've seen more computer games than anyone. Now, for the first time ever, we present our ultimate list of the best and worst PC games of all time. In this commemorative section, we stroll down memory lane to reward the greatest gaming accomplishments, castigate games that were ripped untimely from the development womb, sneer at the flakiest gaming peripherals, ridicule the worst excuses for plotlines, honor the most influential people in the gaming industry, and celebrate lots more of the best and worst of 15 years of computer gaming.

# BEST (and 50 Worst) GALES of Line

#### 134 The Next 15 Years

o one who played STAR TREK on mainframes, much less PONG, could have envisioned the graphics, sound and playability of today's games. Who knows what gaming will become in the next 15 years? Keith Ferrell, former Editor of *OMNI* magazine, talks to noted designers and futurists to map out gaming's destiny.

#### 147 3D Cards

he 3D revolution may be slower in coming than everyone anticipated, but the cards are finally hitting gaming beachheads. Contributing Technical Editor Loyd Case gets down in the trenches to separate the winners from the weenles in the 3D wars.

#### JUST THE FAQS

month? How can I find what I
want and use it? What sort of abom-

inations did the voice-over actors on the CD-ROM commit this month? What's kappening next month?

#### What's On The CD?

This month's CG-ROM celebrates 15 years of outstanding computer game cov-

erage in CGW. View the magazine's top stories from the last 15 years, hear the 15 best game soundtracks of all time, and check out the 15 coolest game designs from our readers. Plus, the Multi-mediocre Players make an excruciatingly bad play of the games we'd like to see made, and the games we never want to see again. (Phoney accents exaggerated to protect the guilty.)

Quake fans—you'll find the shareware version of the game, plus deadly factics and exclusive level maps to guide you to the goodies. For simulation fans, we have an exclusive of Philips's NET DUEL (the internet version of Fighter Duell), and an exclusive radar tutorial for Military Simulations' Back to Baghbab. For the Strategy Game enthusiast, we have exclusive WarChaft II scenarios and tips, and five additional scenarios for SSI's FANTASY GENERAL.

#### How Do I Use It?

If you have Windows 95, installation is simple. The CD is Autoplay enabled—just lock in load. Otherwise, from Windows 3.x, select Run from the Program Manager menu, and type "D:\RJN-ME" (where D is the letter of your CD-ROM drive) to run it straight from the CD. Then type "D:\INSTALL" to create a CGW program group on your Windows deskiop. If you have installed previous versions of the CG-ROM, this disc will use the program group already on your desklop.

#### How Do I Play The Demos?

To view the demos, first click on Editors' Hot Picks or Product Demos. Next, click on your favorite genre. Action, Adventure, Simulations, Sports or Strategy. Then click on the title of interest. Each demo has its own instructions for installation.

#### How Do I Get The Patch Files?

Click on Palches under the CGW Features, and then read the text window, which has instructions on copying the files to your hard drive. You can also access the palches from a DOS prompt by typing "D:\PATCHES" (where D: is the letter of your CD-ROM drive) and copying them directly from there to your hard drive. We strongly recommend that you back up any previously saved games before installing a patch, as this may overwrite your existing program.

#### How Do I Get The CG-ROM?

Newsstand issues come in two flavors: with and without the CD. Each type is clearly marked. If you can't find the version you want in the store you frequent, encourage your retailer to carry it (or subscribe to ensure that you get a CD every month). To subscribe, simply call (303) 665 8930, and specify that you want the CD-ROM version.

#### How Do We Classify Games?

Action/Arcade (AC): The emphasis is on hand-eye coordination and reflexes, usually emphasizing fast play over story or strategy.

Adventure (AD): Games wherein you control an alter ego and move through a story line or sequence of events and puzzle-solving takes precedence over conversation and combat.

Classics/Puzzles (CP): Classics are old stand-bys and parlor games that appeal to many different types of gamer. Examples include: backgammon, bridge, chess, Monopoly, parchesi, Risk, and Southaine Puzzle games are computer games which emphasize spatial relationships, word games and/or problem-solving without requiring gamers to follow a storyline. Examples would be. Shanghai, Tetrais and Zig Zag.

Rote-Playing (RP). RPGs are a subset of adventure games, but stress character development, often through improving stats or other attributes. Conversations with non-player characters (NPCs) and lactical combal are general-

Canada and all other countries and side for postage. Atmist subscriptions are \$78 per year. Payment must be in J.S. dollars made by chock or money order drawn upon a U.S. bank. Visa, MasterCard. AMCX accepted.

#### **BACK ISSUES**

Fig. 13. x 12. sept \$7 per seas \$3 co. do the drives Strest by the commonly color to Back issuer \$eq.1 | 70 days Patenteig no IPD, Box 13131, Begider, CO 80327 3131

ly more important than in Adventure games. Finally, the game world tends to be large, and the plot less I near, often with some quests! treks outside the main story line.

Simulations (SI): Highly realistic games from a first-person perspective: you may drive a realistically simulated race car, fly a military aircraft with a meticulous physics model, or swoop through a detailed sci-fl environment. Usually polygon filled technology is used to build the simulated world on the fly.

Sports (SP): The sports game category is a broad genre which includes action (NBA Live) and strategy games (Front Page Sports Football, Pkg) based on sports.

**Strategy** (ST): Problem-solving, short- and long-range planning are

the keys here. These games almost always emphasize resource and risk management. This genre includes conflict-based sci-fi and fantasy games (X-COM, Ourpost, MOO), as well as "pure" strategy games and "software toys" such as SIMCITY.

Wargames (WG): A subset of strategy games, these recreate historical conflicts from a command perspective. They may be tactical, operational, or strategic, and stress anything from log stics and fire-power to morale and leadership. They may be simple (PANZER GENERAL, EMPIRE II) to incredibly detailed and complex (PACIFIC WAR).

#### What Is CGW's Reviews Policy?

 We only review from the final copy of the game. Though it has

**DEMOSIVEPC** 

DEMOS\WAR\_SCEN

**DEMOSUNTRPLAYIWL** 

via CD interface

become popular among PC gaming magazines to review from late beta copies, we feel that the reader is best served by having the reviewer look at the same copy of a game that the readers will find on the shelves. While we recognize that this causes some delay in coverage, we believe the reader is better served by such caulion.

2) We expect our reviewers to finish the game. We want our readers to be assured that we do not review based on immediate or early impressions of a game. Our reviewers give a game ample opportunity to show its quality. In some cases, bugs make it impossible to finish a game, but we identify situations where that has occurred.

3) We make every effort to match the reviewer to the game. We take into

consideration the preferences, background and possible biases of the reviewer and, where possible, we find people with actual life experience or special backgrounds that match a game. We believe this policy enhances both the credibility of the review and the enjoyment of gameplay when the real world and the game world are competently compared.

4) We do not accept free travel from software or hardware companies. We believe such gifts have a facil assumption of coverage attached to them. We will only cover such events/launches as we believe will benefit our readers.

#### What's Up Online?

Addict them first, charge them later. Distributing Shareware via the internet has proven to be a great promotional channel for marketing games: case in point, id Software and its Doom, Heretic, and Wolfenstein 3D, all of which helped created the biggest little name in the software industry. See which games made CGW's list of top 15 shareware games of all time (hint:

all of the above). Downtoad these greatest-shareware games from our AOL site, and see for yourself just how addicting they are.

#### **Coming Next Month**

Our annual Hollday Buyer's Guide returns with more than 50 pages of gaming goodles for the holldays. The CGW staff is sifting through mountains of new and pre-release games to show you the BEST ones

HOLIDAY HOT 100

in every category, plus hardware, stocking stuffers and children's equipment. It'll be huge and helpful, so check it out.

# ULTIMATE GAME MACHINE

December also marks the third year of our highly acclaimed Ultimate Game Machine roundup. If you need a hot new gaming system, see next month's issue for a complete evaluation of the hottest machines designed specifically for gaming. We'll test and rank the hottest rigs from Falcon Northwest, Compaq, NEC, Sony and Toshiba (providing they deliver them on time), and update you with new information on Zephyr and Galeway machines.

#### Hot Reviews For December

- DEADLOCK
- Jagged Alliance: Deadly Games
- . THE ELDER SCROLLS: DAGGERFALL
- NHL Hockey 97
- JOHN MADDEN FOOTBALL 97
- . STAR CONTROL 3
- F-22

#### Sneak Previews Next Month

- Descent to Undermountain
- IM1A2 ABRAMS
- MechWarrior 2: Mercenaries

#### Disclosure

As a matter of record, CGW voluntarily maintains a list of companies in which SoftBank, the parent company of Ziff Davis Publishing Co., has an interest, it is available online at http://www.zdnet.com /gaming/disclaim.html and is updated when we become aware of such investments.

#### **HOW DO WE RATE?**

#### Outstanding:

The rare game that gets it all right. The graphics, sound, and gameplay come together to form a Transcendent Gaming Experience. Our strongest buying recommendation.

#### Very Good: A

high-quality game that succeeds in many areas. May have minor problems, but is still worth your money, especially if you're interested in the subject matter or genre.

#### Average: A m xed bag. Can

be a game that reaches for the stars, but falls short in severa ways. Can also be a game that does what it does well, but lacks frair or

#### Weak: A game with serious prob-

with serious problems. Usually buggy, seriously lacking in play value, or just a poorly conceived game design—you should think long and hard before buying it.

#### Abysmal: The rare game that

gets it all wrong.
This is reserved
for those products
so buggy, ill-conceived or value
less that you wonder why they were
ever released in
the first place.

## 15 Years Of Playing To Win

#### **CGW Founder Russell Sipe Reflects On The Magazine's History**

sit here at nearly mid night typing on the same keyboard that t used a few minutes before to send freneho commands to my battle-weary troops. Orick! Group One;

Move to the river crossing

Click! Group Two: Move south and fire on the forces before you. Click! Group Three: Regroup.

Fighting three opponents, I had rushed my troops about in a desperate effort to prevail in an Internet online game of COMMAND & CONQUER. The battle is over, dozens of vehicles destroyed, and even more troops sent to their electronic graves. Here I sit, the adrenaline rush subsiding, coming back to earth. Suspension of disbetief suspended.

Oddly enough, in many ways tonight was a lot like a night some

15 years ago when I sat in front of a different computer, turned my little single-prop aircraft around at about 24,000 feet, and aimed it at a poslage-stamp-size grid floating far below me on the computer screen. On that night I was mesmerized by a tiny wire framed grid representing the world of FLIGHT SIMULATOR. My Apple II served as my aircraft's Control Panel as i began the long descent back toward the world as Bruce Artwick had created it in 1979. In that world the enemy fighters were nothing more than simple white dots on the screen that flirted about like rocket-powered fireflies. Reality in ultimate abstract. A dot, nothing more, represented my determined opponent. Yet, I was lotally engaged. It was just me and the dot. No mercy, no quarter. Talk about suspension of disbelief!

On another occasion, I booted

BREATH OF LIFE This dragon graced CGW's first Issue in 1981, when the TRS-80 and Apple II were the reigning game platforms.

up a game and read these words:
"You are standing in an open field
west of a white nouse, with a
boarded front door. There is a
small mailbox here." These simple
lines began what is without a
doubt the most significant com-

puter adventure game of all time, ZORK. Somehow, recall ing these games is a bit like attending your high-school reunion. It brings back a lot of memories.

The first issue of Computer Gaming World appeared 15 years ago this month Now, 15 years doesn't seem like a long time when you consider the likes of The New Yorker or Reader's Digest. However, in the world of computers and computer games 15 years is a t-o-n-g time.

When CGW's first issue hill newsstands, all 36 black and white pages of it (only the two covers were in color) the hottest games were ROBOT WAR and CRUSH CRUMBLE AND CHOMP. A fair porlion of the games were distributed on cassette tape. The two big gam ing rigs were the TRS-80 and the Apple II with the really complex games requiring an upgrade to 48K of RAM. The name Lord. British was unknown, except to a few folks in Texas, and Trip Hawkins was a young executive at fledgling Apple Computer who dreamed of starting his own game company one day.

Here's how I happened to start CGW. In late 1979, I got the harebrained notion that I could be a computer game designer. I had designed a board game or two and thought that, with a lew months invested in reading programming tutorials. I could become a "player" in what I thought would be a wonderful emerging hobby and industry. I was right about the hobby and industry, but guite wrong about being a computer game designer. You see, in those days the designer and the programmer were the same person. The concept of specialized skills exhibited by design teams, producers, and the like would not make an appearance until the mid '80s when Electronic Arts codified the development-team approach to game design.

After spending only two weeks with the Applesoft tutorial manual,

WING AND A BLAIR Mark Hamill shares his experiences from Wing Commander III with Aussell Sipe in early 1984.

You can be the monster. Or you can be its prey. Either way, some poor bastard will get his ass kicked.

In Hunter/Hunted, whether you live or die is all up to you because you choose the character you play. Either way, monster or prey, to dodge traps and run a gauntlet of 3-D characters just to stay alive. The blistering action takes you through flesh-eating tunnels and booby-trapped sewers with only your wits separating you from a body bag. Well, wits and

FIFTED

whole bunch of guns, knives, grenades, and rocket launchers. Because, hey, when it's kill or be killed, it's better to

give than receive.

Circle Reader Service #154

PLAYING WITH THE BIG BOYS CGW founder Aussell Sipe (center) plays Modem Wars with the game's producer, David Maynard (right), in 1988. The garrulous Johnny Wilson is at left.

I knew that I didn't have the per sonality to be a programmer. So here I was, stuck with the \$2,000 machine representing my life savings, and no way to make money with it. While trying to figure out how to get the computer to pay for itself, I was playing a lot of games.

in March of 1981, I was playing a game called COMPUTER AIR COMBAT from SSI. It was a thinly disguised computer version of a popular board game system called Air Force/Dauntless from Battleline Games, Driving along the freeway one day in March 1981. I was thinking about the game. Mulling over the fact that a programming error caused the ME 109s in the game to turn more tightly than they should have, I wondered if others had noticed the same problem. I wanted to read a review of the game and see if others saw the problem. It occurred to me that no one was reviewing computer games in those days. Outside of a brief mention of an arcade game here and there, none of the existing magazines covered games, And certainly there wasn't anything like a computer game magazine to

"Someone should start a com-

puter game magazine," I thought to myself as I drove along.

"You could do it," a voice said in my head

"I don't know the first thing about magazine publishing," I lhought.

"You could learn," said the

It felt like some scene out of Star Wars. "Russ., Use the Force. Russ!"

The voice was right. I could learn, And I did learn, Now, 15 years later I look with pride at what CGW has accomplished over the years and at what it is today. In those 15 years CGW has reviewed thousands of computer games and entertained millions of gamers. But more importantly, CGW has helped mold and shape the look of the computer gaming as both hobby and industry. We played a key role in building the community of computer gamers. This is the greatest egacy a magazine could hope to attain Computer Gaming World has done the job. And I am very proud of her.

Russell Sipe sold Computer Gaming World in 1993 Today he is the Director of Internet Commerce for DeltaNet in Southern California. He still plays games. %

#### **EDITORIAL COMMENT**

Lam a farty new mater of CCW, soil cellbase only recently gotten faitly Leavily into convoiter gaming and amonly 13, but I find it better than any other magazine I've seen, and I most your opinions very much.

Howe a question about game level makers and editors and the like. I recently purchased WarCtext Hood lound the editor to be a dr the game Hadds inforte play blate and most of all, it was so easy to use that even a brandess

fool like the could use it Alv probe ars, who Russian do other editors have obe sohard Lycept for Higgs son Mon wa Mye v Windows Strong to Have never to malane the creditor tan was this case of even one Louddise, to be anyone Ikuow Do taescipeople a Lexpect us to a ve a full knowledge of CAD'Tknow a

Wase of tastele editor wouldn't have worked for many games, such as Doom clones, but I tank so action gar little more user friendly edulations by conthought up. Or take the Constant have been debe only fun to use. Does anybour clse feel this way, or am Ljust being foolish?

Andrew Corrill Gray, ME

This scenario, The Course

a bulk-in editor for unanger

and contest

We wish it were possible to have an easy-touse editor for every game. Different game companies have different philosophies about the value of editors. While the flexibility often gives legs to a game and causes a title to remain in the public's eye a little longer, it also reduces the desirability of producing a sequel with the same basic game engine, since gamers may be able to download new levels or maps from the Interact or a host of local

BBSs. The two buggest questions about whether to build game editors are 1) how much tune/money to invest in creating an interface that gainers can understand and 2) what is the nature of the game objects (3D, objectonented, limited to a library provided by the company, spritebased) and thus

how easily can user-defined objects be implemented in the game? Companies like Blizzard and New World have obviously decided that giving users the extra flexibility to create their own scenarios makes the basic game into a better product. After helping to judge the HOMM scenario design contest recently (and seeing game maps like the one pictured here), we truly believe that editors are a good thing. Now, if only Mindscape would develop a WARTAMMER editor so we could create our own medieval wargames!

· 中国

The subscribers rate games from a list on a questionnaire. Playing Lately is a straw poll of the same subscribers where they "wate in" the names of games they are currently playing. Hence, The Top 100 gives a qualitative evaluation, whereas Playing Lately may indicate popularity more than quality. We like to think that the former offers comparative quality with the latter shows what's currently hot.

#### THE GODFATHER ANALOGY

I was pleased to see your article defending the quality of sequel games. I only wish you could have seen it in your heart to give me credit for your Sword of Shanarra! Godfather analogy After all, you first used this line of reasoning in response to my lefter a few months ago, in which I took exception to the five-star ratings given to sequel games.

However, I must admit that I had never really played StO MEJER'S CIVILIZATION II before writing that letter. Now that I have, I can see why it received five stars. I still adhere, though, to my behef that sequel games should be reviewed with at least a small bias. This hore, let me clarify my reasons.

First, a gamer who has alreach played a great or ginal game cannot (at least in most cases) get the extraordinary gaming experience that a five-star rating promises. In SID MULTE'S CIVELYMOS II, you are

#### QUALITY AND QUANTITY

Hove your magazine. You have always been a good resource (for me) on what games to buy and what not to buy Your reviews and reviewers are utelligent, informative, and humorous. You do not surprise me every month when you put out a new quality issue. I would espect nothing less, But goez, why isn't your "Playing

Lately?" top 10 the same as the top 10 games in your Top 10022

#### LL DELIGHTFULLY EXPRESSED BY THE COMPAQ PRESARIO.

The Compaq Presario 8000 Series isn't

for everyone. It's for that certain breed of multimedia enthusiast who likes a computer that, well, goes to 11.

After all, the Presario 8000 Series is the most advanced multimedia home computer line ever made.

For starters, it features JBL Pro Premium speakers for the same awesome dynamics one enjoys from a home sound system. Rest assured, when combined with our Interwave 32-Voice Wavetable Synthesis for brilliant audio realism, it'll definitely rock your world. And quite possibly, your neighbors.

Another cool feature is a Talk & Send 33.6Kbps modem. Not only does it give you the fastest Internet access, it lets you play games and talk with your opponent at the same time. But perhaps most impressive of all, the Presario has PowerVR 3D Graphics and 6MB of

graphics memory that bring true 3D arcade-quality images home for the first time ever. Translation: frightening realism and incredibly smooth animation.

The experience is further intensified by a range of cutting-edge power and performance features. There's even an innovative gamepad that puts everything in the palms of your hands. The same ones that are probably getting a little sweaty right now. For more information, visit us at www.compaq.com or call 1-800-345-1518.

The Compaq Presario 8000 Series Not for the faint of heart.

Has It Changed Your Life Yet?

building cities, managing military and economic expenditures, etc. basically the same thing as in the old SID MEIER'S CIVILIZATION, It is certamly entertaining, and the added multimedia is a nice addition as well-But a transcending gaming expenence? I think not. Using your Codfather II analogy, CIVILIZATION II would be comparable to re-releasing The Godfather with an enhanced soundtrack and a few new scenes. and entitling it Codfather II. (In fact, George Lucas is attempting to do this very thing next year with Star Wars, but that's straying from the point.) You see, what made Godfather II even more successful than the original was the compelling, well-written and completely original script. You did not see a horse's severed head in both movies, now didyou?

My second point centers around originality. In my opinion, games like PSYCHIC DETECTIVE deserve extra praise because of their striking originality. Let's face it, software designers can turn a profit on the same types of game year after year, so it is important to reward the program designer who stretches the imagination a bit. I know PSYCHIC DETECTIVE was well received at COW, but if games like these aren't given extra recognition and promotion, there might not be enough incentive for the next designer with a creative idea.

lan Umland From the Internet

Actually, we don't believe Lucus is doing what you asserted above with regard to Star Wars. He isn't calling it Star Wars II, is he? Ironically, we think the Godfather analogy still holds. Coppola shot more footage for The Godfather than he could possibly have used in Godfather II. It footage was used in Godfather II. It

had new script elements, new actors and new footage, but some of it was built solidly on the preproduction and production work done for the first film. In much the same ware SurvAlence's CIVILIZATION II is built a system on the preproduction uring closeand production work done in ereeces of data ating the original e screen, only game engine it view when the Yet, if was a tely, it only work of art for coming missites. the design team to integrate new s target range, elements (new units, new wonders) Vertical into the game without ure. The disrupting the play balance associated with the first game.

But before the Valse Analogy
Patrol drags us into the darkened
dangeons of the fabled CGW building and tortures us with choral readings from our competition, we'd like
to go on record as stating that we
approve of innovation. The producer/
designer of Psycauci Detective has
told us personally how much he
appreciated our review. Psycauc.
Detective wasn't a game for hard
core gamers, but it was a fresh
approach to game design. We welcome such approaches, even when
they aren't commercially successful

#### **GETTING HIS 64 BITS IN**

Lam writing in response to Martin Carilla's newest rant on glimiticks (September). In it he says that Nintendo is just pushing its new 3D games as a glimmick, I disagree. The way Hook at it, it is a technological achievement. That they have the ability to craim 3D technology, processors, penpheral ports and all the other stuff into a box that's no bigger than the speakers on my computer (and have it priced at

## **CGW's European Vacation**

### ECTS Provides An Updated Look At Games On Tap For The Holiday Season

he European Computer Trade Show (ECTS) Is similar to the United

States' E3 show albeit with a smaller display floor and a longer history. Still, comparisons are inevitable, especially since the early-September timing of ECTS meant that showgoers were treated primarily to

BATTLES OF ALEXANDER
Interactive Magic's new wargame
lets you command Alexander the
Great's ancient armics. Up to 12
players can battle over the 'Net.

updates of products already announced at E3.

That's not to say our European cousins can't hold their own when it comes to flash and dazzie. The first thing attendees saw upon entering the hall was a genuine, brightred Fokker Triplane hanging over the Empire booth promoting FLYING CORPS. The award for flashiest premiere has to go to DID, who earlier in the week had invited journalists to the Famborough Air Show to unveil the new 3dfx update of EF2000. What better way to show off EF2000 than with a show that featured a flying display with the real Eurofighter, as well as MIGs, Sukhois, and even a B-2 flyby?

SHOW DUZZ A genuine Fokker Dr1 triplane watched over the ECTS proceedings.

DID also showed early versions of TFX: F-22, which has a terrain engine lhal's as big an advancement over the current state of the -art as EF2000's was last year.

Interactive Magic unveiled FALLEN HAVEN, a strategy/ resource-management game that puts you in charge of New Haven (the space colony, not

turn-based game, and build weapons to fight off a relentless alien race. If you're feeling naughty, play as the aliens and do your best to wipe out the colonists.

Gremlin had a number of impressive titles on display. Including Fragile Allegiance, seemingly a hybrid of Master of Orion and Deaclock. The adven-

ture game Realms of THE HAUNTING has you preventing the Apocalypse by running through a country village Doom-style packing a shotgun. (It looked better than it sounds.)

ON THE SHELF

ere are some of the hottest products on the market, as well as

#### THE ELDER SCROLLS: DAGGERFALL

A massive role-playing gaine with layers of detail, Daggerfall is an extremely open-ended CRPG. You control one character who is assigned a covert mission from the Emperor, but how

the ones that frankly ain't so hot. Reviews for most are coming soon.

you complete that mission is up to you.

Daggerfall features the most emphasis on skill development we've seen since

Wasteland and the most emphasis on character reputation since Darklands. As opposed to Darklands, Daggerfall's handling of reputation is a much more sophisticated algorithm based on character class, social status, guild membership, race, religion and actions throughout the game.

Although a sequel to THE ELDER SCROLLS: ARENA, DAGGERFALL offers plenty of improvements over its progenitor. Landscapes are no longer flat, and the use of 3D in stairs, balconies, and roofs makes everything seem more real. Fast travel is easy, reducBullfrog's nearly finished DUNGEON KEEPER had me looking around the room for my socks—the extra time spent on this action/strategy hybrid has paid off, and it promises to be an impressive title. THEME HOSPITAL, on the other hand, is just what it sounds like—THEME PARK gameplay set in a hospital. More exciting is news of Populous 3, which will merge the Warring Gods strategy game with an enhanced Magic Carpet engine to give you amazing views of your dominion.

Long-time gamers were jazzed over 21st Century's impending release of Pinball Construction Kit, the first steel-ball design set since Bill Budge's classic C64 Pinball Construction Set. Nostalgia buffs will also want to be on the lookout for Lunar Landing, a detailed Apolio simulator by U.S. developer AIM Software.

Finally, some of the biggest buzz at the show concerned the announcement of the U.K. version of Computer Gaming World, to be helmed by David Kelly, a leading figure in the U.K. computer industry since 1983. In a land where "reviews" sometimes precede a game's ship date by up to six months, the U.K edition of CGW plans to set new standards for accuracy and timely coverage.—Denny Atkin

## Toshiba Ups The CD-ROM Ante With New 12X Drive

D-ROM drives have dramatically changed how computer games are packaged and distributed But while their large capacity (640 MB) has helped usher in this new era, their speeds and access times have left more than a few gamers (widdling their thumbs waiting for installations to finish and scenes to load.

There have been incremental speed increases over the last couple of years, but Toshiba plans to dramatical-

ly raise the bar with its new XM-5701 and XM-5702 12x CD-ROM drives. Toshiba plans to ship both EIDE (\$165) and SCSI-2 (\$195) versions of the caddyless drive, which should be available as you read this. Improvements should come not only in speed—12x works out to a swift 1.8 MB/sec—but in access time as well, which Toshiba lists at about 125 ms. What does that mean for gamers? Faster installs, scene loads, and general file I/O, and in applications that hit different parts of the CD-ROM, faster accesses—which promises less thumb-lw ddling for us all.—Dave Salvator

## **3DO Goes Software-Only**

DO has announced that it will be phasing out its hardware division, focusing instead on the production of game titles for the PC, the 3DO-designed M2 game console and Internel gaming. Denying that financial difficulties motivated the decision, the Redwood City, California based company stated that it was difficult to justify being dependent on outside companies to manufacture their pame console, which flour-

dered amidst the competition. Cutting its staff by onethird—primarily outside developers, with the remaining layoffs coming from within the hardware division—3DO says it wants to focus on the "next generation of gaining technology." Enforcing its commitment to Internet gaming, the company's first Internet game, Meridian 59, made its official debut immediately on the heels of the announcement.—Jill Anderson

ng the burden of some of the Fed-Ex-deliveryperson scenarios, and even such mundane details as negotiating with shop owners is more fun. Also, combat seems both tougher and more interesting than it did in Arena, since you have different strokes with your weapons. It's a big game with many, many hours of play for dedicated hack-andstashers.—J. Wilson Bethesda Sollworks, (301) 926-8010

PC CD-ROM

Reader Service #301

#### DEADLOCK

In the coldness of space, seven warring races in a military deadlock have agreed to settle their differences on a single planet. Whoever controls the planet will be

declared victor, and the rest of the galaxy will be spared bloodshed. But those who must battle for rule over this planet will pay the price, for blood will be spilled in the battle for the lush planet, Galilius IV. The conditions for victory: building a set number of cities or the simple annihilation of the other races. This is the premise behind Deadlock, another space strate-

gy game in the same vein as Master of Orion.

DEADLOCK SUCCEEDS where ASCENDANCY (and OUTPOST) failed. While not as epic as MOO and the upcoming MOO2, Deadlock is still a fun game. Combining true racial differences and abilities (the Cyth will always stay at 80 percent morale), multiplayer play, and good graphics with great sound, Deadlock should satisfy sciting gamers, at least until the Antarans return in Master of Orion 2. The only quibbles I have are the slightly weak AI and a few interface quirks. But in the end Deadlock is just plain fun. For those who thought space colony management games died out after Outpost (as I did), this is a game for you.—T. Nguyen. Accolade, (408) 296-8400

## **DUKE INVADERS**

## GT Interactive Battles The Bandwagon

ttempting to capdalize on Duke NUKEM 3D's SUCcess. Sierra On-

line recently released an expan sion pack for the popular 3D action game. The only problem was, they didn't have permis s on from the game's developers and owners. Apogee/3D

> Realms and GT Interactive. According to Apagee's Scott Miller, Sterra asked for authorization to create an add-on pack called TOTAL MELTDOWN, INC ud.ng original sounds and art work in add lion to levels created from the official level ed tor. GTI denied

Sierra's request; however, Sierra published and distributed the \$19.95 pack age anyway. Total MELTDOWN was on the shelves for two weeks before GTI confronted the Bellevue.

Washington-based

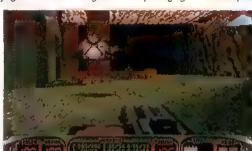

company regarding copyright

infringement, Sierra agreed to stop pro duction, pay an undisclosed settlement. and desiroy the remaining copies of the disc after selling the 50,000 copies it had already distributed

But GTI's battle isn't over yet Carlsbad, Califormia

based Micro Star has developed Its own add on pack, Nuke It. Nuke It is a compilation of levels created by independent, thirdparty individuals and posted on the Internet, from where Micro Star collected the levels and is selling them as a "service" for \$19.99.

GTI has insisted that Micro Star stop distributing the discs, citing copyright infringement Micro Star is using Apogee's characters—pig cops, the one eyed monster, the trooper, and

MELTDOWN Can you believe Sierra would do a knock-off of Duke Nukem without permission? You're looking at it.

Further, GTI is suing Micro Star for damages, stating that the poor quality of the Nuke It product clouds the reputation and branding of the original Duke Nukem 3D and dircumvents potential income. Micro Star has fired a counter suit to keep GTI from threatening legal action against retailers that carry Nuke fr, and a suit for damages, stating that GTI is infringing on its business practices, a move that Miller believes is an attempt to stall the short-term injunction

other images on the packaging, and keep the product on store

shelves through the holidays, Micro Star also plans to create add on discs for Doom. WARCRAFT II and Microsoft's Fuger SIMULATOR.

Michelle Ruyle, Micro Star's director of marketing, says that GTI is attempting

to monopolize the market, and that "(GTi) is worried that we're going to take business away from Wizard Works," a small GTI division that specializes in add-on levels for popul lar games

The case was sel to be taken to the Federal Court in San Diego county in late September, and is expected to set precedence for intellectual copyright. infringement cases in the future.--Jill Anderson

#### CRUSADER: NO REGRET

Origin's return to the universe of Crusader is more of an update than a sequel, but it still packs an action-filled punch, with the same incendiary violence that fans of the original Crusader: No Remorse have come to know and love. This time, you're taking aim at the Corporations headquarters on the moon, storming through the level with several new weapons and ballling some new enemies, Among the additions to the game are a freeze gun that both freezes and then shatters your opponent in Terminator 2 fashron; a deadly gun that reduces your enemy to flesh chunks; and a new mech that can morph into such mundane objects as vending machines. The Al is supposed to be better, and some enemies will actually rolf and duck for cover while blasting you.

No Regret Is a stand-alone product, but it only has 10 levels, as opposed to the originat's 15. Still, if you like to see things blow up, and you love to hame, freeze, disintegrate and otherwise obliterate your foes, then you should definitely reserve a spot on your hard drive for CRUSADER: No REGRET.-E. Chin EA/Origin, (415) 571-7171

#### JACCED ALLIANCE: DEADLY GAMES

It's been two years since the Melavira episode, and the Association for International Mercenaries (AtM) is back with a vengeance. The new JAGGED ALJANCE game comes with a nicely done campaign, but the focus is on scenario design and multiplayer competition against teams of mer cenaries commanded by other humans.

The built-in campaign features a loose story line that's actually less hokey than the origina. but lacks that game's consistent focus. Each battle now has turn limits, which has proved controversial among former players (Sir-Tech has announced a patch that will make turn limits optional). The scenario editor is a gem, offering enormous flexibility in scenario design, including a large number of objectives whose requirements

## **ZD Finds A GameSpot**

#### Ziff-Davis Publishing, SpotMedia, to Merge Game Sites

ook for a new gaming mega site this fall from Computer Gaming World's parent company, Ziff-Davis Publishing Co., and SpotMedia Communications. The new site will merge Ziff Davis' CG-Online with SpotMedia's popular GameSpot Web site. Both sites currently provide reviews, lips, hints, and features to almost half a million visitors each month. Ziff strategists hope to draw twice this number by offering a one-stop gaming shop for Web surfers.

Despite an expansion in user services, the new site promises to keep GameSpot's Integrated look and feel. According to CGW publisher Dale Strang, the merger brings game fans the best of Ziff-Davis' online and magazine resources: "It offers a new opportunity for synergy between our continually improving online editions and our traditionally dominant print media." Strang also promises that CGW readers can "expect a fresher, faster, CG-Online."

For Sega Saturn, Sony PlayStation and Nintendo users, SpotMedia has also launched VideoGameSpot, to provide reviews, previews, hints, cheats and demos for 32- and 64-bit platforms. You can access CG-Online at www.zdnet.com/gaming and GameSpot at www.gamespot.com. — James Burns

#### Sierra Gets Into 3D Hardware

Sierra On-Line has announced plans to market a 3D graphics board based on the Rendition Verité, one of the most promising 2D/3D chips. The 3D buzz has been fueled by 3D-intensive games like Duke Nukem 3D and Quake, and companies are now facing gamers' increasing demands for fast, affordable hardware solutions.

With the Rendition deal, Sierra hopes to provide gamers with high-performance acceleration hardware, in an attempt to take Sierra titles to the next level. The Sierra/Rendition board with 4 MB of FDO DRAM will retail for about \$200—throwing it into head on competition with Creative Labs' Rendition based PCI 3D Blaster. Sierra's board will be bundled with some of their hottest 3D games, and should be on retailers' shelves by the end of the year.—C. Panther

#### PLAVING LATELY?

ere are the games readers are actually blowing the most time with, as opposed to the reader's overall "quality ranking" in the Top 100.

Civilization II returns to the number one spot, shoving WarCraft II back into second place. Duke Nukem 3D maintains a Top 3 position, for the fifth consecutive month. MechWarrior 2, Doom II and

READERS'

Command and Conquer remain static, while Steel Panthers sneaks one place ahead of Herges of Might and Magic.

You'll no longer find the CGW Poll Card bound into the magazine, but check your mail box: We mail a survey to 1,500 randomly-chosen subscribers each month, and we use the results to calculate the Top 100 and Playing Lately each month.

	no top too and haying batony outsit	Last Month	Months On Chart

#### DEVO PRESENTS ADVENTURES OF THE SMART PATROL

Way back in the '80s, children, a band named Devo played a type of music we liked to call "new wave."

which was kind of like disco for dorks who couldn't dance. Devo wore these, ith, flower

pot thingles on their heads and sang a lot of songs about potatoes and "devolution" and stuff. Maybe you had to be there.

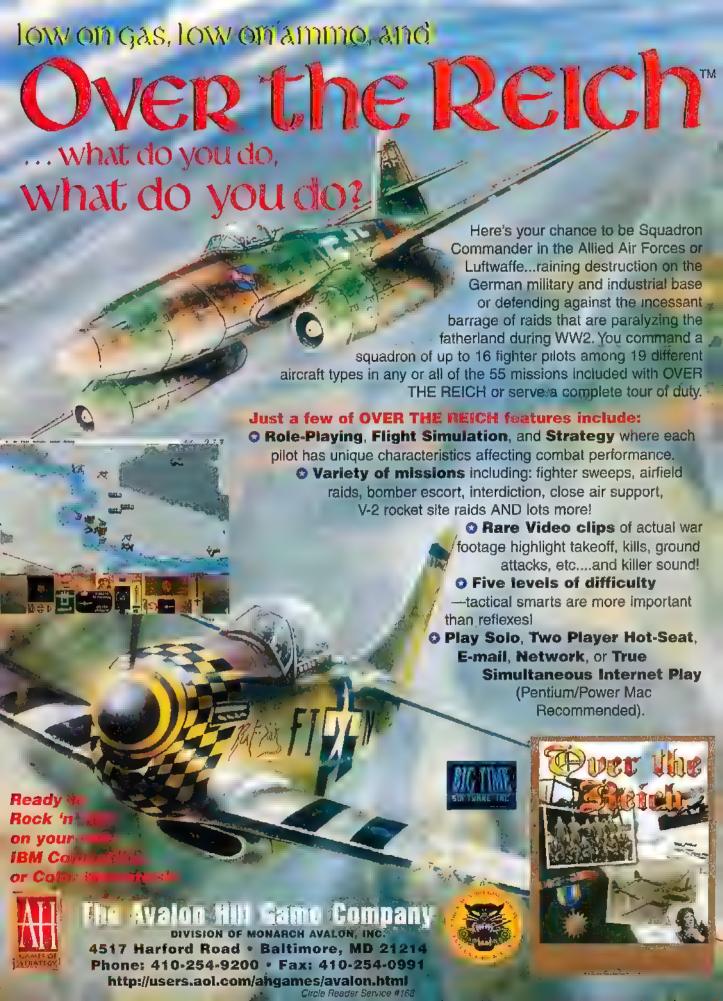

Anyway, now Devo has a computer game, Adventures of the SMART PATROL, and boy does this thing slink. The plot, such as it is, involves some sort of nonsense about bringing down an evil corporate empire and stopping

a genetically mutated creature called Turkey Monkey. I'd like to tell you how it turns out, but the game is such an incomprehensible and unplayable mess (and I had the walk-throught) that I gave up. Most disappointing—considering that Devo really were music-video pioneers—is how awful the game looks, with third-rate animation, jerky, out-of-synch video, and an atrociously annoying interface.

Members of Devo, it's time to ask yourselves: Are we not has-beens? If you're really this desperate for attention, put the flower pots back on your heads and hit the nostatgia circuit with Haircut 100 and A Flock Of Seaguils. The old folks'll eat it up.—J. Green Inscape, (800) 510-1791

#### FIRST LOOK

re's your first look at games in development. These games aren't even playable yet, but we thought you'd want to see

how they're coming along. If the game warrants it, we'll do a Sneak Preview or Hands On once they can be played.

hen last we visited the MIGHT & MAGIC series, we encountered two interlocking game worlds—THE DARK SIDE OF XEEN and THE CLOUDS OF XEEN. The developers at New World had cleverly devised two interlocking games that when connected, gave a sum greater than that of the two separate parts.

When next we visit the Micht & Macic series, the creators' goal is to create the most logical 3D landscapes and interiors possible. The game world will be designed by a former architect who is supposed to use real-world logic in creating floor plans that make sense, cities which reflect the transactional and traffic flow of the city, and settlements that make the best use of existing natural resources.

The engine is currently being constructed with full 3D so that any Lightwave-generated town can be imported into the game engine. In this way, the artists can work on the environment using existing 3D tools while the programmers are still building the engine. Even the objects which can be manipulated in the game will all be defined objects with analogs to real-world objects.

The entire in-house staff at New World will reportedly shift to Might & Magic VI after Herioes of Might & Magic II (see following) has shipped.

#### HANDS ON

hese are the products in development we've actually spent some time with. They represent some of the most interesting

titles in the Pipeline, and they are complete enough to actually tell how they're going to play. Most should be released soon.

#### NASCAR 2

here's not exactly a lot of PC stock car software out there, but Sierra has upped the standards anyway with their upcoming NASCAR 2 from

Papyrus Design Group. Early sampling indicates that allhough it won't be a quantum leap forward (hey, NASCAR was none too shabby in the first place), it'll certainly pack enough wallop to ture own-

ers of the original back for another go

Off the track, NASCAR 2 sports interface improvements with tighter menus, upper and lower command bars and a single-screen setup routine that contains a spot for comments—a nice touch Race-time graphics are cleaner too, with a far more sophisticated look that includes clouds, prettier pavement, and generally more slable movement. One

recurring complaint about the original, coming

mostly from outside the core Papyrus audience,

focused on NASCAR's extremely (perhaps overly?) realistic play in short it was just too darned hard to handle, especially on road courses. Suffice it to say that the

turns of Walkins Gien seem to be a changed animal with NASCAR 2-the car's lost some of that annoying "wobble." Also the

overdue implementation of curbing, which will tilt the car should also help keep the tires on the black shuff.

But what sets NASCAR apart from

the rest will be the foud-mouth crew chief/spotter. Actually, he's a pretty decent sort and sounds a bit like of Mr Jarrett, who coaches you about that car in your right or left blind spot, current lap count and the pit ane speed limit.

Papyrus's latest will also feature optional steering assistance for a less demanding drive and an "arcade" mode for those that like it really unreal. As for tracks, Daytona won't be there (yet!), but 16 other tracks will, as will the unruly number 3 of Date Earnhardt Uh-oh, better get Maacol-G. Goble Sierra On Line, (800) 757-7707

#### HANDS ON

#### ▶ Heroes of Might & Magic II: The Succession Wars

n the great fantasy tradition of sequels and trilogies, authors have given us hours and hours of fascinating reading by taking us beyond the "nappily ever after" of their first books and introducing us to the trials and tribulations of their offspring. Jon van Caneghem has added a new twist in HOMMII. Gamers choose between playing the bad son and the good son in two different campaigns.

HOMMII offers almost four campaigns, because the good son can follow the dark side of HOMM's force and the bad son can be

Still not satisfied?

redeemed by the good (playing similar endings to the other campaigns with different parameters). Best of all, van Caneghem has managed to add role-playing elements to a well balanced strategy game without messing up the playbalance that made the original so addictive. The new elements include primary and secondary skills, character classes like the wizard and necromancer heroes, a new spell system that is mana (or

strength) based, a broader range of opponents (up to six players), wider choice of castle/town improvements, and four different map sizes.

Graphically, the towns offer a more realistic feel. The castles are based on historical architectural styles, instead of the fantasy illustration of the original, and the buildings are rendered in 3D (so that they cast the right kinds of shadows) and then textured with handdrawn 2D art to remove that sterile feel most 3D art has. Unlike the first game, in which you built dwellings once and were rewarded with one type of being to recruit, HOMD allows you to upgrade nearly half the dwellings in the game. In this way, a dwelling for Paladins gives way to a more powerful home of

Crusaders, and a Dragon's tower scales up from Green to Red to Black Dragons.

Even some familiar buildings from the original have new value in HOMMII. Thieves Guilds now provide more delailed references, and laverns add rumors that can be useful. Most important, you can now hire a captain to manage the town or castle's defenses when your

hero isn't there. In the original, there was no way for a town without a hero present to use "General's Orders."

Combat has changed considerably in response to popular demand, van Caneghem has added a Wait command so that gamers don't have to attack with the creatures in the same order

during every battle round. This allows better use of "combined arms" lactics in the tough battles. Further, you can now divide creatures into attack groups. In the original, a player with 60 centaurs had to leave them in one group of 60. That way a rival sorcerer could tie up all 60 centaurs at once. Now you can have three groups of 20 centaurs, which folls that sorcerer's gambit.. Combat also allows you to use a PANZER GENERAL-style shaded hexagon interface, if desired.

Judging from our initial play sessions of HOM-Mil, it is possible to make a great game even better. J. Wilson

#### HANDS ON \*

techno-magical world torn asunder by warfare, Yayaun Is the backdrop for SSI's new realtime strategy game, Was Wind.

An ambillous game, War Wino allows you to play any one of Yavaun's four races; the Tha'Roon, the current masters of the world, who are lighting to maintain their tenuous hold over the other races; the sturdy Obblinox, the stave-soldiers of the Tha'Roon, who are ready to battle all races to win their freedom, the treelike Eaggra, who wish to free them-

selves from their slavery under the Tha'Roon to find their mythic homeland; and the Shama'Li, wise droids who wish to stop the bloodshed for all parties and unite all the factions into one race.

Gameplay is similar to that of WARCRAFT II, in that you build structures

#### **▶War Wind**

and harvest resources. However, there are differences between Wan Wind and previous real-time titles: You upgrade your basic worker units to solders instead of training new units, you attract mercenaries and heroes, and you are represented in the game by a leader unit who gains prestige (a game stat that influences your hero recruitment) as the game progresses, Each race does have different strengths and weaknesses, and the campaigns are very different for each race. With its differences and fun gamepiay, Wan Wing should

hook all those WarCraft fans who are looking for new fantasy real-time battles. Look for War Wino to hit store shelves in early November.—E. Chin SSI, (800) 245-4525

#### ▶Steven Spielberg's Director's Chair

o, you want to be a director, hun? Think you could handle the pressures of Hollywood? Well, before you quit your day job, let's find out if you've got what it takes. Steven Spelbeng's Diactor's Chair allows you to be director for a day (or for as many days as your shooling schedule allows). In your new career, you'll be responsible for each stage of the movie-making process, from writing the script to schmoozing with the rich and famous at the premiere. You'll receive sound advice from Mr. Spielberg and his associates, and you'll be bressed with the tall ents of Jennifer Aniston and Quentin Tarantino, but it's ultimately up to you to write, film and edit your masterpiece, on time and under budget. Obstacles arise out of nowhere: During production, costumes may be delayed and actors may fairly in Makeup. While editing, you may realize you've neglect ed to shoot an important scene. Learning how to maneuver around such problems without annihilating your schedule or blowing your budget is key.

your skills, and with three levels of difficulty, the scope for replayability appears endless. This behind-the-scenes, hands-on program is a must for movie fans and control freaks alike. Steven Spieleerg's Director's Chair should be hitting stores the first week in November –*C. Panther* Knowledge Adventure, www.directorschair.com

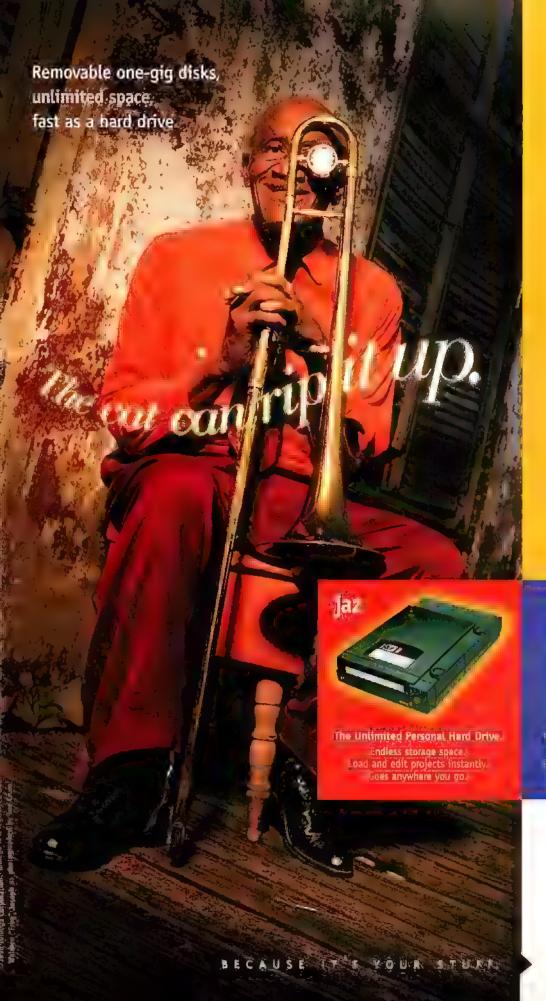

#### **▶**Clandestiny

ou waited until the 11Th Hour and you welcomed the 7TH Guest. Now you've been selected as the last Earl of MacPhiles: Thematically connected to the other two, though not at all a sequel, CLANDESTINY promises more of the puzzles that characterized 7TH and 11TH. As the Earl, along with his feisty partner Paula, to claim your title you must solve these puzzles. They range in difficulty, to be sure, but you may also select a difficulty level such that some almost solve themselves. Additionally, a "tip" function will actually do the job for you, if any of them prove just too frustrating. (The problems become increasingly difficult as the game progresses ) The game unfolds as a drama connected by animated sequences. Each puzzle you unlock leads to a new section of the drama, which in turn points the way to a new puzzle. The would-be Earl is frightened (as well he should be) of ghosts and rolling corpses, while Paula can't wait for the next challenge. The history of the place is not one to be proud of: it is filled with cowards and runaway knights. Nonetheless, it makes for some amusing background and diversion between puzzles. In general, Clandestiny lakes the edge off of piercing puzzles, at the player's option, and empha-

#### HANDS ON

#### ▶F/A-18 Hornet 3.0

he F/A-18 Hornet is the workhorse of Navy and Marine air units, performing both air-to-air and ground attack missions with such linesse that it was the first aircraft simultaneously designated "Fighter/Attack," Soon the Hornet will get a different sort of dual personality, when Graphic Simulations Corporation's updated F/A-18 HORNET 3.0 ships on both the Macintosh and, for the first time, Windows 95.

HORNET lets you fly single missions, a scripted career or network battles (up to four players) in a single seat F/A 18A.

Unlike many recent sims, which have featured dynamic campaigns with strike packages composed of multiple aircraft types and have often concentrated on coordinating attacks with wingmen, Hornet seems to follow the older "you against the world" model. Not that that's too difficult in an aircraft that can simultaneously carry a full air-to-air load for self-protection, air-to-ground ordinance to perform precision strikes,

really tough-to-clean enemy stains, try Hornet's factical nukes, guaranteed to wipe out entire bases with one easy crick, or your money back.)

and HARM antiradiation missiles to take out enemy SAM sites. (And for those

Horner's graphics engine doesn't use texture-mapping, but the large polygon count and high resolutions supported (up to 1024x768) make for extremely sharp ground structures and nicely detailed air-

craft-not to mention a speedy frame

rate on machines not blessed with 3D hardware.

The flight model feels in the middle of the realism range. With a nice set of lutorials, uncomplicated but challenging missions, and a fairly realistic but not overwhelming instrument package, Horner looks like a great introductory game for the new sim pilot. More experienced fliers, though, might feel a bit alone in the skies.—*D. Alkin*Graphic Simulations Corporation, (214) 386-7575

Windows 95 and Macintosh CD-ROM

## **Plant Trees for America**

Trees provide food, shelter, and nesting sites for songbirds.

Trees merease property values, and make our homes and neighborhoods more livable.

Trees help conserve energy. They cool our homes and entire cities in the summer, and slow cold winter winds. Shade trees and windbreaks can cut home utility bills 15-35%.

Trees clear the air we breathe.

They provide life giving oxygen while they remove particulates from the air and reduce atmospheric carbon dioxide.

#### America needs more trees

The United States has lost a third of its forest cover in the last 200 years.

Our towns should have twice as many street trees as they have today.

We need more trees around our homes and throughout our communities. We need more trees to protect our farm fields and our rivers and streams. To provide wood for our homes and a thousand products we use every day.

#### 10 Free Trees

Ten Colorado blue spruces, or other conifers selected to grow in your area will be given to each person who joins the Arbor Day Foundation.

Your trees will be shipped postpaid at the right time for planting in your area, February through May in the spring or October through mid December in the fall. The six to twelve inch trees are guaranteed to grow, or they will be replaced free.

To become a member and to receive your free trees, send a \$10 member-

ship contribution to Ten Blue Spruces, National Arbor Day Foundation, 100 Arbor Avenue, Nebraska City, NE 68410.

Join today, and plant your Trees for Americal

# CLINICAL MANUAL OF MENTAL DISORDERS

### ANTISOCIAL PERSONALITY DISORDER:

Now Available

Perhaps the most disturbing issue here is that this game is one of the best-selling games of 1995.

- Shoot 'em up action from the creators of Doom
- •Destroy the treacherous Serpent Rider and restore order to the Cronos dimension
- Jump, fly, throw lightning bolts, or even cast evil spells

DOS/Windows® 98/Macintosh®

Now Available

This manifestation of the disorder is of a more reclusive nature.

- The barren artist retreat of the late eccentric designer, Thurston Last
- Rebuild the Muse Machine, harness the power of the Muses and restore the resort to its original grandeur
- Solve brain-numbing puzzles along the way

Windows 95/Macintosh

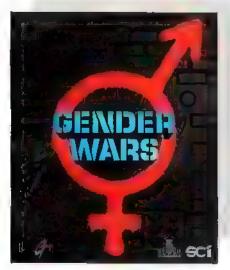

Buy 2 games and get a third

#### A pattern of disregard for and violation of the rights of others.

Now Available

What we see here is a definite cry for help.

- ·Play as either male or female and annihilate the opposite sex
- ·Choose from among 28, equally antisocial missions within each sector
- ·Blow up virtually everything in sight

DOS

Available October '98

Here we see, not just violence but ultra violence.

- •Intense action thriller
- · Evil alternate reality dictatorship, where the player must solve the mystery of their former identity
- Nightmarish artwork of underground phenomenon Aidan Hughes and the industrial sounds of Roland and Paul Barker

Windows 95/Macintosh

one free. Antisocial types will be unwilling to share news of this offer with others.

Availability dates subject to change.

### IMPULSE-CONTROL DISORDER:

Now Available

Pray you never see a case this extreme.

- Control 3 independent robots and fight your enemy on 3 different battlefronts
- Totally interactive environments blow up virtually everything in sight
- Thousands of enemies, incredibly destructive weapons, numerous powerups and puzzles

Windows 95/D08/Macintosh

Available October '96

Here we see a perfect example of impulse-control disorder.

- •3-D futuristic, "Gladiatorial Tournament"
- 60 supremely intelligent opponents with unique fighting styles and awesome weaponry
- •20 different playing arenas
- 4 player network compatibility

DOS

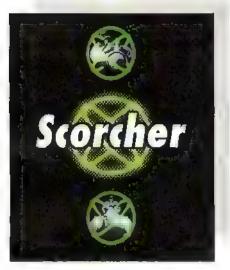

Buy 2 games and get a third

Episodes of failure to resist aggressive impulses that result in serious assaultive acts or destruction of property.

Available November '98

There's no misdiagnosing this one.

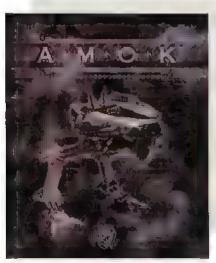

- Graphically-advanced, futuristic cybercycle racing
- Pit skills against a pack of high-speed rivals on totally outrageous tracks
- Screaming through a white-knuckled world of shadows and danger

Windows 9B/DOS

Available October '96

The name says it all.

- Best graphics, fastest gameplay and most diverse replayability in its genre
- 3D shooter puts player in control of a hi-tech battle walker on one of many suicide missions
- Expansive, cutting-edge settings occur on land, underground and even underwater

Windows 95/DOS

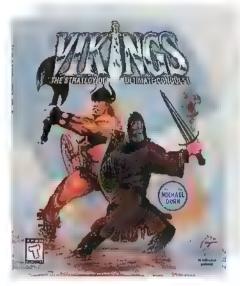

one free.

Impulse-control disorder types will be so excited by this offer they will probably roll up this publication and smack someone in the head with it

Availability dates subject to change.

### **DELUSIONS OF GRANDEUR**

Now Available

This is a somewhat frightening manifestation of delusions of grandeur.

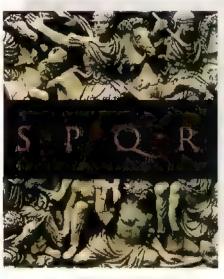

- •Scheme your moves, strengthen your arms and conquer the world as a 9th century rack-and-ruin Viking
- Wreak havoo on unsuspecting villages, crushing all and carrying off spoils
- ·Narrated by Michael Dorn

Windows 3.1/Macintosh

Available November '96

Here the player believes he must save the Roman Empire.

- Navigate a labyrinth of politics, murder and deceit
- Totally immersive and faster than the hit web game
- Historically accurate reconstruction of Ancient Rome, 205 A.D.

Windows 95 & 3.1/Macintosh

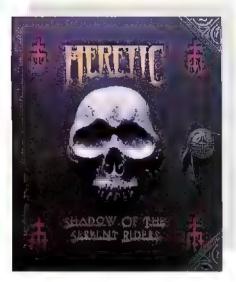

## Buy 2 games and get a third

Delusions of inflation of worth, power, knowledge, identity or special relationship to a deity or famous person. (e.g., Nordic Gods, ancient Romans, heretics, commanders of inter-galactic space ships)

Now Available

Yes. It's as disturbing as it sounds.

- The ultimate sword and sorcery battlefest
- Fluid, seamless realism (which unfortunately, only serves to reinforce players delusions)
- The original 3 episodes of gameplay plus 2 new full episodes

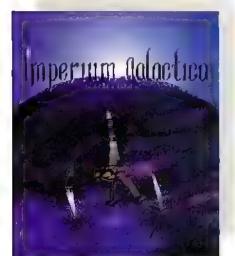

Available November '96

The player has to prove just how great he is by uniting the galaxy under his leadership.

- Aggressive inter-planetary colonization and cunning political negotiations with alien cultures
- Real-time strategic space and ground warfare
- •Clever resource allocation requiring heavy R&D

DOS

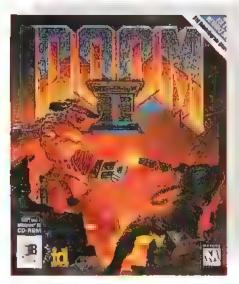

one free.

Those who suffer from delusions of grandeur will think this offer is yet another manifestation of their greatness.

Availability dates subject to change.

### **OBSESSIVE-COMPULSIVE:**

Now Available

This is only the early stage of this violent obsessive-compulsive disorder.

- The best selling action game of all time
- Higher resolution graphics and faster than ever gameplay

Windows 95/D08

Now Available

At this stage you know you have not succeeded in early intervention.

# 150 BES Games

## 1. Sid Meier's Civilization

#### MICROPROSE, 1993

hile some games might be equally addictive, none have sustained quite the level of rich, satisfying gameplay quite like Sid Meier's magnum opus. The blend of exploration, economics, conquest and diplomacy is augmented by the quintessential research and development model, as you struggle to erect the Pyramids, discover gunpowder, and launch a colonization spacecraft to Alpha Centauri. For its day, Clv had the toughest computer opponents around-even taking into account the "cheats," that in most instances

added rather than detracted from the game. Just when you think the game might bog down, you discover a new land, a new technology, another tough foe-and you tell yourself, "just one more game," even as the first rays of the new sun creep into your room. The most acute case of game-lock we've ever felt.

6. SIM CITY

everyone thought about the PC as a

fast gaming machine. If you want to see us rhapsodize some more, check out this month's Hall of Fame.

Maxis, 1987

he ultimate in software toys almost never got published Supposedly, there just wasn't "enough game," a description belied by the dynamic city construction involved. After you built your city from scratch, vou

had to run it, and the continued success comes not so much from the mechanics, but from tapping into the sheer joy of discovery. Challenging on many levels, it evaluates your performance even as you enjoy it. It's hard to ask much more than that from any game.

#### 7. WING COMMANDER

**ORIGIN, 1990** 

o, it didn't have the detailed "flight model" that X-Wing or TIE FIGHTER would later bring to the galactic party. And compared to the multimedia production values of Wing COMMANDERS III and IV, the original looks like stilted Saturday morning cartoons. But Wing Commander was the first to successfully blend interstellar action with a storyline. While the theme-a valiant struggle against a seemingly overwhelming foe-was typical sci-fi, the designers dld a good job of developing the tensions inherent in the situation. The "hot washup" scenes at the Tiger's Claw bar between missions gave you a needed break from wrist-wracking action, and the conversations you had with other pilots left you with not just tactical tips, but the impression that your wingmen were personalities rather than mere algorithms.

2. ULTIMA IV

**ORIGIN. 1984** 

ere began Avatarhood: where every major plot development depended on ethical choices made by your character. The detail was

such that even non-player characters would react to you based on your character's reputation, as word traveled from town to town of your actions. What the dialogue lacked in cleverness, it made up for with an authentic, gritty feel rarely found in other games. For the first time, NPCs became true companions, rather than bun-

dles of statistics to help in combat.
Even the ending was a surprise, moving away from the "take out Foozle" climax so common in RPGs. If all RPGs were half as richly filled out as this,

role-playing games wouldn't be in such a state of decline.

3. MULE

EA, 1983

our players try to colonize a planet while simultaneously driving the other players out of business. Named after the robotic "mule" that enables you to

farm, mine and transport equipment, the game contains no bombs, guns or missiles-just offers an exciting game of cutthroat competition complete with

inspelliton complete wit

live auction that actually made economics fun. Because EA could never manage to come out with a sequel, many of us held on to our C-64s and Atari 19800s just to play this, still the best multiplayer game we've ever seen

4. RED BARON

**SIERRA, 1990** 

# hile Fatcon 3.0 (see below) may be the most impressive from a technical standpoint, there is little question that Red Baron is the better game. Damon Siye honed his craft white designing action hits like Stellar 7 and Skylox, but with pure flight sims, he found his metier. With all the realistic options turned on, Red Baron is a bear to fly; it's all you can do to keep the fragite wings from tearing off. Rotary aircraft snap to the right, machine guns jam at the worst time-just exactly how you would expect these rickety constructions of wood and fabric to behave. When you toss in the interesting missions and wonderful campaigns, it's hard to imagine a better flight experience. A Inbute to the design is that despite its dated VGA graphics, it is still selling. If Red Baron Il is anywhere near as good, flight sim fans will have ample reason to rejoice.

5. DOOM

ID SOFTWARE, 1993

Simply the best action game of all time. Even though DOOM wasn't true 3D, it transformed the way

R

Red Baron

NOVEMBER 1998

#### 8. EMPIRE

#### INTERSTEL, 1978

fter proliferating on college and corporate mainframes all through the 1970s, EMPIRE found life on the personal computer when ex-NASA programmer Mark Baldwin was approached by Interstel to create an Atan ST version. Ostensibly a game of planetary conquest, complete with a sci-fi wrapping in the documentation, the game was really a delightful multiplayer version of strategic level WWII era warfare. Production level determined

economic level which determined the potential number of military units available. As a multiplayer game, it could be played by "hot seat" (CGW deadlines were constantly in danger due to office games) and by PBEM. Not a direct port of the mainframe game, Baldwin's version added greater roles for destroyers and new intelligence algorithms, among other additions.

#### 9. WASTELAND

#### INTERPLAY, 1987

fascinating science fiction story set in a post-nuclear world of dislintegrating technology, dysfunctional society and mutant organisms. Wasteland was the first game many of us played where the other members of the player's adventuring party acted like "real" people instead of inventory cabinets with names and automatons with skill sets. Ask the party to divvy up the cash and one or more might refuse. Try to get a party member to cough up his/her last clip of ammo? No way! But don't take our word for it. Play it yourself. The entire game is on this month's CG-ROM.

#### 10. FALCON 3.0

#### **SPECTRUM HOLOBYTE, 1991**

ALCON 3.0 was the first jet simulation to offer a truly realistic flight model, but it didn't stop there, it also introduced the useful (and necessary) wingmen and the first truly dynamic flight sim campaign.

Moreover, FALCON 3.0 was also one of the first games to support multiplayer network play. The fact that the game is still in the shelves more than five years after its initial release is testament to its quality and advanced design.

#### 11. FPS FOOTBALL 1995

#### SIERRA, 1994

Most pigskin games are either realis-VItic stat-based sims dryer than our favorite martini, or so reflex-dependent that your gridiron savvy is rendered totally irrelevant. FRONT PAGE FOOTBALL changed all that, somehow combining the best of both worlds, and improving up through FPS Football 95, winning an unprecedented three CGW Premier awards in the process, Instead of relying on statistics, this models the physics of the game on the field: the fulld rotoscoped movement of the players; the quick release of a Dan Marino pass; the blocking power of a 300pound offensive lineman. From the play editor, to the updated rosters of NFL players (who actually play like their reallife counterparts), and the career league options, no other game brings its sport to life quite like this one.

#### 12. LEMMINGS

#### Psygnosis, 1991

The cries of "Oh no!" as you'd sacrifice a Lemming in an effort to save its brethren proved that the death of little animals had never been so cute. This diabolical puzzle game starts with simple challenges and works you steadily towards uitra-challenging conundrums that require split-second timing with the mouse. In its initial release, the PC version was a poor imitation of its Amiga predecessor, but the Win 95 update included with Lemmings Pantball should be snatched up by all who missed this classic.

#### 13. ZORK

#### !мгосом, 1981

t all started with a little letter in a mailbox outside a small white house. From here began a magic journey into the land of Frobozz. This seminal infocom text adventure combined challenging puzzles, wonderful descriptive prose, and a touch of humor to create

a rich universe that existed not in SVGA graphics, but within your head. A far different tone than the campy Return to ZORK or the dark ZORK NEMESIS made this a universe many early gamers would spend all their non-school hours glued to until it was fully explored.

#### 14. TETRIS

#### SPECTRUM HOLOBYTE, 1988

his insidious little
puzzle game
may have
been the Soviet
Union's last-otich

attempt at destroying American productivity, if personal computers had been more commonplace in 1988, it damed well might have succeeded. The seemingly simple task of matching falling blocks would become an obsession, to the point that many gamers would find themselves rotating Tetris blocks in their dreams.

#### 15. PANZER GENERAL

SSI, 1994

ost of us that play wargames began for a variety of reasons, but chief among them was that we wanted to be Patton, or Lee, or Rommel for a day. PANZER GENERAL lets you do just that, in a series of tough scenarios and exciting campaigns. PG isn't for everybody, since every time realism and fun clash, the latter wins out. But what the game lacks in historical insights, It more than makes up for in variety: the amphiblous invasion of Norway; the airborne assault on Crete; the sweeping armored battles of Kursk and North Africa, PANZER GENERAL made more realistic games like Steel Panthers possible, because it made wargames fun-and mar-

#### 16. WIZARDRY

#### SIR-TECH, 1981

ketable-again.

The seminal dungeon romp, this RPG sent AD&D fans scrambling to Panzer General buy Apple IIs.

#### 17. GABRIEL KNIGHT 2

#### SIERRA, 1996

Ahaunting tale from Jane Jensen, the interactive Ann Rice, which successfully blended the psychological and supernatural, an adventure game inter-

Day of The Tentacle

face and full motion video.

#### 18. SID. MEIER'S PIRATES! MicroProse, 1987

The Amiga version of this hybrid game of exploration, combat and rote-playing was by far the best, with smooth ship combat and fast-action swordplay.

#### 19. SECRET OF MONKEY ISLAND

LucasArts, 1989

Who could ever forget the insult-driven duel system or the identity of the mysterious Swordmaster?

#### 20. ARCHON

FA 1984

"he strategy of chess plus fast-arcade action made for an addictive two-player experi-

#### 21. THEIR FINEST HOUR

LucasArts, 1990

The first World War II sim that really made you feel like you were there, this, like Red Baron, reminds us that a great sim can also be a oreat game.

#### 22. X-COM

MPS.1994

he best tactical system for squadbased combat combines with an excellent R&D model and pop culture about aliens and UFOs for an incredibly addictive strategy experience.

#### 23. MIGHT & MAGIC

New World, 1986

3D dungeon view combined with Athe biggest world map to date were just two of the major features of this advanced level CRPG.

#### 24. RAND ON BUNGELING BAY

Впорепечию, 1984

Smooth-scrolling, 360-degree shooter that redefined C64 arcade action and used graphics tiles that paved the way for SIMCITY's inception.

#### 25. EARL WEAVER BASEBALL

EA 1986

The Amiga version was a sports classic, from the stats to the graphics. Too bad the later versions gave it a black eve.

#### 26. **LINKS 386**

Access, 1992

When a "386" golf game is still selling to Pentium Pro owners, you know it's

#### 27 MECHWARRIGH 2

ACTIVISION, 1995

The atmosphere and background story made this glant robot game an amazingly immersive experience.

#### 28. WARCRAFT II

BUZZARD, 1995

noesn't reach all of its lofty goals, but it's fast, furious and compelling-what Interplay's Tolkien games should have been.

#### 29. STAR CONTROL 2

ACCOLADE, 1994

STARCONTROL 2 was a fast-paced space game with a stunning blend of adventure, action, and humor,

#### 30. Populous

BULLFROG. 1988

As the father of real-time strategy games, Populous gave you the opportunity to play god.

#### 31. NASCAR RACING

PAPYRUS, 1994

its fast action on the track introduced computer gaming to a whole new market.

#### 32. M-1 TANK PLATOON

MPS, 1989

s the first simulation to allow you to As the first simulation.

Accommand multiple vehicles, M-1 TANK PLATOON addressed several issues of combat doctrine ignored in other tank games.

#### 33. MASTER OF ORION

SIMTEX/MPS, 1993

C teve Barcia leaped to the stage with Othis Sip Meier's Civilization meets REACH FOR THE STARS game of space conquest.

#### 34. DAY OF THE TENTACLE

LUCASARTS, 1993

OTT completely blew away its Dancestor, Maniac Mansion, with its smooth animated sequences, nifty plot and great voiceovers.

#### 35. CHUCK YEAGER'S AIR COMBAT EA, 1989

Three eras of air combat came together in this flight sim classic. For the Korean War, this is the only flight sim which has addressed it.

#### 36. QUAKE

. lp.1996

The ultimate implementation of the deathmatch, QUAKE also creates the spookiest atmosphere ever presented in an action game.

#### 37. DUKE NUKEM 3D

APOGEE, 1996

close match for Quake, with any Adeficiencies in its 3D engine made up for by its bizarre, and sometimes earthy, humor

#### 38. CRUSADER: NO REMORSE

ORIGIN 1995

in an industry dominated by DOOM-clones, this shows that the \_-view action game has a lot of very visceral appeal left.

#### 39. RED STORM RISING

MicroPross, 1989

Amodern submanine common grands amodern submaning common submaning common submaning common submaning common submaning common submaning s modern submarine combat game the play balance of scenarios, campaign and realism was nearly perfect.

#### 40. HARPOON

360 PACIFIC, 1989

Since modern naval combat is fast and diverse, HARPOON had to offer gamers a real-time perspective they'd never seen before. It succeeded.

# QUAKE TO THE STATE OF THE STATE

WING COMPANDER

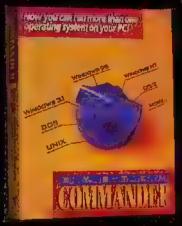

# Win 95 is cool, but sucks with DOS games!

### Games run best on the Operating System they were designed for!

....That's why you need System Commander. You've got great DOS games, but you really want to try that new Win 95 game. You want it all. But, if

you upgrade to Win 95, it will really hose your DOS games. With System Commander you can play each game the way it was meant to be played...on the OS it was designed for.

System Commander allows you to boot both DOS (3.3 or later) and Win 95 on the same PC. When you turn on your machine, System Commander gives you a menu. Pick the OS you want and with the touch of a button. System Commander does the rest.

### Even your parents could do it!

System Commander's automatic installation will have your PC ready to add OSes in less than 5 minutes. And unlike some utilities, it uses less than 1 MB of hard disk space and no RAM!

### Get it and play it

As you install new OSes, System Commander automatically copies key files and adds the new OS to its menu. It manages unique copies of AUTOEXEC.BAT, CONFIG.SYS and COMMAND.COM for each installation of DOS, Windows 95 or any other operating system.

System Commander is only \$99.95 and comes with an unconditional 60 day money back guarantee. Mention this ad and get FREE\* overnight shipping. Call today and play your brains out tomorrow!

When ordered before noon PST, No Saturday delivery, Standard shipping outside US, CA res, add \$7,25 sales tax. Offer subject to change without notice. All logos and product names are trademarks or registered trademarks of their respective companies. VISA/MC/Amex @1998

# Unlike most

hard drives

it's removable.

Unlike most

removables it

are millions left.

There seems to be an unwritten rule with computers. No matter how large the hard drive, you'll eventually find a way to max it out. Unless, of course, you get one that never really fills up, right? For example, the EZFlyer \*230, the latest removable cartridge hard drive from SyQuest? Don't let the small 3.5 inch cartridge deceive you, this thing is huge 230 megs that rip along at twice the speed of any removable in its class.

The reason for our blustering performance is pretty simple. It works like a hard drive because it is one Sluggish technologies from tape drives to high-capacity floppies just can't keep up. Use the EZFlyer 1230 the same way you would with any hard drive, with a nice little bonus—it's removable. So you can add on to your system limitlessly, 230 megs at a time, till the end of time.

Weighing a mere 1.6 pounds, the trimmed-up drive can bit the road as well and features a

self-sealing door to protect cartridges from dust and other disturbing things. When you feel the urge to change cartridges, hit the eject button and you're out of here. Applications and files stored on your cartridges are ready to run instantly. Own the Internet, throw on large chunks of video, colossal scans, the meaning of life or maybe just a CD-ROM game. Keep things you don't need. Back up things you do. It even saves money, storing your world at 10 cents per megabyte. Hmm. When you think about it, the possibilities are as endless as its capacity. Now available at Comp USA, Computer City, Best Buy and a bunch of other places, 1-800-245-2278 or http://www.syquest.com.

### a hard drive.

### James ALL TIME

### 41. SID MEIER'S RAILROAD TYCOON

MPS.1990

Cid's fascination with rail-Orgading begat a combination of SimCity, 1830 and the ultimate model railroad that will be a strategy game icon for years to come.

### 42. HATCHANKER'S GUIDE

INFOCOM, 1985

ouglas Adams' humor comes alive Din this text adventure based on the five-book Hitchiker's trilogy (pentalogy sounds so pompous, you know).

### 43. BETRAYAL AT KRONDOR

**DYNAMIX**, 1993

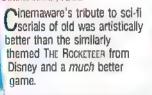

The universe of Raymond E. Feist came to brilliant life in this 3D, firstperson perspective roleplaying game.

### 44. ULTIMA VI

**ORIGIN, 1990** 

ord British hit new highs in virtuality with the defined useable objects in this game world. It also presented a brilhant treatise on the danger of prejudice.

### 45. ROCKET RANGER CINEMAWARE, 1988

### 46. CHESSMASTER

SOFTWARE TOOLWORKS 1986

The best of a competitive pawn-pushing lot, Chessmaster stays ahead of the competition with Al apponents based on real-life Grandmasters.

### 47. Aces of the Pacific

**DYNAMIX**, 1992

orsairs came allve in this WW II sim Uthat set new standards for graphics and performance.

### 48. COMMAND & CONOBER Westwood, 1995

Not quite as complete a design as Warcraft It, this still set a new standard for great multiplayer play combined with a good back story told through top-notch cinematics.

### 49. DUNGEON MASTER

FTL 1987

The stereo sound in the Amiga version of this classic RPG had you looking around the living room for monsters.

### 50. PINBALL CONSTRUCTION SET EA. 1983

The first entertainment software that allowed you to build your own pinball machines and give them to friends

### 51. REACH FOR THE STARS SSG, 1984

Multiplayer space conquest reached a new maturity with Keating and Trout's design which included economic, research and military strategy

### 52. F-19 STEALTH FIGHTER

M croProse, 1988

he first flight sim where you actually won by staying out of a dogfight, this game almost presaged the Gulf War.

### 53. STEEL PANTHERS

SSI, 1995

Gary Grigsby's superb implementa-tion of tactical combat in WWII was

the culmination of such successes as KAMPFGRUPPE, PANZER STRIKE and TYPHOON OF STEEL.

### 54. Wing Commander III

**ORIGIN, 1994** 

Thrilling space action in the first successful interactive movie. The beginning of a new breed?

### 55. STARFLIGHT

**ELECTRONIC ARTS, 1986** 

Not only was this the first game to use fractal graphics to define planetary surfaces, it was a rich science fiction role-playing game, as well-

### 56. TIE FIGHTER

LucasArts, 1994

far better simulation of the Star A Wars universe than X-Wing, winning In this space combat game relied more on flying skills than puzzle-solving.

### 57. NBA LIVE

EA Sports, 1994

The first time we played this game, we had to look before we had to look twice to make sure the players were animated and we hadn't switched on the TV by mistake.

### 58. SUSPENDED

INFOCOM, 1983

Controlling remote robots gave this SF text adventure a unique flavor.

### 59. GETTYSBURG

SS1.1986

This first in a post-soling days the American Civil War games was the This first in a best-selling series of first to experiment with a randomized reinforcement schedule for the order of battle

### 60. EF2000

DIGITAL INTEGRATION, 1995

Graphics, sound, and realism took a flying leap forward in this combat sim

### 61. Seven Cities of Gold

EA.1983

# Games DE ALL TIME

### 62. INCREDIBLE MACHINE

Dune 2

Wing Commander III

### SIERRA 1993

his Rube Goldberg-style puzzle game was fresh in concept and long on gameplay.

### 63. FAERY TALE

### ADVENTURE

### M CHOILLUS ONS. XX

Real time adventure at its Amiga best. There is a rumored update (cross your fingers).

### 64. MARATHON

### BUNGER 1994

This 3D action-lest was a big reason all the Mac users kept saying "DOOM what?

### 65. WINGS

### CINEMAWARE, 1991

W NGS featured a masterful combination of arcade action, flight simulation, and a cinematic story set in WW I as its wrapper.

### 66 WORLD CIRCUIT

### MICROPROSE, 1992

racing sim that provided a wonderful balance of authenticity combined with accessibility for beginning drivers.

After a hard day, it was just fun to mow down civil ans in this strategic action game of futuristic gang warfare.

### 68. ULTIMA UNDERWORLD

### ORG N. 1992

67. SYNDICATE

BULLFROG 1993

With the 3D look that paved the way for other point-of-view games, the Looking Glass design team immersed gamers in a more intense Britannia.

### 69. LEISURE SUIT LARRY

### SIERRA, 1988

owe's Larry's lascivious, lecherous \_life was launched in this remake of the lewd text game, Softporn,

### 70. DUNE 2

### Westwood, 1992

OMMAND & CONQUER'S predecessor Uused the universe of Dune as the environment for a fabulously engaging real-time strategy game.

### 71. ACES OF THE DEEP

### Dynamix, 1994

This U-boat simulator is still unrivaled for creating an authentic atmosphere.

### 72. SOLITAIRE'S JOURNEY QQP, 1992

his unique game not only provided a large variety of solitaire games, but two different styles of campaigns (transcontinental trip and haunted house) in which to try them.

### 73. QUEST FOR GLORY

### SIERRA, 1987

Whoever heard of combat in a Sierra adventure? Attributes? Skills? Corey and Lori

Cole made it work in this hybrid adventure/role-playing game

### 74. SECRET OF MONKEY ISLAND II LUCASARTS, 1990

### eChuck was back and managed to provide the unhappily ever after for a washed-up pirate hunter named Guybrush

### 75. YOU DON'T KNOW JACK

### BERKELEY SYSTEMS, 1995

This irreverent cyber game-show will glue the most computer-phobic to the screen.

### 76. SHADOW OF THE BEAST

### Psygnosis, 1989

arallax scrolling and fast action made this Amiga arcade game better than anything you could drop quarters in.

### 77. WARLORDS II

### SSG, 1993

Probably the best of the Keating/Trout approach to challenging Al and scenario design. Best fantasy strategy game until Warcraft II

### 78. BALANCE OF POWER

### MINDSCAPE, 1983

wonderful game of political intrigue Athat felt just like the Cold War and didn't require the detail of Shapow PRESIDENT OF CYBERJUDAS.

### 79. FLIGHT SIMULATOR II

### SubLogic, 1984

From the Atari 800 to the Amiga, this civilian flying simulator brought virtual flight to the masses.

### 80. LODE RUNNER

### BRODERBUND., 1983

The father of all platform games, this game of run and gun was much better in its original incarnation than its Win 95 zomble reincarnation.

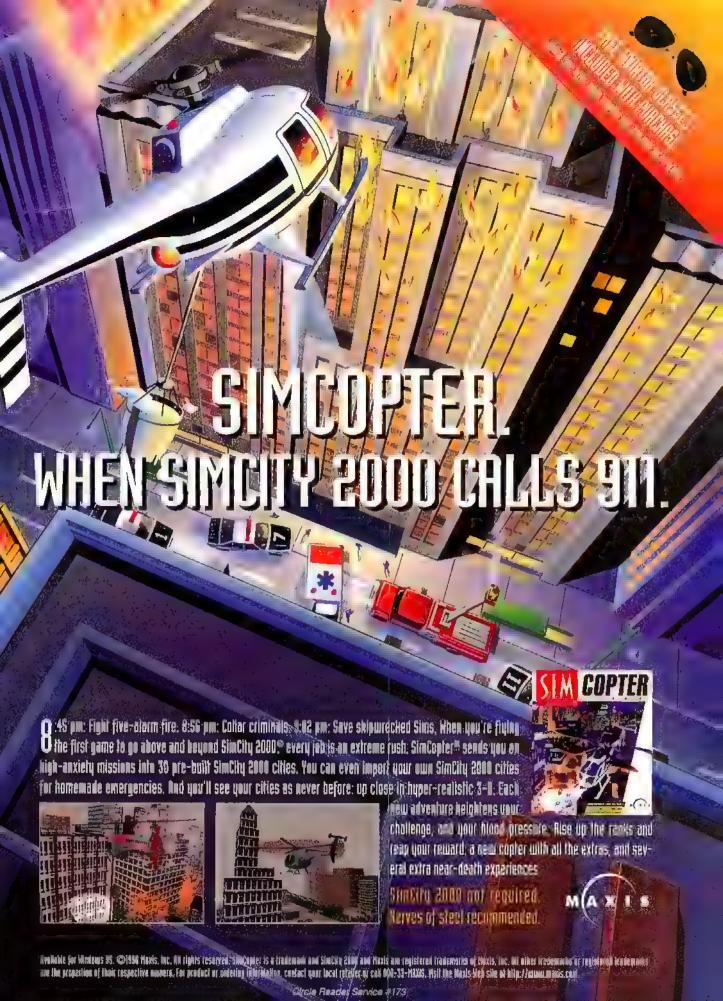

### 81. LOOM

### LucasArts, 1982

OOM featured one of the most beautiful scores ever to grace an adventure game and a musical staff

interface that was most original

82. RESCUE AT FRACTALUS EPVX.1987

riginally designed with a grant from Atari, this was the original LucasArts (then Lucasfilm) game. Many keep old computers around just to play it.

### 83. RISE OF THE DRAGON **DYNAMIX**, 1990

o good that a rival Opublisher tried to steal it, this cyberpunk game used rotoscoping, hot spot mapping, and cinematic cuts before they were standard.

84. PRINCE OF PERSIA

BRODERBUND 1990

Prince of Persia

An acrobatic platfomer with amazingly fluid action. PRINCE OF PERSIA let you become the legendary Thief of Baghdad.

### 85. ROBOT WAR

Muse, 1981

In this ancestor of C-Rosors, gamers programmed robot behavior

in a subset of BASIC. Then, the programs fought it out on-screen.

### 86. SILENT SERVICE

MichoProse, 1985

C LENT SERVICE introduced the con-Otrol-room interface for submarine games on a variety of plat-

espite having only seven missions, this Amiga jet combat sim set the state-ofthe-art for its era.

### 88 ALONE IN THE DARK

**I-MOTION 1992** 

Following on the heels of Out of this World, Alone in the Dark showed that 3D actron needn't get in the way of a tense, exciting story.

### 89. BARD'S TALE

FA. 1985

With three-point monster animation, 3D maze window and new character classes. Michael Cranford's story started the successful trilogy.

### 90. CARRIERS AT WAR SSG, 1992

Roger Keating and Ian Trout created the first playable game of WWII aircraft carrier operations with the release of this game.

### 91. BATTLES OF NAPOLEON

SSI, 1985

Although it didn't sell well, SSI's game of tactical combat in the Napoleonic Era was not only a terrific game, but had an easy-to-use construction set, as well,

### 92. DEFENDER OF THE CROWN

CINEMAWARE, 1986

Ilm Sacks' spectacular artwork and Udazzing animations in this simple strategy game showed Cinemaware could live up to its name.

### 93. INDIANA JONES AND THE FATE OF ATLANTIS

LUCASARTS 1993

Three games in one, Hal Barwood's Indy adventure let the gamer regulate the way it was to be played without losing its impact as a story-based game

### 94. KING'S QUEST V

SERRA, 1990

With King's Quest V, Roberta Williams hornfied Sierra traditionalists by getting the parser out of the way of some of the most beautiful graphics ever.

### 95. SAM & MAX HIT THE ROAD

LucasArts, 1993

The adventure game that redefined "wacky" as Steve Purcell's crazy animal detectives visit alligator farm miniature golf courses and freak shows.

### 96.STAR TREK: JUDGEMENT RITES

INTERPLAY, 1994

The first Star Trek game that truly captured the feel of the classic original episodes. The CD features voiceovers from Shatner, Nimoy and company, and is still available.

### 97. WOLFENSTEIN 3-D

APOGEE, 1992

oosely inspired by Silas Warner's Castle Wolfenstein, this was the 3D shooter in the half that started it all.

### 98. SYSTEM SHOCK

**ORIGIN, 1994** 

This hybrid action/adventure/RPG didn't get the credit it deserved for its tight cyberpunk plot, believable characters, and SHODAN, an excellent villain.

### 99. UNDER A KILLING MOON

Access 1993

nampy humor combined with amazing U3D scenery in this futuristic film noir.

### 100. AH-64D LONGBOW

JANE'S. 1996

The first helicopter sim to match its fixed-wing counterparts for realistic play.

### 101. KAMPFGHUPPE

SSI,1985

Vehicle silhouettes, great sound effects in the Amiga version, and the tactical combat scale gave a different texture to this game of Eastern Front combat.

### 102. GUNSHIP

MPS.1989

In the days of the abominable Super Huev, this relatively simply sim with detailed campaign was the only authentic helicopter simulation.

### 103. ERIC THE UNREADY

INTERPLAY 1992

Full of puns, punchlines and person-ality, ERIC THE UNREADY Was not only

This is the next dimension of Magic: The Gathering. Draw on a mystic armory of 220 spells to invoke a supernatural legion of creatures and powers! In the vortex of warfare every unique spell reacts differently to every other spell. Prepare yourself for another level of strategy!

Duel rapid-fire, real-time with up to 4 players over a PC network, modem or the internet! Or wage a necromantic campaign against Battlemage Ravidel and an alliance of wizards in the vast uncharted 3-D world of Corondor.

Welcome to the ultimate War of the Wizards!

one of the funniest games of all time, but Bob Bates' masterpiece.

### 104. DEADLINE

INFOCOM, 1982

DEADLINE was a lough text adventure that placed you in the midst of an intricate police procedural and let you wander around a

105. **CRUSADERS OF THE** DARK SAVANT

Sir-Tech, 1987

David Bradley capped off his Wizarday trilogy with this combination sci-fl/fantasy adventure which paid subtle treatment to the Wizard of Oz.

### 106. BATTLE CHESS

INTERPLAY, 1988

Clar Wars' Chewbacca would have of felt right at home with this chess game enhanced by funny, elaborate animated sequences and spectacular special effects

### 107. PERFECT GENERAL

OOP, 1989

As in EMPIRE, Mark Baldwin (with new partner Bob Rakowsky) took a proven design (Bruce Williams Zaccagnino's table-top strategy game) and made it better

### 108. NEUROMANCER

INTERPLAY, 1988

William Gibson's cyberpunk novel was retold with an interactive stant and a soundtrack by DEVO.

### 109. PACIFIC WAR

SSI, 1992

Arguably the most ambi-tious wargame design in history, Gary Grigsby's magnum opus lets you refight the campaigns in the Pacific on a day-by-day basis.

### 110. OPERATION

CRUSADER

AH/Atomic, 1994

he low unit density and the vast sea of North African sands gave you plenty of room to maneuver, making this the best game of the World Ar WAR series.

### 111. WAYNE GRETZKY HOCKEY

Bethesda, 1989

This masterpiece featured Gretzky's perspective and Marty McSorley's playtesting in a hockey game that captured the flow of the game for the first time.

### 112. TV SPORTS: FOOTBALL

CINEMAWARE, 1987

he first in a series of sports games, the idea of TV Sports: Foutball was to present athletic action like you see it on television. It worked.

### 113. MONOPOLY

Virgin/Hasbro, 1995

Based on the quintessential family boardgame, this Internet-capable version of Monopoly offered more than we ever expected in a computer version.

### 114. JAGGED ALLIANCE

SIR-TECH. 1995

### 115. BATTLEGROUND: WATERLOO

TALONSOFT, 1996

The grand age of warfare comes to life with colorful uniforms, delightful landscapes, and above-average opponent Al in this recent release.

### 116. CASTLE WOLFENSTEIN

Muse, 1981

Inspired by the film, Where Eagles Dare, Silas Warner developed this game where you try to escape from a Nazi fortress.

### 117. BEACH HEAD

Access, 1983

the smooth sprite action in this beach-defense arcade game could have you diving under your desk.

### 118. FIGHTER DUEL PRO 2

JAEGER SOFTWARE, 1993

The ultimate Amiga flight sim, FISHTER Duel Pro 2 had realistic flight models and SVGA-quality graphics.

### 119. PINBALL DREAMS

### 21st Century Entertainment, 1990

mooth scrolling and great ball Ophysics made this Amiga game a wizard's choice.

### 120. TRINITY

INFOCOM, 1986

Brian Moriarty's text adventure based Bon the Manhattan Project was a tense, ethical tightrope walk through the Cold War.

### 121. VIRTUA FIGHTER PC

Sega. 1996

he best of the horizontal-scrolling fighting games, this title succeeds on a platform for which It was not

### 122. INDIANAPOLIS 500

EA, 1989

he nascent Papyrus redefined the The mascent rapyroot and Amiga racing sim on the PC and Amiga with this game that allowed you to go backwards on the Indianapolis "Brickyard" for the first time.

### 123 DESCENT II

INTERPLAY, 1996

Builds on the promise of the original, with better 3D effects and enemy Al.

### 124. DEATHTRACK

ACTIVISION, 1989

ynamix developed this seminal car-Uto-car combat simulation where Car Wars-style action had become a national sport.

### 125. WARCRAFT

BLIZZARD, 1994

spirited real-time rendition of the Aspirited real-time remains. Humans, with an especially elegant network setup routine.

### 126. WAR IN RUSSIA

SSI.1984

Gary Grigsby's strategic level game of combat on WWII's eastern front was the first "monster game" on the computer that came close to SPI's huge boxed sets.

### 127. STAR CONTROL

Accolade, 1992

pace War enters the 90s Dwith a touch of humor.

### 128. TONY LARUSSA 3

### STORMFRONT, 1995

The best of the LaRussa series, this game has graphics and stat-capabilities that sometimes outshine the original Earl Weaver, Sometimes, though,

### 129. MIG ALLEY ACE

### MICROPROSE, 1984

ndy Hollis pioneered the head-to-Anead flight sim on the Atari 800 with this game.

### 130. GGRE

### **ORIGIN, 1986**

rigin worked closely with Steve Origin worked bloody that this faithful conversion of the boardgame based on taming one olgantic and futuristic supertank.

### 131. PRESIDENT ELECT

### SSI, 1981

Praying this strategy game of public appearances, campaign financing and debate gave one an entirely new appreciation for presidential politics.

### 132. LEXI-CROSS

### INTERPLAY, 1991

futuristic combination of cross-Awords and Wheel of Fortune that was great for proselytizing non-gamers.

### 133. HEROES OF MIGHT & MAGIC

NEW WORLD. 1995

This award-win-ning remake of THE KING'S BOUNTY is a brilliantly balanced game of fantasy combat that quickly becomes addictive.

### 134. I HAVE NO MOUTH AND I MUST SCREAM

CYRERDREAMS, 1995

arlan Ellison's dark, despairing story makes a smooth transition to dark, despairing adventure game.

### 135. NUKEWAR

### AVALON HILL, 1983

Can you believe we fought global thermonuclear war with text and sprites on the C64?

### 136. DARK CASTLE

### SILICON BEACH, 1986

For years, Macintosh owners would point with pride to the fact that this fluid, fantasy-based arcade game was only available on their platform.

### 137. MAGIC CARPET

### BULLFROG/EA, 1994

arned weird rules were offset by a Drich, 3D world to explore and conquer.

### 138. ARCTICFOX

### EA 1986

Damon Siye's update of STELLAR 7 for the Amiga was the seminal 3D polygon-based shooter.

### 139. MEAN STREETS

### Access, 1989

his adventure's VGA graphics and digital RealAudio set a new standard for 286 games and offered tribute to Raymond Chandler's novels.

### 140. CRYSTAL CALIBURN

### STARPLAY, 1993

Not as many tables as we'd like, but lit looks and sounds like *real* pinball. The multiball action leaves Tristan in the dust.

### 141. MASTER OF MAGIC

### MPS, 1994

Once patched, this fantastic strategy game was almost a Sio Meier's Civilization/Magic: The Gathering hybrid.

### 142. BLUE MAX

### SYNAPSE, 1983

TAXXON with a WW I biplane on the C64 made for a fun shooter.

### 143. TYPHOON OF STEEL

SSI.1987

his 8-bit forerunner to Steel Panthers had a great "Banzai" rule that really impacted games which had gotten out of balance

### 144. ULTIMA EII

### **ORIGIN. 1983**

The conclusion of Lord British's first ULTIMA trilogy introduced one of the nastiest villains to grace a computer screen-the bloodthirsty Exodus.

### 145. KASPAROV'S GAMBIT

### EA.1993

Not up to the standard set by CHESSMASTER, but this was the first to effectively use multimedia in illuminating the mysteries of chess. Strong Al didn't hurt, either

### 146. SHANGHAI

### ACTIVISION, 1986

This mah-jongg style game not only transfixed puzzle gamers of both sexes during the '80s, but even has versions on dedicated word processors in the Far East.

### 147. SWORD OF FARGOAL

### EPYX, 1992

This dungeon romp for the VIC-20 required a massive 16K expander and may have been the most ambitious game to ever appear on that platform

### 148. TIGERS ON THE PROWL

### HPS, 1994

ackluster graphics and a learning curve like a Sandy Koufax pitch. Still, this game is the most realistic tactical WWh land combat wargame ever, and the tough Al doesn't cheat.

### 149. COURTSIDE COLLEGE BASKETBALL

### HAFFNER, 1984

As a text-only, statistics-based sports simulation, Haffner's college basketball games have always been entertaining and earily accurate.

### 150. STARFLEET I

### INTERSTEL, 1985

he classic grid-based Star Trek game went commercial in this simple but addictive game.

7

THINK SHEEP ARE

THE SEXY? ESPECIALLY WHEN

THE PROPERTY OF DOLLED UP IN HEELS

THOSE FORM-FITTING LATER?

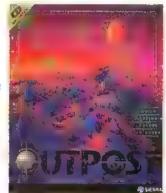

Let's give a hig Bronx cheer and three-fingered salute to the

### 1. Outpost

### SIERRA 1993

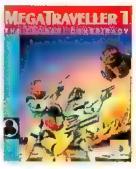

he idea was a good one to make a realistic space strategy game based on real scientific principles. What would it be like to found a colony on an alien world? Well, it couldn't be any more frightening than the way this product shipped. Overly complex algorithms had you micro-managing oxygen levels in habitats, among other minutrae Worse, the design was so incomplete that many of the actions you took made no difference in the game's outcome. Poor documentation forced players to buy the strategy guide-conveniently authored by the game's designer-and the interface design was no help either.

Rightfully vilified as "the greatest screen saver of all time." this game more than any other, tries to hide its vague concepts, and near-total lack of substance behind pretty pictures-with little success

felt tossed off by Traveller creator Mark Miller from rehashes of pen

ground story that

and paper modules he had designed in the past. Then, it featured the best character generation system ever for creating characters with skills that didn't really impact the game. Next, it had real-time combat, handled so fast that most players didn't have a chance in 90% of the battles. Finally, they designed it so that the player would have to run away from the first encounter or be killed within two minutes of spending 30 minutes to an hour generating a character MegaTraveller I was easily the Megaworst role-playing experience of all time, especially since its failure kept many other deserving paper RPGs from traveling to the computer for nearly a decade

### 2. DefCon 5

COSMI, 1987

his Cold War era game combined the worst of two worlds, badly

paced strategy with a poorly-designed arcade exercise Cosmi couldn't even get the title of the game right. DefCon 5 is the most peaceful setting. From there, the game went downnill with an irritating log-on procedure and arcarle sequences that bore little resemblance to any SDI-style system Imagine deploying anti-

space mine robots to defuse space mines (the bad guys apparently didn't understand the concept of proximity detonators) or X-ray asers that blanket wide areas of the atmosphere with severe radiation. Add dull graphics and lousy sound and you get the picture-DefCon None

### 3. Blue Angels

ACCOLADE, 1990

light simulations cover a wide range from the "faght model light" of US Navy Fighters to the painstaking physics of Flight Unlimited

But even the most forgiving of computer pilots couldn't stomach Blue Angels Blue Angels featured all the adrenalin rush of memorizing multiplication tables. The entire game was memorization, pattern recognition and refiex response. Much of the game is spent flying through wire-frame rectangles in order to memorize your "routine." Then, you get to go into show mode. That might have been okay if the visual payoff was adequate, but it wasn't. Instead of passing within feet of each other in a death-defying knife-edge pass, you see your partner a mife away and zoom, he's gone. Give me the flash cards, please!

### 4. MegaTraveller 1

Paracon, 1990

■ ith SSI making plenty of money on their D&D license Paragon opted to take another classic pen-and-paper game and convert it to sillcon. Unfortunately MegaTraveller I consisted of a back-

### 5. Hamey D. Clown

CAPSTONE, 1993 omey D. Clown was the epito-

me of the bad cartridge game on the PC. Capstone tried to cash in on some of the cachet associated with In Living Color, but defaulted to the simplest, most inane adventure elements to flesh it out.

Homey don't

play like dat and neither did any real gamers, if they were smart. Too bad we couldn't borrow Homey's sock just to beat up the game box.

### 6. Night Trap

DIGITAL PICTURES, 1994

he ultimate experience of FMV gone bad, Night Trap gave a bad name to every game platform

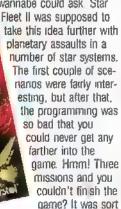

from Sega to 3D0 to PC. The designers took a pretty ex-television star/ex-con named Dana Plato and put her in a nightgown. They surrounded her with an entire houseful of scantily clad

Junior Misses and sent aliens to drill their brains out—literally. As the player, it was your job to protect these helpless little sweeties (hey we didn't write the script—that's how they were treated!) by activating hot spots on the video and entrapping the aliens before they could perform their nefarious deeds. Unfortunately, that meant before you saw the cool special effects. So, how many pre- and early adolescent gamers do you suppose saved the girls? Yeah, that's what the Senate subcommittee investigating video game violence thought, too.

### 7. Star Fleet II

INTERSTEL, 1989

Star Fleet I (listed in our Top 150 Games) didn't look like much, but it had all the options for which a Captain Kirk wannabe could ask. Star

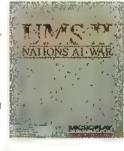

of shareware-except that you had to pay full price for a limited version. The latter part of the game was released some years later by Mindcraft, but it was leap years rather than lightyears too late. Star Fleet II remains an unfortunate monument to buggy, incomplete products.

### 8. Universal Military Simulator II

MicroProse, 1990

The design limitations were too numerous to mention in full, but they began with the designer's pet concept that "fog of war is unrealistic." As a command simulation, it told you

: little of why Napoleon · won at Austerlitz, or how Lee consistently triumphed over Union armies twice the size of his own forces. The

weaponry modeling was so homogeneous that WWII scenarios differered little from those of the 19th century. However, the worst thing about UMS II was the incredible time that the AI took to make a single move-often as much as 2-3 hours-and the move, once finished, was invariably terrible. The only thing "universal" about this entire series-including the recent War College-was the consistently low quality. UMS II, however, is so bereft of any redeeming factors that it justly deserves the title of worst wargame ever.

### 9. Air Power

MINDSCAPE, 1996

A ssume that dirigibles became the dominant force in the air after WWI. If you're not offended by the silliest backstory idea since Capstone licensed Homey D Clown, you have to consider the design team's premise that no consumer really likes

anything resembling a flight model Finally, throw in a lame strategic overlay, and you have a good idea of how these disparate elements became even less than the sum of their parts.

### 10. The Civil War

**EMPIRE**, 1996

Real-time games have their place-witness the success of Warcraft II and Command & Conquer-but this game set real-time strategy gaming back untold millennia. The scale wasn't particularly bad, but daily turns for the four-plus years of the American Civil War provided a case where more was definitely not better.

The concepts-training, production, supply-made sense individually, but faired to give any real feel for the conflict. This could just as easily have been The Wars of the Austrian Succession, for all the historical flavor it served up. It also had the dubious distinction of having the worst AI of any game since UMS II (see above). The morale/command system was so screwy that at the battle of Gettysburg, for example, the Army of the Potomac and Lee's Army of Northern Virginia-two of the finest armies in US history at their peak-both fled from the battlefield any time a shot was fired.

# ALBION

You thought it was just another mining expedition... You thought the planet was uninhabited... You thought you'd be home for dinner...

We could go on about the unnecessary micro-managing, the bad interface, or the poor naval modeling, but we'll just sink this ship and move on.

boring, abysmal product that wasted such formidable talent as Geoffrey Holder and Dennis Hopper.

### 11. College Slam

ACCLAIM, 1996

If NBA Live is a slam dunk, this game is a deflated basketball. Takin' the rock to the hoop might be fun once

or twice, but you soon find that your best defense is setting the basket on fire. Throw

in the power pills, players that leap higher than Superman, horrid graphics, a ball that never goes out of bounds, and you have a game that looks embarrassing on a SNES, much less a PC. For those that like this sort of thing, we understand that Mario has a mean behind-the-back slam.

### 12. Hell: A Cyberpunk Thriller

TAKE 2, 1994

rom the turgid script to the poor acting, Heli lived up to the first part of its name. This cyberpunk smeller was an abomination that showcased all that's bad about most "inter-

active movies." The 3D art models are so stiff that they conjure up images of Gumby & Pokey In old age, and the ba.lyhooed cyberpunk setting looked equally tired-at least what

you can access of it.

Crashes, sound problems and other
bugs were more interactive and energetic than the actual design was in this

### 13. El-Fish

Maxis, 1993

Remember the "executive toy" craze of the 80s? Silver ball-bearings on a trapeze and panic buttons that weren't hooked to any-thing? El-Fish was the ultimate execu-

tive toy. It required the fastest processors of its day to spend up to an hour rendering artificial fish for your artificial aquarium. The movement was lifelike and the fish behavior intriguing, but there was no game there. After spending hours catching fish, mating them, rendering them and setting up the aquarium, you had a screen saver. What next, El-Grass?

### 14. Ringworld

TSUNAMI, 1993

arry Niven's epic novel about an enormous world in which you could lose an entire star system was here reduced to the most insipid level of

adventure
games. The
puzzles were
either incredibly dull and
predictable,
or so obtuse
as to defy
any logic
whatsoever.
None of the
puzzles had
much to do

with the plot. The characters were remarkably unmemorable, quite a feat considering the source material. On top of all this, you had to sit through endless screens of the Ringworld-featuring plenty of places where you could not land or explore-without even the opportunity of clicking past them. While there may have been worse games, few quite defined the essence of tedium quite so well as this one.

### 15. Indy's Desktop Adventures

LUCASARTS, 1996

ucasArts rarely does a bad game, but when they do, they make up for it in style. "Billions and billions of possible games" are generated for the utmost in repetitiveness. Go there, Indy. Fetch this, Indy. Read the painfully obvious clues, Indy. Save this person you've never heard of, Indy. Do it again—different name, different body,

whatever-bad Nintendo-like figures running futher and yon, trusty hat and whip by your side. Or trade it in for a gun-there's little difference. You need a Pentium and 8 MB of RAM for this?

### 16. Martian Chronicles

BYRON PREISS, 1996

Tired, pointless and insulting to Bradbury's poetic genius

### 17. Pacific Strike

**ORIGIN**, 1993

ven on today's Pentium 90, playing this game would be like flying WWI planes during WWII.

# LAST SUMMER YOU FOUGHT FOR HONOR AND GLORY. PRAY FOR MERCY.

**ACTIVISION** 

Girole Render Service, #41

DBLITERATE ALL-NEW URBAN ENVIRONMENTS

### 18. Inca il

SIERRA, 1995

An indescribably incoherent action/adventure blend, with uneven graphics and ridiculous premise.

### 19. Sex Vixens From Space

FREE SPIRIT, 1990

This funny, sexy adventure game was neither funny, sexy nor adventurous.

### 20. Ultima VIII Orig.n. 1994

A once-great RPG series reduced

to the level of Mario, but with hateful, virtue-less characters

### 21. Fighter Wing

MERIT, 1995

Poor graphics, flight model and scenario design caused this cooperative, multi-player flight sim to augur in.

### 22. Red Crystal

QQP, 1993

Deadly proof that QQP should have stuck to strategy/wargames.

### 23. Thexder

SIERRA, 1995

Even fans of The Transformers didn't like this arcade shooter that was universally bad on every platform from C64 to Win 95.

### 24. Allens

MINDSCAPE, 1996

Bad art, plot and action shame the Dark Horse comic series on which It was based.

### 25. Treasure Quest

SIRIUS, 1996

Convoluted, insulting and pointless the worst of all puzzle games

### 26. World Hockey

**MERIT, 1995** 

Bad graphics and a worse interface made this game play worse than the Ottawa Senators.

### 27. Spiderman/Captain America vs. Dr. Doom

PARAGON 1989

Another great waste—a horizontal Ascrolling Spiderman game.

### 28. Speed Racer

ACCOLAGE 1993

Worst driving model in a computer game, with floating car graphics.

### 29. Batman

Data East 1989

Amindless arcade game where the Caped Crusader spends more time running from the crooks than fighting them

### 30. Heroes of the 357th

ELECTRONIC ARTS

Worst WWII flight model ever, and not even fun from a shoot-'em-up standpoint.

### 31. Coaster

DISNEY 1993

With game elements, this buildyour-own rollercoaster sim would have been fun.

### 32. Isle of the Dead

MERIT 1994

Adventure/action hybrid with crude graph.cs, weak sound and a weak 3D engine.

### 33. Unnecessary Roughness

ACCOLADE 1994

Goes deep for the long bomb in more ways than one.

### 34. Pizza Tycoon

MicroProse : 1994

No matter how many ingredients this strategy game offered, the game play was all anchovies.

### 35. Zeppelin

MicroProse

Fresh idea, hampered by a dirigiblespeed interface and Hindenburgesque bugs

Circle Reader Service #139

### 36. Cardinal of the Kremlin

INTRACORP 1993

Tom Clancy as spreadsheet, but Excel is more fun.

### 37. Blue Force

TSUNAMI 1993

CHIPS with worse writing than the TV series and nearly the same amount of gameplay

### 38. Chaos Control

I-Motion 1995

Aconveyer belt ride through a shootling gallery.

### 39. CyberRace

CYBERDREAMS 1994

Syd Mead's futuristic art surrounds a bad story and a mediocre racing name

### 40. David Wolf Secret Agent

DYNAMIX 1989

Gamers were only able to affect the plot about as much as they could at a movie theater.

### 41. Fountain of Dreams

ELECTRONIC ARTS 1991

Wasteland got stupid as killer clowns, a silly plot and fear of Disney ruined the sequel.

### 42. Lawnmower Man

SCI 1993

Poor graphics, worse controls, and an unfathomable plot nearly killed the whole idea of virtual reality.

### 43. Labyrinth of Time

ELECTRONIC ARTS

Pretty, empty, slow MYST-allke.

### 44. Inferno

OCEAN 1995

Bad sci-fi storyline, guttural voice acting, and way too many dull cinematics in a limp space shooter.

### 45. Patriot

360 PACIFIC 1992

Evan Brooks called it the "Harvard Graphics" of wargames—all

flash, no action, lots of bugs.

### 46. Lightspeed

MicroProse 1991

ore repetitive than "The Twelve Days of Christmas" with no payoff.

### 48. Disciples of Steel

FORMGEN 1993

Role-playing with all of the tedious details and none of the fun.

### 49. Star Wars Chess

MINDSCAPE 1993

Proof that there really is no Intelligent life (or AI) even in a galaxy far, far away.

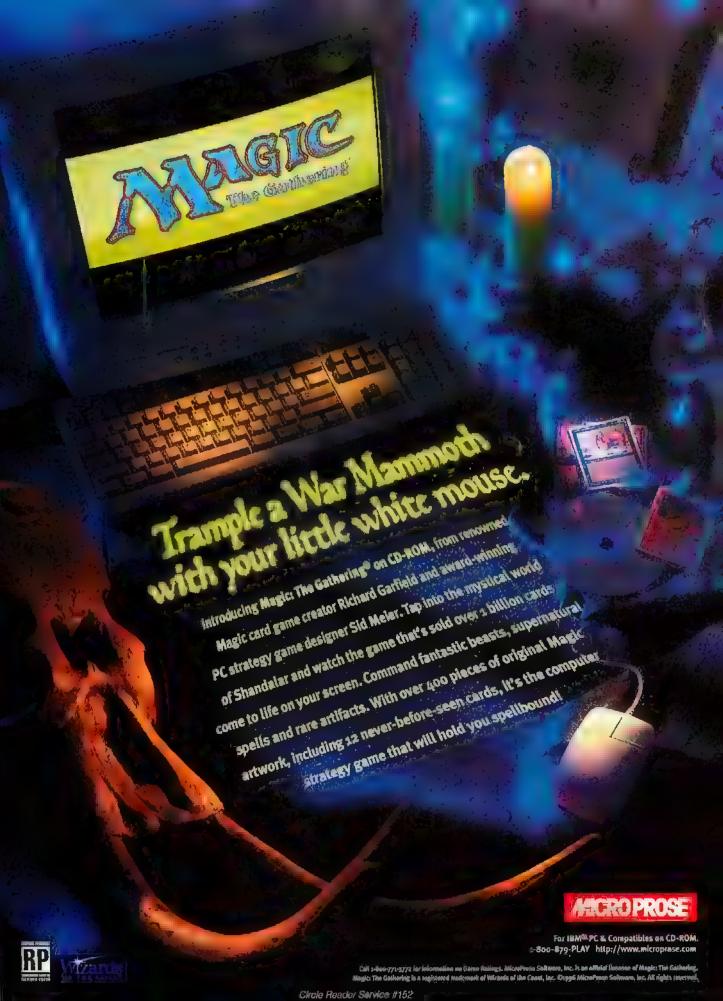

### 50. Shuttle

Vingin 1992

All the work of being an astronaut with none of the glory.

# The 15 Most Innovative Computer Games SPECIAL

### 1. Pinball Construction Set

### ELECTRONIC ARTS 1983

Gamers got their first chance to create their own games (i.e. pinball tables) with this unique, early product.

### 2. Ultima IV

### OR GIN 1985

The greatest UCTIMA was the first role-playing game to use series of ethical dilemmas to generate player characters

### 3. DOGM

### ID 1993

DOOM accelerated the first person action trend by putting monsters right in your face and on your network.

### 4. Mystery House

### S FRRA 1979

Roberta's first game was the first adventure game to use text and graphics together on the screen

### 5. Links

### Access 1990

With a photo-realistic look that is still widely copied today, Links may have inspired more "business machine upgrades" than any other game.

### 6. Modem Wars

ELECTRONIC ARTS

**9** (7)

### 1988

This futuristic warfare game was on the bleeding edge of point-to-point modern play.

### 7. Falcon 3.0

### SPECTRUM HOLOBYTE

This F-16 sim set a standard for realism and connectivity that is only now being surpassed.

### 8. TV Sports Football

### CINEMAWARE 1987

This game offered hot, fluid sports action years before John Madden FOOTBALL, much less NBA Live and FPSPE.

### 9. Wing Commander III

### ORIGIN 1993

The first "Interactive movie" that really worked, its FMV didn't get in the way of the game.

### 10. Adventures of Willie Beamish

### DYNAMIX 1991

First adventure game to use traditional cel-based animation throughout the game.

### 11. MYST

### BRODERBUND 1993

The game that launched a thousand imitations, Myst proved pretty 3D graphics and obscure puzzles were more important than plot.

### 12. Rise of the Dragon

### DYNAMIX 1990

This cyberpunk adventure ploneered in using a dynamic, hotspotted map as the game world travel interface.

### 13. Flight Sim Toolkit

### 1993 Domark

Domark's flight slm engine became a marvelous tool for flying fans.

### 14. Tetris

### SPECTRUM HOLOBYTE 1987

Who would have thought that manipulating colored shapes would create such a phenomenon?

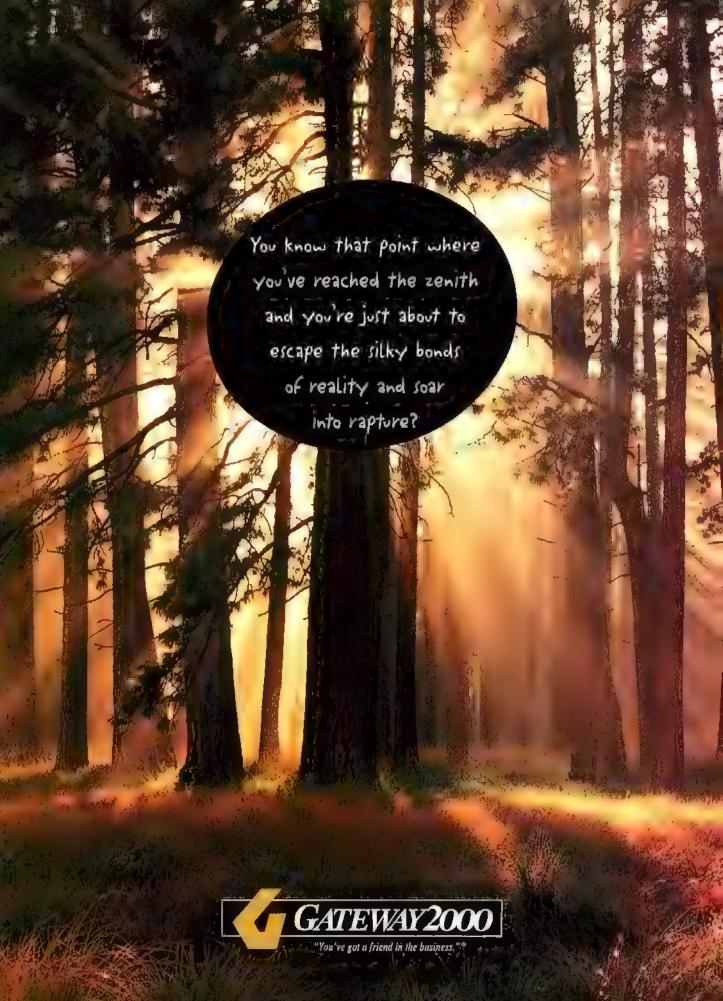

### 15. Quest For Glory

### SIERRA 1987

Corey and Lori Cole proved the Sierra engine was more versatile than anyone thought with this hybrid adventure/RPG game.

of like that ... only better.

You're Fighting to protect good and Restore the Rightful King to power.

The Bad News is you're the Buy on the right.

1000 d

\*\* Enlary on a clay adventure that breaks the mold."

# THE 15 MOST INFLUENTIAL INDUSTRY PLAYERS OF ALL THAT

# 1. Trip Hawkins

awkins' insights haven't always panned out, but he's always had a vision for this industry. As founder of Electronic Arts, Trip was right about the value of the recording industry model for software distribution and the need to recognize designers as artists. He was right about how good the Commodore Amiga was as a game machine, but wrong about its eventual place in the industry. And he was right about the future of CD-ROM, but bet too much on CD-I and 3DO. He was probably right about the power of the so-called set-top box, but he gambled on the bleeding edge of that technology. He has definitely been the

prophet of the computer game industry as the New Hollywood, and the full effect of that paradigm is vet to be seen.

#### 2. Ken Williams

The ultimate entrepreneur, Ken Williams literally moved from the kitchen table to the boardroom table with the inception of Steras On-line. His programming of Roberta Williams's MYSTERY HOUSE, the original graphic adventure game, paved the way for Steras's success. He shrewdly focused the company on making its own development tools, as well as establishing Sterra as a company driving technology such as VCA, the CD-ROM, a full-time

development tools, as well as establishing Sierra as a company driving technology such as VCA, the CD-ROM, a full-time online gaming network, and full-motion video. Watch for Sierra to enter the hardware wars in the near future and drive other standards, including 3D graphics and electronic software distribution.

#### 3. Brian Fargo

As founder of Interplay Productions, Brian Fargo has shown both brilliant product vision and great business instincts. He moved the computer role-playing game out of the standard Ultima three-quarter-overhead perspective, and introduced three-point idle animation for the encounter windows on such products as THE BARD'S TALE, WASTELAND and DRAGON WARS. He helped break the heavy EA dominance on distribution in the late 30s, and his success as an independent publisher and distributor of European

software helped herald the European invasion of 3D adventure/role-playing products. He also deserves credit for the successful MacPlay division, which distributes Macintosh conversions of PC products, and the recent Engage! venture that is helping many companies bring multiplayer online products to market.

#### 4. Lord British

Richard
RCarriott virtually defined computer role-playing.
A firm believer in delivering hot new technology with each new UTIMA, Carnott designed the most successful computer role-playing game series in history

Through the years, the ULTIMA series has broken new ground in graphics, artificial intelligence, character generation, object-oriented worlds, and story. After leading Origin out of FA's Affiliated Label program over an intellectual property dispute, Carriott and his brother Robert built a full product line and recruited Origin's second design superstar, Chris Roberts of WING COMMANDER fame. As creative director, Carriott was instrumental in building Origin into a real publisher.

#### **1**

#### 5. Roberta Williams

The original creative mind behind the Sierra product line, Roberta Williams is only listed below Ken Williams here because she has remained in the corporate background rather than on the front line. The fairer Williams created the first graphic adventure and was one of the first designers to build a full adventure from a female perspective (THE COLONEL'S BEQUEST, KING'S QUEST IV, PHANIASMACORIA). Her KING'S QUEST series moved Sierra into the realms of E.G.Agraphics, VGA graphics, movie-style soundinacks, paiseries adventures, SVGA and, soon, 3D adventures.

#### 6. Joel Billings III

A quiet player who isn't well known, Joel Billings founded SSI in 1981 to build the kinds of games that he wanted to play. He recruited important talents like Chris Crawford, Dan Bunten, Cary Grigsby and Roger Keating to write war games. Later, he diversified by licensing the most sought-after pen-and-paper game property in history, DUNGMONS AND DRAGONS, for a successful and unprecedented seven-year license. Today, Billings is the vice president of worldwide development for Mindscape, parent of SSI

#### 7. Chris Crawford

The game-design guru duning the early days of Atari, Chins Crawford was the first designer to write a

primer on computer game design and has written more about game design than anyone. His TANKHOS (a computer-assisted board game design for Avalon Hill) and EASHLEN FRONT (an early Atari computer game design) set standards for opponent Al in a war game. His geopolitical magnum opus, BALANCE OF POWER.

- 漢述

established a new level of intricacy for game algorithms, and his TRUST & BETRWALETHE LECTOR OF STROOT introduced icon-based speech and broke ground for experiments in artificial personality. Yet
Crawford's greatest legacy to computer games was the founding of the Computer.

8. Sid Meier

Conference, now a major

event with thousands of participants.

Came Developers

N o one game designer has as many CGW Hall of Fame games as Sid Meier, Meier once boasted to colleague Bill "Wild Bill" Stealey that he could write a combat flight program in days that would put the commercially successful RED BARON com-op game to shame. He was right. Meier's designs broke the mold at everything. Whether designing games about war, spics, railroading, civilization or pirates, Meier has always focused on what's fun and what works. Games always scent to be so multifaceted in Sid's designs that it is hard to fell whether they are strategy or adventure. Meier recently left MicroProse to form his own gamedesign company, Finasis Software.

#### 9. Russell Sipe

When Russell Sipe founded Computer Gaming World in 1981, there was no regular source of information about computer games. Sipe believed that gamers would want news, reviews and strategies about computer games, and he envisioned a hobby that would grow and mature into a major entertainment industry, Under Sipe's leadership, the magazine grew from a small hobbyst publication to a full-scale consumer magazine. His emphasis on a high editional standard of journalistic accuracy and fairness continues to this day. He also believed that a magazine should take stands in the industry by advocating positions that benefit gamers. Such is the legacy of the best in computer journalism.

#### 10. John Carmack

The technological genius at id Software, John Camtack is largely responsible

for the explosive growth of firstperson perspective action games. Without his programming tricks and gaming instricts, it is

questionable whether WOLFENSTEIN
3D, DOOM and QUAKE would have been
made. Even games from other companies
such as DARK FORCES and DUKE NUKEM
3D owe much to the basic design of
Carmack's games. In addition, ids titles
proved the viability of shareware as a distribution system, apgraded the public's perception of shareware quality, and accelerated the trend in multiplayer gaming

#### 11. "Wild Bill" Stealey

Major (now Colonel) Bill Stealey was the founder of both MicroProse. Software and Interactive Magie. As entrepreneur, super salesman and industry "character," Stealey has always concentrated on the necessity for this industry to be frui. Whether plotting the latest move in guerrilla marketing or the newest promotional gimmick, Stealey has been one of the great evangelists of the computer game aidostry.

#### 12. Doug Carlston

Doug Carlston designed GALACTIC FMPRE and CALACTIC TRADER, two games that launched Broderbund Software. A company founded by siblings (two brothers and a sister), Broderbund emphasized social responsibility from the beginning. In addition to game publishing, it has been a leader in educational publishing and productivity software, as well. Because of its success in all three areas, Broderbund became one of the first entertainment companies to go public. For gamers, Broderbund's most important contribution may be the guidance and support if provided for Origin

and Mass as they sought to become independent publishers.

#### 13. Phil Adam

Plul Adam was one of the founders of Spectrum HoloByte, and he has built interplay's marketing-and-sales effort into a powerhouse. More than a salesman, Adam has been the foremost statesman for the computer game inclustry in the Software Publishers Association, standing up for the game industry with regard to game ratings, packaging issues and government regulatory issues.

#### 14. Jon Freeman

Jon Freeman founded the first surviving computer game company, Automated Simulations, which went on to become Epys. Later, he became one of the first designers at Electronic Arts and formed his own design group with Anne Westfall (Preel all Associates). STARSHIP ORION, TEMPLI, OF APSHAL, ARCHON and many more would never have uppeared without the efforts of this early proneer.

#### 15. Gilman Louie

Chairman of the board of Spectrum I foloByte, Louis designed a Star Field like command simulation in the early '80s, and he is considered the visionary behind the legendary FALCON 3.0. His survival skills have kept him alive through the

apparent saiende of Francial backer Robert Maswell, an uttempted coup by former executives, and several quarters of major financial losses. As a simulation innovator and staunch advocate of multiplayer games, Loure is

still an important influence on the future of computer games and hopes to lead Spectrum to a brighter future

310HF DEDIN IS ISS FORD. There's a warde in Scotlered with an installable appealing for your brain, his Sainte MecPhilian, and his flance. # FIFTEENTH ANNIVERSARY SPECIAL The 15 Funniest Computer Cames

# 2. Secret of Monkey Island I & II

#### LucasArts 1990

From the Insult-driven swashbuckling to the Previously Owned gags of Stan the Salesman, this series was a non-sexist bust-up.

#### 3. Day of the Tentacle

#### LUCASARTS 1993

The computer equivalent to classic Warner Bros. Cartoons, this sequel to Maxiac Mansion was funny, clever, and even charming.

# 4. Hitchhiker's Guide to the Galaxy

#### INFOCOM 1984

Douglas
Adams' humor
comes alive in
interactive
book adaptation, although
the ending is

more annoying than Vogon poetry.

#### 5. Leisure Suit Larry

#### SIERRA 1986

Base, sexist, sometimes scatological humor, with no concessions made to taste or sensibilities, this was the best of a funny series.

## 6. Monty Python and the Holy Grail

## 7<sup>th</sup> Level 1996

From not-quite-dead Tetris to "Spank The Virgin," this adaptation of the cult film was funnier than a man with three buttocks.

#### 7. Sam & Max Hit the Road

#### LucasArts 1994

With a sentient dog joining forces with a destructive bunny sidekick to form a detective agency, you knew wackiness was bound to ensue.

# 1. Space Quest IV

#### SIERRA 1991

Roger Wilco and friends transformed every sci-fi timetravel cliche with Gary Owens' voice (Laugh-in, Space Ghost) providing perfect comedic counterpoint.

#### 8. You Don't Know Jack

#### Berkeley Systems 1995

Pop culture trivia that was more fun than a Partridge Family marathon (Isn't everything?). This is the game show the networks have nightmares about.

#### 9. Eric the Unready

#### LEGEND 1992

Poor Eric gets treated like the least popular piedge in a medieval fraternity. Climbing into an out-

house and kissing a pig is just the start of his misadventures.

## 10. Leather Goddesses of Phobos

#### INFOCOM 1987

The first adventure game to offer naughty and nice mode, this little jewel was pulp science fiction meets comic book humor.

#### 11. Spellcasting 101

#### LEGEND 1992

There's a reason this is listed under LEATHER GODDESSES OF PHOBOS. It had the same author, but this was the beginning of a trilogy where fantasy met fraternity row humor.

#### 12. Sid & Al's Incredible Toons

#### SIFRRA 1993

Bouncing cartoon characters around Rube Goldberg-style devices was never this amusing before or since.

#### 13. Freddy Pharkas, Frontier Pharmacist

#### SIERR 1992

Al Lowe showed his brand of humor could tame the wild west and win the hearts of sheep everywhere.

#### 14. Lemmings

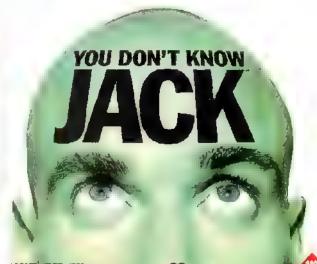

#### Psygnosis 1991

Yes, watching cute animals plunge off cliffs, drown, and explode can be fun.

#### 15. Little Computer People

## ACTIVISION 1985

Atthough not roll-on-the-floor funny, this consistently amusing product featured a little man and his dog living in your computer long before Dogz and Carz.

# The 15 Worst Back Stories of All Time SPECIAL

# 1. Quake

ID, 1996

The quintessential example of "Don't let the plot get in the way of the action." There is no story for QUAKE.

#### 2. The 7th Guest

## TRYLOBYTE 1993

How they filled a novel with this fluff only Matt Costello will ever know.

#### 3. Microcosm

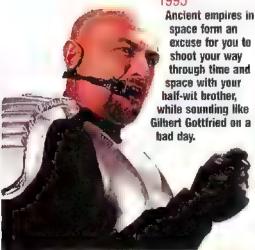

#### Psygnosis 1994

Blood vessels with more traffic than the Santa Monica freeway on a holiday weekend formed the basis of this Fantastic Voyage knockoff.

#### 4. Inca II

#### SIERRA 1995

#### 5. Fortress of Dr. Radiaki

#### Merit 1994

"It was supposed to be funny" was the defense of this Doom-clone that stole equally from H. G. Wells and Japanime plotlines.

#### 6. Dragon Lore

#### MINDSCAPE 1994

If the history of the dragons and their riders existed anywhere other than the documentation, this would have been a much better game.

#### 7. Air Power

#### MINDSCAPE 1996

What if lighter-than-air ships had become the norm after WWI? Even taken as camp, this hot-air ship plummeted faster than the Hindenburg.

#### 8. David Wolf: Secret Agent

#### DYNAMIX 1989

We immediately wanted to just say Or. No to this James Bond wannabe.

#### 9. Xenocide

#### MicroRevelations 1993

The ultimate cheap setup, Xenocide's prime directive was "LOCK AND LOAD. IT'S TIME TO COMMIT XENOCIDE!"

#### 10. Millennium Auction

#### EIDOLON 1994

This auction game reduced the idea of art to a competition in acquisi-

tion on a galaxywide Home Shopping Channel.

#### 11. Coaster

#### DISNEY 1993

Why would you build a rollercoaster with Disney's mini-CAD program? Judging from the "game," they didn't know either.

#### 12. DreamWeb

## EMPIRE 1994

Gritty cyberpunk themes with a childish interface undermined this updated version of Donald Wandrei's pulp short story, "A Plague of Lunacy."

#### 13. Endorfun

#### Time-Warner 1995

New-age mumblings combined with a diet of simple real-time puzzles made us hunger for red meat and caffeine with double cream.

#### 14. Challenge of 5 Realms

#### MicroPLAY 1992

Nhagardia was a multidimensional kingdom that had everything but an interesting plot.

#### 15. Pizza Tycoon

#### MichoProst 1994

Even da bad Godfatha imitators know more dan ta maka da bad pizza pie inta a real-time mess like dis one.

"SPORTS GAME OF THE YEAR"

GOES FOR A FOUR-PEAT.
Computer Gaming World thinks FPS: Football Pro Is so true-to-the-game, they've awarded it gaming's Super Bowl ring three years running. But what's up for this year? Hang on to your helmets.

WE'VE TURNED FOOTBALL INTO A CONTACT SPORT.

Playing against the computer is cool. But it's hard to build up a big, bad case of nasty revenge against a bunch of microchips. So now you can play Football Pro over a modern or network to find out which of your friends

are as good as their brag.

NOBODY SCORES MORE

POINTS FOR ACCURACY.

Up-to-date stats for every current NFL player- manage real players on real teams. Only game with multi season career play to take into account players¹ aging and injuries ○ CAMS™, our exclusive camera system, lets you view from anywhere in the stadium OTV-like motion

captured player movement More than 10,000 plays to choose from or design your own with the PlayWizard.

# The Top 15 Sleepers Of All Time SPECIAL

# 1. x-com

#### MicroProse 1994

X-COM came from nowhere to win CGW Game of the Year and sell over a quarter-million units, despite nonexistent marketing. Clever, eerie and addictive.

#### 2. Wolfenstein 3D

#### ID 1992

The true beginning of the first-person PC shooter craze, and the bane of vertigo sufferers everywhere.

#### 3. I Have No Mouth And I Must Scream

#### Cyberdreams 1996

The only serious science fiction story to make the transition to the silicon screen. All games give IIp service to the Importance of story, but this one delivers a real wallop.

#### 4. Fire Brigade

Panther Games 1987

The Amiga version was not only gorgeous, it was the first decent attempt at breaking

away from hex-based wargames.

#### 5. Flight Commander 2

#### Avalon Hill 1994

Not a flight sim but a top-notch strategy game where thoughtful maneuvering means more than quick reflexes.

#### 6. Dark Legions

#### SSI 1994

This action-strategy heir to Archon never got the credit it deserved.

#### 7. Bad Mojo

#### Pulse Entertainment 1996

Gamers always ask for something new and different; life as a roach is about as out there as you'll ever get.

#### 8. WarCraft

BLIZZARD 1994

remember now that Blizzard was a small and risky venture by Davidson before this block buster.

9, 1830

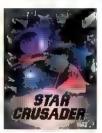

#### AVALON HILL 1995

If the MASTER OF ORION Crew at Simtex had stayed with Avaion Hill, we could have had many more gems like this fine railroad strategy game.

#### : 10. Star Crusader

#### GAMETEK 1994

Lost in the hoopla of TIE FIGHTER and

Wing Commander III was this solid space sim, which featured moral dilemmas, good voice acting and

lots of weird alien spaceships

#### 11. Title Fight Pro Boxing

#### COMP-U-SPORTS 1995

All's shuffle and Tunney's pinpoint jab are faithfully recreated, along with hundreds of other pugliists, in this simulation of "the sweet science."

#### 12. Custer's Last Command

## INCREDIBLE SIMULATIONS 1995

A gritty wargame that doesn't shy from the controversial subject matter and offers an incredible number of "what-ifs."

#### 13. Connections

## DISCOVERY CHANNEL MULTIMEDIA 1995

The wit, Interesting puzzles, and James Burke's unique takes on science and history make this even better than the TV program.

#### 14. Aide De Camp

## HPS SIMULATIONS 1994

The holy grail for board gamers, letting them convert favorites from cardboard to computer.

#### 15. Monopoly

# Westwood/Hasbro

The all-time best-selling classic board game becomes a standard for quick, clean internet play.

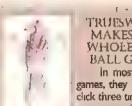

# IT SEEMS TO US

Only over-caffeinated European teenagers had reflexes fast enough for this one.

#### 3. Ultima VII

#### ORIGIN 1993

Until the SERPENT ISLE add-on came out, you suffered from mysteriously disappearing keys, unsolvable plot sequences, and party members who couldn't feed themselves.

#### 4. Suspended

#### INFOCOM 1983

Controlling multiple robots remotely with a text parser—the very definition of a challenge.

#### 5. Fighter Duel

#### JAEGER 1991

Come on guys: even real Corsair pilots didn't have to fight engine torque using a digital joystick.

#### 6. Capitalism

#### INTERACTIVE MAGIC 1996

An economy simulation so thorough—from making products to marketing them—it should include a free MBA in every box.

#### 7. Pacific War

#### SSI 1992

Less a wargame than a way of life. Just moving units to the right island was a challenge, let alone winning.

#### 8. Hitchhiker's Guide to Galaxy

#### INFOCOM 1984

The Babel Fish puzzle alone stumped many gamers in their interstellar tracks.

#### 9. Falcon 3.0

## SPECTRUM HOLOBYTE 1991

If flying one of the first realistic

flight models wasn't enough, you also got to manage the entire air

#### 10. Gabriel Knight 2

#### SIERRA 1996

A lot of intermediate to complex puzzles throughout, but the killer was splicing those cassette tapes.

#### 11. X-Wing

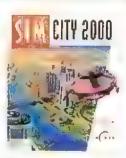

#### LUCASARTS 1993

You had to read Larry Holland's mind to know the proper sequence for completing each mission.

#### 12. SimCity 2000

#### Maxis 1994

If they'd just left the plumbing out, the challenge would have

been more fun than frustrating.

#### 13. MYST

#### Broderbund 1993

Even the pretty pictures couldn't hide how obtuse many of the puzzles were.

#### 14. Fantasy General

#### SSI 1996

Probably the toughest computer opponent of the past decade, plus you didn't have enough info to decide which campaign paths to

#### 15 Tornado

### DIGITAL INTEGRATION 1993

Easy to fly-after a few months of RAF training.

# PRO FOOT TOSIMULA FRONTPAGESPORTS

#### WE'RE TOTALLY INTO REALISM, REALLY,

When Sierra came up with their first Front Page Sports PC game, FPS: Football Pro", it was so true-to-the-sport, that Computer Gaming World named it "Best Sports Game" three years running. Now that same kind of fanatical devotion to realism is showing up big time in all four FPS games.

NUTS FOR ACCURACY. THIS IS YOUR ASYLUM.

You'll find the kind of details that let you know we're sweating the small stuff:

(i) Internet and network play lets you compare with people around the world

Physics-based ball movement for greater accuracy Extensive, up-to-date stats Down-to-the-inch simulation of real-world stadiums, lakes, and golf-courses () Motion-captured, high-resolution movement of on-screen players and action

AS REAL AS HUMANLY IAND COMPUTERLY) POSSIBLE.

If you want to see the games that blur the line between your computer and the rest of the sports world, grab some free demos and screen shots at www.sierra.com/games/fps, and then not real.

# The 15 Most Memorable Came Horoes SPECIAL

# 1. Colonel Blair

Wing Comander Series Origin, 1991–96

An unforgettable character, from the old "blue hair" days to the full-motion video cinematics featuring Mark Hamill.

#### 2. Gabriel Knight

GABRIEL KNIGHT SERIES SIERRA 1993–95

Gabriel's mix of sexism, supernatural curtosity and down-home sensitivity made for an interesting voodoo blend.

#### 3. Guybrush Threepwood

Secret of Monkey Island Series LucasArts 1991–93

From 90-pound weakling to swashbuckling adventurer, this intriguing protagonist grew in more ways than just combat and puzzle-solving skills in these terrific storylines.

#### 4. Madame Sophia

Indiana Jones & The Fate of Atlantis LucasArts 1993

The female counterpoint to Indiana Jones, Madame Sophia, was every bit as strong a protagonist as Indy himself.

#### 5. Roger Wilco

SPACE QUEST SERIES SIERRA 1987–95

Roger was unique as a hero because he was a schlemiel who accidentally accomplished heroic ends.

#### 6. The Avatar

Ultima IV–VIII Origin 1980–94

The anonymous hero of most of the Umma sagas was particularly interesting when trying to balance the virtues.

#### 7. Duke Nukem

DUKE NUKEM 3D FORMGEN/3D REALMS 1996

Although Duke's been around, he never had quite so much personality as he showed with the delightful voiceovers for his latest incarnation.

#### 8. Sam and Max

SAM 'N MAX HIT THE ROAD LUCASARTS 1994

Steve Porcell's hilarious talking animal detectives brought gritty humor to the monitor screen.

#### 9. Ben Whatsisname

FULL THROTTLE LUCASARTS 1994

The hard-riding, gravel-chewing, punk-stomping biker hero who saves Corley Motors.

#### 10. Greg Bradley

IT CAME FROM THE DESERT CINEMAWARE 1989

Geologist turned hero, Dr. Bradley saved the world from giant ants.

#### 11. Eric the Unready

ERIC THE UNREADY LEGEND 1993

In his quest for knighthood, Eric proves that heroes make their own good luck out of misfortune.

#### 12. Max Remington

COVERT ACTION M CROPROSE 1990

Was Max Remington, the superspy in Sid Meier's espionage thriller, a mate or a female?

#### 13. Laura Bow

COLONEL'S BEQUEST AND DAGGER OF AMON RA SIERRA 1990-92

Roberta Williams's journalismstudent, cub-reporter protagonist captured the flavor of the flapper era, but not the hearts of predominantly male computer gamers.

#### 14. Indiana Jones

INDIANA JONES & THE FATE OF ATLANTIS LUCASARTS 1993

Indiana Jones should have been an easy character to bring to life. Until this game, no one was successful.

#### 15. Frank Castiglione

THE PUNISHER PARAGON 1990

In the only successful comic book adaptation we've seen, Marvel's urban vigilante known as "The Punisher" was a solid character.

# FIFTEENTH ANNIVERSARY SPECIAL The 15 Most Memorable Game Villales

#### 2. Werdna

#### WIZARDRY/WIZARDRY IV SIR-TECH, 1980/1987

The evil archmage was the villain you defeated in the first game and played in the latter game.

#### 3. The Guardian

#### ULTIMA VII ORIGIN, 1992

An insidious polson, this villain posed as your friend and supernatural mentor in beginning the third Ultima trilo-

#### 4.Cyber Demon

# DOOM/DOOM

#### II ID. 1993/94

Action gamers who thought they'd seen "boss monsters" before suddenly realized they hadn't when they encountered the CyberDemon.

#### 5. Adrian Ripburger

#### FULL THROTTLE LUCASARTS, 1994

"Pond slime in an Armani suit," the documentation described this villain in a masterpiece of understatement.

#### 6. Prince Thrakhath

#### Wing Commander II & III Origin, 1991-93

This long-fanged kitty got the top treatment from Origin, with cool voice-overs, some of the best lines in the script, and better pilot Al than

the other computer-controlled Kılrathi fighters-

# 1. Purple Tentacle

Day of the Tentacle LucasArts, 1993

This unforgettable villain was monomaniacal. Actually, he was mono-everything.

#### 7. Fredrick von Glower

#### Gabriel Knight II Sierra, 1995

Although a man among men, the leader of the exclusive Hunt Club was much, much more.

#### 8. Kronus Maelor

THE HORDE CRYSTAL DYNAMICS, 1994

In setting up the fastpaced action sequences, Michael Gregory reveled in the role of the evil High Chancellor.

#### 9. Scorpitron

#### WASTELAND INTERPLAY, 1985

This nefarious villain was ostensibly based on a famous role-playing columnist.

#### 10. LeChuck

SECRET OF MONKEY ISLAND SERIES LUCASARTS, 1991-93

Whether alive or undead, this

scurvy-brained pirate made Guybrush Threepwood's life miserable.

#### 11. Adolf Hitler

#### Wolfenstein 3D D. 1992

When fictitious villains weren't enough, the monster had to come from the pages of history.

#### 12. Gao Qui

#### BANDIT KINGS OF ANCIENT CHINA KOEL 1989

in this strategy game, an evil minister from ancient historical accounts tried to outwit you at every turn.

#### 13. Count Dracuia

# DRACULA UNLEASHED VACOM, 1993

The actor who played this full motion video vampire was able to sink his teeth into the role.

#### 14. Pirt Snikwah

#### ULTIMA V ORIGIN, 1987

This pirate leader was loosely based on a game company president. Do you have to spell it backwards?

#### 15. Tom Frisina

#### HARDBALL ACCOLADE, 1985

A villain in a sports game? That's essentially how founding Accolade partner and game designer Bob Whitehead cast his left-handed, junk-throwing corporate president in the game which opened the movie, A Princess Bride.

Heroes brings out the warford in yon—a finitary/stratogy game that puts you in command, recruiting because and their forces to building no to three human or computer? adversarios. What's at italia? Only the authorized, as you know the From New World Computing/

# THE 15 Worst Peripherals SPECIAL

# 1. CyberMan

#### LOGITECH

This weird controller managed to fail as both a game controller and a mouse replacement.

#### 2. Doom Gunn

#### TAC SYSTEMS

A tiny joystick mounted on a big ugly plastic gun makes for a controller that's unreliable and

unusable, as well as ugiy. It's now marketed as the Demon Bestroyer Gunn, but it's still the same uncontrollable controller.

#### 3. Spaceball Avenger

#### SPACETEK IMC

It was the company's first attempt at a 360-degree controller, but only the designers could figure out how to use it.

#### 4. Mousewheel

#### COLORADO SPECTRUM

A steering wheel/flight yoke you strapped to your mouse; one of the most imprecise controllers ever.

#### 5. Aura Interactor

#### AURA INTERACTIVE

A subwoofer you could strap to your chest. Adult fun at its worst.

# 6. Wizzard Pinball Controller THRUSTMASTER

We're still not sure how this is supposed to be better than a keyboard.

#### 7. Amiga Joyboard

#### AMIGA, INC.

Suzy Chafee asked, "Why use a joystick for C64 arcade games when you can use a mini-surfboard instead?" Um, perhaps because a joystick works?

#### 8. Thunderseat

#### THUNDERSEAT

A subwoofer in a chair, for serious flight sim fans. Well, it's better than in a vest at least.

#### 9. First-generation VR headsets

#### **VARIOUS**

Low resolution obviates the coolness factor of VR tracking in all the first-generation VR devices; until inexpensive hi-res hits, these novelties hamper gameplay.

#### 10. Destination keyboard

#### GATEWAY

Slight delays in key transmission let you experience lagging play without logging on to the internet.

#### 11. GlidePaint

#### Ciroue

Imprecise as a Windows mouse replacement, touchpads are virtually useless as game controllers—

just when laptops were becoming good game machines, too.

#### 12. Mouse "Surf" Board

#### NEUTRAL PRODUCTS

A weird board for using your mouse in your lap. When the company brags that it also works as a drink coaster.

you know you're in trouble.

#### 13. RealMagic

#### SIGMA DESIGNS

It made full-motion MPEG video games look better. If only it could have made them play better.

#### 14. Parallel Gameport

#### GENOVATION

A great idea for using a joystick on a laptop, but the near-total lack of drivers made it virtually useless.

#### 15. Flight Sim Cockpit

#### THRUSTMASTER

OK, we think it's cool too. But if you have one, it's time to hang up the surplus-store flight suit and go out and try to meet a girl.

ce

# FIFTEENTH ANNIVERSARY SPECIAL The 15 Most Rewarding Endings 81 All Time SPECIAL

#### 2. The Secret of Monkey Island

#### LucasArts 1990

After solving the last puzzle, you are rewarded with a fabulous freerunning animation starting with Guybrush being ejected from inside a doubloon-op grog machine and ending with Guybrush in love.

#### 3. President Elect

#### SSI 1981

Your careful planning is rewarded with an election-night televisionstyle presentation of state-by-state results.

#### 4. Gabriel Knight II

#### SIERRA 1995

Although there was a low-key attempt to wrap things up with the bridge scene, the *real* ending to this game was the climactic opera/ritual scene combined with the unique little strategy game in the basement.

#### 5. Defender of the Crown

## CINEMAWARE 1987

it may have been not the coronation sequence at the end that was the most rewarding part of this game,

but the sensuous shadow play when you rescued the damsel in distress.

#### 6. Sid Meier's Pirates

MicroProse

# 1. The Magic Candle

#### MINDCRAFT 1989

Instead of fighting a massive battle at the conclusion, you enact a detailed ritual using—you guessed it—magic candles.

#### 1987

This was the first game in which we received a "retirement ranking"— where we would have ended up in society when we quit.

#### 7. Eric the Unready

#### LEGEND 1993

After interrupting the wedding and rescuing Lorealle, you kiss her and prepare to live happily ever after.

#### 8. Red Storm Rising

#### MicroProse 1989

The successful conclusion of a tour of duty, ends in a ticker-tape parade and a presentation of medals.

#### 9. StarCon 2

#### ACCOLADE

This rich and satisfying game entertains right down to the end, with some of the funniest credits since Monty Python's Holy Grail.

#### 10. Full Throttle

#### LucasArts 1995

Ben rides off into the sunset instead of tiving happily ever after with Marlene.

#### 11. Ultima IV

#### Origin 1986

Your avatar ended up reading the Codex of Ultimate Wisdom instead of merely fighting "Foozle," the generic bad guy of most CRPG endings.

#### 12. Wing Commander

#### ORIGIN 1990

After defeating the final Kilrathi armada, Colonel Blair is showered with medals and fireworks for his heroic achievements.

#### 13. Master of Magic

#### MicroProse 1994

All roads lead to the casting of the ultimate spell. The facial expressions are priceless.

#### 14. I Have No Mouth and I Must Scream

#### CYBERDREAMS 1995

It isn't a cheap ending when these soulweary characters find their individual peace.

#### 15. Duke Nukem 3D

#### FORMGEN 1996

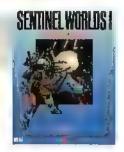

Duke saves the world, and then, in a vaudeville-style blackout, a radio play lets you know that the good guy is coming to get some.

# FIFTEENTH ANNIVERSARY The 15 Least Rewarding Endings of All Time

# 1. Sentinel Worlds 1: **Future Magic**

#### **ELECTRONIC ARTS 1988**

You win and immediately drop to the DOS prompt.

#### 2. Eve of the Beholder

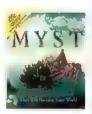

# 1991

You kill the beholder, get a text box victory message and drop immediately to DOS.

#### MYST

#### BRODERBUND 1993

After winning the game, you are automatically put back into the game. Some reward!

#### 4. Star Trek V: The Final Frontier

#### MINDSCAPE 1990

Paramount's ban on destroying the Enterprise caused this illogical simulation within a simulation ending.

#### 5. QUAKE

#### ID 1996

After you were teleported into Shubniggurath's body, the id-meisters congratulated you for beating QUAKE. Big deal!

#### 6. Starflight 2

## **ELECTRONIC ARTS**

If your crew was destroyed, you lost your saved game files, as well.

#### 7. Laura Bow in The Dagger of Amon Ra

#### SIERRA 1992

After reaching the final act, Laura's inventory was inaccessible. Players suddenly needed notes they hadn't realized they needed to take.

#### 8. EF2000

#### **OCEAN** 1996

After finishing a campaign, you receive the enlightening screen that informs you, "Campaign Won" or "Campaign Lost."

#### 9. Champions of Krynn

#### SSI 1990

Upon the completion of the quest, characters were "rewarded" by having their most powerful artifacts

#### 10. Darklands

#### MICROPROSE, 1992

After giving up its wealth and health to defeat a demon from Hell, the

party ends up penniless at an inn with lots of fame points.

#### 11. Al Unser's ARCADE RACING

#### MINDSCAPE 1995

in a return to the victory screens of the '80s, you finish first in a season and get one lame picture of a trophy.

#### 12. Might & Magic II

#### NEW WORLD 1989

After winning the game, your characters each get 50 million experience points. For what?

#### 13. Witchhaven fi

#### CAPSTONE 1996

The end of game screen features a skull. Then, a butterfly flies off the skull. Strange symbology?

#### 14. Jinxter

#### RAINBIRD 1988

Even when the player won, the protagonist died. Happily ever hereafter?

#### 15. Ultima III

#### ORIGIN 1983

After all the mega-combat in this game, the actual dispatching of archvillain Exodus was anti-climactic.

# SURF AND DESTROY

#### who?

youl immersed in the first-person perspective, you play a renegade hacker trying to destroy an insidious virus launched by Rood O'Dor, an evil genius out to trash the world's: computers.

## what?

vertige!
negotiate realtime 3-D
interactive
mases featuring
multi-threat
traps, dissying
pratfalls, and
pussling enemies
by mastering a
progressive sev
of gravitydefying skills

#### where?

surf to 18
virus-mutated
mase-like
worlds, freefloating through
a bizarre
interpretation
of the Internet.

#### when?

octobar! at your local software retailer

#### why?

because PC game players deserve the same mindbending thrills spills, and skills formerly available only on high-end cartridge games

# VILLETTH AND VERTER TO 15 Tep Vaporware Titles in Computer Game History

# 1. Champions

**Exception-driven rules and weak game** design document caused this to be the ultimate victim of the dreaded CGW cover curse.

for years, the game finally shipped, as an anticlimax.

#### 11. Falcon 4.0

SPECTRUM HOLOBYTE Due: 1993 Delivered: 1997?

After more than one design team shake-up and more cost overruns than the real F-16, Spectrum hopes this will replace the metal fatigue on Falcon 3.0's wings

#### 12. Myst II

BRODERBUND

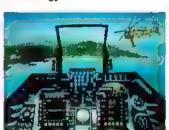

Due: 1995 Delivered: 1997?

A tough act to follow, since everyone now develops with SGI machines to create similar environments.

#### 13. Strike Commander

Due: 1991 Delivered: 1994

The haze you see from the cockoit is emblematic of this title's troubled development on the bleeding edge of technology.

#### 14. Married With Children

MONARCH

Due: 1989 Delivered: Never

Now-defunct Monarch Software had the license and the "Hollywoodstyle" producer who said he could do it. He couldn't.

#### 15. Murder on the **Orient Express**

SMOKING CAR

Due: 1994 Delivered: 1997? Would photos from every mile of Orient Express track quarantee a

great game? We may never know.

HERO GAMES

Due: 1992 Delivered: Never

#### 2. BattleCruiser 3000

DEREK SMART Due: 1993 Delivered: 1996?

Derek Smart's design of galactic proportions went through more companies than Liz Taylor has husbands.

LUCASARTS

DUE: 1992 DELIVERED: 1995

After nearly killing three design teams, Spielberg's first interactive experiment

had moments, but was very dated in look and feel by its arrival.

#### 4. Return to Atlantis

**ELECTRONIC ARTS** Due: 1985 Delivered: 1988

One of EA's first scheduled games, four years later, it became one of their worst-ever games.

5. 20,000 Leagues **Under The Sea** 

REICHART VON WOLFSHIELD Due: 1989 Delivered: Never

Beautiful graphics were sunk deeper than the Nautilis when Disney legal threatened to sue.

#### 6. Mean Time

**INTERPLAY** Due: 1989 Delivered: Never

This Wasteland sequel succumbed to the death of the Apple II and to the virus that ate interplay's homework.

#### 7. Return of the King

**INTERPLAY** Due: 1993 Delivered: Never

The final segment of Lard of the Rings trilogy may never escape from Sauron's clutches, due to the aging of the series engine.

8. The Elder Scrolls: Daggerfall

BETHESDA

Due: 1994 Delivered: 1996

Featuritis and creeping technology has held up this potential jewel for far too long.

# The Next 15 Years

A Look Back From CGW's 30th Anniversary

#### by:Keith:Eerrell:

#### Fall, 2011, Somewhere in the electroniverse:

he 30th Anniversary Computer Gaming World was due any nano now and Jack couldn't wait. It was his birthday as well as CGW's, and that made it a special day. They were the same age and there was no question that they shared the same interests.

#### GAMES.

Computer games. (Was there any other kind?)

The only thing Jack lived for more than the moment the latest ish washed into his system was the games CGW covered.

Jack lived to play and played to live—it was a happy arrangement.

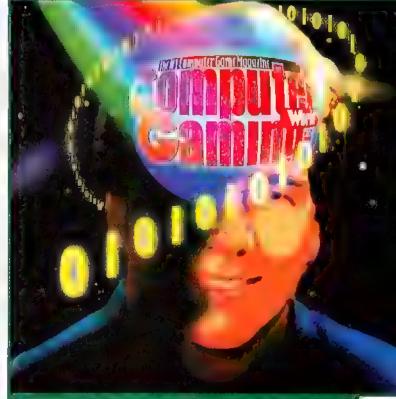

The aimless gameless didn't see it that way, of course, but then they never had. As a kid he'd had aunts and uncles, teachers, neighbors, even other kids who just didn't get it. But there were less of them every year, and every year Jackie cared less what they thought and listened less to what they said. Their words couldn't reach him over the multi-fracks that were games' latest rave.

Besides, Jackie knew he was tracking right—otherwise why even when the New Mill was less than two years old had CGW moved past Reader's Digest as the world's biggest monthly? And that was when it was still on paper, for byte's sake.

Well, it wasn't a paper world any more, and Jack wasn't a kid anymore either. But he still had a child's impatience on his birthday, and he figured he had a right to that. Waiting was never easy for him. But he had ways of passing time, of making time disappear.

Jack submerged himself in his system, all senses extended, cata loging his game cosmos, powering up, stretching out, becoming one with his games.

You are, Jack thought as he surged outward, what you play.

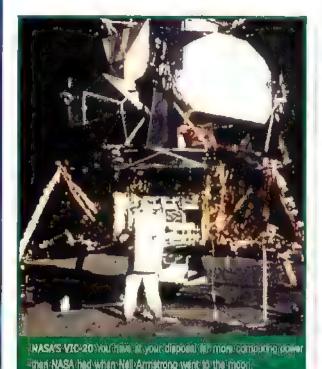

TO COME AND ADDRESS OF A STATE OF THE PROPERTY OF THE PROPERTY

#### THE VIEW FROM NOW

Players of computer games—and that's a growing number of us humans—are living in an age of wonders. If you doubt that, drop back 15 years or less

You call those computers, those boxes with their mono monitors and clunky tape or clunxer disk drives, with jagged sprites moving across

small screens, mostly without sound? We did call them computers—
they were computers, after all—and in the context of their times they
looked more science lictional than they ever will again. Computers and
computer games are so much a part of our electronic environment now
that we've forgotten how revolutionary 64K (or less) and a green or
amber screen were.

"I remember what a kick in the head it was to see the first MacPaint," says Al Lowe, designer of Sierra's Leisune Suir Lanny series. "Black and white on that tiny screen, but wow." That was 1984, when the hottest games used... text.

Today, we take it for granted that great graphics—and sound, and animation—are part of our games, and that they're going to get better.

"The computer manufacturers know this, too," says Derek Smart, designer of Battlecruiser 3000 AD, a game that's been in development long enough to see a number of generations of hardware become obsolete. "They know that people use their machines for games, and that's why you're seeing 3D accelerators, plenty of RAM, and all of it on inexpensive machines."

You have at your disposal more raw computing power than NASA had when Neil Armstrong went to the moon. You use it, as do most people who own personal computers, whatever they claim, to play games. Compared to 15 years ago—or 10 or five—you have everything you could ever want,

But show me a gamer who's satisfied and I'll show you someone who's never had a dream. The best of today's games can't compete with our dreams of tomorrow's games, can they?

So what will tomorrow bring?

Whatever you want seems to be a pretty good guess.

#### LOOK AT THAT!

Short term, call it five years out, we're looking at another round of

improvements in the appearance, speed, and feel of computer games. The sorts of technologies that have attracted a lot of attention in bits and pieces—great graphics here, fantastic animation there, those sounds over there—are going to start coming together.

"I think we're undoubtedly going to see another jump in graphics capabilities," says Al Lowe. "Combine that jump with increases in speed, movement, animal on and you're going to get worlds where you can move anywhere, see anything from any angle, and do it while getting rid of those giant light pixels, letting us have gorgeously realistic high-res worlds to play in."

Lowe thinks these advances, combined with larger monitors and perhaps even high resolution flat screens, are going to bring about a melding of techniques. "Cross the world of MYST," he says for example, "with a fast action game, and think about what you can do. Graphically, there really aren't any limitations to the possibilities."

No timits? "It's like when I saw *Jurassic Park* for the first Irme," he says. "I remember thinking, *yeah*—now you can do dinosaurs, *real* dinosaurs. You've got dinosaurs on the big screen, and we're on the brink of anything we want on computer screens."

Plenty to look at then, and the odds are you won't be looking at it alone.

#### ALL TOGETHER NOW

Drop back again—not even 15 years. Go back half a dozen and you'd be hard pressed to find more than a few hackers who could talk about the Internet And if you had mentioned the World Wide Web, you'd be halfed as a visionary. (And if you'd Invented it, you'd be rich.)

But one truism of the computer revolution is that its waves of change move ever faster, and connectivity via the net, the Web, services—name your connectivity poison—came of age faster than any innovation in the history of the industry.

"There's no question that future of computer gaming is multi-player," says Bill Stealey, president of interactive Magic. Stealey's perspective goes back to the earliest days of personal computing: his first games at MicroProse were distributed in ZipLock bags.

Today, Stealey thinks that the days of solo computer gaming may be nearing an end. "People will still go one-on-one with their computer games," he says, "but primarily to practice for group sessions." The next five years, he argues, will see the groundwork laid for multiplayer gaming's dominance of the industry. The reasons are technological—the growth of the net, availability of high speed telecommunications, plenty of server power—but also social

"Single play," Stealey says, "just can't compete with the challenge of facing another person or group of people. You will have communication during games, learnwork, a sense of being part of something Multip ayer computer games will become a social activity just like a softball game."

Derek Smart thinks that multiplayer gaming will move to the forefront as well, but for reasons having much to do with the limitations of computer opponents. "Gamers want to challenge a mind that is prone to flaw," he says, something you don't often (bugs and sloppy code notwithstanding) get with computer opponents. "A serious player wants to be up against something equal or similar to himself, an after ego, if you will."

# You're in a low-resolution world when you put the goggles on. And in the world of gaming, high-res wins over low-res every time.

Undoubtedly we all will, many if not most of us all at once. And once we're facing the reality of a human opponent, the question arises as to whether we will face each other's reality virtually.

#### VIRTUAL WHAT?

VR was all the buzz before the Web cornered the buzz market, and a great deal of technical attention and research is still being devoted to developing virtual reality tools and systems. It just doesn't seem likely that we're going to be playing many of our games inside such systems.

The problem, many think, is one of resolution. We've grown accustomed to ever increasing graphics quality displayed on bigger and beller screens. VR goggles just can't compete.

"Those VR goggles put too many pixels too close to your eyes," At Lowe says. "You're in a low-resolution world when you put the goggles on. And in the world of gaming, high-res wins over low-res every time."

Technically, virtual reality still holds a lot of promise, but increasingly that promise seems to lay in fields such as medicine and engineering, not computer games.

#### THE MORE THINGS CHANGE

So if we're not going to be playing in some version of the holodeck, what interfaces will we be using?

In many ways they'll resemble our old familiar inputs: joystick, keyboard, mouse. The devices are ubiquitous, we're accustomed to them, and they're flex ble—there's not a lot of input you can't put in with one of these tools or a comb nation of them

There is, however, one other input/interface device that is ubiquitous and that most of us know how to use, and that is the spoken word.

Watch for a rapid explosion in voice processing technology, all but immediately incorporated into certain types of games. Biti Stealey thinks that our voices will become our primary housekeeping interface with our household computers: "You'll just tell your computer what game you want to play," he says, "you'll tell it to get your regular opponents on the line, or to round up a new group. And when you're done, you'll have your computer to put everything away. We're going to have HAL in our homes!"

Another area in which voice processing is likely to have a large impact over the next decade and a half is in role-playing games. Increasingly, such games will be distributed over the net where, as with every other type of multiplayer game, we'll be talking with each other.

But there's no reason why we shouldn't also begin talking with our computer opponents. It's been tried before—remember saying "Fire!" into that microphone that came with some space war simulators a few years ago? That, though, was hardly a conversation and hardly effective.

Have you talked to a telephone operator lately? Human or machine? Sure, you can tell now, but as with every other aspect of computer technology, now is a fleeling term. Voice processing technology is growing up fast, and it's going to move out of the phone companies and corporate offices and into our role playing games well before the next 15 years are past.

#### WORLDS OF OPPORTUNITY WITHOUT END

Combat simulators, role-playing games, interactive movies, arcade games, strategy worlds—all of the categories of games we know and love are going to evolve and grow over the next 15 years.

But it could well be that we'll also see something,... different. It's happened before, and sometimes it makes hits. Chris Crawford's BALANCE of Power was one. SIMCITY was one, MYST was an even bigger one, and DOOM the biggest of all. The game that comes out of left field, somet mes way out of left field, to redefine computer gaming

It could be time for another one... or several.

Gentry Lee thinks, in fact, that the next decade and a half may well be the ripest time yet for that sort of explosive arrival, a debut that warps the whole garning field in new directions.

A scientist and novel st whose latest book is *Bright Messengers*, Lee is currently wrapping up RAMA for Sierra, a game based on the series of novels he wrote in collaboration with Arthur C. Clarke. Combining the perspective of the scientist with that of the novelist, Lee thinks that we may be missing a point by focusing too much on the ways in which technology is going to evolve.

"We're going to see a whole new type of storytelling," Lee says. "We're going to see the sorts of stories that no words can tell, at least by themselves. The very *idea* of storytelling is going undergo a transformation as we develop a fully enveloping medium, with a level of drama and possibility that we've only just begun to glimpse."

#### OTHER WORLDS MAY BE ENDING

Not everyone is excited about the future. Harlan Filison, for 40 years now one of the most provocative writers anywhere, sees the emergence of interactive technologies and gaming as precursor to the end of language. Despite the amount of new writing he did for the recent interactive version of his I Have No Mouth And I Must Scream, Ellison is hardly sanguine about the impact of computer games on literacy.

"I feel an abject terror," Ellison says, "because I think we're living in the twilight of the word. There will always be books, but they're going to reach a smaller and smaller audience. Because the masses—that maleable, plastic wad of faceless people we call the majority—are the ones to whom technology is slanted, seducing them away from the word and into the image," The marketers, he feels, are going to do us in

It's a feeling shared by Chris Crawford. "The marketing of computer games has steered the industry into an evolutionary blind alley," Crawford says. "A decade ago, we had all this potential, and the liberat-

ing factor of not yet knowing what a computer game was supposed to be, and the industry just hasn't grown." Crawford blames this situation on the reient less quest for market share on the part games publishers. "They decided that there were certain categories of games, and those are the same today as they were in the days of the Apple II, when the industry got started. Something is profoundly wrong about that,"

Crawford thinks it likely that the field will turther divide over the next 15 years, splitting into the computer games industry and the interactive enterlainment industry. Both sides, he feels, will be dominated by the same lowest-common denominator marketing mindset that in Crawford's eyes has robbed the industry of any innovation.

THE PAST IS PRELUDE

Whether or not the seeds of a stagnant industry were sown over the past decade, a lot of lessons were learned. And each of those lessons,

whether positive-"this is great"—or negative-"noops"—provides a foundation on which future games will be built.

Having learned so much about the nature of computer games, it seems only fair that computer games should learn some things about us. At least that's the vision Pat Cadigan has. Among the most respected science fiction novelists currently working—her *Synners* should be required reading for anyone interested in evolving technological societies—Cadigan thinks we're about to see a feap in the Intelligence and capability of our computer opponents.

"We're going to be playing against things that are more like living creatures," she says. "Our artificial opponents are going to fearn the ways in which we think and play, and they'll be putting that knowledge to work against us. They're going to be tougher, smarter, and more adaptable, all of which will make for better and better games."

A serious student of the present, as well as of the future, Cadigan thinks too much is made of the power of computer garnes to "steal" us away from the "real" world. "When people want to play garnes," she says, " they're going to play garnes. And when they want insight into the human condition, they'il turn to media that offer insight into the human condition. Game players never mistake what they're doing for anything else, and it's a mistake to think that they do."

Gentry Lee thinks that we may see a combination of game playing with those insights that traditionally come from other arts. "Somewhere out there," he says, "is a master who is going to be able to do it all, programming, writing, storytelling, game design, all of it. And when he or she arrives, their work will create the same sort of impact as the best of fiction, or art, or movies."

Lee thinks that the coming revolution in computer games will feed back into traditional art forms. "Just as painters learned new tricks when photography came along, so will our novelists, and painters, and filmmakers add new tools to their palettes as computer games become themselves a fully recogn zed form of art."

### IMMERSE YOURSELF

Whatever form or shape, familiar or as yet unknown, tomorrow's computer games assume, there's little doubt that they will wrap themselves around us and draw us into their realities to a degree we can only glimpse from our present perspective.

Al Lowe thinks we'll actually see *ourselves* in games. "A whole industry will grow up," he says, "that will put your face, complete with expressions, in your favorite games." Leisure Surr Keith? The mind boggles.

Bill Stealey sees a real golden age of interaction on the horizon. "I want to create a virtual battlefield," he says, "with lots of different equipment, all of it linked, every player in communication, a real multiplayer writtel world."

"The fantastic worlds are going to be far more realistic," says Pat Cauigan, "and thus far more persuasive. Our illusions are going to look very realistic... and that's going to raise the level of the entire gaming experience."

Gentry Lee speculates about the possibility of a *total* experience. "Your imagination working in concert with the storyteller's imagination and the game designer's imagination to create something that has never existed before. You could have something that's going to be far more real, and far more dangerously real than any reality you've left behind."

The future has a way of surprising us. The boldest of speculators a decade ago did not foresee the power and affordability of even low-end systems today. And it may well be that even the boldest speculations in this piece pale beside the reality that unfolds as the next fifteen years pass...

### ENDGAME

Fall, 2011, somewhere in the electroniverse:

The wave was here. Jackie fell it arrive, subtle nerve-stim letting him now the info-flow wave was breaking right now into his system, into him. He let the issue flow through him, became one with it, just as he did with the games he played.

it was a great issue and he would hold it livewire for a white. There were things to feel again before he archived it.

A great issue, a great day. He felt his games calling to him again and before he yielded to the call Jack allowed himself one wistful thought. Sometimes when CGW flowed in, he missed Johnny Wilson, gone these last few years to follow his call of the ministry.

Couldn't fault old JW for that, Jack thought as the games floated back to the forefront of his consciousness. Admirable, really.

Besides... maybe he just got lired of preaching to the converted. Jack.., played.

### CARDS

### The 3D Wave Hits The Shores

Here's How The First Generation Of 3D Video Cards Really Stacks Up

BY LOYD CASE

f you've been eagerly anticipating the wave of 3D graphics. cards, you're not alone. Our e-mail coffers have been overflowing with requests for information on the performance of the first generation of 3D graphics accelerators. Last year, we saw the dominance of 64-bit, 2D graphics cards; this year, 3D is king. With that in mind, we split this survey into two parts, so we can take a look at the full spectrum of 3D offerings bitting the streets. This month, we look at the Matrox Mystique, three cards using the S3 ViRGE chip. (Number Nine's Reality 332fx, the Hercules Terminator 3D. and the Diamond Steath 3D 2000XL), and the ATI 3DXpression PC2TV, as well as two 3D-only add-on cards that use 3Dfx's Voodoo chipset (Diamond's Monster 3D and Orchid's Righteous 3D), Oh yeah, did I mention we'll be looking at three 2D cards-the Hercules Dynamite/128 Video, VideoLogic Grafixstar 600, and STB Lightspeed 128-too? (Ho-hum.)

The prying question is, Does 3D actually deliver? The short answer is Yes; you'll get better image quality, solid DOS performance (in most cases), and good Windows performance out of these first-generation offerings. But as you'l see, the 3D performance of some of these cards isn't all it's cracked up to be. That said, let's dive into the numbers.

### MATROX MYSTIQUE

Last year, Matrox took the 2D graphics world by storm with the highly praised Millennium. It delivered stellar Windows performance and solid DOS performance and was popular with many gamers. Matrox comes back this year with the Mystique, its first 3D accelerafor tuned for the demands of computer games.

The Mystique is kind of a mixed bag, its 2D performance approaches that of its sibling, the Millennium, but its 3D feature set is somewhat lacking. According to Microsoft's 3D Test tool supplied with the DirectX 2.0 developer's kit, the Mystique should be a 3D screamer. However, this didn't turn out to be the case with HELLBENDER, a Direct3D game. We saw frame rates during heavy action as low as 4 frames per second (fps), even worse than the 2D cards in the roundup.

On top of that, the Mystique lacks some key 3D image-enhancement features, such as bilinear filtering (which smoothes out blocky lextures), aipha blending (for transparency) and fog effects. (For more information on 3D jargon, see the August Issue.) The Mystique sh.ps

With an enhanced version of MECHWARRICH 2. Because of the lack of texture filtering, this version of MECH 2 doesn't look as good as ATI's version, and we didn't see that performance was markedly better than the ATI-enhanced MECHWARRICH 2.

The Myslique is a good choice where 2D graphics are the main thrust and 3D is only a secondary consideration. The Mystique's Winbench performance was the best of the roundup, and its DOS

Pros: Fastest Windows 2D performance in the

Gons: Lack of key 3D features, including bilinear

Software Bundle: MechWarmor 2 (enhanced), Sconched Planet, DESTRUCTION DEABY 2, MONSTER TRUCK RALLY (demo version), a software MPEG playpack utility, and the WIRL VRIML plug in for Nelscape 2.0 or Microsoft Internet Explorer 3.0.

Price: \$199 for 2MB, \$259 for Upgrade

Contact: Matrox, Inc. (800) 844. 8312 http://www.matrox.com

performance was second only to cards with the ET6000 chip, a 2D only accelerator.

Installation and documentation were up to Matrox's usual high standards, and we encountered no major installation headaches. The Mystique has VESA 2.0 SVGA support built in, avoiding the need for a VESA add-on utility like Scitech's Display Doctor. Also available is a set of daughterboard upgrades, including one for MPEG playback and another for NTSC video output for display on a television set

We reviewed Mystique last month, giving it four stars. But upon further review, we're inclined to revise that rating. Admittedly, perfor mance in one Direct3D title is not a comprehensive indicator, but what we saw initially wasn't very encouraging. Cons: Pricey for what you get

SOFTWARE BUNDLE: TERMINAL

VELOCITY, SCREAMER, HAVOC,

MB version available).

http://www.nine.com

Realtimation STE, and Web

Price: \$199 for 2MB card (no 4

The Reality 332(x is the first of a trio of cards we looked at based on S3's ViRGE accelerator. At its heart, the ViRGE is basically a 2D

> accelerator-using the same core as the S3 Trio64V+-with 3D features bolted on. The fist of features used in the VIRGE is impressive, including bilinear filtering, MIP mapping, and alpha blending. Unlike the other two VIRGE cards we evaluated, Reality 332fx on y comes in a 2MB nonupgradable configuration.

> > Of the three S3 cards, the Reality 332fx turned in the slowest performance on Direct3D Test. Its DOS VGA benchmarks were also the slowest, includ-

> > > ing the game benchmarks we ran, But in SVGA tests. Number Nine held is own. Winbench 96 lest scores placed it smack in the middle of the

pack, however, Interestingly, its performance in Hellaender belied the slow Direct3D Test numbers, with a frame rate range of 9 to 19 fps. depending on the intensity of the action.

Serventer

Like most of these 3D cards, the 332fx ships with some bundled titles. Of these, one of the more interesting is a light version of Realtimation, a virtual reality modeling-and-simulation package.

Installation was fairly straightforward, but we encountered bugs in the Hawkeye resolution utility, which crashed frequently. However, we were able to tweak color depth and resolution settings through the normal Display Properties control panel. At a list price of \$199, the Reality 332fx is not the least expensive nor the fastest card around As such, it's not a particularly strong value.

### **HERCULES TERMINATOR 3D**

The Terminator 3D is another S3 VIRGE card, and we checked out the 4M8 version for this review. Benchmarks were mixed for the Terminator 3D. DOS benchmarks were pretty much on a par with the other 4MB ViRGE offering we tested, the Diamond Stealth 3D 2000. Winbench 96 scores were the lowest of the ViRGE cards, and were actually the lowest of this month's roundup, reflecting a fairly immature set of drivers. Direct3D Test results were inconsistent. On one hand, the Terminator's fill rate was faster than the other S3 cards', but ris polygon throughput dian t foliow suit. However the HELLBENDER performance seemed a bit better than that of the other two S3 cards, lopping out at 25 fps in some parts of our test.

Installation of the Terminator 3D was a breeze, and the Powerdrive utilities let us tweak all oraphics parameters within a single controt pane:

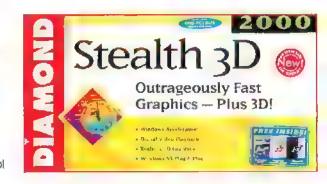

Overall, the Terminator 3D lurned in good DOS performance and reasonably good 3D performance. We anticipate that Windows 2D performance

HERCULES TERMINATOR 3D Pros: Great price, best 3D performance of the VIRGE cards; good lech support cons; Slow Windows 2D performance: limited Software Bundle: DESCELO !! bundle and possibly one additional title Price: \$129 for 2MB, \$159 for AMB (FDO DRAM) Contact: (800) 532-0600 http://www.hercules.com

will improve with subsequent driver revisions. Given the very aggressive price of the Terminator 3D, it's an interesting alternative to some of the other cards in the roundup if you're on a tight budget. Hercules offers stellar support and is the only company in our roundup to offer a toll-free technical support line.

### DIAMOND STEALTH 3D 2000XL

Diamond sent us their newly released 4MB version of the Steaith 3D 2000 for our roundup. Of the three ViRGE-based cards, the Diamond had the hottest Winberch scores, and while the 1024x768x256 color score was only average, the 640x480x65,530 color score was near the top of the heap. In the Direct3D Test, the Stealth 3D posted solid scores—near the middle for fill rate but near

the top for polygon throughput.
It posted pretty much midpack scores in our Hellbender testing, with frame rates ranging from 7 to 18 fps.

The Stealth 3D's installation was straightforward,

allhough we did encounter a bug (which

Diamond acknowledged) in the installation process for DirectX. The simple workaround is to use Windows 95's Explorer to launch DirectX's selup program, instead of the AutoPlay script that runs when you insert the CD. The Diamond control panel integrates nicely into the Display Properties'

Overail, the Stealth 3D 2000 is another solid offering from Diamond: It's a very respectable Windows 2D performer and offers decent DOS performance and moderately good 3D at an affordable price.

### ATI 3D EXPRESSION PC2TV

This new card uses ATt's Rage II second-generation 3D chip. It layers 3D functionality onto the Mach 64 2D graphics accelerator, including britinear filtering, alpha blending, z-buffering, fog effects and sub-pixel accuracy. In addition, this adapter boasts a unique featurer built-in NTSC capability. Now you can hook your computer up to your 60-inch large screen TV - the Xpression supports up to 800x600 when

using the NTSC port—and really see MECH-WARRIOR 2 in a lits glory. Well, at least in theory. The chore of carting your game ng into the family room to hook up to a television may

be a bit much, but the capability is certainly enticing. Imagine videotaping your best gaming sessions..

Having said that, the performance of the ATI 3D Xpression is stunningly average. DOS VGA and SVGA benchmarks were among the lowest of the group, although Winbench 96 performance was quite good. The Direct3D scores were pretty good, with a fast fill rate, but fairly slow polygon throughput. Hellenden performance was so-so, with frame rates ranging from 7 to 15 fps. Unlike some other allpurpose cards, the ATI card pretty much stayed in the 12-13-frame-persecond range, varying less than the extremes might suggest The ATI enhanced version of MECHWARRIOR 2 looks very nice indeed, completely obscuring the fact that it's only running at 512x384 resolu tion. The filtering of the

ground and sky textures, plus

the animated sky, adds a dramatic touch of realism to the game.

Overall, the 3D Xpression PC2TV is a very interesting card, sporting a solid feature set and moderately good performance.

### **HERCULES DYNAMITE/128 VIDEO**

Given all the focus on 3D these days, one wonders why anyone would come out with a 2D only accelerator. Some of the most technically savvy gamers around hang out in CompuServe's Flight Simulator Forum (GO FSFORUM). The Hercules Dynamite/128 has gained favor among a good number of them, and for good reason. The Dynamite/128V is one of three cards we evaluated based on Tseng Labs' 128-bit ET6000 chip-set. No other graphics chip can touch the

### HOW IT SOUNDS.

They kick out your favorite music with riveting, concert hall energy. Blast game effects with blistering, movie theater intensity.

It's the amazing new Compaq Presario home collection featuring the revolutionary JBL Pro Audio system. You've never heard anything like it before.

JBL engineers teamed with Compaq to create the industry's first truly integrated sound system.

Everything(we mean everything!), is designed to deliver thrilling, in-your-face sound reproduction

in an up-close environment, just like in professional recording studios. You can boot it up, and crank it up.

The new Compaq Presario PCs with JBL Pro Audio. The only line of PCs that can handle musical numbers as accurately as crunching numbers.

plional JEL Subwoods:

so that we didn't even bother printing them, since the 2D cards didn't meet our minimum criteria for 3D feature sets. But when we ran HELLBENDER, a Windows 95 Direct3D title, we saw frame rates ranging from 6 to 15 fps-not too shabby for a 2D-only card.

For DOS games, the Hercules card excelled, edging out the STB Lightspeed/128 by a hair. Winbench performance, however, was the slowest of the three ET6000 cards at 1024x768x256 color by a wide margin, although all three cards were pretty much on par in the 640x 480 x 65,530 color test. If you're still a hard core DOS gamer for the most part, this card is hard to beat.

### **VIDEOLOGIC GRAFIXSTAR 600**

East year, we were pleasantly surprised by the decent performance and reasonable price of VideoLogic's line of graphics boards, and its ET6000-based Grafixstar 600 continues this trend. The DOS benchmarks were pretty much even with the Hercules Dynamite/128V and STB Lightspeed/128. The 1024x768x256-color Winberich score was the third highest, though the 640x480x65,530 performance trailed off.

However, the Grafixstar 600 had two quirks that warrant mention: First, frame rate in Duke Nukew 3D was quite a bit slower than the other two ET6000-based cards. A more vaxing problem was in its VESA 2.0 Super VGA implementation. When running Quake at 640 x 480 resolution, the entire game took on a distinctly greenish cast, as if the green values had been pumped up and the red and blue values toned down. Currously, we didn't observe the "seasick lens" effect in DUKE NUKEM 3D or Electronics Arts' Advanced Tactical Fighters, Using So tech's Display Doctor (formerly UniVBE) version 5.3, the problem

tightning fast Windows performance Ontimized for Windows 95 / Direct Draw Exceptional video que: ly SmartVools software for total control From MPEG playback software Five year warrants Unlimited technical support

Lightning Fast 128-bit Windows A

disappeared.

Overall, the Grafixstar 600 is a decent graphics card at a good price, but it's overshadowed by its compelition.

### STB LIGHTSPEED 128

It's kind of ironic that one of the best game bundles in this review

These "traine rates" are reported by Chench, and though wey greatly exceed the monitor's actual refresh rate (50 Hz), they represent the number of "traines" that could be computationally generated. GrafixStar 600 ran Quake in VESA modes with a distinct greenish cast. Using JNIVBE 5.3 lixed the problem.

The S3 ViRGE cards would only run Quake VESA modes with Scilech's display doctor loaded

ships with a 2D card. The Lightspeed 128 comes with Sierra's EARTHSIEGE 2 and SILENT THUNDER (A-10 II), a limited edition of TERRA Nova (the first 10 missions), as well as a number of game demos from Sierra.

The card itself performed quite well, running all the DOS applica

### Lies, Damned Lies, And Benchmarks

ny test methodology is fraught with possible peril and erroneous results. A case in point are some of the toy applications that ship with Microsoft's Direct3D developer's kit. We looked at using two such applets: Tunnel and Twist. Several vendors are already quoting these numbers as 3D performance indicators, but caveat emptor. Unless you know which features are enabled or disabled, these frame rate numbers are at best suspect. Rather than look at frame rate data from these tools, we instead used Direct3D Test, also in Microsoft's Direct 3D kit. It too is far from perfect, but at least gave us a rough indication of 3D performance. Ziff-Davis will be developing a more comprehensive 3D benchmark, due out sometime next year

Here's how we tested. First, the system was always the same, except for the graphics card. We used a Pentium 166 running on a Triton II chipset motherboard, with 32MB of EDO DRAM and 512KB of pipeline burst L2 cache. If the card supported it, the refresh rate was always 75Hz.

We used games wherever possible as test tools, as well as Winberch 98 and CBENCH, a simple DOS 3D performance metric written by Chris Dial.

Unfortunately, finished Direct3D titles were lacking at press time, but we were able to use Microsoft's new Halleenger, which had a simple frame rate counter. We ran HELLBENDER with all graphics features cranked up with a 640x480 frame size. Another problem: HELLBENDER Is able (via Direct3D) to detect and automatically enable or disable rendering features to achieve optimal game performance, but a Direct3D game may not tell you which features are enabled and disabled, even if you set all graphics options to the highest level. Bear in mind that using HELLBENDER as our sole Direct3D game-as-performance metric, we got an Indication of 3D performance, not the final word. That won't be forthcoming until more games-as-tools are finished and shipping.

In using Direct3D Test, we ran at two different test settingsboth at 640x480x65,530 colors—representing different performance points. The minimum feature set allows for the highest possible frame rate. For the minimum test, the settings were:

- · Pat shading
- Perspective correction disabled for texture maps
- Point fittering (rather than the more demanding bilinear filtering).

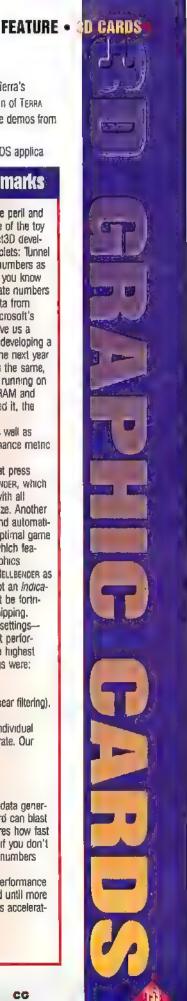

Turning on additional rendering features improves individual frame image quality, usually at the expense of frame rate. Our maximum settings were.

- Gouraud shading enabled
- B inear filtering enabled
- Perspective-correction enabled

We looked at pixel fill rate and polygon throughput data generated by Direct3D Test. Pixel fill rate is how last the card can blast pixels onto a surface, and polygon throughput measures how fast polygons are generated (rendered). Bear in mind that if you don't know which features are enabled and disabled, these numbers become all but meaningless.

Long story short, the 3D numbers here are initial performance indicators, but the full performance story can't be told until more Direct3D titles ship and we see how 3D hardware fares accelerating them. Rest assured, we'll keep you posted.

-Loyd Case and Dave Salvator

tions we could throw at it with aplomb. Its Windows performance was pretty solid as well.

There's not much else to say about the Lightspeed 128, except that it's a solid card at a good price, with good bundleware. What more do you want?

### **DEDICATED 3D CARDS**

This month, we take a wate bundle. look at a pair of dedicated cons: No built-in 3D teatures. 3D add-on cards, one each from Orchid Technologies and Diamond Multimedia. These cards require the presence of a standard graphics adapter for VGA, SVGA and Windows 2D chores. Both cards use the 3Dfx Voodog 3D chipset, and both come with 2MB of EDO DRAM for frame buffer (display memory) and 2MB of memory for storing textures. The 3Dfx based cards use a passthrough cable, so you connect a cable

from your standard graphics card to the 3Dfx card and attach your monitor cable to a second connector on the 3D card. When running accelerated 3D titles, the 3Dfx chipset completely takes over and is not dependent on the 2D card's performance.

The cool thing about these add on cards is that they'll even work with the more mainstream 3D cards, such as cards using the ViRGE and ATI chipsets, taking over the 3D chores when necessary. In fact, several system vendors are doing S3/3Dfx or ATI/3Dfx combinations for their graphics subsystems. Look for them next month in our "Ultimate Game Machine" feature.

The list of features of the Voodoo chipset is a mile long; bilinear filtering, trilinear MIP-mapping, alpha blending, fog effects, accelerated light sources. Let's take a look at the two implementations, which actually differ more than a first glance might indicate. 3D performance on both was impressive, and as more titles ship that take advantage of Direct3D, these will be the cards to have-if you have the bucks.

(Note that although we had final hardware, neither company had

finalized its software bundles, so we'll update you in part 2 of the graphics roundup next month.)

### DIAMOND MONSTER 3D

Diamond's Monster 3D installed easily next to the ST8 Lightspeed 128 2D card (it was running in our system at the time), and the sam ple games we saw were testimony to 30fx chipset's rendering horsepower, impressive though they are, we're hoping for better overall

gameplay in future titles.

The Monster 3D was somewhat slower than the Orchid's offering in the Direct3D test-but that's not saving much. When we ran Microsoft's HELLBENDER WE never saw a frame rate number less than 25, although the frame rate counter was being updated so fast it was hard to read at times. Sulfice it to say that gameplay was so smooth that we never saw any terkiness.

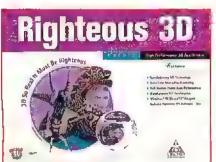

Monster 3D delivers the goods:

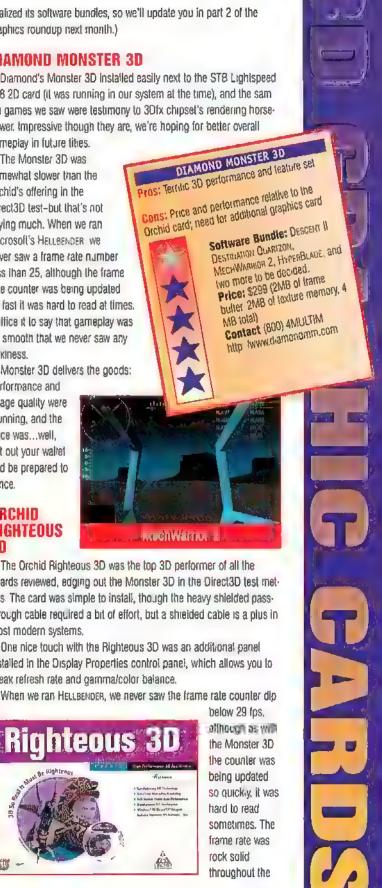

Performance and mage quality were stunning, and the price was...well. get out your waltet and be prepared to wince.

### ORCHID RIGHTEOUS 30

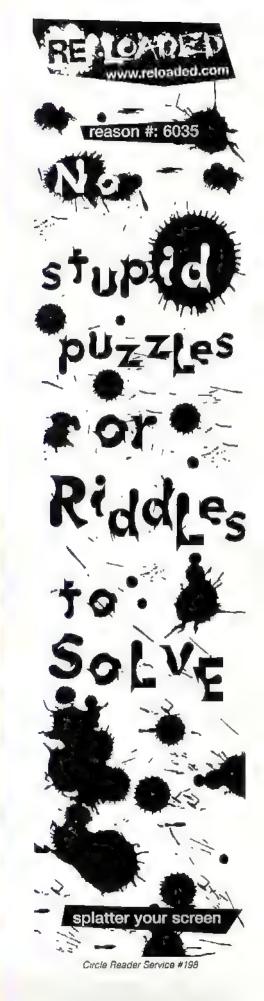

The Orchid Righteous 3D was the top 3D performer of all the boards reviewed, edging out the Monster 3D in the Direct3D test metrics. The card was simple to install, though the heavy shielded passthrough cable required a bit of effort, but a shielded cable is a plus in most modern systems,

One nice touch with the Righteous 3D was an additional panel installed in the Display Properties control panel, which allows you to tweak refresh rate and gamma/color balance.

FEATURE • 10 CARDS

test, and playing Hellbender with this card was a truly righteous experience.

### AND THE WINNER IS...

The age of 3D acceleration is finally upon us, with mainstream accelerators like the Diamond Stealth 3D and the ATI 3D Xpression bringing a new level of really and performance to the standard PC.

Adding a dedicated board like the Bighteous 3D can proced 3D.

Adding a dedicated board like the Righteous 3D can propel 3D game performance into orb t Bear in mind, however, that to gain the benefits of 3D accel-

eration, a game must be written to take

advantage of the hardware. So don't expect Doom or F15 STRIKE EAGLE III to run any faster on these cards. A point to consider. Given the aggressive pricing of many of the 4MB boards, you'd do well to spend a little extra now for more 3D performance up the road.

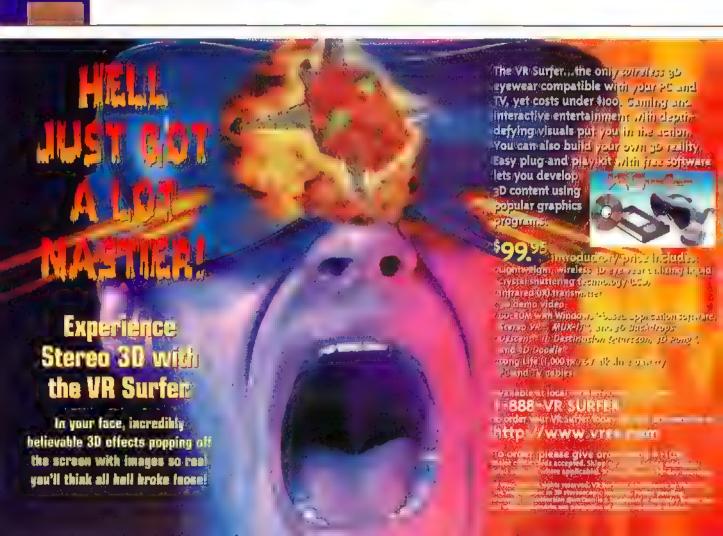

Rumors of the demise of 20 boards have been greatly exaggerated, as the new ET6000 based cards from Hercules, STB and VideoLogic attest. These cards offer superior DOS performance, topnotch 2D Windows performance, and terrific prices.

Of the mainstream cards, there aren't any clear winners per se, though the Matrox Mystique proved something of a disappointment

We'd give the nod in performance to the Diamond Stealth 3D 2000 for its smooth implementation and balanced performance. The ATI card would be an interesting choice if DOS VGA performance weren't a critical factor. The Hercules Terminator 3D is a lough value to beat, with reasonable performance coupled with a very aggressive price.

The best combination, however, would be to meld the 2D performance of a Matrox Mystique, Diamond Stealth or Lightspeed 128 with the Rightsous 3D. Then you'd have the notiest graph as setup for gaming around not to mention one of the pricrest-at least for a white.

Next month, we'll be reviewing Creative Labs' and anticipated 3D Blaster, as we'll as Rendition-based boards from Intergraph and Sierra (yes, Sierra). We'll also take a look at some cards using 3D Labs' Permedia chipset and some higher-end S3-based cards using the ViRGE/VX chipset, and we'll put the intriguing PowerVR through its paces. The age of 3D is upon us, but it's only in its infancy There are still some teething pains to come as this burgeoning technology begins to mature, but this year's 3D cards coupled with next year's crop of games, will bring us one more step on the road to realism. §

### ls Your Computer Sound Asleep?

**HERE'S YOUR WAKE-UP CALL.** Yamaha WaveForce sound upgrade cards will shock your old sound card to life like six cups of double espresso, double caff.

WaveForce upgrade cards replace the outdated music functions of your sound card. Now you get 4MB of wavetable sounds right out of professional Yamaha keyboards. Plus three on-board professional digital effects processors. And the control and extra

features of the Yamaha XG MIDI format. So every nuance of music and games are dramatically reproduced. And General MIDI software sounds better than ever.

If you have a sound card with a WaveBlaster™ connector, choose the

DB50XG daughter board. Or, if your PC has an

available card slot, fill it with the SW60XG and get better sound quality than an audio CD. The SW60XG includes 18-bit digital to analog

converters (DAC). Compared to the 16-bit sound of audio CDs and the 16-bit DAC of other sound cards, the SW60XG doubles and then doubles again the dynamic range. You'll hear louder louds, softer softs, less noise and incomparable performance.

So get a WaveForce DB50XG or SW60XG and wake up to the way your computer should sound. WaveForce sound upgrade cards and Yamaha YST multi-media speakers are available at your favorite computer retailers.

To receive product literature, call (800) 823-6414 Ext. 403 or http://www.yamaha.com. ©1996 Yamaha Corporation of America, Computer Related Products, 5600 Grangethorpe Avenue

SHOULD SOUND.

### Fast, Faster, **Fastest**

### A Performance Report On The Hottest New Processors

Pvc been getting quite a bit of c-mall from gamers

are curious about some of the new processors out there. Usually, people understand the Pentium fairly well, but there's a dearth of information regarding two alternatives to the Pentium; the Cyrix 6x86 and the Pentium Pro. 1 would go so far as to say there's a lot of mythology about them as well, I personally prefer to keep my mythology either in novels or computer games, so I set out to test once and for all how the new kids on the block, CPU-wise, stack up against the Pentium.

But let's take a moment to reflect Less than a year ago, CGW built the

ultimate gaming rig, which used the Pentium 133... now the Pentium 133 is the entry level. By the time you read this, the Pentium 75, 90, 100 and 120 will probably be historical artifacts - a staggering amount of change in such a short time. The high end of the intel CPU line now is the 200MHz Pentium Pro, and the 200MHz Cyrix 6x86 and Pentium are inpping at the Pro's heels.

I took a look at the Pentium 166, the Cyrix 6x86 P166+ and the Pentrum Pro 200, running game-oriented benchmarks. I didn't have either the Pentium 200 or Cyrix P200+, but the actual performance difference is probably around 10 to 15 percent

I wanted the test to be as even as possible for the Pentium and Cyrix, so I used a motherboard with Intel's latest chipset, the Triton 2 (430LIX, for you gearheads.) The Pentium Pro was tested on a P6SNE from Supermicro, and uses Intel's second generation Pentium Pro chipset, code-named Natoma

(440FX). Lused identical peripherals for all the tests. The graphics card was a Videologie Grafixstar 600 graphics card, based on Tseng Lab's new 128-bit ET6000 graphics clup. Disk and CD-ROM access chores were handled by an Adaptee 2940UW SCSI controller attached to a Plextor 6X CD-ROM and a Seagate ST31055NB ultra SCSLICB hard disk. All test configurations had 32MB of nonparity EDO DRAM, I even went so far as to use the same keyboard, mouse and monitor for the sake of consistency.

I ran the Winbench 96 benchmarks for CPU and Windows 95 graphics performance measurements. For DOS game performance, I used CBench, a DOS VGA and SVCA graphics benchmark written by Chris Dial. In addition, Lused OUAKE, DUKE NUKEM 3D and EANADVANCED TACTICAL FIGHTIES for real-world game performance (all at 640x480). See the table for my results.

With the sole exception of DUKE

There's a Pentium Pro in your future. but your mileage may vary.

### inhipofitestille

					labera .			
Processor	Graphics Winnark	CPU Mark18	CPU Mark 82	CBench VGA	Chench 8YGA	Duke Nukem 3D	Quake	ATF
Cyrix 6x86	36.3	302	302	106.1 fps*	30.5 fps	22 fps	8.9 fps	21 fps
Pentium 166	33.7	321	318	121.6 fps*	39.0 fps	30.5 fps	13.5 fps	20 fps
Pentium Pro/ (without Fast		357	542	146.6 fps*	28.9 fps	21 fps	17.3 fps	25.6 fps
Pentium Pro/		N/A	N/A	190.1 fps*	48.6 fps	25 fps	19.8 fps	29.8 fps

"These "frame rates" are reported by CBench, and though they greatly exceed the monitor's actual refresh rate (60Hz), they represent the number of "frames" that could be computationally generated.

NUKEM 3D, the Pentium Pro system clearly outpaces the Pentium 166 and the Cytex 6x86. However, to get the greatest performance boost out of the Pentium Pro, you need to download a little utility written by John Hinckley (no, not the guy who took a shot at President Bonzo) called FastVid, which enables some key features on the Pentium Pro that are disabled by default. These features are—brace yourself—write posting, banked VGA write combining and SVGA linear frame buffer write combining. Without getting into too many mits and bolts,

these features enable the Pentium Pross Level I cache to work more efficiently with graphics output. The result is a dramatic increase in fgame graphics performance.

### FLOAT LIKE A BUTTERFLY...

Then there's the matter of floating point calculations, those arithmetic operations that use noninteger arithmetic for calculations. Most games today use integers (i.e., whole numbers) for many calculations, but more and more graphics-intensive 3D games will more than likely use floating-point calculations for geometry setup. Some current litles—QUANI

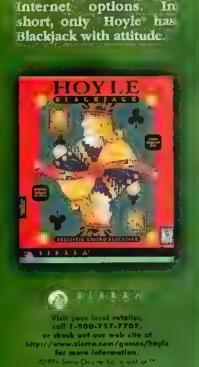

### How Do You Rate?

Testing systems is a tricky business. Even when you think everything is identical except for the item you reliesting—the graphics card for example—you find that results can change from one test to another. Still here are some units on testing your two system with eat applications.

- ATF: To test ATF frame rates go into the promission builder Create a mission builder Create a mission with only one plane (youts) and have it sitting on a runway. Other alread to objects will a fact the negation and impredictable way. Enter the mission Disable the paystick is rice it eats into CPU performance and the potential maximum frame rate. When sitting miyour cockpat and the plane is idle hit Ctrl-F (press the Control key and the Fikey similtaneously). You will see a dumbor represe this frame rate in the series per second at the bottom of your screen.
- ▶ Quake: To test Onake's frame rate, bring up the console window (press the name want to do this past the beginning of a lover to get the best number. Also try it at ull terent resolutions.

- Duke Nukem 3D. Run the Duke
  Nuke n 3D setup program and choose
  the resolution you want to test furning
  off sound will give you a better frame
  rate number. Save the configuration. At
  the DOS prompt, type "cuke3d /m /l1
  /s3". When the spaceship crashes and
  you're actually in the game, type
  "DNRAFE" without moving Duke. You'll
  see a continually refroshed frame rate
  number at the upper left corner of the
  screen.
- CompuServe's Fight Simulator Forum library 13 or from http://www.ofw.net/~sdw/chris3d html CBFNCH is a synthetic benchmark whose only purpose in the is to test libe performance of your graphics system. There are two programs BENCH, which tests VGA performance and SVGABNCH, which tests SVGA performance.
- Finally, to get WinBelich test results you can order a copy of the new WinBelich 97 (available in mid November) for Ziff-Davis's benchmark operation group. Drop them a postcard and ask for the Winbelich 97 CD ROM.

### HEARING AIDS FOR THE GAMING IMPAIRED.

The speakers that came with your computer are fine when you're creating reports and spreadsheets. But when it comes to playing games, your speakers don't cut it. Our ACS55 three piece Dolby® Multimedia Surround Sound Speaker System is an integration of hardware and software that will revolutionize your gaming audio.

Satellite drivers fire multidirectional gaming audio for true surround sound. Combined with Dolby circuitry and our 30 watt subwoofer, you'll hear game sounds that will twist your head around. And our ACS55 system includes WaveCube™ software adding interactive audio steering of your game sound and Wavetable true sound quality technology. Every game sound. Loud and clear.

Your games have sounds intended to a maze your ears. Don't let your computer speakers get in the way.

Circle Reader Serv

for example -- already do. As it turns out, the Cynx 6x86's floating-point usit (FPU) is slower than the comparable Pentium's. In turn, the Pentium's FPU hardware is slower than the Pentium Pro's, which explains why the QUAKE numbers vary greatly from one processor to another

Also, the Pentium Pro shines in performing 32-bit operations—and all Win 95 titles these days are created using 32bit technology (as opposed to older games using 16-bit technology). ATF is a 32-bit game, and hence benefits from the Pentium Pro. The faster clock rate doesn't hort either. However, the Pentium Pro doesn't work well with 8-and 16-bit operations, which shows up in the DUKE NUKEM 3D frame rate results. As it turns out, DUKE NUKEM 3D uses a lot of 8- and 16-bit operations, and the Pentium Pro's performance under DUKE suffers as a result.

tnitially I was disappointed in the performance of the Cyrix chip, but

upon reflection, I realized it's pretty much performing at its potential. The 6x56 P166+ costs less than the Pentium 166, and the Cyrix chip actually runs at 133 MHz, not 166 MHz. So is Cyrix's 6x86 P166+ a Pentium 166 killer? For gaming, not really. It dusts the Pentium 133 for integer performance, but its floating point performance doesn't quite stack up. On the other hand, if you're on a tight budget, and you don't see yourself running a lot of floatingpoint-intensive games, then the 6x86 is worth considering. But if you're not on a tight budget, you'd do well to consider the Pentium 166

What about the Pentium 200? I haven't actually tested a system using the Pentium 200, but initial reports indicate that the Pentium 200 runs only about 10 percent faster than the Pentium 166. Interestingly, the 200MFiz Pentium Procosts less at some outlets than the 200MFiz Pentiums.

### Something Klamath This Way Comes...

The next-generation Pentium Pro chip, code-named Kiamath, will have some interesting features. The built-in Level 2 (L2) cache will no longer be permanently attached. Instead, there will be a snap-in module that may support cache sizes larger than 512KB. The detachable cache module will run a little slower than the current built-in L2 cache, but will run at a faster clock rate and will have a larger Level 1 cache. Intel will apparently offer Pentium Pro overdrive upgrades, for existing Pentium Pros, that will run at a higher clock rate and have Intel's MMX instruction set built in.

### MOTHERBOARDS AND OTHER RANTS

On to my next soapbox. Motherboard technology is advancing, too—in some ways faster than CPU technology. The core logic chipset or CPU support logic are those components on your computer's main system board that builde all the traffic-cop chores for moving data around. Recently, latel has released a new core logic chipset for the Pentium. These new chips, collectively known as Inton II, have greatly streamlined data paths. In fact, it's possible now to build a mother-board that exceeds the capabilities of other components in the system if the designer isn't careful. I had a recent

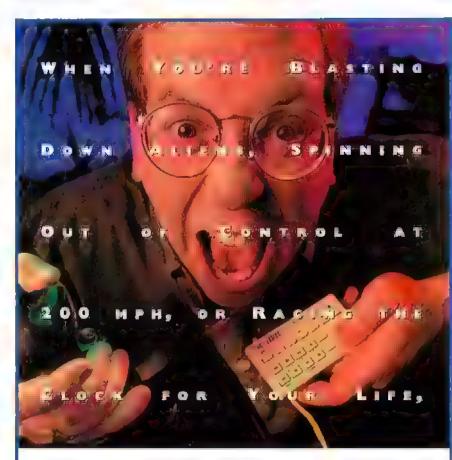

system if the designer isn't careful. I had a recent experience with one company whose motherboard wasn't ready for prime time. In truth, all they did was include a BIOS feature that could really juice up memory accesses—except that most people's memory couldn't handle, creating lockups and other problems. To be fair, the company did fix the problem, and most lifton II motherboards work quite well

On the positive side, Intel also released a new chipset, code-named Natoma, for Pentium Pro systems. Natoma-based systems can use FDO DRAM and are much less problematic than systems using the older Orion chip-set. If you decide to roll your own upgrade, definitely look for boards using the newer chipsets

By the way, if you decide to get one of the Cyrix processors, check with Cyrix to make sure your motherboard is supported. Better yet, buy a whole system. The P150+, the P166+ and the P200+ chips all generate a lot of heat, so a cooling fain is a must Also, the P200+ has an external clock frequency—the speed at which it communicates with the memory bus—of 75MFLz, whereas just about all other systems' memory busses run at 66MHz. Most motherboards can't handle the faster bus speed, so make sure the board you get has a memory bus capable of running at 75MHz.

Finally, what's in store for the future? Intel's MMX lechnology will show up in Pentium processors early next year, and MMX could have a significant impact on 2D graphics performance and audio. MMX will also be embedded in the Pentium Pro later in 1997. Another interesting development, Intel's Advanced Craphics Port (ACP) will be a special interface slot for graphics cards that will take voluminous 3D graphics traffic off the PCI bus's maximum throughput.

Thoully, Microsoft seems to have dipped a toe in the graphics hardware business. At STOCRAPH, the annual conference for graphics gurus, Microsoft announced a reference hardware platform they call Talisman, specifically funed to accelerate DirectDraw and Direct3D applications. Microsoft doesn't want to get into the actual business of making graphics hardware; but instead wants to drive what they hope will be a standard specification (theirs), and license the technology to hardware vendors. Although Microsoft has strayed into the hardware business on occasion (the Windows Sound System, Microsoft Mouse and Sidewinder 3D Joystick), Talisman appears to be much more ambitious. The AGP-based Talisman specification is very aggressive, calling for 75 frames per second running at 1024 s 768 x 24-bit color. More on this in next month's 3D graphics board feature.

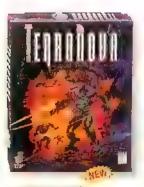

### WHO NEEDS INTERRUPTIONS?

### QUICKSOUND

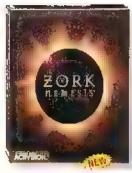

Why kill yourself just to pump up the bass or silence your enemies? With QuickSound, you'll never have to sacrifice performance—or quit your game—to adjust your PC sound. You get instant control of volume, tone, mix, mute and more, with the touch of a button. Pure power at your fingertips. Because it's true what they say: quitters are losers.

### Voice Recognition Finally Starts To Come of Age

by Dave Salvator

2's Interactive's Verbal
Commander is the latest
speech recognition product
designed for games, While
not perfect, Verbal
Commander (VC) does a
good Job of letting you drive
DOS games with voice com-

VC isn't Plug-and-Play, but it's easy to install since it requires only one I/O address (set with jumpers). Its DOS based Verbal Commander utility ships with about 20 preconfigured command profiles for popular game titles.

VC is a "trainable voice-recognition system," meaning that you have to "teach" If commands, which if can lifen recognize during gameplay VC also ships with a headset that uses noise-cancellation to help improve the recognition rate

We configured VC to play QUASE, DUST NOSEM 3D and ET 2000, and for all three titles its bit rate on voice commands was prefly good, even with the

**PAPPEAL:** For action and flight sim gamers who pine for an extra set of hands to man the controls.

PROS: Easy Installation; straightforward configuration utility; pretty good hit rate.

CONS: No native Windows 95 support yet; anneying reboot back to Windows 95 from 90\$ batch file.

games' background noise. VC was sometunes intolerant of deviation from the original command sound, foreing the speaker to repeat a command several times before it would respond. But the hit

can configure games anyway you want K2 currently has a Windows 95 device driver and front end in the works, it's due out late this year. Over and out %

rate was high enough in titles like El 2000.

to make flying the plane easier and more

fun. Plus, VC is programmable, so you

**REVIEW • QUICKSHOT SOUND FORCE SPEAKERS** 

### **Sound Deal**

### QuikShot Speakers Let You Crank It Up For Less

by Dave Salvator

1110

Price: Sound Force 660 S69, Sound Force 800 S149 Vendor: QuikShot Inc Milpitas, CA (408) 263-4163 http://www.guikshot.com

Reader Service #: 327

hat good are a game's killer sound effects and sound track if they're played through a pair of Diste-cup speakers? As a rate, with speakers you do get what you pay for. QuikShot has introduced its Sound Force line of speakers, which deliver impressive sound quality at good prices. We listened to two mod-

The Sound Force 660 is a two-speaker system with no subwoofer (actually, whats often referred to as a "subwoofer" is really a woofer). Despite the lack of a separate woofer, the 660 delivers good bass response and more-than-adequate vol-

els and we liked what we heard.

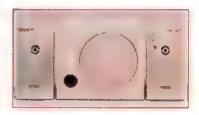

ume levels with the volume control at about 50 percent. Other controls consist of biss/treble, power, and a 1/8-inch headphone jack that mittes the speakers when headphones are used. Caming audio in QUAKE and FT 2000 sounded clean and well defined, with solid response from low

➤ APPEAL: If you've had a hankering for better sound from your system, these bables could be the ticket.

PROS: Impressive sound quality at a good price. The 800's powerful amp and woofer will drive away pests.

CONS: You won't confuse them with Bang & Olufson speakers, but what do you want for tess than \$200?

to high frequencies. Audio CD music also sounded clean, even at louder volume levels, and the frequency response didn't suffer at lower volume.

The Sound Force 800 features a 6 1/2-inch woofer with satellites, each of which is equipped with a 3-inch full-range driver Again, quality was generally good, though some vocal music sounded a bit middy. The 800's amplifier rating 240 watts overall — is four times that of the 660's, and it makes for louder volume levels sans distortion, and beefier bass response with the dedicated woofer.

Both speaker systems deliver good audio for the prace, through the nod would have to go the 660, which at \$70 will greatly enhance any og's ailing audio system. Your ears will see the difference \$\infty\$

### Our New Righteous Accelerate More

### 3D Accelerator Will an Your Graphics.

INTRODUCING RIGHTEOUS 3D. WHETHER YOU'RE INTO SERIOUS
FLIGHT SIMS OR HARDCORE MUTANT-BLASTING, THERE'S NOTHING IN THE
GALAXY THAT CAN PUMP MORE 3D REALITY INTO YOUR GAMES.

Descent<sup>\*</sup>H: Destinution Quartzon 3D Without Rightcons 3D

Descent\*II: Destination Quartzon 3D With Rightcone 3D

That's because Righteous 3D has some of the most advanced features ever designed into a 3D accelerator. Like real-time interactive rendering, dual 64-bit memory architecture, advanced filtering and anti-aliasing,

built-in transparent and translucent effects and Windows' 95 Direct3D" support, to name a few.

But all this rocket science is just technobabble if it can't make your games more fun.

Which is exactly what Righteous 3D does. You not only get eye-popping visual effects—smooth textured images and outrageous atmospherics—you get full speed

interactivity. Something no mere graphics board can deliver.

In fact, Righteous 3D is the first accelerator of its kind that can render complex 3D images at full-motion frame rates.

And much higher heart rates.

No more pixels. No more herky-jerky

stick figures. Just sharp, clear images that move like nothing you've ever seen on a monitor. Which can make good games great.

And great games truly awesome.

So get a grip on reality. Visit your computer retailer or our website at www.orchid.com, or call us for more information at 1-800-806-9142. And see what a little adrenaline can do for your system.

### Life With The Abby Normals

ad ven tu rus, kut under

NORMALITY Offers Up Goofy, Lightweight Fun With An Edge

here isn't much that's normal about Nor-MALITY, a crazy little adventure from Gremlin Interactive and Interplay Produchons. Set in an unspecified

future in the city of Neutropolis, it follows the zany antics of Kent, an unkempt teenage maleontent who just wants to be left alone to do his own thing. Naturally, that's not about to happen

Neutropolis isn't going to get on anyone's most-livable-cities list. A permanent cloud of smog hangs over the city, obsenting sun and sky. Norm troopers are everywhere, ready to enforce the "Stay Normal" motto of Leader Paul, one way or another, which usually means a stretch in the feared Blue Pens for the nonconformist

Kent is very much a nonconformist,

The Crystal Bali foresees many new games set in TSR's AD&D universe.

Sierra Online now has the license to the Birthright world, and is working on its first title, THE Gorgon's ALLUANCE, as well as on a Birthright online game. As the Crystat Batl foretold in September, Interplay has the Forgotten Realms and Planescape licenses.

Take 2 has the Ravenloft and Steel & Bone ticenses, Its first Ravenloft

YOODOO THAT VOODOO NORMALITY features, among other things, one of the oddest PDAs to grace an adventure game. Click on the doll's eyes to examine an object, click on his mouth to talk, and open his chest to open an object

and, as the game starts, has just been released from a visit to the Pens. While doing time, he received a mysterious note from an unknown person. Following up

game, Iron & Blood, will be published by Acclaim Entertainment

Finally, SSI now only has the rights to finish its DARK SUN ONLINE; it does not have the rights to the rest of the Dark Sun world, which are up for grabs. SSI does have the license for the Rod of Seven Parts adventure, and is planning a game for a 1997 release

on that, it isn't long before he becomes involved with an underground movement, of sorts, "Of sorts," because as rebels, these folks are on the meffectual side. They hide out in a dumpster, have no particular plan to follow, and aren't really working in any effective way to overthrow the current government

Kent's arrival on the scene changes all that Not that he's welcomed with open arms, mind you. Before he can join up. he has to prove himself. You get the impression that Eleather, nominal leader of the group, hands him the assignment more to get rid of this stranger rather than as a real test

Of course, when Kent is successful,

Only in NORMALITY can one make coffee from scummy water and white paint, and only in NORMALITY hluow someone drink it.

Scorpia's Top 15 advanture/RPS games? If you want to know. see our Web site.

ROCKET BABE Join the revolution and meet fabulous revolutionary babes, such as the specimen shown here, ready to light your fire.

that attitude changes a bit, and suddenly our hero becomes the "man of all work" for the rebels. In fact, he ends up doing just about everything for them, while they continue to hang out in the dumpster, much as before. I guess old habits die hard. Heh.

### **DUMB AND DUMBER**

While the background sounds grim, and there is a serious undercurrent, this is a comedy and it's all played for laughs. The 3D graphies have a certain cartoony aspect to them, everyone (except Kent) is about as sharp as a britter kinfe, and some

of the puzzles have improbable solutions. Only in NORMALEY can one make a cup of coffee from serimmy water and white paint—and only in NORMALEY would someone drink it.

The interface, like many these days, is a simple affair. When the cursor is over a hot spot you can try one of three basic commands: Examine, Use, or Pick Up. This can be done from the keyboard by hitting the appropriate letter, or by using the game's "voodoo doll," which appears when you press the right monse button while the cursor is over a hot spot. This doll is a caricature of Kent, and clicking

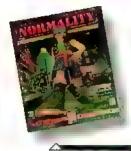

various parts of the body performs different actions. One hand picks items up; the other hand uses them. The eyes look at something, while the chest is used to open doors or other objects.

Moving around locations can be done using cursor keys or mouse; I found that the keyboard was generally easier. The view is mostly first-person 3D, although there are many cut scenes and automated sequences where Kent appears on screen Usually these happen when Kent performs an action that is especially important, or especially bizarre. It's also possible to look up or down by using the Page Up and Page Down keys.

Movement between locations is accomplished by using a map. Places Kent can visit light up as the cursor touches them; clicking the mouse takes him there. Some areas are available thoughout the game, while others are reachable only once. Kent has to learn about, or be sent to, most locations to get there.

Conversations begin when you click on a person. Occasionally, the conversation will be intornatic between Kent and the other person, but most of the time, you have several topics to choose from.

Happily, NORMALTN' allows for text only, speech only, or both speech and text. Since few sound cards are supported—the Gravis is fortunately one of them—baving an all-text option brings the game

NORMALITY TIPS: Having trouble gaining entry to the TV station? It's obvious that the security guard has an aversion to rats, but scaring him with the rubber rat from the malt is not good enough. If you think back to the beginning of the game, you should recall that there's a real rat trapped in your washing machine at home. To open the machine, you're going to need to smash the door with a heavy (frozen) object.

Painting the waffle sculpture yellow, as Heather asks you to do, is no easy task. The first thing to do is to find the extinstatue himself. If there was just some way to set it on fire...

At the Ordinary Outpost, you don't need to destroy the evidence against you, but it changes the game if you do If you decide to do if, you need to fix

the grinder by finding and then attaching two cogs to it. Grab the tadder on the way out to the haulage container—you'll need it to find the smaller cog. Once you've fixed the grinder, throw in every piece of evidence to destroy it.

#### SCORPIA

**DVENTURE/RP**(

within reach of more people. On the other hand, having sound is important, since it is the voice of Kent (plaved by Corey Feldman) that carries much of the game. Seeing the words alone on screen just isn't the same as hearing them.

Save positions are generous; you can have up to 99 of them, as well as overwrite earlier saves. Saving and restoring can be done most of the time; there are a few instances, such as throng conversations, when this option isn't available.

#### RIDDLE ME THIS

Generally, the puzzles are not, for the most part, all that difficult. Many times, what to do in a situation is obvious; it is lawing the right tiem or items on hand that can be treable. Miss something somewhere, and you could be stuck for quite awhite on what is otherwise an easy problem. That happened to me in the Mall toy store. I run the cursor over the tool wall; three items were "dead" spots, and I didn't touch the fourth one. Of course, that

If you do get stuck, the back of the manual has some limbs and obscure clues to solving many of the puzzles. It's fairly detailed on getting you started (out of the apartment); after that, the bants are not quite so generous, but enough in many cases to spar you on.

was the important item.

NORMALTH is also a short game. Major locations are few, and there is much running back and torth between them.

Sequences lend to alternate between complex and simple. Painting the wafile sculpture at the MINT Mall is a complicated maneuver, while playing the video at the TV station is straightforward. Lisewise, reseming Sant is an involved matter, whereas the rescue of Dail Vanderhip is almost a trifle.

The two main irritations I had with NORMALITY were the inconsistent interface and the loading times. Supposedly, you can use keybrand commands for everything in the game, but that isn't true. I first ran rate this problem while trying to destroy evidence in the Research Lab.

After fixing the grinder, I simply couldn't do anything with the items needing destruction. Kent would say "I don't want it" or "What would I do with it?" when I tried to pick up or use the objects. This nearly drove me erazy until, in desperation, I tried the voodoo dol! method, and then everything went well. There were a few other similar instances later in the game, where the keyboard didn't work but the dolf did, I aru surprised that something like this escaped the attention of the playtesters.

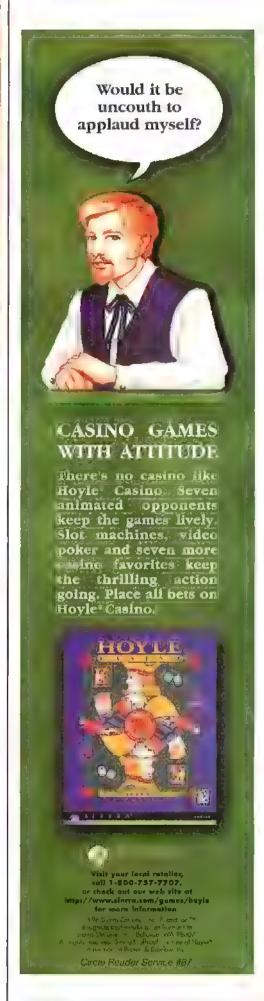

The other annoyance was the slow loading time of new areas. When Kent travels between locations, say from the Plush-Rest Factory to the MINT Mall, you see him either hoking at a watch or jogging through a blue spiral while the new area loads in. There's nothing you can do here but wait, and the wait is a

SURF CITY Kent's adventures take him all over the grimy police state of Neutropolis, including, at one point, a raft ride down the city's polluted river

long one. There were times I was rehielant to travel because of this, especially when I knew it was just to run sumewhere, pick up a single item and then come back.

Overall, though, NORMALTH usn't bad. It has some genuine hinnor in it, and can be a good change of pace if you've been playing something heavy (like THE PANDORA DIRECTIVE) lately. While the game is not likely to keep veteran adventurers occupied for very long, anyone looking for light material and a quick play will probably find it here.

# Opening Pandora's Boxes

Need A Hint? Scorpia Takes A Walk Through THE PANDORA DIRECTIVE

his month, we take a trip through The Pandora Directive, and as there's a lot to cover, we'll get right to it. As you probably know, PANDORA has seven possible endings. Which one you get depends for the most part on how 'tex reacts to people, what deals he accepts or refuses, and how he handles his relationship with Chelsee. This is entirely ap to the player, so I'm not saving much about that, especially as the game path has little. effect on the puzzles. I will mention one milesione along the way. If you take Chelsee to the Flamingo, vou're not on Mission Street

#### DAY ONE

This is get-acquainted-with theneighborhood day. Mostly you bit the stores around the block, finding out exactly how much Tex twes everyone. Paying up is a smart idea, but it's best to leave Nuo at the Ritz for sist, as that gets you into a certain apartment and ends the day.

#### DAY TWO

Recovering from the traditional "Pt gets conked on the head" rontine, you have the chance to search Malloy's apartment. Take your time, look everywhere, and be sure to examine all you find. This gives you more things to ask about around the neighborhood. With the right approaches, Tex ends up with a couple of keys. One opens the warehouse; the other gets you into the Planningo, briefly.

Then it's off to the cabin in the woods, where matters look rather omnous. Before you can open the locked door,

you'll have to go back to Tex's apartment and solve the (simple) color puzzle on the CD and return.

The day ends at the Flamingo; whether Tex is there with Chelsee or not, eventually he slips upstairs for a chat with Earily.

#### DAY THREE

Vbusy one Pirst, you have to reconstruct the lorn note (prefly simple, this one). Who would know best about stalkers and killers? Right, go have a chat with him, Then another round of the streets is in order. after which you should have no trouble getting in touch with Lacra Pernell and setting up a very informative meeting.

Have we been to the roof of the Franhouse yet? No? (Did you remember to ask for the key?) Let's go take a look...after getting past the cop lock, that is 'The first pair's a one-to-one relationship; the rest can be found with some trial and error,

Someone sure was careless, leaving his jacket up here, lespecially with some stuff and. You'll need to take a closer look at the (restored) photo to find out where that place is. You'll also probably want to check out the

> BAK's most recent victim; ask the most likely person, and be sure to look around the room very carefully.

Now you get to break into the offices of a hush-hush federal agency (a Pl's work is never done). First, you have to get the objboard from the receptionists desk (good thing no one is around, ch?). Excrything you need is close at band; pay special attention to the blinds and table.

after you pass through the locked door if you're in Game Player mode There's a guand to be dealt with, which is best done by hightailing it down the left comidor to the storage room (and close the door behind you!) From this vantage point, it shouldn't take you long to figure out how to give the guard the slip (mmore

one). Then you can snoop

around a certain office, being sure to overlook the hookease, among other things.

Whew! You made it out alive. There's one person to talk to (very important), then you can head to the water tower, and watch as the BAK gets ready for another victim. Oh oh! Will Emily survive? Maybe, maybe not. Either way, you have to catch the guy yourself (fucky 'lex). This is tricky, and real-time, too. Basically, you have to get chose to bim without being seen. Timing and moving fast are crucial here, as well as keeping out of sight.

#### DAY FOUR

After the automated conversation with Malden (and a brief glimpse of Regan, Mailoy's daughter), it's time to find the missing box. You'll want to look down under, once you have something from up on top. Don't be too quick to grab it, though. Clacek out the hox first; a trap awaits the unwary (this is not hard to defuse)

TOWER OF POWER Observe the killer in action from the water tower on the Funhouse roof

Sometime after this, Tex will be picked up for interrogation by the Fexls. The rules for survival (Tex can easily die here) are don't be "smart," don't be dumb, don't tell all you know, and don't hang on to it.

There's something in the alley behind the Flamingo you'll want to take a very close look at (once you get it down). A friend can help you find the location. I tow you handle the landlady is up to you, but you must get into the room and pick up everything you can. It's also necessary to leave and return, so you can finally locate Malloy and have a chat with him.

#### DAY FIVE

After checking messages, the first order of the day is to return to the seene of last might's fireworks. Aside from stuff to gmb there's a safe to be opened. The auswer is ou the Everlok eard (the people who give

you a square deal). This provides a couple of things, including an important key, which, of course, you run right off to use. Then you'll have to break the bad news to someone.

Now you hear from darling Lucia again. She doesn't want much, she just

wants you to break min the Fed uffices again Lucky Tex. Remember to ask for a favor in return (after this, by the way, Lucia walls no invaliable until Day Eight).

Ok, now you need a way ur there. The dead can be of assistance here; falk to a pal about that.

Once at the offices, don't head to the Evidence Room right away; there's something else here to check out first.

Now you're ready for a little thievery Four lockers in all can be opened. Two require keys (which you have); the other two are already open (careless, these security boys). Did you notice that "travel" was suppressed when you entered the room? This is deliberate You'll have to do something with the evidence before you can waltz out with it. After this, burrah! You won't need to return.

You'll hear from Regan again, and

HOTEL HELL Nilo wants his money in a bad way, but try to hold out until the end of Day One to pay him off

while she hasn't much to tell, you do get another lead. Before rushing off, though, you might want to open those two hoxes you have. Regan's is easy, if you have something from Malloy's crate, just match the patterns. Early's box is quite another matter, however, and one of the tougher pozzles.

After combining the necessary items, concentrate on the physical relationship between the eithes mentioned (you may already have noticed that the peg holes make no sense when compared with the map). When something appears on the peg board, you'll know you've placed a pair correctly:

Finally, you can go talk to your new contact. Be sure to go over everything with him, you may need to converse twice (the most important thing here is Roswell). Then Fitzpatrick will give you the info you need.

#### DAY SIX

Worried about Archie? You're right to feel that way. I suggest doing something about it, soon. Today and Day Seven take place in the Roswell military facility. This is the easy day; everything here is traditional adventure game stuff. Tes is in the security compound right now; the goal is to get into the mano complex.

As usual, grab everything you can. In Came Player mode, you have to reassemble the paper punches for the code to the laser field room (no code in Entertainment mode). Outside, follow the same routine (only one shed can be opened),

ē

SILERRA

T

## THE SEQUEL TO Heroes of Might and Magic,"

## TAKE A

  - Available for Windows 95 and DOS

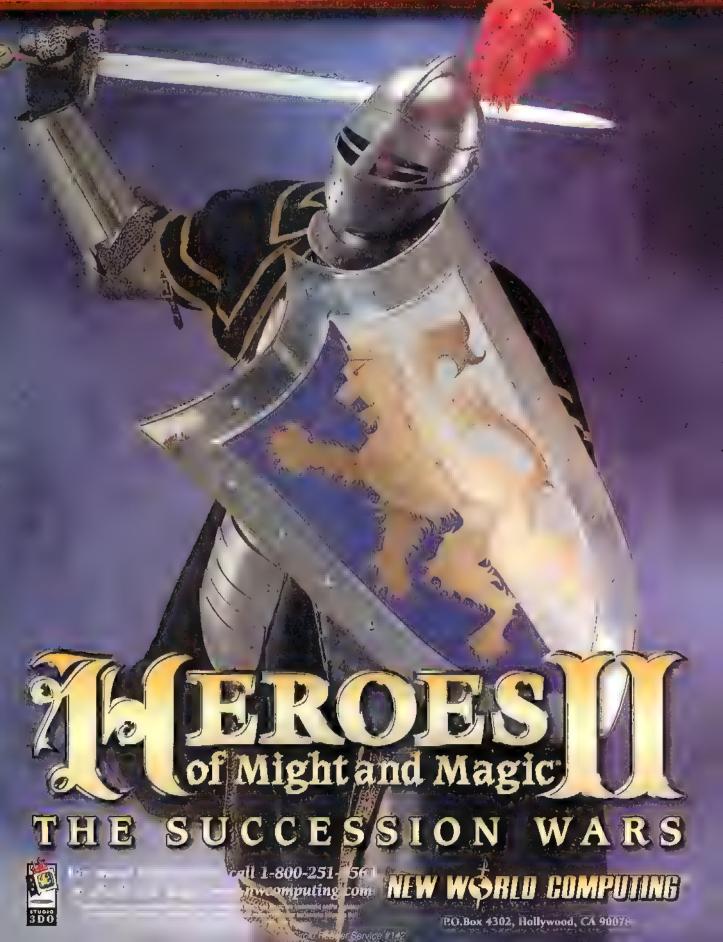

### THE 1995 STRAITEGY GAME OF THE YEAR

noting the loudspeaker system. In the laser room, deactivating parts of the field is not hard, if you keep in mind that you don't have to use just the numbers mentioned in the instructions (this is an old puzzle, by the way). Then walk through the blue parts to the other end (this is where the scaled door is).

Now you can work on opening the emergency door in the security compound. This is very obvious stuff, so we'll skip to the important part: blowing open the scaled door. Stand as far from the door as you can when you place the dynamite. Once that's done, you must rim back through the laser field and out the door ASAPI If you're not fast enough, Tex will be caught in the blast (you may want to save before setting the charge, just in case!)

#### DAY SEVEN

Nasty, An alien something is in there, and it's on the way. Tex will die if the thing enteries hun, so let's avoid that. Leave sightseeing for later. Everything needed is on this floor, in the rooms on the left (from where you enter) side

The objective is to lure the thing to a certain place, where you can then use a certain device on it. After listening to the CD in the dorms, you'll know what room that is. I suggest starting with the mess hall kitchen, and then going on to the two slonge rooms.

After the thing is gone, you can explore at feisure. The rec room has several

MALLOY'S AFORETHOUGHT Having trouble opening Regan's box? Check out the tapestry in Malloy's crale for help.

important items, especially the Abduetor toy. Some of what you pick up, combined with the duct tape, will get you the security card. Unfortunately, only one room on level two is open, the rest are scaled off. Check this room carefully, especially around the projector.

Since you can't get past the doors, you'll have to send the abductor through the ducts instead. Everything is on J2, there are four rooms (three in Fatertainment mode) to visit, and each has something you need. When you've got them all, you can use the second elevator...after dealing with the C-+ charge wired to the controls (this stuff is worse

than toxic) OK, youre almost done Down on level three. you have to assemble a working acetylene headi immu what you find here and other items you should have found

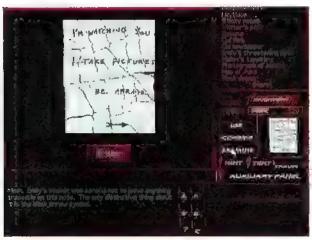

on level one). That gets you into the storage facility. The final puzzle is to manually move (via computer) the containers around so you can get out the one you want. This requires a bit of thought and some advance planning, but it isn't hard. Once you have the item you came for, you can leave, ending the day (whew!)

#### DAY EIGHT

Ms. Pernell is available again, so give her a buzz and make the exchange. Finally, you can read the disk you picked up from Malloy's other room (which seems ages ago by now). This gets you Edgah Witt's phone minuber (before calling him, you may want to visit the electronics store).

Talking to Witt is tricky, I found the fatherly approach best for starters. Essentially, you're going to hire him out so you can break into his apartment and goib his box. Save before going there. Once tisside, an abirm sounds, and you must run around the apartment hitting plates (four) to turn it off before the cops come. Three are on the ground floor (two are visible, one is masked); one is upstars.

Do a thorough search upstairs and downstairs, grabbing and examining everything possible. Check out the area near the fireplace, and you will soon have the key to the statue. Inside is a moving block puzzle; you should have found the

are bit in pairs. When you do it right, the pair turns black. This opens the door out, which in Came Player mode (only) leads to the Fireball room. Here I'm giving the answer, you must try all four doors. The order doesn't matter; it's always the fourth

COMBINE BIANUM. MANUAL PROPERTY

OUI, MON SEWER Having Irouble locating a certain box? Try taking a trip through a manhole. And don't pick up that box too quickly!

door you try that opens, which is why you have to go to all of them

In the wasp room, you have to smoke out the bugs before you can do anything. Then it's simply a matter of doing an easy ngsaw-type puzzle and moving on to the dagger room. Check the totem pole for the solution. Then you can head to the pentagon room, the last one. In Came Player mode, there is a puzzle to solve

here; this relates to the door dot positions. When it's completed (don't waste time or the eeiling will crush you), Tex is deposited in the Mayan Ascension Room, where he meets up agam with Regan. First look around for something useful, then see what you can use it on. An explosive combination and a little

weight in the right places will get both of you out of the room.

Finally, you're out of the pyramid....and right there in front of you is what you're after. And after this, I'm not saying anything, because what happens next depends entirely on the path you've followed through the game, and the rest is up lo vou.

Good luckt %

# Hate Myst? Get Pyst!

John Goodman And Jokesters From The Firesign Theater Team Up To Satirize Pretentious Megahit

By Kate Hedstrom

YST is probably the closest thing we've got to a pop-culture phenomenon in computer games. While you were playing DOOM, your grandmother was playing Myst. It's been a permanent resident at the lop of the sales charts, and industry bean-counters say that close to 4 million people have taken a crack at the game. If you've been paying any attention to computer games in the past two years, you've at least heard about those sumptuous graphics, that enigmatic story, and those, nm,

challenging puzzles.

The game, for better or worse, spawned an entire subcategory of adventure game—the MYST-alike—as software publishers scrambled to duplicate its success with pretty, but mostly lifeless worlds chock full of irritating lever-and-button pizziles. And MYST took itself so dam scriously, which makes it a very ripe target for some good-natured ribbing.

Enter PYSE. The first title in a planned series of parodies from Parroty Interactive.

Pyst'is not a game but a tongue-incheek look at what might happen when 4 million pleasure-seekers are set loose on a tiny island (Pyst, in this case) to flip levers, poke buttons, and try to get something, anything, to happen. It looks like the midway at the county fair right after they kick out the last drunk and lock the gates.

The devastation is revealed in a series of posteards: eigarette butts and trash litter the ground, graffith covers the walls, a trader park has taken root on the lawn outside the observatory, and, to make matters worse, there's a tornado on the honzon. Because a frustrated gamer is not a happy gamer, someone's been flinging stuff at that damn clock tower with a catapult. Anyone who's struggled

Global Variable Conflict Message
Your Global Variables may be conflicting with properly or improperly interfaced menitor/keyboard cards or nested Local variables in the main program algorithm, See Mested Incongruttics in the Manual which is not included.

WHAT, ME WORRY? Not that you're likely to need it, but don't expect to get much assistance from the Help files if something goes wrong

> through MYST will experience a certain sense of satisfaction at seeing the great blue and red books sizzling away in the library fireplace.

Some of the levers and buttons around the island still work, but they've been rewired to give very different results. Clicking on the hot spots scattered throughout each scene yield animations in the Mad magazine vein—a dog

WILD, WILD WEB Spread the joy by e-mailing Pyst postcards to your friends and loved ones from Parroty's site at www.pyst.com. urinates, toxic waste oozes into the sea and we see just how bad things have become for poor Pyst Island.

But they're about to get worse. The Octoplex Corporation has big plans to turn Pyst auto a resort community, with condominiums, a golf course, even a jet-ski marini. Right away we meet our Octoplex representatives, Bob and Cheryt, a pair so perky they make the Entertainment Tonight anchors sound positively sullen. Before Octoplex breaks ground, however, they're going to have to do something about that family of aliens that's taken up residence in the rocket ship.

Oh, and in case you're wondering what happened to the mysterious creator of our fair island, he hasn't been left out. John Goodman plays the foggy King Matruss, who's since found a much better use for that furnace in the log cabin He really wants to get rid of the riffraff who've invaded his peaceful kingdom, but he can't seem to get around to doing anything about it. Those two ne'er-dowell sons of his are still hanging around, too. The delicate Prince Syrrup appears to have developed a nervous condition from interacting with so many island explorers (well, who could blame him?) His brother, on the other hand, the Prince (formerly known as Prince), has fared inneli better and seems to be settling into his newfound celebrity quite well.

As mentioned earlier, Prst is not a game and doesn't pretend to be more than it is—a one-joke dig at a pompous, over-hyped product. Even so, not all the humor in Prst is directed toward its inspiration. Peter Bergman, cofounder of the venerated Piresign Theater comedy ensemble, created the video and audio clips, so many of the jokes derive as much from American pop culture and current events as they do from Myst; While this gives Pyst a wider appeal, it's a little disapponting that the creators passed up some of the more obvious chances for having fun at Myst's expense

Paraoty's Prist plans don't stop with the CD-ROM. A Web site accessible directly from the program is being set up that will allow users to e-mail Prist postcards to friends, as well as get a look at new scenes available only online. Purchasers of the product get access to a members-only area with chat, bulletin boards and extra goodies. Purroty also plans on expanding the site to include non-Past chuckles and other parodies as the product line grows, as well as links to other humor sites on the Web. The disc includes a trailer of John

Coodman singing the "Theme from Pyst" and a short movie chronicling the making of Pyst; which is at least as funny as the parody itself. Pyst is expected to ship in mid-October as a hybrid Windows-Mac CD-ROM. At a street price of about \$14.95, this might be just the right stocking stuffer for the favorite Myst-basher in your life \$

Serving as a stem warning about environmental awareness, Pyst shows what happens when millions of nosy adventure gamers poke around your magic island, pulling levers, playing in your space ship, and generally futzing with everything in sight.

# Low-Tech High-Tech

A Wonderful Play In THE NEVERHOOD CHRONICLES

by Johnny L. Wilson

hen you think of the onscreen magic of Steven Spielberg, you think of special effects. Spielberg, the genius filmmaker, has been known to tell his employees that "if

it doesn't seem impossible, it probably isn't worth doing." After bringing great white sharks, the Ark of the Covenant, an extraterrestrial with a capital E.T. and long-extanct dinosaurs to life, you'd expect that when this generation's answer to Irving Thalberg and Orson Welles turned his attention to computer games, they would be full of high-teeli special effects.

You'd be wrong. Not only will one of the first Dreamworks SKC games to be released lack high-tech special effects for which Spielberg is known, but the design leam has eschewed the digital tools with

which computer game pyrotechnic magic has usually been built. Avoiding the more cost-efficient animation possibilities of Softimage or 3D Studio Max, the design team known as The Neverhood has brought THE NEVERHOOD CHRONICLES to life by using the

time-honored stop-action animation style made fumous by brilliant ammators like Willis O'Brien (King Kong, Mighty Joe Young), Ray Harryhausen (The 7th Voyage of Sinbad, Clash of the Titans), and George Powell (The Nightmare Before Christman) They hoped that the clay

> environment and occasional rough spots in the anunation would have more charm than computer anumation's relatively sterile look. Their instricts were correct.

design team created by a number of refugees from Shiny (including team members from the ALADDIN Segn Genesis game and EARTHWORN ItM), and THE

BRIDGE OVER THE RIVER CLAY Klaymen must assemble the bridge-control mechanism at this point and drain the take to reach the laboratory.

The Neverlood is a

NEVERHOOD CHRONICLES is their way of doing something different by creating a traditional style adventure game with stop-action, clay animation. The protagonist, a latex Everyman known simply as Klaymen, lives in a universe literally made of clay (the sets themselves occupy 2,000 square feet and involved 2 1/2 tons of clay). Indeed, even the interface is made up of menus hand-drawn in clay, a clay cursor and clay buttons.

At first, the game feels like MYST m clay. Klaymen has to solve puzzles to get out of rooms where he is all alone, and is much like an inexperienced method actor still trying to find his motivation.

Fortunately, it doesn't take long to get past the MYST deja vu. THE NEVERHOOD CHRONICLES (TNC) should appeal to the MYST audience, since the puzzles are the spatial and logic puzzles similar to those found in that megahit. Also the game universe is so artistically wonderful that some players will just want to explore all the different scenes just to see the weind clay

SIERRA

## ...it left in its wake the most revolutionary new

A ll the wizards and magicians in the Realms could never have predicted what happened that mystical night in the dungeons of Undermountain. After all of their spells, conjuring, and attempts to see the future, the future literally crashed down upon them. With deadly force.

It left an indelible mark. It affected their vision. Their movement. Their way of life and death. It changed their history as well as their future.

Introducing DESCENT TO UNDERMOUNTAIN", the most revolutionary new AD&D\* FORGOTTEN REALMS action RPG game in centuries. Based on the hugely successful Descent engine, the dark inhabitants of Undermountain's stone belly now experience 3D vision and 360° movement. Perhaps it was the strange visitor from the future. Perhaps just the trauma. But multiple characters are now developing in the cracks and under the rocks of ancient caves.

All of this, along with multiple player options has forever changed the face of the AD&D\* FORGOTTEN REALMS world. What came down from the hereafter that fateful night, is certain to continue down into history. And down. And down. And down.

Download the interactive preview at www://Interplay.dragonplay.com

C 1996 witing pay Productions. All rights reserved. Occam (0, 1996 Parallas Software: All rights reserved. trees and architecture. TNC even has its equivalent of the postage-stamp video that passed for interaction in Myst, the difference is that TNC's video consists of cute, animated cartoons that delightfully unfold the story of the game universe.

Yet there is much more happening in NEMERIOOD than appears at first. Playing with a jack-in-the-box sets free a monster and triggers a delightful free-minning animation sequence - not only seiting up a new puzzle but opening up a new area of exploration. Choosing the wrong solution to a puzzle evokes cartoon consequences, like being punched out flat or temporarily decapitated, but it's all good fun because the game subscribes to the "no-death" school of adventure game design. You never have to go back and restart again. Plus the idle animation is priceless (leave poor Klaymen alone too long and he'll stretch his arms all the way across the screen or blinks expectantly). Even without the plot elements, gamers have to

experiment with Klaymen.

Indeed, Klaymen's anties and charm make up for any problems remaining in the unfinished version I played. When the pace seems too slow, Klaymen makes up for it with some cute action or expression.

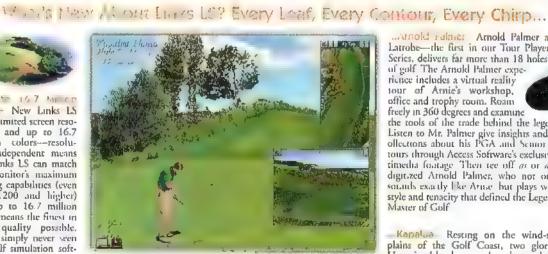

H IS FOR HOOP-HEAD To get into Willie Trombone's library, Klaymen has to assemble the puzzle pieces in the form of an "H,"

LINKS (LS

## EW LINKS LS: TOUR WITH THE LEGENDS IN SPORTS

New Links LS has unlimited screen resolutions and up to 16.7 million colors-resolution Independent means that Links LS can match any monitor's maximum viewing capabilities (even 1600x1200 and higher) and up to 16.7 million colors means the finest in color quality possible, You've simply never seen any golf simulation software this good!

... Arnold raimer Arnold Palmer at Latrobe—the first in our Tour Player Series, delivers far more than 18 holes of golf. The Arnold Palmer experience includes a virtual reality tour of Arnie's workshop, office and trophy room. Roam freely in 360 degrees and examine the roots of the trade behind the legend Listen to Mr. Palmer give insights and recollections about his PGA and Senior PGA tours through Access Software's exclusive mul-timedia foatage. Then tee off as or against the digitized Arnold Palmer, who not only looks & sounds exactly like Arme but plays with the same style and tenacity that defined the Legendary Grand Maxter of Golf

Kapalaa Resting on the wind-swept plains of the Golf Coast, two glorious Hawaiian Island courses have been selected to inaugurate Links LS as the first in the series of Resort Courses. The Arnold Palmer-designed Kapahia Village Course has a distinctly European flavor and a com-manding view of the West Main moun mins. The 7,263 yard Kapalua Plantation Course showcases expansive slopes, deep valleys and unique native vegetation.

#### THE NEVERHOOD CHRONICLES . SNEAK PREVIEW

When the interface seems awkward (there are times when the cursor doesn't indicate that you can exit a screen on one side, even though you can) or the puzzle seems annoying or unfair (the water, tube and tune door combination on one house seemed tremendously obscure), Klaymen saves the day with some animated move that makes up for any frustration, in short, the payoffs are better in TNC than in most adventure games. Also, the locationbased jazz. Disseland and blues riffs throughout the game are whimsical enough to keep you in a good frame of mind, even when you haven't yet solved that lough puzzle

#### THE HISTORY CHANNEL

Another reason gamers will feel comfortable with TNC is that many of the seenes and puzzles are tributes to computer games, movies, cartoons and literature that have come before. One puzzle seems right out of TUE 7111 GUEST or

SMART CAMES, while another could have come directly from Infocom's HOLLY-WOOD HIJBSX (remember the colorcoded punch cards?), When Klaymen animates Bil the Robot, the camera cuts and angles look like classic martial arts movies. When Klaymen drives one of the putt-putt cars attached to the walks, the car reimads us of the film version of H. G. Wells's The Time Machine Later, Ed. Schofield's climactic emematic harks back to a scene from Dr. Doolittle, You'll ace Disneyesque character expressions (lead animator Mike Dietz is a firm believer in the Disney atumators' bible. Illusions of Life, and built his style around those principles) and Warner Brothers-style cartoon violence.

Finally, students of myth and religion will recognize the commonality that this game universe's legends bave with the great myths and theologics of the Western world. The legends are written in clay along the walls of a seemingly interminable passage Too lengthy for one sitting, they are eleverly erafted and dehneate the rationale behind some of the actions Klaymen will have to take to winthe game. Those who don't care can skip. these wall etchings and watch the "Readers' Digest Condensed Version" in the animated cartoon segments that Klaymen finds throughout the game.

#### MAKE MY CLAY

THE NEVERTIOOD CHRONICLES seems incredibly fresh for a product that pays tribute to old games, old technologies and old movies. It may feel fresh because of its primitive look or because of the terrific payoffs in the original animated sequences that follow many puzzle solutions, but TNC successfully evokes nostalgia and discovery simultaneously. It's not a game for adrenaline junkies or those with short attention spans, but it is a game for traditional adventure gamers and casual gamers alike. %

# **Battle Of** The Sexes

Can't Live With 'Em? Shoot 'Em In GENDER WARS

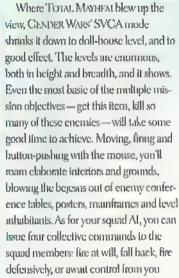

GENDER WARS is a literal Battle of the Sexes that replaces the traditional wit and wile with firepower. You pick a side and from there are carted off to a command

THEY'RE ON PMS! GENDER WARS IS SUPPOSED to be a battle of the sexes, but with little difference between the two sides, this angle is more of a gimmick than a real design decision

center that's part Star Trek: Next Generation bridge console and part RULES OF ENCACEMENT Interface. Here you receive mission briefings, put together a four-person squad, equip your squad members with weapons and ship off the less-experienced members of your outfit for training,

Like CRUSADER, there is plenty to blow up white trapsing through each level. I suspeet that, destroyable item for destroyable item, there's an even higher level of damage here than in CRUSADER: NO REGRET.

#### IT'S ONLY A GIMMICK

Of course, imitation is also the lowest form of creativity, and I didn't find much here that separates CENDER WARS from its evident models. I suppose inter-sex warfare is better than killing off another set of aliens or corporate flunktes, but I can't detect a personsive reason for the male-female conflict other than its simply being different. Apart from the high pitch of the enemy death shricks and some cute graphic touches (men are evidently beerswilling louts who leave trash to pile up in the streets) the missions are essentially interchangeable. If they'd made the supposed differences between men and women -- brain versus brawn -- more integral to the gameplay, they might have

Like CRUSADER, there is plenty to blow up while traipsing through each level.

Circle Reader Service #57

Duake: The cheats for Quake (both

inmreware and registered) are so obvious you'd think id wanted us to find 'em Just call up the console with the tilde (~) key and type

God = god mode.

Fly = fly mode (D is up and C is down) use this even if you don't usually cheal—

I's a great way to see the architecture.

Give [number] — gives you the appropriate weapon (8 is the lightning gun).

Nocip — lets you walk through walls.

Impulse 9 — all weapons and ammo.

Impulse 255 — quad damage mode.

To use these cheats in DeathMatch, you'll need to make a hack with the Quake compiler (see the Vill Long's Quake Hacks for details).

Simply edit the WEAPONS QC, find the

ChealCommand and ServerflagsCommand sections, and add "/"" before the "if (death-match || coop)" statements, and add ""/" after the "return;" statements

▶ Descent II: Descent II only has six secret levels, but they aren't the easiest to find. The first can be reached via levels 3 and 4; the second from levels 5 and 8; the third via evel 12 the fourth via level 14; the fifth via levels 17 and 20; and the level set via levels 21 and 24

had something here. But this appears to be more a presentation concept than a game design.

A Battle of the Sexes is also ripe with potential for humor, but at times, you can tell that The 8th Day tried too hard. The intro's robot-hosted TV show rapidly degenerates into a profane, Pythonesque exchange between the two talking heads. But the pre-mission cut scenes are leaden and obvious, and the missions are humor less firestorms.

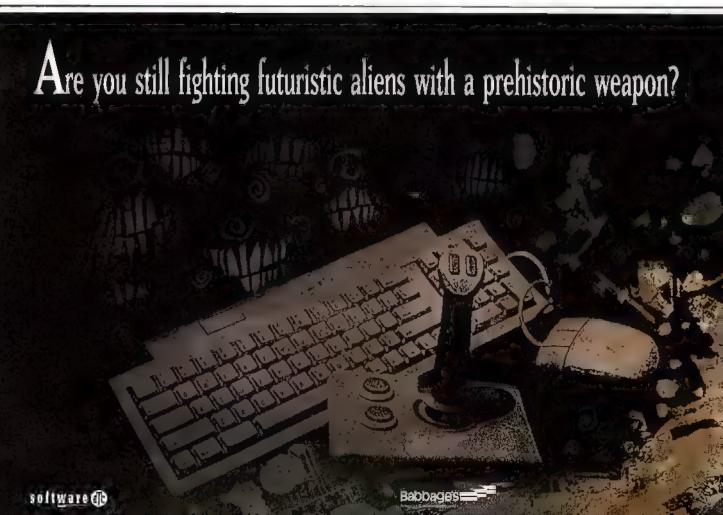

The game itself works well for the most part. Troops do have some trouble following the leader when lifts come into play, and you'll often need to switch control to individual squad members to remite the party (just as in TOTAL MATTEM).

But CENDER WARS was pleasantly free of sechnical glitches. I ran into just one, and it was more of a "feature." On two Pentams with different video cards, movement of characters in SVCA mode was accompanied by a shuddering display and the ▶ APPEAL: Those tired of waiting for CRUSADER: No REGRET and tooking for some nonsensical, combustible action.

PROS: Huge levels, lots of pyrotechnics and decent action.

PCONS: A clone is a clone, and the war-of-the-sexes concept doesn't hold up.

► Hunter seems to be the word of the hour for action garnes.

NEO HUNTER, from Virgin, is a VIRTUA COP-style rail shooter set in the Bay Area, with cartoony characters, selectable levels and an adventure wrapper.

Sierra's Hunter
Hunted is a sideview shooter
with the accent
on realistic
movement
• An early look

at Scavenger's

AMOK (GT Interactive) reveals it as a likeable third-person 3D shoot-'em-up. You pilot a mech through several levels of the ocean floor and dryland, while blasting sharks and robots. The underwater graphics look appropriately murky and fluid.

Spectrum HoloByte has

signed a letter of intent to license
Epic MegaGames' UNREAL engine to
produce its own games. Specifics
on Spectrum's plans were zero, but
the press release announcing the
deal quoted Spectrum CEO Steve
Race as referring to 3D action

games being one of "our three core strengths." Does anyone recall a 3D action game from the

Spectrum family? This sounds like a glimpse of future strategy..

Another potential Quake killer on the horizon. Developers Friendware in Spain is preparing B. Acc for fall release. The spec is daunting. Among the features: 30 weapons and the ability to throw anything in the game—including your enemy's head.

CAN'T LIVE WITH 'EM Whether you play the men or women (men in this case), you'll still go traipsing around vast levels, blowing up all sorts of items and fragging the opposite sex (though it's hard to tell which is which).

appearance of odd horizontal lines.

I tapptly, the solution was a keypress away: a tap of the "f" key, which toggles something called "flick screen mode." It's always nice to be able to solve a problem on your own through trial-and-error, I guess tackling these technical problems head-on is a "gny thing."

Or are those fighting words? &

Introducing an entirely new way to move in 3D: the SpaceOrb 360.

Comparing the new SpaceOrb 360 RealLife 3DTM controller to the joystick, keyboard or mouse is like comparing on orthritic old goezer to an Olympic othlete. The unique Omal-directional PowerSensor®ball is the key, it practically translates your brain waves into on screen motion. Posts, pull and twist it to get fluid 360' motion in any and every direction for otherwise impossible combo moves. Use It to play Duka Nukem," Descent and Doom!" You will be stunned at what a technological leap this is: Even more stunned when you see the loop in your scores. # Quake C Basics

How To Hack Weapons And Use Cool New Toys With QUAKE C

by V. Long

"With QUAKE C, there's nothing you can't do."

-American McGee, id level designer

magine swooping down in QUASIin a highly maneuverable VTOL fighter, bristling with advanced amminent. You spray the scurrying targets below with streams of lead from twin Vulcan camons. Their health ebbing, you deliver the coup de grace with a salvo of folding fin aerial rockets sizzling down from side-mounted missile.

nicks. Inside the cockpit, the roar of the engines barely drowns out the radio chatter. Scanning for targets, you suddenly notice shards of the fuselage chipping off under sustained nailgum fire. You quickly lock stinger missiles onto a heat source and launch—the enemy inreaft goes down in a fireball, raining burning debris onto the lifeless victims.

Such are the friendly skies of QUAKE...more accurately, the QUAKE AirCraft project, as it's currently called 'This custom QUAKE module adds an aircraft to your existing QUAKE game, letting you roam QUAKE's skies in DESCENI-like

fashion. Standard equipment includes stinger missiles, deadly autocannons and other weaponry for truly gut-wrenching pyrotechnics. According to Tim Willits, an idlevel designer, everyone at id from lead programmer John Carmack to the artists was impressed with the early version of the AirCraft project.

Steve Bond and John Cutline, the

founders of QUAKE Consuland (www.me.net /quake), are no ordinary fans: they've guined respect among knowledgeable. QUARF afficionados for their dedication to balanced gameplay, ease of use, and of course, fun. QUART Command first caught my attention with Bond's Img-grenade, a bounding bomb that spews lethal spikes à la Emser-Since then, they've added devastating flametbrowers, throwable axes, and

remote-controlled demoliiton charges, as well as ejecting cartridge casings. They've even added DESCENT-like flares, tossable backpacks; and even slippery banana receld.

Can we expect more from QUAKI. Command? You betcha: next on the agenda is the "Jeep," which will lead to QUAKI Kart...complete with turtle shells and banana peels. Mano Kart fans can at last rejoice! Given how quickly the two pump out goodies, the Jeep, and even QUAKI Kart may be available by the time you read this (check CCW's online site for the latest).

But QUAke Command

definitely isn't the only one talking about vehicles for QUARE. Mark Dochterman of Eliphotic Interactive, which has licensed the QUARE engine, says the Eliphotic team is considering them for its 15-level QUARE add-on pack. And sources at id mention that vehicles may appear in QUARE. 2... but no promises!

SOON TO BE STUNG Once the Stinger locks onto any heat source, a mere twitch of the trigger finger sends it home. Cat lovers will be happy to know that the Stinger can lock onto Rottwellers.

#### COMPILE THIS

It's clear from the AirCraft project that QUAKE C enables an unprecedented degree of customizability, but what is it? Often called QC, it's the C-like programming kurguage built into QUAKE to control weapons physics, combat rules, monster Al, multiplayer scoring and much more. The beauty of QC is that it does all this without ever touching the game engine itself, which governs core functions like graphics and connectivity, and it is stored on the game's CD.

Power to transform whim into reality is not the only attribute of QC. Ease of use is another, and sharing your QC toys is a snap. The easiest QC goodies to play with are PROCS.DAT files that use no external QUAKE data files, For a multiplayer session, only the server needs the PROCS.DAT, Borat's flamethrower

FLYING FLAMBE Savvy pilots will eject before their AirCraft erupts into an aerial barbeque. Falling chunks or exploding debns can be fatal to those caught below

Download

C goodles,

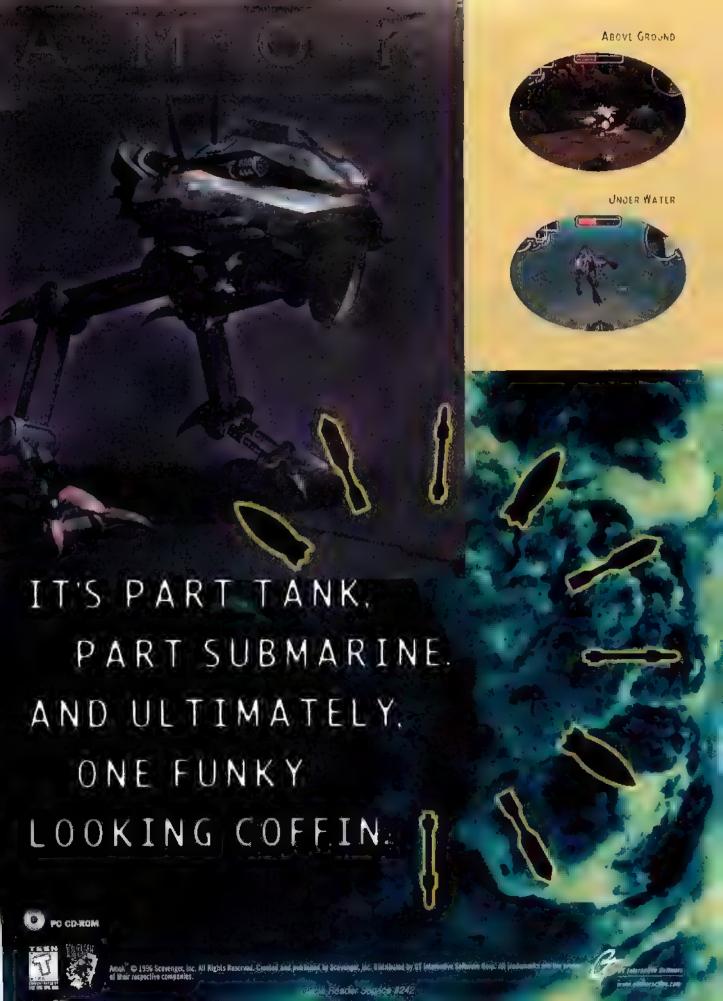

including the

AirCraft, from

www.zdnet

.com/gaming

selected Quake

#### QUAKE . CHEATS & HACKS

patch is a good example. Simply put the flamethrower PROCS.DAT into a dedicated QUAKE subdirectory, such as C-/QUAKE/FLAME, and run QUAKE with QUAKE-GAME FLAME. Anyone joining your game will also have access to the flamethrower.

Even the most elaborate QC modifications, such as the AirCraft, can be equally easy to use if they are wellpackaged. The AirCraft has all neces-

sary rules, graphics, sounds, and 3D models compiled into a single PAKO PAK file Place the AirCraft PAKO.PAK in the CJQUAKE/ AIRCRAFT subdirectory, and run QUAKE by typing "QUAKE -CAME AIRCRAFT +MAP HANGAR", (If you're joining a session, type "QUAKE -GAME AIRCRAFT + CONNECT"). Because this QC mod uses nonstandard QUAKE data,

each player needs to install and run it.

Sometimes you'll encounter a patch consisting of a collection of .SRC and .QC files, which are naw source code. These need to be compiled into a PROGS.DAT file with the QUAKE C compiler. Keep reading and you'll learn how simple it is once you know how.

#### READY TO ROCK 'N' ROLL

Here's some quickie QC that'll make even Rambo proud, it converts your guns to fully automatic fire and gives you unlimited ammo. As a bonus, your nailguns will spit spikes at a higher cyclic rate.

To start, get the QUAKE C compiler (QCC.ZIP). Under your registered QUAKE directory, create a dedicated subdirectory, such as C./QUAKE/FULL-AUTO/PROCS and put all the files from QCC.ZIP there.

Use a text editor to modify
WFAPONS.QC. Find all lines with
"SELFATTACK\_FINISHED | TIME
+ #", and decrease the number (#). For
example, bump them all down to 0.09009
to increase the rate of fire to a blistering

666 shots per minute, not bad, ch?

To keep your steroid-pumped guns properly fed, you'll need an endless supply of ammo, Hollywood-style, Find all lines with "SELECURRENTAMMO = SELFAMMO\_SHELLS —#", and replace the # with a zero. Do the same for the NAILS, ROCKETS, and CELLS.

Then run QCCDOS EXE from DOS mode, the Windows 95 DOS bas, or the Windows 95 Explorer. During the com-

CHUNKS 0' PLENTY A steady stream of nails will kick fragments off the AirCraft's hull. See the shards above and below the fall section.

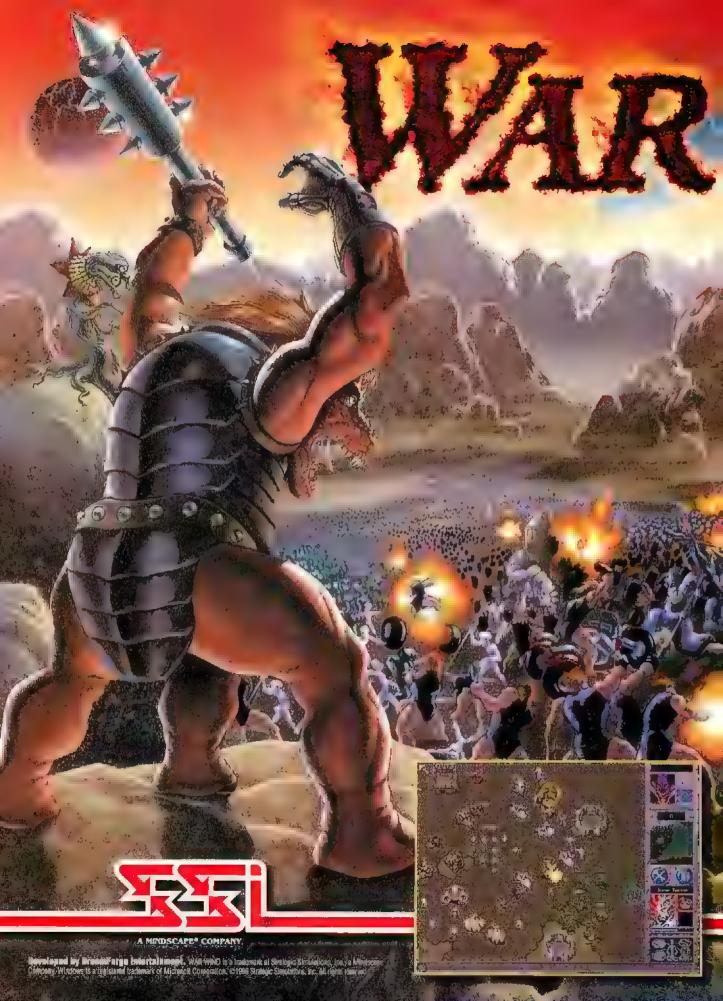

pile process, QCCDOS will provide feedback. Keep in mind that careless typing while editing SRC or .QC files can cause errors and force the compiler to abort After a successful compile, the resulting PROCS.DAT will be in the /FULI AUTO directory, not in the /PROCS subdirectory where the .SRC and QC files are.

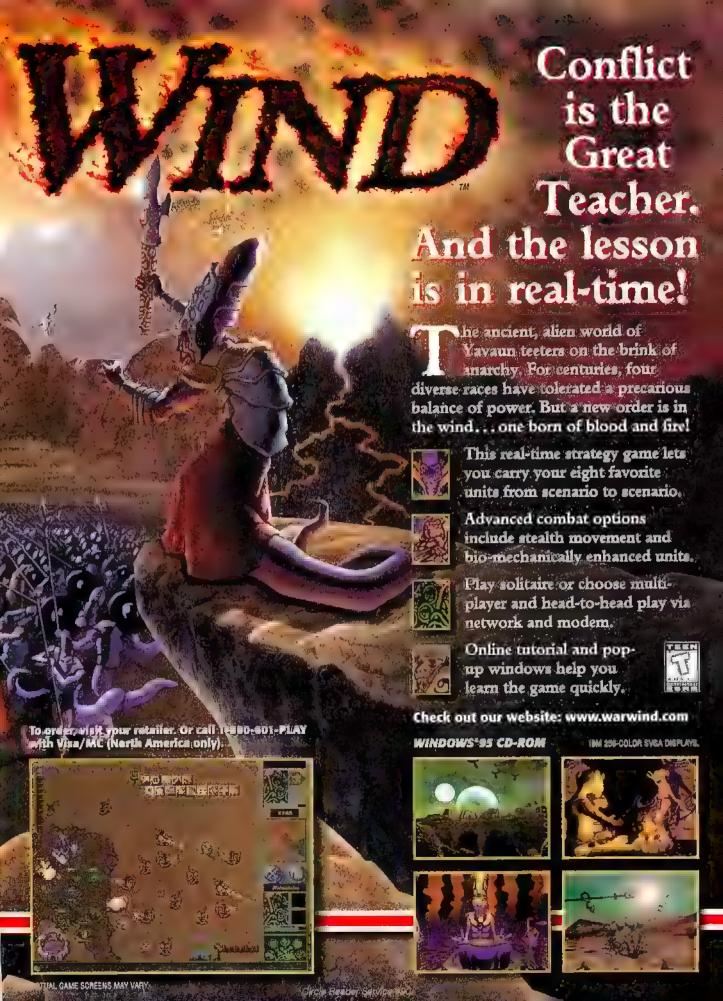

Congrats! You've created a selfsufficient PROGS.DAT Simply run QUAKE with the command line "QUAKE -GAME, FULLI AUTO". Anyone connecting to joining your game will have access to the same full-auto weapons with mexhaustible ammo.

That's not all you can do with QC. Do you want to roll in your own 3D models and add custom sounds, graphics, and levels? Stay tuned: I'll show you all that, as well as how to pack everything into a nifty PAKO.PAK just like the QUAKE professionals do. Same QUAKE time, same QUAKE page.

V. Long poses as a mild-mannered magazane editor for Computer Life, but he lives, breathes and sleeps QUAKE. §

## **Keep Da Peace**

Making Noise In The Hood With Eidos' 3D Tank Shooter

by Mark Clarkson

HELLSHOCK, the new first-person shooter from Eidos, drops you belund the controls of an M-13 Battletank with unlimited ammunition to kick evil oppressor but all over the globe. To set this shooter apart from the crowd, Eidos gave it a distinctly urban vibe, with a pounding, bass-heavy soundtrack, and a collection of slang-slingin' homics with names like 9-1-1, Dogg-Tagg, and D-Tour

SHELLSHOCK's driving model is a good compromise between fun and realism. You can control the turret separately, swinging it around to shoot sideways as you fly between buildings at full speed or behind you to slow down any pesky pursuers. Your view also dips and bobs as you

STARING DOWN A BARREL SHELLSHOCK'S 25 missions show a little variety. One time you're out to blow up tanks and armored transports; the next time you'll be destroying buildings or rescuing prisoners.

negotiate terrain and torch bad guys. Or you can, if you're so melmed, drive your

> tank in a more realistic and complicated two-track mode; each track has its own forward and backward keys

#### HOOK ME UP. G!

Powerups exist in the form of supply crates lying around the levels, often concealed within buildings or larger crates. You'll want to nub all that you can; Props, Da Wardenz' supply man, will pay for them back at the Den, and you'll need the money to repair your armor and upgrade your weapons. If you have the cash, Props can hook you up with a targeting computer that improves your hit accuracy, better armor, a hotter engine, SAM missdes, or even the ability to call in a tank-busting A-10 strike.

SHELL SHOCK'S VCA graphics are adequate but unimpressive. There are no shadows, reflections or other graphical niceties. The sound quality is uneven; some of

the spoken clips are fine, others are unintelligible. There are only four save game stots, and you can only save between missions. When you die, you must restart the entire game, skip past the intro, reload a saved game, and skip through the briefing—an annoying 30-second process.

Still, while STIELL SHOCK doesn't set any new standards, it is fun and loud. Your M-13 rips through chain-link fences and snaps street lights like twigs, all while thumping music blares in the background. And best of all, in a LAN-based multiplayer game you can hurt both shells and taunts at your real-life homies.

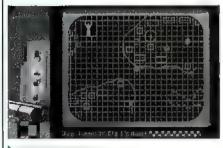

Price: \$49 95

## Dillweed's Delight

Beavis And Butt-head's Arcade Game CD Doesn't Suck

by Jeff Green

uess what, burnwipe? Beavis and Butt-head — those pimply faced poster boys for the declare of Western civalization — are back on the computer screen, ready to annoy spouses, parents and people with good taste everywhere. Following on the heels of last year's adventure game VIRTUAL STUPIDITY, MTV's love-tem-or-hate-tem cartoon morons now star in LETTLE THENGLES, a collection of seven monumentally stupid — and fun — "miniareade" action games.

Mini is the operative word here. The seven games, which include four that originally appeared in VIRBIAL STUPIDIN plus three band new ones, occupy the same space in the gaming universe as MINI SWEET OF SOLITABLE—perfect for

a couple manutes here and there of glazed-over gaming

#### **LOOGIES ARE COOL!**

All the games in Let III
THINGES operate on the same basic principle: You earn points by successfully guiding Beavis and Butt-head through various acts of adolescent social deviancy.

- ▶ In Hock-A-Loogie, you advance through levels based on your ability to successfully spit on people (and a squirrel) from your vantage point atop the roof of the school. This one's cool
- ▶ In Court Chaos, you need to bean obnoxious yuppies (and a squirrel) with teanis balls. This one sucks,
- ▶ Bug Justice challenges you to use your magnifying glass to burn bugs to

death before they march off with your candy. (Butt-head: "The penalty for stealing is having your 'nads fried off!") This one's cool

Thank You, Drive Through finds our heroes as employees of a fast-food joint, attempting to fang food at customers before the line gets too

long. Earn extra points by serving someone a rat burger. This one's cool,

- ▶ Change II requires you to monitor a bank of TV screens and quickly change channels when something large comes on. This one sucks.
- ▶ Wreeked 'em Ball finds Beavis trying

CONTON MAINO

LOOK OUT, BUTTMUNCH! Hit Beavis enough times in the head with a wrecking ball and he just might notice it.

emanating from two different orifices of Beavis and Butt-head's hodies. There's even a Record option, so you can tape your rendition of Beavis burping "Mary Had A Little Lamb" to show everyone what a creative genius you are. This one's coul.

JOBS SUCK Keep slinging the junk food, or Beavis and Butt-head just might find themselves out of a job. Again.

> to eatch nachos that Butt-head tosses out a window, while avoiding hazards such as falling toilets and a wrecking ball. This one's cool.

▶ Finally, there's Air Guitar, which isn't a game at all, but wins as the most audiciously immature module of all (and of course, it's the one that garnered the most laughs around the CGW office). Here we have a keyboard that can be set to play "music"

#### PULL MY FINGER

Civilization II, this ain't. But let's be real. You know whether you want this or not, and it has nothing to do with gameplay. If you appreciate B&B creator Mike Judge's lowbrow humor and hilanous voice work, moments like Beavis's blond-curdling "Die die die!" to the bugs in Bug Justice or Butt-head's immortal "How'd ya like a side of Butt-head?" to a female customer in Thank You, Drive Through, are worth the measly \$20. Everyone else will just shake their head and wonder what's wrong with the youth of today \$\frac{1}{8}\$.

APPEAL: Beavis and Butt-head fans and similar social miscreants.

PROS: Very funny (for fans of the show), dumb little games.

CONS: Can get old fast; pretty slim on gameplay.

Price: \$19.95 System Requirements: IBM-compatible 486DX2 66MHz processor, Windows 95, 8MB RAM, 20MB hard drive space. Windows 95-compatible sound card, 2x CD ROM drive, mouse, # of Players: One Protection: None Designers: Brad Delaney and Brian Babendererde Publisher: Viacom New Media New York, NY (212) 258-6000 Reader Service #: 332

#### IN OUR NEW FIGHTING GAME

BUT THEY TEND TO GET ALL LIMP AND

RUNNIY WHEN YOU REALLY START

#### BEATING ON THEM.

Poor, delicate humans. Just when the lighting gate good the drop dead on you Now a CyberGladiator, on the otherhand lab built for some serious mayhem. Choose from 8 different lighters, each with their own arsenal of over 50 diffetent makes like the Pyro Punch. "Spine Grinder" and the "Humiliator" you gan eve knock off your opponent's head. And if decapitation wasn't had as

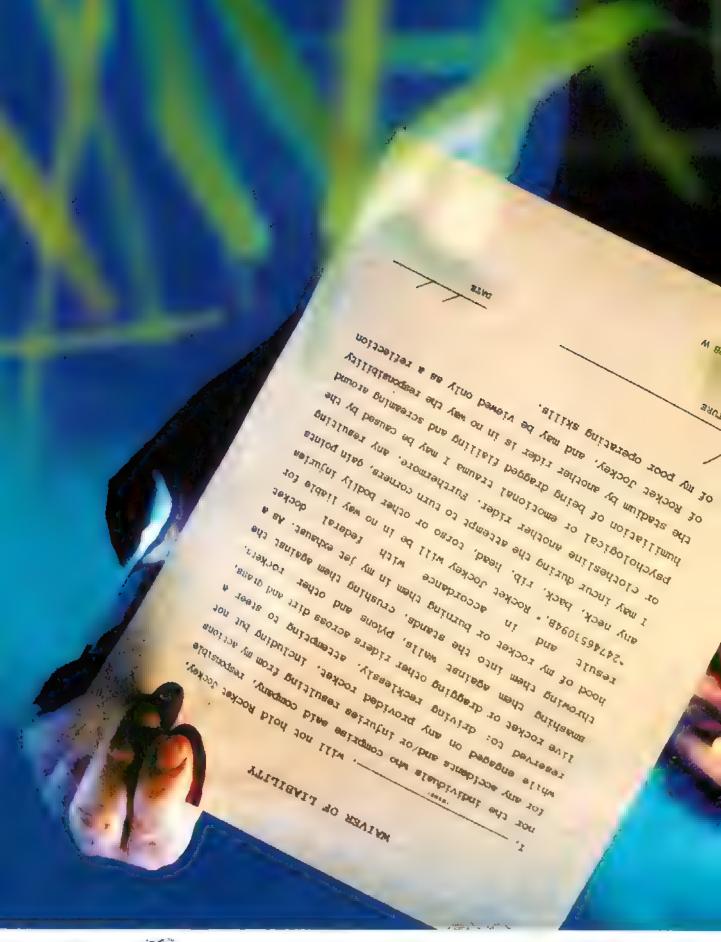

enough, you can use stuff from the arena environments as weapons like spears, rocks, orates and partiels. S.D cameta moves capture the action in ten different arenas on four emezing planets. To it and you'll see why Cyber Gladistolist teduces other human fighting games to bloody pulps.

CYBERGLADIATORS

PARAGRAPH (J), SUBSECTION (1a):

Should I participate in a game of "Rochet War," sanctioned or otherwise, I will not hold Rocket Jockey linble for my being decapitated by another jockey's cable, crushed against the hood of another rocket, hurst beyond recognition by jet extense, or other injuries to myself or others at al.

PARAGRAPH (3), SUBSECTION (1h):

Should I participate in a game of "Mocket Racing," I will not hold Rocket Jockey liable for any consequences of my speeding in excess of the logal limit, including ramming other jockeys, or myself, into walls and/or pylons, as well as any denage to my ago should I lose.

PARAGRAPH (3), SUBSECTION (10):

Should I participate in a game of "Rocket Ball," I will not hold Rocket Jockey liable for any results of smashing a giant ball into oncoming rockets, burling said ball at other jockeys or generally causing destruction to envone's body and/or property et al.

A BAD COMBINATION.

## **Swimming With The Sharks**

Shallow Gameplay Awash in Pretty Seascapes by Mark Clarkson

Price: \$49.95 System Requirements: 486DX2 66MHz 8MB PAM, 2x CD-ROM drive, 10MB hard disk space, SVGA video card, Sound Blaster-compatible or Gravis Ultrasound sound card, DOS 6.0. Microsoft-compatible mouse # of Players: 1 Protection: None (CD must be in drive) Designer: Virtual Studio S A Publisher: American Softworks Stamford CT (203) 327-3366 Reader Service #: 333 TO R.M. isn't exactly a groundbreaking PC game. Put simply, it's just a console-style, side-scrolling action shooter. The year is 2055, and—you guessed if—the fate of the Earth is in your hands. The world's resources have been

exhausted, and now you must pilot the experimental submarine S.T.O.R.M., through a series of underwater levels to claim Parth's last energy alternative, a Praxillium mine.

Along the way, you'll have to battle your way past the evil divers and heavily anned submarines of the Nuclear Eaergy Office, not to mention underwater baddies including gorgons, gluesnails and grant squids

The numbers you'll have to watch in your aquatic adventure are your ammo, your oxygen supply, and your shield strength. All these can be augmented or replenished using powerups scattered along your path, which can be retrieved via mechanical arm, diver or thry remotecontrolled robot

BATTEN DOWN THE HATCHES You can send out divers or minisubs to retrieve powerups in hard-to-reach places, though you'll be more vulnerable to the ocean's dangers. S.T.O.R.M is lensurely gameplay strictly two-dimensional, with a side-on view—is reminiscent of the ECCOTH). DOLETHN games from Sega, though the theme is a little more violent. Levels run primarily from left to right, with some sideways turns to retrieve powerups. You'll also encounter occasional mazes and traps, as well as a powerful boss at the end of every level, S.T.O.R.M. is spiced-up a little with rendered graphics and cinematic cut scenes, but despite all that glitz, it's only a simple side-serolling platform game.

APPEAL: Grown-up fans of Ecco THE DOLPHH and its lik; anyone looking for some slow-paced, side-scrolling, shoot-'em-up fun.

PROS: Pretty pictures and basic, mindless fun.

PCONS: Just pretty pictures and basic, mindless

eye-bending

# King Kong & Cong Of Mahjong

ome gamers may recognize Malijong as a plot element in Jackie Chan's *Drunken Master* 2, and maybe a few oldbuters recall the days, back in the fiftes, when

Mahjong and Canasta reigned as the Trivial Pursuits of their day. But it is years of playing Activision's computer version of SHANCHAI that generally makes gamers think they know a thing or two about Mahjong.

They don't. While SHANGHAI uses the classic Mahjong tile set, that's where the common elements end. SHANGHAI is a type of solitaire, sort of a cross between Concentration and Pick-Up-Sticks. Mahjong is a four-player hand-building game, somewhat similar to gin runnny. Where Shanghai takes about 5 minutes to learn, Mahjong takes...longer The best way to learn to play Mahjong is to have been born in Hong Kong. Barring that,

► CHESS WARS, Art Data Interactive's attempt to out-crash and bash BALITE CHESS, is nearing completion and should be available in late fall or early writer.

➤ We weren't the only ones who liked SMART CAMES: CHALLENGE # 1 II Brished in the Top 10 umt sales for the summer, ahead of such blockbuster littles as WING COMMANDER IV This is the best puzzle title released so far this year, so if you

you need a good and patient tutor. And no trio of human players could be as good or as patient as Nine Dragons Software's HONG KONG MADIONG.

TALK ABOUT TYPECASTING If you're having trouble beauting the tough AI, choose a "Caucasian" computer opponent.

#### FIZBIN, ANYONE?

Fins of the original Star Tiek will remember the episode titled "A Piece of the Action," in which Kirk and Spock are stranded on a planet full of 1920s-style gangsters. To distract a pair of guards, Kirk teaches them "Fizbin," a card game with impossibly complex rules, Malyong is the

haven't checked at out yet, the game's available as low as \$25 street price; check your local software store. Next up for Smart Games is WORDPLAY, due out this winter.

▶ Husbro Interactive's ambitious schedule of computer versions of their classic titles — B.V.FTLESTIP, RISE!, YAHTZEE, et al — is slipping a bit Still, the most prominent of these titles should ship in time for Christmas.

closest I've come in the real world to playing Fizhin.

Instead of four suits of eards, you have three suits of tiles: Sticks, Balls, and

Chinese Characters, You also have four "Winds" (North, South, East, and West), three "Dragons" (Red, Green, and White), and eight "Flowers" (four red and four blue), plus a set of three dice (for andomizing the start of play). There are four of each of the 27 suit ties, which are numbered I through 9, and four of each Dragon and Wind, but only one of each

flower — 144 tiles in all. Each of the four players gets dealt a hand of 13 tiles, leaving a stacked "wall" of 92 tiles, unless one or more players are dealt flower tiles, in which case those are set aside and the players who picked them must pick again.

Play goes counterclockwise, as each player picks a tile from the wall and discards one from his hand. The other three players can grab a discard even out of turn, but only if it gives them a "set." If it does, the tiles that make up the set are displayed to the other players (all other files are hidden) and play continues from the interrupter's seat

A complete hand is one whose 14 tiles are divided into one pair and four sets. A set may contain three identical tiles (a "Pong") or three tiles in numerical sequence (what poker players would call a straight, here a "Chow"). You can also have four of a kind—a "Kong"—but in

The Kabbala has fewer arcane numerological rules than those found in Mahjong.

that case the fourth tile is essentially ignored, your Kong is treated as a Pong for all but sconng purposes, and you get to draw a 15th (or 16th, or 17th, depending on your number of Kongs) tile. There are also some anomalous winning hands, such as the "Seven Pairs Hand," which has as many Pongs and Kongs in it as its name suggests. Take a deep breath and we'll move on to sconng.

When you complete a hand, your score

depends on what Bles you are holding, what round it is, and what chair vou're sitting in. You get points for "purity" (a hand of all one snit) and you get points for "semipurity" (a hand of all one suit plus Dragons and/or Winds). You get points for leaving flowers. You get points for not have ing flowers. You get points for Chowing on your neighbor's

discard, but you can only do so if he is silting to your left. For winning off a blind draw you get points, but if your discard enables another player to war, he gets points, and instead of collecting them from all the other players, he collects them all from you. And so on, endlessly. The Kabbala has fewer areane numerological rules than you find when scoring Makpong. Play continues through the completion of four hands within each of four rounds, or until the players give up and decide to watch Melrose Place instead.

#### LOOK WHAT THEY DONE TO MAHJONG, MA

One thing that HONG KONG
MALIJONG captures particularly well is the
variety of rules you come across when
playing Mahjong, Like Monopoly, every
household plays it a little differently. Some
say you can only declare a wisning hand if
your hand is not only complete but worth

at least one, two, or three extra points. Some say that diseards should be turned face down, forcing you to hold in your head what everyone has thrown. Some say that you have to pay a penalty to all the other players if you declare a winning hand incorrectly. HONG KONG MAUJONG has all these options built in, along with the option of using modern or antique tiles, numbered or unnumbered tiles, and any 3 of 12 possible opponents.

DON'T DECLARE EARLY Often, it's best to keep a Kong, Pong or Chow secret. Declaring too early reveals part of your hand to the other players, and it also smits your flexibility in using a given tile later in the game.

There are some minor snags. Not all tiles are numbered in the antique tile set even if you have the tile immbering option turned on. There is no option for multiple-player games or, what would seem to be a natural, modern play. The Help option helps you choose your own diseards but not when to go after other players'.

But these are minor quilbles indeed HONG KONG MAIJONG does everything a good Mahjong game should. It contains detailed rules (and even a short que) to bring beginners up to speed. It offers opponents at varying levels of proficiency (If you want to win, select the Cancasians.) It doesn't let you cheat either accidentally or on purpose. It politely points out mistakes when you make them. It plays a good game. And it scores a winning hand instantly. For this alone, it deserves a medal

Because we're living in the age of chrome, when even a Mahnong game

- If you're just starting out, cilck on the bint-supplying sparrow before every discard but after you've decided which tile you would throw. This way you can get an expert opinion on your choices.
- Always turn a deciared Pong into a Kong when you can. Not only can you get extra points, but you remove a tile from play and up to three possible Chows from your opponents' arsenal.

needs to feature audiovisual fireworks before it can attract players' attention, designer J. R. Pitch has thrown in some decent music, photographic backdrops and portraits of the players, and little audio clips for when players win or lose ("Yot" says Christopher when you choose to play him. And when he loses: "Bummer!")

This is all incidental, though At the core of HONG KONG MAHJONG is an extremely good game, rich and complex, which major game publishers have neglected even while they churn out the thousandth version of Chess or Las Vegas Poker, It is not only strong in Mahjong in general, but Hong Kong Mahjong in particular. However, as good and slick as it is, HONG KONG MAHJONG is currently only available by direct order from Mr. Fitch himself

Surprised? Me, too. Perhaps one of the major distributors will snap it up. In the meantime, if you're in the mood for a strong and probably unfamiliar game, why wait?

>APPEAL: Anyone who's played Shanghai and wants the real deal.

>PROS: A detailed rendition of a classic game, with all the gameplay variations your family threw in for good measure.

in solitaire mode only, and beginners may be inadequately assisted by the selective "Keip" feature.

Play Hong Kong Man-Jong on this month's CD.

Price: \$29 47 + \$&H System Requirements: 486 66MHz or better processor, 8MB RAM, 27MB hard drive space, 800x600 graphics (64,000 or more colors), 2x CD-ROM, Windows 3.1 or better, Windows-compatible sound Protection: None (CD must be in drive) Designer: J. ## Semi-Closed Opening

Corel Chess Is Competent But Uninspired

by Terry Coleman

csigning chess
games for the
computer has
numerous advantages. There are
literally thousands
of Grandmaster
games with which
to stock your
library Chess

players love to play with databases, which are themselves simple to design. Additional chrome is easy to come by, in the form of

chess problems, diagrams, and tutorials by professionals, many of whom work for a pittance (steady work for a chess master is an iffy thing unless you're Carry Kasparov). Chess programs have always been at the forefront of Al, and it's difficult to accuse the computer of cheating, because all moves are made out in the open.

So it comes as small surprise that COREL CHESS, the latest 64-square contender, has many of the same features as

nce the computer knows your move, it actually starts moving its piece just as your move is complete. This split-second liming is impossible for you to duplicate, so even the odds by giving yourself 20 percent more time than your silicon opponent.

Knight Moves

Core. Chess is mediocre positionally, which allows you to transpose into a favorable endgame. The computer a.so likes to castle kingside, even when it isn't warranted. So sacrifice some pawns to open some attacking lines for your rooks and go after the program's king!

tts predecessors. But unlike the innovative inniltimedia tutorials of KASPAROV'S GAMBET or the wonderful variety of opponent styles in CHESSAASTER 5000, COREL CHESS offers little that's fresh

#### SAME OLD P-K4

The chess sets are pretty, as you would expect from a company famous for its computer art applications. They run the usual gamut from Staunton to Roman to

Art Deco, and if you've never seen a computer chess game before, they might impress you, just don't expect any surprises like the infamous Dali board from CHESSMASTER. Also, having become used to the "true perspective" view of CM5000, I was a bit annoyed at having to go back to the same old three-quarter view that's been around for some six or seven years now.

In farmers, CORFT CHESS can make you a better chess player, but it isn't as effective as CM5000 in this mode, and it's nowhere near the standard set by MACRICI. ASHLEY TEXCHES CHESS. Serious pawn pushers will appreciate the ability to import any chess game saved in .PGN format, otherwise, there's little that's new here. The computer opponents lack style, as well, making this a "been there, done that" affair even for those desaring no more than a fun chess contest.

CORUL CHESS is competent, bug-free, and professionally packaged. Unlike a lot of multimedia companies, the graphics giant hasn't embarrassed itself with its first foray into the competitive gaming market. But games don't exist in a vacuum-they must be compared to others in their genre - and despite the care with which COREL CHESS was crafted, it lacks the essential spark that would raise it significantly above the norm. Next time, hopefully, the designers of, say, COREL CHESS II will take more careful aim at the competition and surprise us a little. In the meantime, stick with CM5000-still the best maiustream computer program.

CorelCHr88

Price: \$59 System Requirements: 486-33MHz processor, 8MB RAM, 1MB hard drive space, 640x480x256-color graphics, 2x CD-ROM, Windows 3.1 or better, Sound Blaster or compatible, mouse Requires Winsock for Internet play. by Charles Ardai

e're in for il now, Just as the success of DOOM called forth dozens imitalors, the success of Berkeley Systems' sar-

castic and intelligent trivia game,
YOU DON'T KNOW JACK, is sure to
have an similar effect on the game
design community. But imitation
really isn't easy if you want to duplicate either the quality or the success
of the game being imitated. The SCI-FI
CHANNEL TRIVIA GAME is the first of what
is sure to be a long line of epigones, and if
demonstrates this point as well as any
game could

JACK had its sinde host, needling the players, Sci.-Pi has its. JACK had multiple categories of subject matter to choose among, multiple-choice questions to be answered by the first player to buzz in, and multiple rounds of play; so does SCI-Fi. JACK had jangly, TV-style theme music, ditto SCI-Fi. But JACK was a huge amount of fun, and SCI-Fi bored me silly.

#### A TRIVIAL PURSUIT, INDEED

Even the worst shoot-'em-up is at least a little exciting, since shooting is shooting. Bad trivia, on the other hand, is merely bad trivia. The trivia here isn't all bad, but 2 or 3 interesting questions out of 60 or 70 per game doesn't leave you with a general feeling of having been entertained.

The mark of a good trivia question is that if you rephrase it as a statement that includes the answer, the statement is

NO WAY! Morphix should fix his Universal Translator—that way he might learn more than a half-dozen Earthling phrases.

interesting. So: "What material was used to bind 1953's special edition of Fahrenheit 451?" Answer: asbestos. They once published Ray Bradbury's book about book binning in an asbestos binding? Interesting.

But, "Who wrote 'Portraits of His Children'?" George R. R. Martin wrote "Portraits of His Children." "In what year was the first 'Theodore Sturgeon Memorial Award given?" The first 'Theodore Sturgeon Memorial Award was given in 1987. Not interesting, "Who wrote," "Who played," "Who directed," "In what year.." —these are the bread and butter of SCI-Fi's questions.

The five categories are Books, 'TV, Comies, Movies, and "Wormhole," a catchall of questions on astronomy, sf magazines, anamation, and such. Your "genial host" is a smartass called Morphix who appears variously as an alien, a dragon, a skeleton, and a robot. When you select a correct answer, he says, "Yest" or "Yept" or "That's it!" When you get one wrong he says, "Wrong!" "Incorrect!" or

"No way!" So much for Morphix.

#### WIN, LOSE OR DRAW = MUCH THE SAME

The great gags and good writing of YOU DON'T KNOW JACK make it a fun game even when you lose. The few questions, plus a "speed round," are just enough to sale the appetite rather than steken it with surfeit. And when the

game is over, the best is still ahead, exquisite parodics of TV commercials play while you hear the game show "studio" shutting down

In Sci-Fi, things are more cut-anddried-question, answer, question, answer. Severity times, question and answer. And then, when you have answered all the questions, the game just ends, with barely a whimper, much less a bang. The only reason this isn't an anticlimax is that what came before was something of a whimper itself &

▶ APPEAL: Hardcore sci-fi fans only. Who else could care how many years The Man From UNCLE ran or who wrote "Enemy Mine"?

▶PROS: If your friends aren't willing

to quiz you on your knowledge of sci-fi minutiae anymore, here's a computer to take their place.

COMS: Most people would rather have friends.

Price: \$29.95 System Requirements: 486 33MHz processor, 8MB RAM 3MB hard drive space, SVGA graphics. 2x CD-ROM. Windows 3.1 or better, Windows-compatible sound card, mouse Protection: None (CD) must be in drive) Publisher: Byron Preiss Multimedia New York, NY (212) 989-6252 Reader Service #: 335

## New Players Hit The Gridiron

Three Expansion Teams Train For The Digital Football Playoffs

the human nature to pell for year, My CGW review (March) of FPS graphical shots that are in

the underdog. What lad doesn't cheer when the neighborhood bully finally gets his? Does anyone outside Chicago or Dallas root for the Bulls or Cowboys anymore?

A similar state exists among computer football

sins. For several years Sierra's FRONT
PAGE SPOKES. FOOTBALL PRO series has
played Gobath to everyone else's David.
Of course, there's been a reason for
FRONT PAGE's success. Sierra's series has
been very, very good, breaking new
ground and winning three CCW Sports
Game of the Year awards along the way.

But with 54 billion in annual sales, the software gaming market is an intensely competitive arena. Even Gokath can't afford to kick back, although that's what

Sierra appeared to do last

year. My GGW review (March) of FPS FOOTBALL PRO '96 noted the malaise, and many gamers seem to agree. Quite a few FRONT PAGE leagues eschew the most recent edition, sticking with, '95 instead. And for the first time in years, FRONT PAGE familied the CGW Sports Came of the Year crown, which went to NBA Live 96. Rival sports game companies have also noticed Gohath's misstep. Like sharks smelling blood, Sierra's competitors have retooled and swarmed into the current football season haded for bear—FRONT PAGE bear.

#### **NEW KIDS ON THE BLOCK**

The frantic competition should result in a fascinating year for football simplayers. FRONT PAGE is back, but will be fighting that feeling that comes from an extended stay with the same system. Consequently, this year's excitement will bloody come from one of the three big

graphical sims that are making their debut. I can't remember a football season with more bothy anticapated releases, or a showdown that's had as much of a playoff feel. So who are the rookies who are taking an computer football's wily veteran?

Emerging from the misty shores of vaporland, FA Sport's JOHN MADDEN FOOTBALL 97 will make its long-awaited debut on the PC. It was expected last season, but EA decided to red shirt JMP for one more year. We'll know soon if the extra conditioning paid off when this console hit bhizes the PC for the first time.

Leveraging the riches of ABC and Disney, Overtime Sports' first game will be MONDAN NCHT FOOTBALL, a multi-media extravaganza that's after the glitz and excitement that pro football brings to prime-time TV. (For a scouting report on MNE, check out 'Rerry Coleman's detailed preview in the September issue.)

The flird, and in some ways most intriguing FRONT PACE rival is LECENDS FOOTBALL '97. Accolade has pinned its hopes on LEGENDS after three seasons of UNNECESSARY ROUGHNESS. While every game has a hook, LEGENDS' is unique, promising authentic NFL play across four different eras: 1932, 1950, 1968, and the present. From the leather helmet days to Steve Van Buren to Cale Sayers to Emmitt Smith, huli? OK, Accolade, you've got my attention. What now?

"The thing that's getting the most hype," confirms the game's producer, Kevin Hogan, "is the LEGENDS concept, which is the ability to play in multiple eras. But I think that what's really going to set it apart is its play value — how intelligently it plays and how much furnit is."

Sierra's competitors swarmed into the football season loaded for bear—FRONT PAGE bear.

## POWERPLRY '96

A CHICAGO

Before signing on with Accolade, Hogan worked for EA Sports on bigname console projects like JOHN MAD-DEN FOOTBALL, NITE HOCKES and BILL WALSH COLLEGE FOOTBALL, CCW recently interrupted the LEGENDS producer's heatic schedule long enough for an in-depth interview about his new football title. From the ground up, Lacenda is a completely original product. That's good news for gamers who were unimpressed with UNNECESSARY ROUGHNESS.

"There's actually nothing of UR in LECENDS," Hogan explains: "We decided we got as much as we were going to get out of that engine, and that if we were going to be competitive with PRONT PAGE. we needed to start from scratch "

basier said than done. For Flogan, the key was finding the right developer. He chose Saffire, an art house that primarily supplied graphics up until It made a recent move into game development. Prior Saffire credits include WAYNE CREEKS HOCKEY on SNES, and HARDBALL 95 for Sega Genesis

Given the large dose of console game experience behind the LECANDS team, and the fact that PlayStation and Saturn

who prefers a good mixture of an arcade game with a lot of robust features. It's a difficult tightrope to walk. We want it to be as statistically accurate as possible, but if we have to make a deersion between play value and statistics, we're gonna go for play value."

#### **FOLLOW THE BOUNCING BALL**

Pro football has modergone several district evolutions during its history. Modern NFL strategy is vastly different from that in 1968, let alone 1932. So how would the Decatur Staleys fare against the lacksonville laguars?

Hogan's answer, "1968 obviously isn't as different from today as '32 would be.' The differences are going to come out in the way each team plays. The '68 Colts (NFL) champs) have a run-oriented, old-school, ball-control offense, whereas today you'll see quite a bit more passing. So there'll be a significant difference in the plays that they choose. If you're playing in '68, the

play we've heard yet in a sports game. Keep your putter poilshed for this one.

Answer: A Macintosh bowling game. Question: Name the game least likely to be stolen from CGW's game library. Having gotten that cheap shot out of the way, let us now note, for the record, that the upcoming ALLEY 19 BOWLING is being made by Starplay, creators of two of the two best pinball simulators ever made: Chystal Caliburn and Loony LABYRINTH. So if you're a Mac gamer, and a bowler, this 3D bowling sim (with four-player network support) may be good news, especially given the dearth of Mac sports games.

versions are due out as well, the obvious question is whether gamers can look for ward to a football simulation or SONIC THE HEDGEHOG in shoulder pads. Hogan didn't waver in his design philosopłsy emphasizing gaming over simulation.

"For people who are into extremely accurate statistics, LEGENDS may not appeal to them as much as to somebody things that will be different are the stadiums, the league rules, the music, the appearance of the players, and the overall look as you switch eras. The Cowboys will definitely have to vary their strategy playing in '68 because of the rule changes things like hash marks being further apart and goal posts placed at the front of the end zone."

MEN IN TIGHTS In NFL LEGENDS, you'lt be able to fulfill your leather helmet fetish when you face '32-era he-men against the plastic-helmeled sissyboys of the '90s.

In the look-and-feel category, LEGENDS Includes 3D repditions of all 30 current NFL stadioms, as well as a representative venue for each of the nostalgic periods. With players from different eras competing. some fascinating matchins are possible. Can Crazy Legs Unselr beat Neon Deion on the post pattern? Just how does a game mesh the smaller, slower players of yesteryear with today's lightning-fast beliemoths?

For Accolade the answer came through Instorical research and statistical analysis. Hogan does admit to a certain degree of subsectivity, especially for the distant eras where stats are not available. In some cases, the designers had to rely on newspaper accounts to assess strengths and weaknesses of individual players,

LECENDS has some intriguing features, but can it flush FROM PAGE out of the pocket? " I think that we're going to get a subset of people that have been longtime FRONT PAGE SPORTS fans," Hogan predicted. "FRONT PACE is a great game, but Edon't think they've done enough in recent years to enhance the game and keep their customers. I think there's an opportunity to go in and steal some of them But PROMEPAGE also is a bit of a different market. There's overlap, but I think they tend toward the stats side of things, where we're tending toward the playability side, The real trick is figuring out the way to make it stand out, because there is plenty of competition out there."

That there is, and for computer football fans growing weary of the same old thing. that's very good news. Look forward to an exciting NFL season %

## **Duffer's Dream**

LINKS LS Lets You Play Like A Pro, With A Pro

by Denny Atkin, Sr.

'm on the first tee at Latabe
Country Club. A slight breeze
rustles the leaves while birds chirp
in the background. Arnold Palmer
has just but a long, straight tee
shot. I get in position and swing
away. The game is on. Here Lam,
fulfilling a "can't possibly ever
happen to me" life's dream, teeing
off against Amold Palmer, pro

against dreamer, in match play. My shot soars down the middle and lands softly in the farway, just beyond Patrier's. I murmir to myself, "You're away, Arafe."

Welcome to the world of Links LS, the latest attempt by Access Software to redefine the computer golf game. And like its esteemed ancestors — LFADER BOARD, LINKS and LINKS 356 PRO — this game's technological firsts and gameplay enhancements could very well make it the golf game to beat for years to come. With birds chirping in the background, divots and tees flying, and realistic ball flight, LINKS LS puts you on the fairway like no PC golf game ever has before

Price: \$79.95 System Requirements: 486 DX2 66MHz (Pentium 90 recommended), 12MB of RAM (16MB to run from Windows 95), 65MB of hard drive space, 2x CD-ROM drive (4x recommended), VESA-compliant video card with 1MB RAM (2MB recommended) capable of displaying 800x600 resolution in 32K colors. 8-bit sound card, mouse, math coprocessor required

se' math coprocessor required Protection: None (GO must be in drive) Program Manager: Roger Carver Publisher: Access Software, Inc Salt Lake City UT (800) 800-4880

Reader Service #: 336

#### **WELL-TENDED GREENS**

Much of game's realism is the work of an amazing new rendering engine, which supports resolutions ranging from 800x600 to 1600x1200 and beyond, in color depths ranging from 32,000 to 16 million colors. This imprecedented detail really reveals ground, grass and sand textures, highlighted by shadows and even fog. It also significantly enhances the game's 3D feet, Exactly how much detail you can display depends on your video card. With a IMB card, 800x600, 16 bit color is the maximum, white a 2MB card will let you play in 800x600 24-bit color, or 1024x768 16-bit

LIMES LS has moved most of the shot controls to a new retractable control panel, giving you a more open view of your actual shot. If you want to make a

club selection, spot the pin or adjust your stance, just move you mouse to the bottom of the sereen and the panel pops up. As you move the pointer across various options on the panel, labels pop up to explain each button's function. Moving the pointer across a club shows its maximum hit distance, a feature beginning duffers will appreciate. Only the swing gauge (visually enhanced but similar to the one in LANKS 386) and slope, lie and wind indicators remain on the screen once all setup decisions have been made.

In addition, side, overhead, pin and other views are now available in windows that you can pop up, resize and place on two generic male duffers and a female golfer—are larger, more fluid and more varied than those in Lasks 386. Palmer's swing process is particularly anthentic, including his characteristic gyrations following each shot. Adding to the realism are Amie's colorful comments, such as, "I was moving off that ball," "That is much better," and even the cassic "Looks like you but the tree, Jim."

In addition to the cyber-Amie, you can set up both human and computer players; the latter add a much-needed sense of competition to this game. Choose a golfer animation, pick from 63 shirt colors (some of which only a true golfer would wear)

SWINGER'S FANTASY Links LS's stunning degree of realism will make you forget that you're actually inside, not in Hawaii, not playing golf at all.

your screen as desired. If you close these windows after setting up your shot, though, you'll find a spectacularly realistic view which includes every mound, tree, bush, cart path (you actually see the earts parked to the side in some of the shots), sand trap and even ball washer in the vicinity

#### **FORE PLAY**

Access has improved more than just the scenery. The new golfer animation which includes Arnold Palmer himself. and set their ability level anywhere from amateur to champonship. You can micro-manage the abilities of computer players, giving them better skills at certain kinds of shots. A point system lets you rate a golfer's overall skill, and even makes possible contests to, for example, create the best overall computer golfer using 700 skill points.

Coffers will appreciate the new choices of game style—you can take on players in Match Play, Best Ball or Skins games. For

## TOO COMPETITIVE AT HOOPS.

#### Well, this surely won't help matters any.

Finally, some PC roundball that
lets you play just like
in the gym. In other

words, like a maniac.

my first game with Amic, I chose Match Play, the oklest and most traditional form of competition. When taking on human players, you can compete on a single machine or connect via modern or local-area network. The Latrobe course and simulated Amold Palmer included with LINKS LS are just the first entries in Access's new Tour Player Senes. Other famous professional golfers will tollow, along with their home courses.

#### **COURSE WARE**

Following my match with Arnie, I ventured to the windswept coast of Maur to play the famed Kapalua Village and Plantation courses, also included with the game. A striking difference to the Hawaii courses is always knowing in which direction the ocean lies, thanks to the enspenyimmental I6 bit 3D stereo sound.

As a thank-you for longtime Links supporters who have already invested in the numerous add-on coarses, Access has included 17 of the SVGA courses used with LINKS 386 PRO and LINKS 386 CD on disc 2 of the three-CD set Simply point LINKS LS at the disc containing the original course, and the program will install an enhanced LS version Although these courses don't quite

I MEANT TO DO THAT Hitting your ball close to the concrete makes it much easier to get back to the cart

match the image quality or offer the ani mated fly-bys of the native LS courses, they are enhanced significantly from the originals.

#### ACE IN THE HOLE

LINES LS is more than just a nun-ofthe-mill franchise update — the interface changes and more realistic sound and graphics give this classic golf game a really new feel, while new match play against Amic and other pro-gollers gives LINKS LS a much welcomed competitive edge. And, lest anyone tell you that playing computer golf is a waste of time, the player animation is so great that you could actually get some good ideas for improving your real-life golf swing and course management through thoughtful playing of this game. Perhaps the only improvement this golfer can suggest would be to allow the player to be positioned anywhere in the teeling area when setting up for the shot. All in all, however, this is a great way to spend a Sahnday when the real links are rained out

Unlike the swing-challenged, flight simfixated fr. edition, Denny Atkin Sr. is most at home on a golf course, as is evidenced by his recent capture of the 1996 Club Champion, Handicap Flight title at Oregon's Tualatin Country Club.

#### The Virtual Clubbouse

Ithough I couldn't wait to get to the golf game with Amie, the standout extras included in the three-CD-ROM package turned out to be thrilling additions for any

real golf fan. Two virtual reality 30 tours—Kapalua's Plantation Cubhouse and Arnold Palmer's office and workshop—use the engine from Access's The Pandora Diffective adventure game to let you walk from room to room and zoom in on specific items of interest.

The virtual tours are amazingly accurate. You move freely down the hallways of the opulent Plantation course

clubhouse. Make your way down the circular staircase to the lower lobby where you'll find the Victory Wall, on which past Kapalua champions are displayed. In all, 93 points of interest are expained with a simple click of the mouse.

Arnold Palmer fans will love the virtual tour of Arme's workshop, office and trophy room. I really enjoyed the feeling of being there, in my idol's private place. Also, video footage allows us to listen to Palmer's insights and recollections of his PGA and Senior tour memories. In addition, two video tours are included: Kapalua, on the island of Mauri, and the story behind the legend of Arnold Palmer. Finally, video fly-bys are available for all the holes on the Links LS courses.

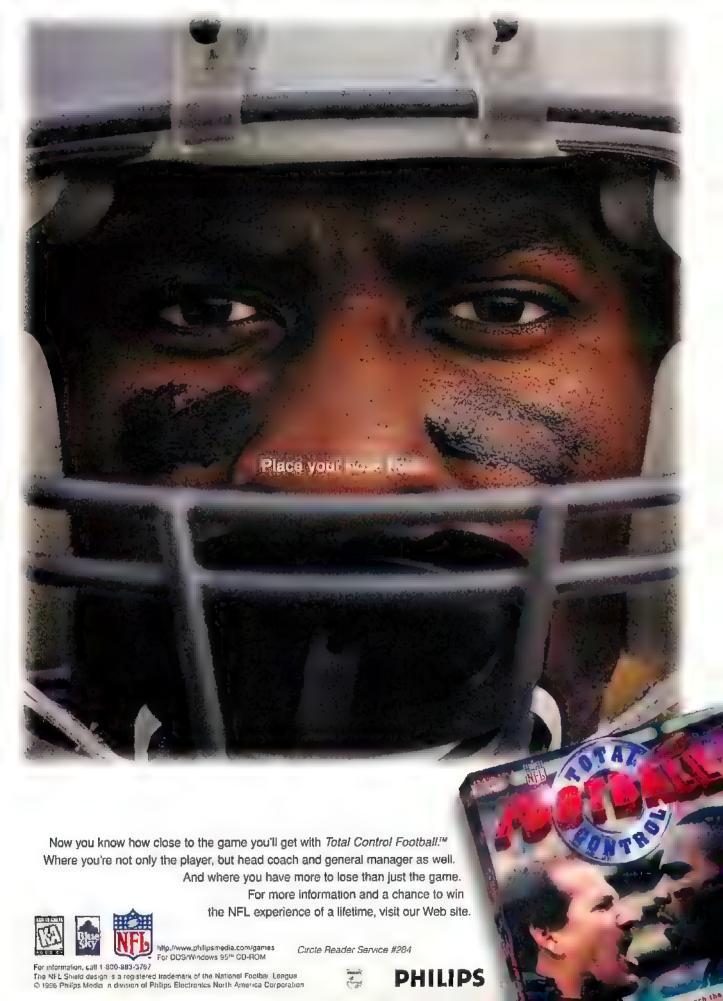

APPEAL: Computer golf fans looking for an accurate, realistic golf sim.

PPROS: The "Like being there" sounds, textures and animation combine to make this simulation a real golf fan's delight. Multiple match types plus modem/network play expand the game's

►CONS: Other than slow rendering times, hard to find any. Perhaps the chirping bird?

TRIPLE PLAY 97 Is Flashy, Arcade Baseball At Its Best, But Stat Geeks Beware

by Jim Gindin

A Sports is kind of like the Michael Crichton of computer sports garning. Like Crichton, who has perfected a captivating story-telling formula in his novels (furassic Park, Disclosure, et al) that eschews realism or social significance but nicely stretches the imagination, EA Sports creates

games that are just plann fun to have on the hard drive. The company's new entry into the vast baseball market is 'TRIPLE PLAY 97, a smooth, attractive bundle of hitting, fielding and pitching, that, like their other games, is loads of fun to play but will leave statistical purists frowning

#### BALL BUSTER

When evaluating TRIPLE PLAY 97, areade gameplay is everything. EA delivers top-notch SVCA graphics in a senaless, smooth-scrolling playing field. The game has an excellent-looking batter/pitcher interface. Players have individual heights, weights and skin colors, so short, muscular players look a little Kirby Prickettish, while lanky pitchers resemble Randy Johnson. This gives the game a neat, polygon-like personality.

As the pitcher, you can select from nine pitches, and then guide the pitch by moving the pitcher right or left on the mound. Touching or holding the joystick moves the pitch in a certain direction. It isn't real baseball—the location of a pitch shouldn't be changed once thrown, obviously—but it is well execut ed. Cetting a feel for throwing outside the strike zone and making the computer batter swing is very important in this game.

From the hitter's perspective, setup is more like real life. The hitter selects an open, even or closed stance, and can then move within the batter's box to select an optimum position for swinging. Swinging the bat requires a button press. If you hold the joystick down, you get a ground half. If you push it up, you get a fly ball. TRIPLE PLAY 97 does not force you to select an area of the plate to swing into. After playing many different competitors' games, I think this was a good decision. There simply isn't any way, with current visual tech-

THIS IS A HIT! TRIPLE PLAY 97 offers just about the best batting nterface available in PC arcade baseball. Set your stance, position yourself in the box, and then prepare to whiff.

nology, to properly simulate the perspective of facing a real pitcher. All attempts to force players to swing in a particular area of the strike zone results in frustration; you need to retrain your brain to recognize specific pixel paths to make that kind of choice.

In TP 97, all you worry about is trying not to swing at inside or outside pitches. You're not going to walk, so timing the swing is everything. Unfortunately, once contact is made, realism detenorates. The stance and your selection of whether to swing with an uppercut almost entirely determine where the ball goes. If you select a closed stance, your batter will pull everything. If you use an open stance, everything will go to the opposite field. Hitting and pitching also seem very streaky. Some innings, you can't buy a lint.

Other innings, you'll get (or will give up) six runs without even thinking about it.

Fielding is a little quirky. You can have your fielders automatically gnided to where the ball will land. Otherwise, if you opt to do it yourself, you'll have to pump the joystick button to get them to move at anything quicker than a molasses-like pace. Once the players reach the ball,

throwing to the correct base can be tough, especially since these players can throw like DNA-mampulated monsters. Any outfielder is capable of zipping a one-hop strike to the catcher from 400 feet.

If you don't hit a home run, you will almost certainly hit a single with onebase advancement Any land of extra

advancement is difficult, and usually restills in a costly out. Even computer-controlled base running is a little bizarre. It's not unusual to see a runner just a few feet from seoning from second base on a single turn and head back to third when the center fielder starts the throw. This part of the game needs a lot of work. The option for even faster, but riskier, throws will add a lot to the game once the kinks are worked out.

#### **CHROME JOB**

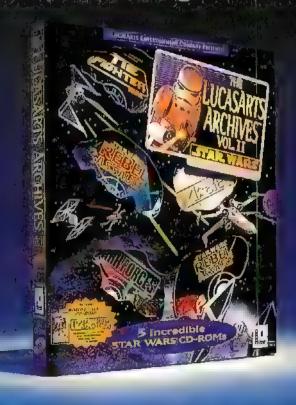

Since TRIPLE PLAY 97 was developed simultaneously for console systems, it's designed to run entirely from joystick or gamepad input. This gives the action game itself a very smooth feel. EA has mastered this type of interface. The game moves from module to module

with attractive, circular menus. Viewing the game's limited statistics. lowever, is a bit tedious. Setting or changing a lineup is very difficult, and If you make an ingame mistake trying to figure out player changes, you cannot undo that change Adding the use of mouse input, while violating the concept of a pure, con-

sole-like game, would have helped this PC version

TP 97 sounds great, however. The game's ambient sounds are cool, and you can select from a few unobtrusive background musical themes. The play-by-play is coherent and doesn't attempt to describe everything, a mistake other designers have made. While player names are provided, amouncer Jim Hughson is a name-mangler who would make Harry Carey proud. No one should try to say Expos shortstop Mark Crudziclanek's name without help.

TP 97 also features a Home Run Derby that has more appeal than the game itself in a purely areade sense. You can choose one or more players to participate, then select a ballpark and (optionally) some attributes about the computer pitcher. Then you simply try to hit the ball out of the park. It can be used for learning the timing required to bit fastballs and curves, and the program

THE SUN WAS IN MY EYES You might want to think about letting TRIPLE PLAY handle fielding automatically, unless you enjoy getting beat by in-the-park horners.

who you calling a blimp? Triple Play's 3D graphics are most triumphant, including breathtaking, realistic rendenings of all the Major League stadiums.

tracks the longest home runs hit by each player I think this part of the simulation has more replay value than the rest of the game. It's simply great entertainment to try to get Gredzielanek to match the mammoth 500-foot Frank Thomas home runs.

## STATISTICALLY SPEAKING

So the game looks great and plays great, but how about that statistical model? Samply put, TRIPLE PLAY 97 has no interest in providing results that reflect the numbers of baseball. Players either have power or they don't, and dozens will finish within striking distance of a league lead in the 40s in simulated seasons. Everyone steals a lot of bases, leading to results such as speedy Atlanta leadoff hitter Marquis Grissom (12 homers, 29 stolen bases in 1995) and powerful Fred McGnff (27 HR, 3 SB) posting nearly identical numbers (36 LIR, 37 SB vs 41 HR, 37 SB) in simulated play. Rico Brogna, a Mets singger who has one stolen base in his career, was among the league leaders with 51 in TP 97 life.

FA does a little better simulating pitchers, but only tracks walks, strikeouts, wins and losses. Saves are also listed, but none are ever recorded. There's no attention paid to pitching strengths. Greg Maddux can throw a knuckleball and a splitfinger pitch in addition to his fastball/change regimen. In fact, all pitchers can throw any of the nine supported pitch styles. This is fun, but will annoy those who are really into simulating baseball.

League management is nonexistent,

The computer selects the same lineup for all league games, so backups do not play. While it tends never to replace pitchers in head-to-head play, it takes them out much too early in simulated games. Every team has a reliever appearing in 120 to 150 games per season. To keep things moving at a fast pace, the game's designers obviously weren't too concerned about getting into the meat of simulating baseball—and it works, sort of, as games are simulated quickly at least.

## PENNANT WINNER

Overall, TRIPLE Pt Ay 97 has state-ofthe-art graphics, a decent interface and solid action gameplay-but not much in the way of realism. Comparison to other recent releases, like Sierra's FRONT PAGE SPORTS BASEBALL PRO '96, is a little difficult. FPSBB '96 attempts elements like a realistic physics model of a baseball in flight, while TP 97 has a few flight paths built in, some directly defying the laws of physics, FPSBB '96 makes a token effort at league management and statistical realism, while TP 97 completely ignores these functions. But TP 97, like Michael Crichton, does entertain, while FPSBB '96 reads a lot like some college consorfirm of literary critics trying to create the Creat American Novel, Everything's there, but somehow it never comes together.

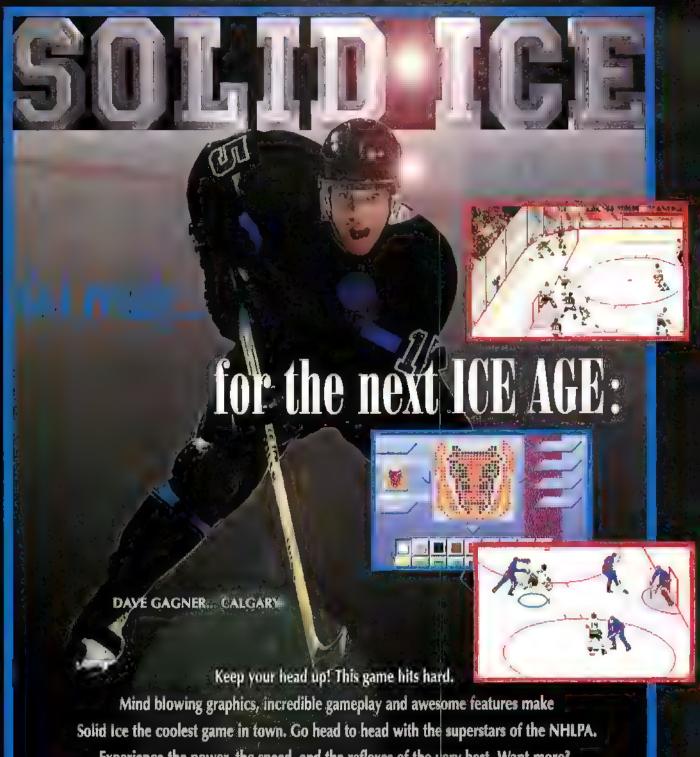

Though EA Sports has done a good job here, the graphics-based computer base-ball genre still awaits its masterpiece. No game has completely succeeded yet in capturing both our trigger fingers and our imaginations. In the meantime, though, TRIPLE PLAY 97 is a very fun diversion.

▶ APPEAL: Console sports gamers looking for an action baseball game for their PC.

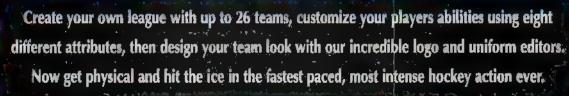

>PROS: Easy-to-use interface, smooth and pretty graphics; excellent arcade action; a well-implemented home run derby, modem play.

PCONS: Weak league management support; nothing to satisfy the stat-enthuslast; cartoon-like pitching interface.

Experience the power, the speed, and the reflexes of the very best. Want more? Solid Ice gives you a collection of game editors found nowhere else.

## Strat Me Up

## No-Nonsense Baseball Sim Gets Prettier In First CD-ROM Version

## by Dennis McCauley

ogether with long-time rival APBA, Strat-O-Matie is one of two producers of statbased baseball sums that have successfully made the transition from table top to hard drive. Both are unique in the rapidly evolving world of computer games, where "long-standing" often means

that a game has survived long enough to have a seguel, Strat-O-Matic, on the other hand, has been eranking out their computer baseball game for over a decade, and has been offering their eardbased game since JFK played touch football on the White House lawn.

STRAT-O-MATTC BASEBALL (SOM) can be considered a boutique product, appealing to fans who demand the utmost m statistical realism — and get it. Make no imstake, SOM will never compete with the likes of EAs TRIPLE PLAY or Sterra's FRONT PAGE SPORTS: BASEBALL PRO. but then, it doesn't try to. The small, privately run company from Glen Head, New York, simply chums out what may be the finest statistical simulation available today. Thankfully, with the new version, they've spraced it up with just enough eye candy to keep things interesting

Never let it be said, however, that Strat-O-Matie moves precipitously. While most other companies switched exclusively to CD-ROM and high-res graphics several years ago, Strat-O-Matic finally took the plunge this summer, and not without hesitation. Long-time fans waited impatiently for the game's release, their anxiety fueled by rumors of strange new areade-like features inserted into what has historically been a shane to statistics. Well, the new baby has arrived, and it's doing fine-a better-looking version of its older siblings. There is an extra appendage you should know about, though. It's called the

MIRROR, MIRROR For this first CD-ROM, Windows version, STRAT-O-MATIC BASEBALL'S new look features much better looking stadium backdrops, though no one is going to mistake the game for TRIPLE PLAY 97.

Regulator, and it's ugly. But don't worry, the doctor says you can toggle it off and no one will know the difference

There's one other major difference in the new STRAT-O-MATTC: It's Windowsbased, running under both 3.1 and Win 95 Veteran SOM players will have little frouhle navigating in the new version, since conceptually the game has changed little. STRAI-O-MATIC nevbles may find flyings a bit more confusing, however, due primarily to the lack of a printed manual - a terrible trend in the industry in general that

the company should not have

followed

## A LEAGUE OF ITS OWN

To its designers' credit, SOM is about as flexable as a baseball game can be. Players can choose to manage their favonte team while committing the others to autoplay mode. Or, if they choose, put every ball club on autoplay, sit back and watch the results fly by On a Pentium 90 or better, complete season replays can be completed in under 15

minutes. Anyone who's surrendered their computer for a weekend while waiting for FPSBB to finish a smmed season will relish SOM's speed in CPU-to- CPU play.

Camers who scan the fine print on the stat sheets will appreciate SOM's inclusion of every player who picked up a bat or a glove duning a season. It's great fun to use the late season cultups and tesser role players in recreated seasons. Player manipulation has

been simplified in the new STRAFO-MATIC as well. The old General Manager module has given way to a duag and-drop. interface for trades among teams in the same league. In a carryover from the old SOM, interleague trading remains more complicated than it should be, requiring an edit-copy-paste step.

One aspect of management that's especially cool is the Swap-O-Matic feature, which allows the gamer to propose trades as large as three-for-three with GMs of computer-run teams. The game's

MINOR LEAGUE ACTION STRAT-O-MAIIC has thrown a bone to areade gamers with an awkward beast called The Regulator, a cartoony pitcher-batter confrontation that you'll want to disable as soon as possible.

Price \$66 00 System Requirements: Windows 3.1 or higher 8 MB of RAM or greater, 20 MB of hard drive space for full install, CD-ROM drive Protection: Floppy key disk Developer: Strat-O-Matic Glen Head, NY

## **PLAYING THE NUMBERS**

Gauceplay is the standard STEAL-O-MANC fare, and basift changed much over the years. Players make out a lineup, Statistical accuracy remains a STRAT-O-MATIC trademark, as players perform realistically across the board. Although certain offensive categories seemed a bit on the high side in several 1995 replays, aren't sportswriters today saying the same thing and attributing it to the sorry state of Major League pitchatg? Still, both Dante Bichette and Flank Thomas reached Roger Maris country with 61 HRs in separate replays, and several sluggers exceeded the 50-homer mark. The Indians maxed out at 116 wins on one occasion, exceeding their own 1954 major league record by 5 Ws. Other than these few anomalies,

> the stats SOM produced were more than satisfactory, and much better than what you'll get from the graphics-oriented satis.

On the downside, STRAL-O-MAILE still uses an annoying floppy-disk-key copyprotection scheme. If the company really feels this is necessary, wouldn't if be simpler to just check for the presence of the CD-ROM rather than writing an energytion

to the user's hard drive? This is one thing that Strat-O-A latic needs to dump quekly to help shed their small-time image. Also lamentable is the lack of modern play, because so much of the competition is including it these days and so many leagues around the country are using SOAL.

## FEELING IRREGULAR

And then there's The Regulator, the news of which set tongues wagging among suspicious SOM faithful for morths in anticipation. The Regulator is an arcade (that's right—arcade) device that was included, one supposes, to draw action-oriented fans to the product. If won't work. When activated, The Regulator sends the player to a cartoonish pitcher-batter confrontation. This device is basically a circle drawn around the

strike zone, in which the user tries to click the mouse at the ball as it arraves at the plate. According to Strat-O-Matic, it has no impact on statistical accuracy, and the link between what one accomplishes at The Regulator screen and the actual play result is Byzantine, at best. Thankfully, this feature is optional. My advice to garners? Toggle it off — mimediately. My advice to Strat-O-Matic? The Regulator is no Natural. It deserves an unconditional release

In yet another attempt to spice things up, Strat-O-Matic has upgraded the textbased play-by-play to include 10,000 lines of verblage, so there will be less of the repetitive commentary of the older games. For a sawback more, gamers can purchase an optional team-specific play-by-play disk that names names, including the owner, mascot and enaches. There are also ambient sounds, such as the crowd, the crack of the bat and the peanut vendor, that succeed to some extent in adding atmosphere. However, I found that on my AWE 32, the general crowd sound had an underlying load, rhythmic thump that was quite distracting

Overall, Strat-O-Matic's first foray into Windows and CD-ROM gaming has to be considered a success. The game plays well, yields accurate stats, and offers a few pleasing new twists. To be sure, no one will ever confuse SOM with HARDRAIA. 5, TONY LARCISSA, FPSBB or any of the other big graphics-oriented baseball sims. But then, that's not why gamers turn to stat-based games like SOM. So, keep 'em coming, Strat-O-Matic — just not on a Regulator basis. §

I'M PRETTY INTERESTED, WHAT ELSE CAN YOU DO FOR ME?
I'M LOOKING TO FIX THE FOLLOWING PROBLEM(S) ON
MY TEAM. MAYBE YOU CAN HELP ME OUT.

SWAP TILL YOU DROP One of the game's best features is the Swap-O-Matic, which lets you make 3-for-3 trades with computerrun GMs.

select a starting pitcher, and then it's batter up! The pitcher vs. latter matchup keys the action, but fielders' range and error percentages have an impact as well. In addition, SOM includes ballpark and weather effects that influence play. Home runs in Wrigley become long fly balls in the Astrodome, while night games in April often feature cold, wet weather which puts a damper on hitting. Couple these with true lefty-righty effects, and SOM provides the feel of real baseball, if not always the look. While the optional stadium backdrops are much improved over previous editions, featuring attractive day and night photos of major league ballparks, STRAI-O-MA, a. remains primarily a stat oriented gasac. If you need to secrealistic, animated ballplayers and stunning stadium graphics, you're in the right church, wrong pew

- **PAPPEAL:** Hardcore basbeball gamers and stat freaks who value accurate simulation over all else
- >PROS: Top-notch statistical engine, excellent player management tools, fast and accurate replays, complete major league rosters.
- CONS: Ho-hum sound and graphies, key disk protection scheme, misguided attempt to Inject arcade action into game system.

## **Get A Hold** Of This Action

CH's New Force-Feedback Joystick Is A Wrist-Wrenching Winner

ve seen the future of flight sims, and it is a joystick. Specifically, the new forcefeedback design from CH Products, While VR goggles make it look like you're really flying a plane (in a low-res universe, at least), the CH Force F/X joystick makes it feel like you're in control of a real aircraft.

## POSITIVE FEEDBACK

The Force F/X, which was slated at press time to ship in late September, will use the same handle as the CHF-16 Combat Stick But that's where the similarity ends. The F/X's heavy base does away with the throttle wheel and simple gmbal mechanism found

STICK IT The CH Force F/X will share the handle design of this F-16 Combat Stick but will include a sturdier base.

in the F-16 Combat Stick and replaces them with a complex mechanism of gears and motors. The resulting stick works like

a conventional joystick, but it provides you with amazing environmental feedback, simulating bumps, jolts, vibration, and resistance.

I recently had a chance to spend a week flying Philips Media's Figureit DUEL using a prototype Force F/X, and I'm a definite convert, (It's really hard to avoid a cheap joke about flaccid joysticks here, but I'll resist.) Going back to a standard joystick now is like downgrading from a top-of-the-line programmable fighter stick to an old Atari digital joystick, the experience just can't compare.

Force feedback has two effects, First, the realistic resistance the stick provides when you attempt to pull out of a highspeed dive or make a rapid roll motion adds a level of challenge to combat you can't just jerk the stick in a Corsair like you're piloting a fly-by-wire F-16. But even better, the joystick actually significantly increases your situational awareness by providing much of the same feedback you'd get when flying a real plane Eucountering heavy resistance when you pull back the stick is a clue to check your alispeed gauge, because you're probably overspeed. Similarly, a shaking stick is a much more intuitive and realistic warning of an impending stall in a WWII aircraft than a warning horn. Self-proclaimed espert pilots often complain that aircraft in sims don't depart from controlled flight as easily as the real thing. However, that's reasonable, since you get very few of the cues from a screen and speakers that you get in a real cockpit. Until now, that is. Well-programmed force feedback will open doors to new levels of flight model realism.

A forcefeedback joystick does more for the feeling of 'being there' than any VR helmet.

impacts and gun hits.

Look for force-feedback support to quickly become widespread. Even now, the latest version of ICEs WARBIRDS online sim supports the CH stick. Its feel is similar to FIGHTER DUELS, but the program doesn't feature the same level of adjustment.

The Force F/X should sell for around

\$150, a small price to pay for the sensation of "being there."

## **NET RETURN**

Speaking of Figure 2004, the NET DOED nine-player add-on-I previewed in the July issue is finally available. You'll find it on this month's CG-ROM, as well as on our web site at www.zdnet.com/gaming. §

his month we start with a sim that's dropped off the radar. A few months back, Sierra promised a free update to the lackluster Silent Thunder: A-10 Tank Killer 2. The update was set to add a realistic flight model as an option to supplement the poor, arcade-like handling of the sim's A-10, and include a series of new missions as well.

The plan was to incorporate the Rep BARON II flight model, which is forcemodel driven and can be used for virtually any plane which you have accurate dimensions and data for. Turns out that the estimates of the difficulty of grafting in the RB II flight model were more optimistic than realistic. Also the missions, which were almost complete, turned out to be too large to distribute online. At this point, the project seems to have been shelved, and players looking to fly a plane that handles like a real A-10 should instead check out A10 Cusa! on the Macintosh, or even the A-10 included in Jane's ATF.

> The other news from Sierra's Dynamix

group is of the bad news-good news type. The bad news is that Reo Barion if has been delayed until at least February of next year. The good news is that the delay will allow developers to further finetune the game and make it *right* before shipping. Look for support for the major 3D graphics cards to be included, and multiplayer is a possibility as well. (Multi-

SLOW CRASH Any chance of Reb Bason II shipping this year has been shot down

player will definitely be available in an add-on if it doesn't make it into the product.) After the recent Outpost like flasco with the early release of a buggy, rough FRONT PAGE SPORTS: BASEBALL update, we're happy to see that Sierra isn't exhibiting

more corporate shortsightedness and rushing RED BARON II out at the end of a fiscal quarter just to try to satsify stockholders' expectations.

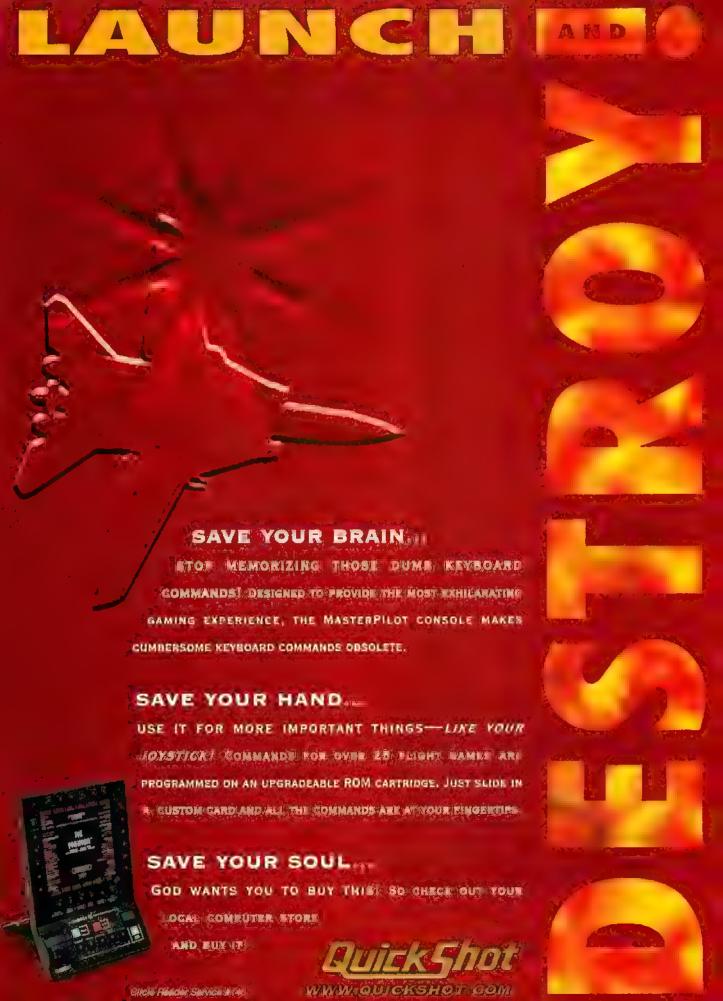

- Another delay is in store for Micro-Prose's European Air War, in part due to the departures of some members of the development team, but also because the decision was made to enhance the sim over the original design and move it from DOS to Windows 95. Look for it in the first half of 1997.
- Finally, since this month's "Radar" seems to be about making you walt, I'll close with the scoop on the next project for the West Coast division of EA's Jane's group. After the completion of the latest sequel to 688 ATTACK Sub, due this spring, Paul Grace and his team plan a Jane's flight simulation set in World War II. It's the end of the line for the creaky US Navy FIGHTERS engine, though, so don't look for this product until at least Christmas of 1997, because the team is building an entirely new simulation engine from the ground up for this project.

## MasterPilot

THE WAR IS A SECOND THROUGH OF DECEMBER 1970 AND DESCRIPTION OF THE PARTY OF THE PA

## Unexpected Ace

Empire and Rowan's Latest Sim Is Surprisingly Realistic

by Denny Atkin

mpire makes heady promises about FINNG CORES, its impossing World War I flight sim. You have to be pretty confident to claim your product will "render other flight sims" obsolete, and claiming that computer pilots are "as smart as their real-life counterparts" is just asking for trouble

Whether the product will come anywhere near to living up to those claims will be seen when the sim ships in mid-November. But even in its unfuished state, it's evident that the product will do for Empire and Rowan's reputations as developers of flight simulations what LONGBOW did for Origin's. FIYING CORPS is a serious attempt at simulating the first air war, one that looks ready to surprise those who've encountered the previous areadish efforts from this team.

At the start of the Great War, nobody really knew what to do with the airplane. Unarmed aircraft were used for reconnaissance, but the respective armies had little respect for the potential utility of air power. Early attempts at air-losur combat were

JOE CAMEL Because of the gyroscopic effect of the Sopwith Camel's rotary engine, you'll get much better responses when turning to the right in combat situations.

LOW AND SLOW Strating supply dumps can cut off affed advances, but you'll have to watch for ground fire.

almost comical Pilots tried to down other arcraft using shotguns, rifles, bricks, bottles—even graphels! One air factics guide advised pilots to force an enemy aircraft down by getting above it and pushing against the opponent's top wing with the landing gear. Air combatt didn't get very exciting until France's Roland Garros mounted the first successful forward-firing machine gun on a Morane monoplane in late 1914.

From that moment, the days of enemy pitots flying carelessly by each other were over. At first, air combat was mostly a test of marksmanship. But soon, a series of maneuvers—including the Immelman, split S, and barrel roll still in use today—came about, and air combat because a test of flying skills. Names like Richthofen, Ball, and Rickenbacker would soon be revered—and feared.

And if FIVING CORPS accomplishes its aims, you too will fear these names. The program takes you back to the era of nascent air combat, when victory was gained as much by individual creativity, initiative, and reflexes as it was by combat training and hardware capabilities.

## **CAMPAIGN TRAIL**

FINING CORPS will be set in the latter half of the Great War, 1917–18, and offer four campaigns. These aren't typical securios that just drop you into the action as an anonymous pilot for a series of redundant fighter sweeps and strafing runs.

The "Flying Circus" campaign puts you in charge of Manfred von Richthofen's Jasta II in May, 1917. But instead of dropping into the role of the Red Baron himself, you instead fly as his brother Lothar With Manfred on leave, you take command of the squadron and try to match or break his kill record. But Albert Ball and his 56th Royal Flying Corps Squadron have other plans for you. This is your chance to alter the course of fustory by forcing the encroaching British offensive back, and making Lothar von Richthofen the name that history remembers.

A similar campaign puts you in the boots of Eddie Rickenbacker, America's top World War Lace, Can you match his performance, lead the 94th Aero Squadron to victory, and win the Congressional Medal of Honor?

These are scripted campaigns, as is the

## Bad To The Drone!

## A Flight-Sim for Novices and Aces Alike

Beneath the animated, exoskeleton of Banzai Bug beats the heart of a joystick-wrenching, pheromonepumping, action-packed flight-sim. Designed for all of you gamers with better things to do than memorize a tech manual the size of a calculus book, Banzai Bug weaves a humorous story-line and wise-cracking dialogue seamlessly into the aerial action. Lead Banzai on a mission to drive the bug-phobic humans out of the house forever. Banzai Bug will be flying off your local software retailer's shelf beginning this October.

Eight fully rendered 3D levels

Bug-phobic human adversaries

Scores of ground-based and airborne bogies

3 Axis, 360° freedom of flight

(203) 797-3538 http://www.gralier.com/ Spring Offensive, which puts you in the shoes of a rookie pilot and lets you fly some training missions before your trial by fire. But perhaps most intriguing is the Battle of Cambrai, which does away with the scripts and puts you in the skies over history's first massive tank battle. You and your squadron must prevent the massed Allied tanks from reaching Cambrai. You'll defend your field guns and attack allied supply lines, aircraft, and artiflery battenes. The battle front changes depending on

your performance, this dynamic campaign should offer plenty of replay value.

## THE PLANE'S THE THING

Well-designed missions don't mean a thing without well-designed planes to fly them in. Happily, it looks like FIMNC CORPS is set to deliver. In addition to combing hundreds of books dealing with WW Lair combat, Rowan has been working with a test pilot at England's Old Warden airfield — who has actually flown many of the aircraft modeled here — to ensure anthentic aircraft handling.

The flight model, even in the alpha version I've been flying, bears no resemblance to previous Rowan efforts. It looks like the days of jet-like biplanes are over Aircraft handling feels good, with proper speed bleeds in turns and climbs, realistic stall behavior, and even torque effects. The idiosynerasies of each aircraft are properly modeled as well. For instance, the Sopwith Camel uses a rotary engine that spins as the propeller does. The torque and gyroscopic effects of this heavy spinning engine are properly modeled, making

right turns dramatically more effective than left Subtle effects such as the engine pushing the nose down in a turn are modeled as well. The only problem with the alpha version's flight model was too-easy recovery from spins, an inconsistency Rowan plans to address before the program's release. Less experienced pilots can disable spins, as well as torque, wind, gyroscope, and slapstream effects

The enemy AI wasn't fully implemented in the version I tested, but Rowan's design documents indicate that enemy pilots will fly according to their plane's particular abilities and weaknesses. For example, a Pfalz pilot will usually avoid combat unless he has a height advantage that will allow him to dive and zoom on the Alhed planes. Look for some heetic acraal melces—the sim supports up to 48 planes in the air simultaneously.

Rowan has finally buried the hornel

VISITING THE BRITS A Fokker prepares to lay waste to a British command HQ.

view system used in their earlier games. FIMNG CORPS features a virtual cockpit as well as view keys. A Padlock view can be set to lose track of a plane when it moves out of your field of view or to "magically" track planes even when they're obscured by your wings and fuselage.

Couplies are nothing short of speciacular. The planes are sharp and detailed, as is the landscape. The ground is accurate enough that you'll be able to use rivers and roads to navigate to and from your targets—lap maps will be included. Rowan used a combination of on-site research and WWI aerial reconnaissance photos to create the terrain.

SIGN LANGUAGE Because WWI aircraft didn't have radios, communication with wingmen is limited primarily to hand motions signifying "break off" and "return."

## AWAITING TAKEOFF

Finns Corps will include both DOS and Win 95 executables, with the latter supporting multiplayer play. Graphics resolution is adjustable—you can bump the standard 640x480 up to, say, 1600x1200 if your machine can handle it.

If FEXING CORPS delivers on all its lofty promises, it has the potential to make the Empire/Rowan team senous players in the simulation market.

t 730 pounds, the B-61 tactical thermonuclear bomb packs a huge wallop in a tidy package. It has no friends—if delivered incorrectly, it will kill you as readily as it does the enemy. By knowing the proper delivery profiles, you can learn to stop worrying and love The Bomb.

There are two basic release methods that guarantee you won't get caught in the nuke's enormous blast: high-altitude level bombing and toss bombing. Reasonable accuracy requires CCIP Mode 2 be used on a target designated by ground radar, near the primary objective.

The goal of each method is to end up at least 30,000 feet above ground level by the time the bomb detonates. If you start out above that altitude, a sim-

ple level drop will do. Otherwise, release while in a 40- to 45-degree pitch-up, with enough momentum to take you above the safe altitude threshold in

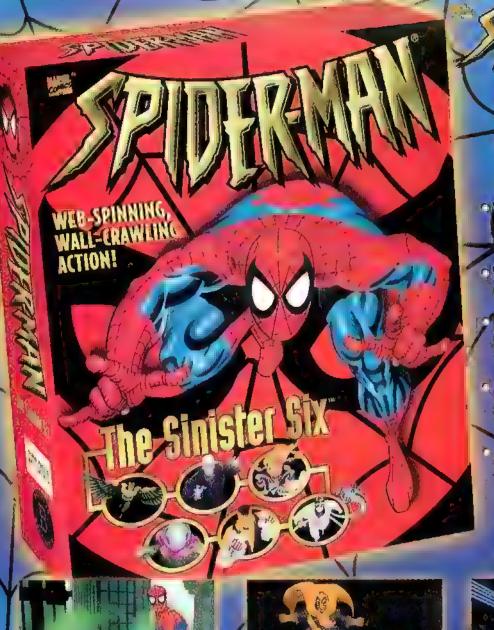

FLASH DANCE When a tactical nuke goes off, you'll need to be at least 30,000 (set above ground level to avoid being caught in its blast.

time. Note that the 8-61 is a retarded bomb, so this toss-bombing technique won't grant you additional standoff range, just more time to escape.

The HUD symbology looks the same regardless of whether you use level or toss bombing. The target won't be in the HUD's field of view, so you must maneuver until the vertical steering line bisects the target designator box with your wings level. Watch the time-to-go indicator to know when to drop. Squeeze the trigger when this number disappears, one second after it reads "00 00."

Coming in at such a high altitude makes you a target for enemy interceptors and air defenses, so you generally want to get in and out as fast as possible. In your haste, don't forget that the bomb will not drop if you're above Mach 1.2. When turning away, try not to dive below 30,000 feet. If you do, damage from the shock wave is certain.

advantage by leaving your radar off as long as possible.

When you decide to engage, it will typically be from beyond visual range, using AIM-120 AMRAAM medium-range missiles. The computer pilots are fearless, and will drive in to fire AA-10 Alamos at you even though they know the missiles you launch will get to them first.

AA-10s employ semt-active radar homing guidance, so they're supposed to stop guiding if the lameching aircraft is destroyed. In B2B, however, they remain a threat no matter what, making mutual kills a distinct possibility. While it's possible to dodge an Alamo (see "Missile Evasion" sidebar), it would put you at a

LIGHTEN UP Setecting your centerline fuel tank before you
enter combat a lows you to jettison it quickly when you need
extra maneuverability.

distinct factical disadvantage afterwards.
The preferred option is to prevent a bandii from faunching at you in the first place.

Dropping chaff will break any aircraft's radar lock on you, forcing it to spend 4 to 5 seconds regaining the lock. The trick is to deploy a chaff buildle every 3 seconds,

eliminating any chance of radar locking onto you until the bandit's taken out by your AMRAAM or you pass each other and enter a visual range doglight. This technique consumes a large portion of your total supply of chaff, but for rendering deadly radar-guided missiles impotent, it's well worth the cost.

If your AIM-120s aren't 100 percent effective (as is usually the ease), one or more bandits will survive to engage you close in. Should you decide to stay and fight, jettisoning unnecessary external stores will boost your turning ability significantly. AMRAAMs are heavy enough to be a liability in a doglight. Instead of wasting them at this stage, try to fire them before the merge, launching two at each target when they can still do some good.

From this point on, it comes down to your doglighting skills versus the computer pilots'. Just remember to keep your speed up and refrain from hauling all the way back on the stick unless absolutely necessary.

## AIR-TO-MUD

For ground attack missions, B2B provides a good variety of ordnance types to choose from. Selecting an appropriate mix for the target at hand can greatly increase your chances of success.

Together, the electro-optically (EO) guided weapons, which include the GBU-10 glide bomb and the AGM-65 Maverick, are good choices for attacking a wide range of targets. They are deadly accurate and can be deployed from any altitude. And owing to a deficiency in the GBU-10 modeling, there's no blast radius to worry about. One or two GBU-10s can demolish almost anything. With its smaller warhead, the Maverick is best suited for destroying ground vehicles or parked alreraft, though two hits will usually take out a ship.

Because each weapon type's seeker can be slaved to a target designated by the ground radar, it's actually possible to guide multiple weapons toward different targets simultaneously, greatly increasing the amount of damage you can do in a single pass. It's not realistic to do this for the CBU-10, but neither is being able to use it at all, since your simulated F-16 does not

eleating missiles presents quite a challenge in 82B, as they track you quite tenaciously The key ingredients to avoiding

a SAM or air-to-air missile are airspeed, sit-

uational awareness, and good technique.

Spoofing heat-seekers is relatively easy. Dropping a flare every 3 to 4 seconds until the missile passes you by often works all by itself. The important thing is to know a missile is inbound. This can be difficult, because the missile launch warning system is

extremely unreliable. It's generally best to play it safe and drop flares whenever a bandit appears to be even close to firing parameters.

Radar-guided missiles are a whole different bal game. They are not easily fooled by chaff or jamming, so your best defense is to outmaneuver them. First, you must spot the missile. The Threat Warning Indicator will tell you the direction it's coming from. Turn toward it. When you see the missile, turn to put it 40 degrees off your nose. This allows you to judge the missile's range by its smoke trail, and it forces the missile to

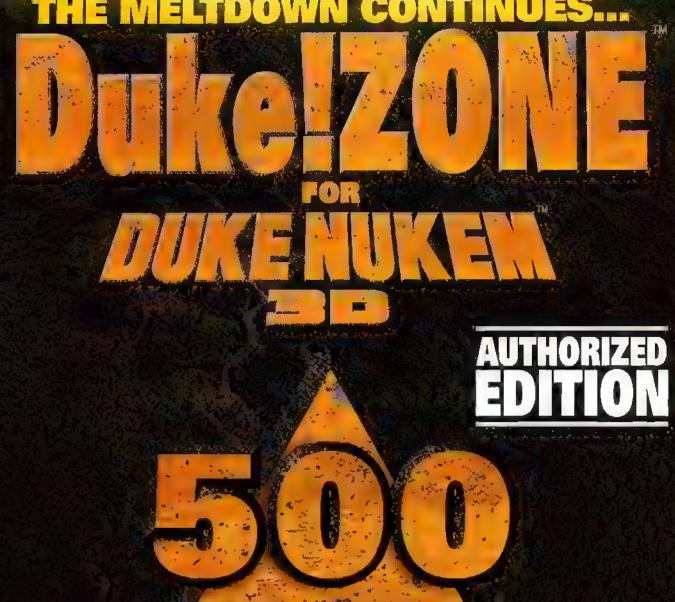

steer out ahead of you Speed is essential—the faster you go, the more lead the missile must pull.

Switch to the forward-up cockpit view and roll to put the missile directly above you. When it's 3 or 4 seconds away, break hard into, and then past, the missile. This method works consistently if your timing is good—and if you have

enough airspeed. Here's why When the missile is leading you, its seeker head will rotate to one side in its gimbals to stare at your radar return. A well-timed break turn forces the seeker to turn so far to track you that it hits its gimbal limits because the missile body can't after course quickly enough to compensate. Once the gimbal limits are hit, the missile "goes stupid" and stops guiding.

MISSILE BREAK When an Incoming missile is three to four seconds away, It's time to start a maximum G break turn into it.

THE WIZARDWORKS GROUP - MINNEAPOLIS, MIN 55447 http://www.wizworks.com/

earry a laser designator. Just pretend it uses TV guidance, like the Maverick.

There are two ways to do multiple fargeting. The first involves locking onto a target with the radar, which automatically slaves the EO seeker to that same target, then manually descleeting the target in the EO MFD and locking onto a second one. If you then release two weapons, the first will ann toward the EO MFD's target and the second will head for the target being tracked by radar. There's no way to check that the second target is within the gunbal limits of the second weapon's seeker, so point the plane roughly toward that target just to be sure; if the seeker can't see the where the radar is looking at lanoch time, it will not guide.

The second method relies only on radar. This means only the first target selected can be visually identified in the EO MPD, unlike the previous method, which allowed you to see both before

BOOM BOOM By learning how to guide multiple smart bombs simultaneously, you can wipe out half a convoy in a matter of seconds.

picking. If does, however, have the distinct advantage of working with as many largets as you have weapons. The procedure is simple: lock up a target on ground indar, launch a weapon, break the lock, select the next target, lock and launch, and repeat as necessary.

You may sometimes want to allocate multiple EO weapons to a particularly tough target. Simply press the trigger repeatedly while the radar designates a larget; all of them will lock onto that one target

BIG PICTURE (t's a lot easier to find and lock onto the right target when using the full-screen version of the EO MFD.

If you decide to earry dumb bombs instead of the fancy F.O weapons, hitting moving largets in particular becomes much more difficult. You have to estimate lead manually, so use CCIP Mode 1 and place the pipper ahead of your target. The shorter the bomb's flight

time, the less lead you have to factor in. So the best profile when attacking ground vehicles is to come in from behind, 500 feet off the ground—just lugh enough for your bombs to arm before they impact. Mk 82s have such a small kill radius that they are useless for this task, so stick with Rockeye cluster bombs or fuel-air explosives. Against armed warships, this

technique is suicidal. Give in and use smart weapons instead

## **LOW AND FAST**

Regardless of the ordnance you're toting, approaching a heavily defended target is no easy task. Unless you use standoff weapons and trust your ECM pod to prevent SAMs from killing you before you can drop your load, the safest approach is to ingress down on the deck. Plying below 80 feet will render you practically immune to SAMs and AAA. Even air-to-air missiles will be more likely to hit the ground than your F-16, Keep your speed up to minimize your exposure time.

All your missile weapons are fully effective at these altitudes, but except for the GBU-IO, bombs will not arm before they hit the ground. If they did, the blast would surely kill you. The solution to both problems is to loft the bombs by pitching up and releasing while in a climb. If the climb angle is shallow, the impact point will still be visible in the HUD and you can use

the normal CCIP aiming procedures. For steeper climbs, use the toss hombing method described in the sidebar "The Bomb." Fither way, roll past 90 degrees immediately after release and make a hard diving turn to escape the explosion and return to the sanchiary of low altitude. From the time you pull up until the the moment you level off in the weeds, pump out chaff and flares and use your jummer if you have one.

## DAMAGE, DEATH, AND RESURRECTION

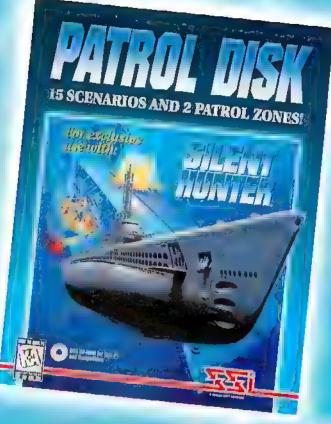

Nobody's perfect. Some missions in B2B are so tough that even the best sim pilot will inevitably take some hits. You can do without most systems, but a working engine is obviously essential for avoiding a long walk home. If you see you have an engine fire, don't panic, Just shut down the engine, restart it in flight, and it II be as good as new. Even catastrophic damage is not that big a deal in the sim, because ejection almost always succeeds.

If the tracis get lucky and manage to down you before you can eject, there's still a way to continue your career. Go to the pilot selection screen and click on the shiny metal harness buckle in the picture at the top of the screen, then click on the OK button. It will remain depressed. Now click on the pilot you want to recover and watch the OK button pop back out. Your pilot is now restored, and the events of the previous mission become nothing more than a bad dream. Wake up, get back out there, and do it right this time! §

## **Command** Decisions

Battle Plans For Beating Four Great Strategy Games

get a lot of questions every month concerning tips and winning strategies. Thy as I might, there's no way that I can give detailed answers to every question. So this month I'm devoting the column to hints and tips. Since we've focused on real-time games lately-with our multi-installment

## SID MEIER'S CIVILIZATION II

some turn-based standbys.

articles on WARCRAFT II, I'll focus on

In high-difficulty games, such as King or greater, the Oracle allows you a lot of flexibility. Doubling the effect of temples allows you to build that big economic base with each city. It also adds to your offensive firepower, since citizens that would usually revolt with troops on the march under Republic and

I NEED MY SPACE The Oracle and Great Library make a tough combination, letting you dominate on both military and research fronts.

Democratic governments are rendered oddly content by the Oracle's vagne yet persuasive powers.

The best weapon of ancient times, however, is the Great Library, Many players use this to take their research, moving to a near-total warlike economy, secure in the knowledge that they will never be too far behind in crucial technology. This strategy can backfire, though, if one civilization gets so far ahead in technology that a second civdoesn't discover the advance -the crucial prerequisite for garnoring discoveries via the Great Library,

A much better use of the Great Library is to actually step up research in an area different from your opponents'. This way you get the benefits of their research, plus the applied fruits of your own labor. Meanwhile,

If you have a solid economic base, start building the same Wonder of the World at two different cities. Even if you build the Wonder at one city, don't change to something else, but leave the other city building it limbo. Soon your adversaries will discover something that you really need, which you then pick up with the Great Library. At that point, you can switch your production over to the Wonder associated with that technology, since most of the funds needed are already allocated. I often use this technique to snatch Leonardo's Workshop or Women's Suffage from unsuspecting computer opponents (it works pretty well in games of CIVNET, 100).

BRIEFINGS

• STAR GENERAL looks like it will be one of this season's hottest games, but SSI shows no intention of stopping there: they pian to bring the popular series back to WWII next year with PACIFIC GENERAL and a PANZER GENERAL sequel. Both will feature refinements to the classic system, with the possibility that the Pacific theater conflict will allow you to play both Douglas MacArthur and Tomoyuki Yamashita. I can see the add-on packs now:

Kamikaze General and Generals of the Long March.

Talonsoft's first real-time game, Age of Sail, has developed so rapidly that it should make Christmas. This has caused other games in the pipeline to shift: Battleground: Antistam should still be out in 1996; the shifting sands, however, will move the next 20th-century installment of the series, Battleground: Sinai, to sometime in the spring of next year.

Kursk for the 37th time, but wily human opponents will exploit your lack of battle-field intelligence. Save yourself some hassles; at least buy a couple as auxiliaries.

101

DANCIN' IN THE RAIN Bad weather is your friend.
Your scout aircraft can get up close and personal
will even enemy AA guns

Another myth that needs busting is "Over-rehance on air power will get you into trouble when the rains fall." Perhaps, but many Russian backs that laught at German artillery can easily be dispatched by experienced Ju87 dive bombers. And fighters are more than mere escorts — a Focke-Walf 190 built up to

B-15 strength can poke a few holes in even the toughest armor.

Rain and snow turns are often just as welcome to the German as the Allied player 'They form a good opportunity to pump air squadrons up to overstrength status, to upgrade air units (particularly Me109s to FW190s), and simply to refuel aircraft without having to worry about reposals from the other side's air units. Best of all, you can't be shot down by antiaircraft fire, so send a couple of fighters deep anto enemy territory—again, Focke-Walfs work best, due to their long range—to find the holes in your opponent's defenses.

## AMERICAN CIVIL WAR

The Confederate side in the 1863 scenano is probably the bardest to win. A lot of players try to keep Grant out of Vielsburg, but this ties down a lot of troops, and "Unconditional Surrender" Grant is tough to beat on the battlefield. If you abandon Vielsburg, stuking toward Memphis is tempting. Problem is, the Union navy and Yankee reinforcements from Gairo make it nearly impossible to hold the city for long. A better option is to combine Johnston's and Pemberton's troops, fent against Nashville, and Invade Kentucky. Even if you end up rebeating south, you should tie up a lot of Union forces.

Alternatively, Longstreet's idea of sending a corps from the Army of Northern Virginia to assist Bragg in Tennessee is a

BAD DAY FOR SADDLESORES Zu'us should always target British cavalry, to reduce their recon capabilities and reduce enemy morale.

good gamble. Keep in mind, however, that this feaves Lee at the mercy of an Army of the Potomac not yet depleted by Gettysburg. What you do depends on how many more miracles you believe "Marse Robert" has left in him. In any case, the Rebels won't be able to invade Alaryland or Pennsylvania this summer, perhaps never again.

## ZULUWAR!

A very aggressive strategy with the Zulus may pay off against a novice Brit, but the key to winning against veteran Anglophiles is to limit their mobility. First, balance the contest by selecting the "variable Knad" option, to frustrate those players who have the Zulu setups memorized. Then the Zulu player should target the Anglo-Affied cavalry, the loss of cavalry probes will deny the British player the data he needs to plan coordinated attacks. §

## Rebel Generals

Both Age Of Rifles And Robert E. Lee Strive To Be The 19th Century's Panzer General

## by Terry Coleman

Il never forget a Civil War reenactment I witnessed as a child. The tight formations of the soldiers as they marched were in sharp contrast to their coarsely woven, sometimes patched, unilorins of Confederate butternul and Union blue. Combatants on both sides sported wire-rim glasses, many chewed tobacco,

and some took the realism too far by having holes in their shoes. There were bitter defenses, brave charges and countercharges, and the glint of bayonets in the summer sun. But the most distinct memory I have of that day is the smell of gunpowder, accentuated by the thunderous roar of caption.

It is this sense of martial beauty—the sounds, smells and pageantry—mixed with the all-too-real terrors of the battle-field that both ROBERTE, LEF CIVIL WAR CLASSRAL and WARGAMS CONSTRUCTION

SET III: ACR OF RELES by to capture. The graphic representations of units from both games recall stylized ruminture soldiers, and the bases on the RIFLES figures, in particular, wouldn't have been out of place in a 19th-century tabletop game. LEE even

goes so far as to call itself "So realishe you can smell the ganpowder." While my childhood memories might wish for just that, I do wish Sierra's marketing would tone it down Such quibbles aside, both these games have a lot of histoneal flavor to go with the pretty pictures, for which any aficionado of 19th-century conflict can count himself fortunate

## AGE OF TRANSITION

The true link between the Napoleonic conflicts and The War to End All Wars, the American Civil War began with smoothbore muskets and finished with the telegraph, submarines, trench lines and machine guns. LEL chooses to focus specifically on this conflict, while highlighting the fighting genius of its most famous general. And though RIFLES has a breater scope—covering every major battle from the Mexican-American War to the Russo-Japanese conflict at the turn of this century—it simply takes a longer view of the transitions in technology and battlefield doctrine during this period when the common soldier was still king.

Partially because you don't have to manage air, land and sen forces (or Ores, Dragons and magic spells), both games are fairly simple to learn. LEE has a nice video tritorial included right on the CD, and RIFLES has a generic "Civil War" tutorial scenario to get you marching and firing volleys in a hurry. Each game allows you to turn off the hesgad outlines, and their attempts to distance themselves from traditional wargames don't stop there.

Let takes the position that while smallarms weapons might fire up to 400 yards, they were only effective up to 200 yards.

ROBERT E. LEE: CIVIL WAR GENERAL Price: \$59 95 Required: 486 processor, Windows 3.1 or better 4MB RAM, 14MB hard drive space, SVGA graphics, Windowscompatible sound # of Players: 1-2 (hotseat, modem or e-mail) Designer: Jeffrey Fiske Publisher: Sierra On-Line, Inc. Bellevue, WA (800) 757-7707 Reader Service #: 340

ROBERT E. LEE It's tempting to overuse your readers in the front lines. While you might survive without Longstreet, Early or Hood, each of these popular leaders has a tremendous positive effect on morale—the most crucial factor in combat—so you'll thrive by keeping "Old Pete" and the rest of your senior officers healthy and happy. In fact, the most straightforward way to win the campaign is to prevent Stonewal Jackson's death at Chancellorsville; "Lee's right arm" makes a huge difference at Gettysburg and Washington.

### Antietam Twice Told -

In LEE, Use Jeb Stuart's cavalry to blunt the Union threat from the North. Most of the Yankees aren't available as "reinforcements" until the time McClellan got around to using them historically.

In Age or Rifles, the fighting centers around the middle and lower bridges, but with a twist: You can't win a decisive victory unless you take the Union VP hex across the creek

The toughest early fighting in Lee occurs around the famous Burnside Bridge. Take out those sharpshooters, then pull back from the bridge one unit at a time, delaying as long as possible.

When set to "super tough," the Al Is even more aggressive than "Fighting Joe" Hooker was at the actual battle, leading to historically high casualties in the famous Antietam comfied

The correct way to outflank an enemy unit in LEE: directly opposite from the first attack. As the Confederates, you must counterattack vigorously if you want to win at Antietam.

Fitzhugh Lee is your 99-strength ace reserve. Since RIFLES rates formations more on training and morale than head count, this unit can repeat its fine showing at the bloodiest day of the Civil War.

WARGAME CONSTRUCTION SET III! AGE OF FIFLES Price: \$59 95 Required: 486, 4MB RAM, 10M8 hard drive space (65MB recommended), SVGA graphics, Sound Blaster- or General MIDI-compatible sound # of Players: 12 (hotseat or e-mail) Designer: Norm Koger Publisher: Strategic Simulations, Inc. STRATEGY/WARGAME

### HEAD-TO-HEAD REVIEW • ROBERT E. LEE VS. AGE OF RIFLES

hoosing weapons in Robert E. Lee is a lot like upgrading in Panzer General: You never have enough money to buy every weapon you need.

Start by purchasing cheap rifles such as the 1842 Palmetto musket. Enfield riffes are nice, but you won't be able to afford the ammo.

Cavalry weapons are easier: Just load up on sawed-off shotguns

The six pounder cannon is best: nice firepower (10), cheaper reloads, range of 6 is plenty in heavily wooded Virginia terrain

So the designer set the map scale at 200 yards per hex, which allows each unit equipped with small-arms to fire at a range of one hex and only one hex. Since cannon may fire farther, of course, this does create an obvious qualitative difference between the two major arms. To compensate, units with Springfield repeating rifles, for example, are given proportionally higher firing strengths than 1848 flintlock muskets, for an equivalent number of men. This design decision makes LEE's combat system a lot easier to assimilate than that of, say, BATTLECROUND: SHILOH, but cutting down on the micro-managing also removes a lot of the tactical flavor.

Riffuls, on the other hand, varies its scales from 100 to 400 yards per hex, depending on the battle being depicted. And unlike LEG, RIFLES lets you shoot to the extreme length of your

DO YOU KNOW THE WAY TO SAN JOSE? If you're into obscure battles, Rifles has Chileans and Peruvians facing off at Anca in 1879-acquired taste indeed.

range, leaving you to decide whether it's worth expending the ammo for dimmishing returns. When you take alm at an enemy unit, the color of the targeting cursor shows blood-red for pointblank fire, orange for average, and so on, down to green for minimally effective fire - an elegant visual aid that speeds play and aids in decision-making.

### A MATTER OF FACING

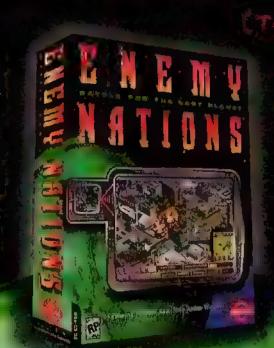

ZOCs—Zones Of Control—those ballowed old warhorses of turn-based games gone by, are nowhere mentioned in the manuals or READ ME files of either LEE or RIFLES. In LEE, ZOCs are just like the hexgrid outlines, because even if (like the design team) you try to conveniently ignore the existence of ZOCs, they still restrict movement ZOCs don't affect combat in LEE, but that's nary a problem, given the one-hex limitations of small-arms combat.

In RELES, ZOCs don't exist, per se. Instead, moving next to an enemy draws reaction fire, which may stop the moving unit dead

# Original Scenarios Created With The AGE OF RIFLES Game Editor.

### Computer Gaming World and SSI Present The AGE OF RIFLES Scenario Design Contest!

You could be the lucky one who pockets \$1000 cash or a beautiful art print depicting a 19th century military scene! Simply create and submit scenarios using the AGE OF RIFLES Game Editor and you'll be entered into a random prize drawing. All scenarios that meet the requirements listed below and are postmarked by December 15, 1996 are eligible. So crank up your Game Editor and start designing!

**Reward:** • Grand Prize: \$1000 (1 winner) • 2nd Prize: 1 Framed Cranston Fine Arts Print, worth up to \$300 (2 winners) • 3rd Prize: Gift Certificate for a free game from SSI Direct Sales (20 winners)

**Requirements**. Scenarios must utilize a 100 yard scale on a minimum 50 x 20 hex map. Scenarios must be between 15 and 25 turns in length. Scenarios must feature land troops with a minimum of 2,000 troops and 8 game units per side. Scenarios copied from AGE OF RIFLES or any other computer or paper game will not be accepted. Scenarios must be created using the AGE OF RIFLES Game Editor.

Send your scenario, by pre-paid U.S. mail, on a 3.5 inch IBM $^{\circ}$  compatible floppy disk, along with your name, address and phone number printed on a 3 x 5 inch card, to the address below. Scenarios must be postmarked by December 15, 1996.

AGE OF RIFLES CONTEST • Computer Gaming World • 14th Floor • 135 Main St. • San Francisco, CA 94015

All scenarios submitted become the sole property of SSI and will not be returned. Criteria satisfaction will be determined by a pane of SSI Development and Co-nputer Gaming World editorial staff. Their decisions are I hall SSI is not responsible to lost, late, stolen, damaged or misdirected mail. The random prize drawing of eligible entries will be not did not later than January 15, 1997. Random drawing will be conducted by Computer Gaming World. All decisions are final. All winners will be notified by phone within tan days, and then by U.S. mail. Winners who cannot be contacted by phone and whose prize notification letters are returned for fet their prize, and new winners will be substituted via random drawing. Odds of winning depend on the total number of eligible entries received. All tax liabilities are the sole responsibility of the winners. Gift certificate redemption is limited to available stock. No purchase necessary. No prize substitutions. Void in Rhode stand and where prolibited, Correstants must be 18 years or older Contest open to U.S. residents only. Employees of Mindsdape, SSI and Computer Gaming World and line in mindled family members are not oughle. For a list of winners, write to the above address after January 15, 1997. Confest sponsored by SSI. To contact SSI regarding this contest, write to the address above.

**Reaction At** 

in its tracks. Having a "field of fire" is essentially the function that a traditional ZOC performs in other 19th-century games. The major difference here is that the movement restriction when moving adjacent to an enemy is not absolute. Each unit in REFLES is given a standing set of orders for when to fire, as indicated in the chart.

Thus, you see that if an enemy tried to run through a gap at your line, he would

Tyne of Fire

Reaction Distances At 100 Yards

Free Fire . . . . . . . . . . . . . . . 3 Hexes

Near Fire . . . . . . . . . . . . . 2 Hexes

Walt Fire . . . . . . . . . . . . . . . 1 Hex

Counter Fire . . . . . . . . Weapon Range

Hold Fire ........ No Reaction

By comparison, units in LEE have merely march-column and combat line formations from which to choose, and no rales for facing. This searcity of choice, combined with the ngidity of ZOC restrictions, would seem to limit LEE's flow of play, when compared to the free-wheeling movement through hadstorms of bullets that characterizes RELES. Well, yes and no. LEE is meant to be simpler to play, but it has a lot of subtleties. Chief

TRATEGY/WARGAME

among these are the specialty units: Shotguns offer hard-initing firepower with little manpower expenditure. Sharpshooters have an increased chance of taking out enemy leaders. Stragglers return when unit morale improves, and they increase supply since they weren't around

before to fire any shots.

Also, it's easy to tell when you're behind an enemy unit in RIFLES. To out-flank a unit in LIFE, you must attack it with two different units from exactly opposite sides. There is also a viguely explained.

first be engaged at 3 hexes away, then 2,
then at point-blank range, provided that
you had given proper orders to your
defensive line Conversely, if all your units
holding a particular position were flailing
away at long range with weapons Ill-
suited to that purpose, you
ringht find that the enemy

might find that the enemy force moved through your field of fire relatively unscathed to outflank you!

All norts in RIFLES must face a particular direction, which determines their front. flank and rear hexes. Additionally, units may be in any of the following formations: line (best for combat), supported-line (fair), marchcolumn (mobile), attackcolumn (great for melee), defensive (in forts); or that old Napoleome standby, a square, When their morale breaks. units become disordered as well. RIFLES goes to great lengths to provide realism, accounting for fatigue on the march, skirmshers, and even stragglers, all bandled effortlessly by the game system and interface.

AGE OF RIFLES Keep in mind the dispanties from conflict to conflict between armies of different nationalities. In the American Civil War scenarios, for example, cavalry is used more for reconnalssance, with some dismounted fire capability that is appropriately less than comparable infantry units. By contrast, most professional European armies, particularly British Lancers, have a high melee rating, making them perfect to run down retreating enemies. Trying this tactic, though, against high-morate units—especially those with plenty of ammunition—will quickly show you why the Charge of the Light Brigade was never repeated.

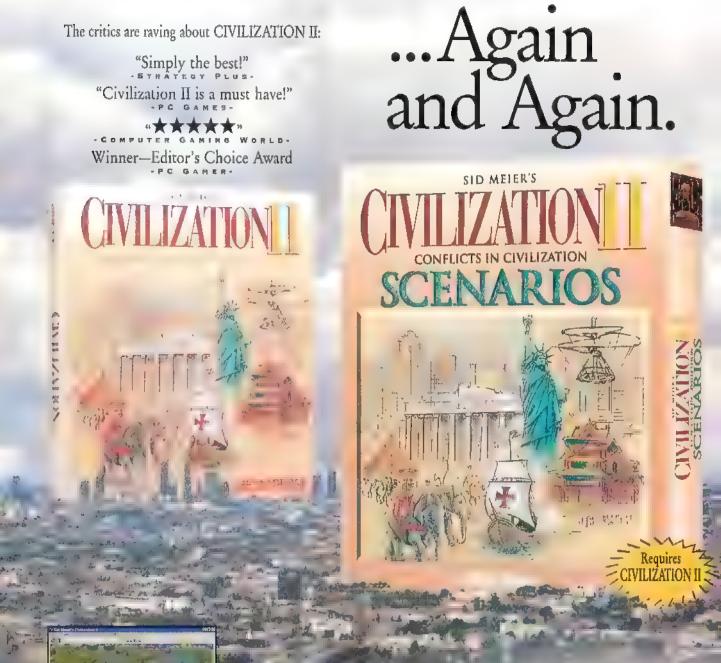

"Now here's the leader, driving on 17..."

"And WOW, he really smacked that one..."

"Yes-but it looks to me like it's slicing way left..."

### ROBERT E. LEE VS. AGE OF RIFLES • REVIEW

algorithm that penalizes a unit each time it is attacked by an enemy of equal or greater force. Tedious, perhaps, but it works pretty well in practice. Both games handle charges realistically. In RELLS, the charging units must undergo a morale check; Lee makes you spend Army morale to entice your tired soldiers to go "once more into the breach," a mee touch.

The din of battle fairly bursts from your speakers, with the digitized screams of RIFLES getting the edge, although the southern-drawl voiceovers of LLE, offer a pleasant bridge between scenarios. Similarly, the annuated sequences of RIFLES for each individual firelight can't touch the professional movie clips of LLEEs battles (filmed at a Civil War reenactment). Then again, many gamers will eventually tire of these and turn them off, just as they did the then-revolutionary animation of PANZER CENERAL.

### NO PENINSULAS HERE

Comparing the incredible number of scenarios (over 40) and campaigns in RIFLES to those of LEL scents unfair, since the latter covers only the eastern theatre of the American Civil War Even so, Late does cut a few corners. It includes First Bull Run for historical perspective, although Bobby Lee wasn't there. That's a nice gesture, but moving immediately after that to Second Bull Run in the campaigo is misleading.

You see, Joe E. Johnston, a fine tactician, wasn't particularly loved by his men, so Jefferson Davis removed Inm from command. Replacing Johnston was Davis's military advisor - Robert E Lee-whose only other campaign had been a disastrous loss of West Virginia (II was to become a Union state in 1863). Neither this campaign nor "Marse Robert's" coming-out party versus McClellan outside of Rehmond are included. Where are the struggles of the Seven Days' battles, where Lee's Army of Northern Virginia was forged, forcing the superior Union forces down the peninsula? Surely these scenarios would have added more depth and more factical challenges to the campaign game, besides giving gamers a glimpse into the beginnings of Lee's legend

Once you get past these omissions, however, LEE does a good job of showing

### THE LONG MARCH

In any collection of 40-plus scenarios, a few will inevitably fall flat. The stacking limits of two units per liex put a crimp in more than one scenario. But considering that some of the conflicts covered in RIFLES are hardly the most exciting material from which to craft wargames - take the Russo-Japanese War, please - the overall quality is remarkably high. The weapons of the Mexican-American War, for Instance, pale in killing power to those of later conflicts, requiring that you master different facties in each campaign. Moreover, the campaigns of RIFLES are every bit as difficult and addictive as those of PANZER CENERALhigh phase, indeed. The Soldier Queen is my favorite, a multifaceted romp through an era when the Union Jack flew in every corner of the world. You pit your Maxim machine guos against spear-earrying Zulu warriors, put down uprisings

in India, and even duke it out with old European adversaries in the Crimea.

If the campaigns aren't enough to keep you enticed for hundreds of hours, simply link existing scenarios into a new campaign. The scenario editor of RIFLES is much better than that of TANKS!—It even lets you create troops of fictitious nationality, complete with uniforms that you design—and is the single biggest edge that RIFLES enjoys over LEE.

TEGY/WARGAM

So which is better? Currently, ROBE AT F., Li F. has the most entertaining Civil War campaign, but if isn't up to the superb BATTLEGROUND: STILOTLAS a recreation of Civil War combat (keep at mind that Talonsoft needed some time to hone its craft as well). If also has some curious omissions in terms of battles and isn't as fully realized as RELES.

ACE OF RIFLES, for its part, is incredibly ambitious, and sometimes slips. Already, complaints are hitting SSI about the annoying play-by-e-mail bugs. While the documentation is adequate, some may wish for more strategy tips. Others may miss their familiar ZOCs. Still, few games of any genre realize so many of the lofty goals for which Riff Es strives, A game that refuses to sacrifice either history or fun, it stands as Norm Koger's masterpiece — a game that will be played by many gamers for a long, long time to come - and deservedly so. In the end, if you must buy only one of these, get RIFLES, but real Civil War fans should pick up LEE as well, so that the Instorical flavors can mingle on their hard drive %

### ROBERT E. LEE

▶ APPEAL: For anyone interested in the Civil War's most legendary military leader.

PPROS: Solid Al; nice period graphics; entertaining Civil War campaign featuring the most famous battles.

PCONS: Questionable scale; light on tactical detail; some of Lee's most important battles are inexplicably left out.

### AGE OF RIFLES

►APPEAL: A must-buy for anyone remotely interested in 19th-century warfare.

PROS: Captures the flair and fun of the era without compromising the history; over 40 different scenarios; robust editor; wonderful campaigns; excellent Al. A winner through and through.

PCOMS: Some PBEM bugs; merely adequate manual; stacking restrictions limit some scenarios.

...look out for the most exciting tournament golf game you've ever played.

some interesting tactical challenges while keeping the tone on the cartoon side of the street.

Your mission is to make the galaxy safe for Red Robots everywhere by crushing the despicable Blue Robots who threaten peace everywhere because they ... are not Red, Eguess. Your first clue that you have entered a very sally universe is the introduction, where you meet your two Red Robot pilots. These rocket-fuel swilling, mechanical beach burn rejects are delivery men for the tin-cart Patton, Commander Zod — the android who directs you to battle - and they serve as your comedic reward; you get to view their lu-parks after completing every battle. Parents should be warned, though: These Robo buffoons are meant to entertain adults, and the swearing flies frequently

Hard-core gamers may be annoyed by the funny animation, but for the rest of us

NOVEMBER 1996

BOMBS AWAY Don't be fooled by Z's humor and graphics; underneath is a strategy game with lots of twists and depth, including units with pretty good Al that require different strategies of usage.

the excellent quality of most of the bits and their amusing nature can give a welcome respite from the usual teeth-gritting tension of real-time wargames.

### THE COGS OF WAR

As far as the warfare itself goes, what you are really looking at is an excellent quick-in-dirty version of COMMAND & CONOTER, stripped down for speed and

playability. All the marching units and shoot-outs have been maintained, but the concept of base-building has been dropped in favor of capturing territories, a step that makes the game less complicated but reduces the factical difficulty of the game only slightly

In a switch from

the C&C model, however, Z has little robot soldiers fighting over battlefields composed of several "terntories." Each terntory has a flag, and usually contains either a radar installation or automated factory. Whichever side captures the territory flag gains control of the structure in that terratory. Once you capture a factory, you can begin producing units. All units are free, but they require time to produce the more powerful the unit, the longer it takes. As you gain control of more territories, your factories become more efficient and units are produced more quickly This is

good when you are winning, but it means that it becomes awfully hard to dig your-self out of a disadvantagenes position. Also, factories do not stop production when the territory changes hands, and the computer player has an annoying habit of seizing a flag just 3 seconds before the attached factory produces its unit. Ultimate victory is only achieved by destroying the Blacs' fort in their original.

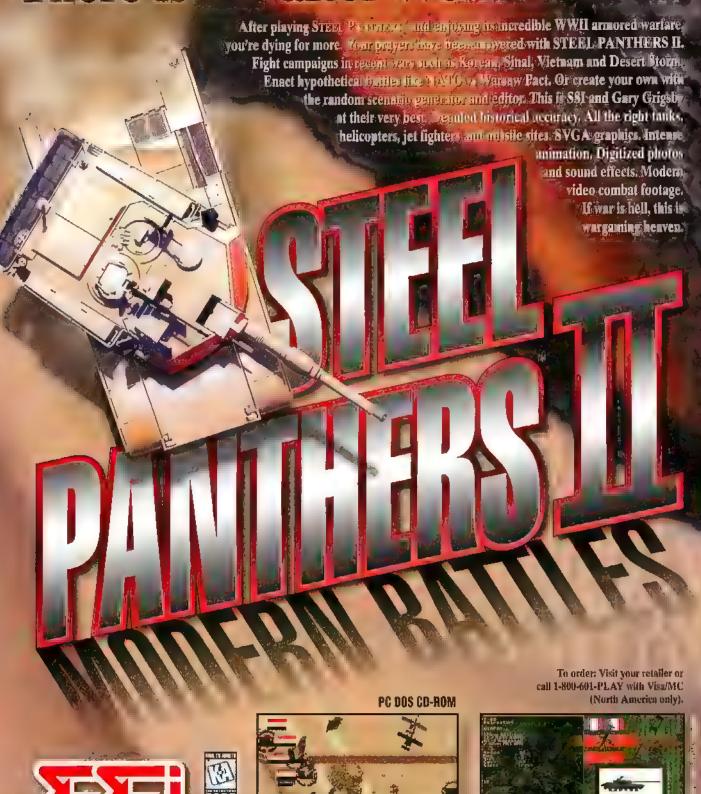

GOING BALLISTIC Explosions are huge affairs in Z; sparks and shards fly all over the screen, body parts and machinery soar into the sky, and all that shrapnel actually does affect gameplay.

couple of tactics
will make your
career as commander of the

Red Robots a little easier and less frustrating

The first time you see a battle-field, don't worry too much about winning it; instead, give some inlitial troop movement orders to nearby territories. Study what is out there, what you need, and the best path to get to it. Sometimes, a unit won't choose the best route automatically, so for key initial territories that you must race to capture, plot short, optimized routes for your units to follow. Use cheaper units like Grunts or Psychos to grab vehicles and

ing strategy planned out, restart the level and execute those moves as fast as you can

The fine art of production can take a little getting used to. Only produce Grunts early in the campaign, for seizing unowned vehicles; after the initial land grab by both sides, switch to more versatile units. However, don't set all factories to produce heavy units. as a lot can go wrong while you wait for the best to roll out of manufacturing It does you no good to have three factories producing heavy tanks if enemy jeeps roll up and take the territones because you have no units in defense. In general, the closer to

WHAT TO BUILD... Unlike in Command & Conquer, there is no base-building in Z. Instead, you have to capture territories with factories. Build defensive guns as soon as you can because the enemy hammers away at you constantly.

guns, and save precious Snipers and Toughs for defending your claims. Once you have your openthe front lines your factory is, the cheaper the unit you should be producing there.

starbing territory

There are an interesting array of units. They initially come across as overly sample, but once you start ordering them around the map, you come to appreciate some of their novel twists. The Stuper unit is an excellent example of this. At first, it

seems to be a simple rifle unit with extended range, but once in combat you realize they are capable of killing off the crew of a vehicle so that any ground

trooper can then capture it. There are six types of troops, seven kinds of

vehicles and four kinds of stationary cannons used for defense. Often, maps will start with empty vehicles and guns strewn across them, and an important key to vic-

**DEJA VU** You'll see this scene a hundred times while playing, because Z's levels and gameplay get awfully repetitive.

tory is sending the right troops out to immediately capture and use these "free" resources before your computerized enemy does.

Units are also fairly clever in the art of combat liself, and will tend to retreat momentanly from a position where they are getting cut to pieces and attack again from a shightly different angle. While at pays to allocate targets yourself for units, they are also adept at firing automatically at any units that come within range and will even pursue a short distance to destroy a fleeing enemy — without chasing blindly after them, as WARGRAFT soldiers are wont to do. All an all, the unit Al is a small but satisfying improvement over that found in C&C.

### WAR IS EASY, COMEDY IS HARD

Z is a fun, mostly successful game that plays on the success of its more senous ancestors in the real-time tactical wargame arena. The graphics are excellent, and they're humorous without being repetitious or stupid. Thrrets fly high up into the screen, growing in size before tumbling back to "earth" and exploding in a great resounding blast that can cause even more damage Soldiers give little yells and vaporize or tumble through the air themselves when bit by shells, and even units waiting for orders do amusing things like sit

down on tiny crates and play cards.

The program itself is extremely reliable; its only technical fault, for me, was that is wasn't a true Windows 95 application. Z has the same multiplayer

options of C&C (null modern, modern and IPX network support), and provides fast and reliable maybem for up to four players.

For me, Z had only one major flaw (other than the manual, which was a little thin on unit capabilities): There just didn't seem to be a lot of game here for the buck. I would say the experienced wargamer can only expect 20 hours or

so of campaign play. While network play stretches the longevity of this product immensely, it might have been a good idea to slip in a random battle generator or add spawning technology for cheaper network play. A more minor "fluw" goes without saying If you don't like real-time games, or funny games for that matter, Z isn't for you

But if you don't mind a game that's on the short side, and you are a real-time tactical game lover with a good sense of humor, then buckle into your computer chair, thide, and crack open a cold can of Rocket Firel, because Z is going to be your favonte letter.

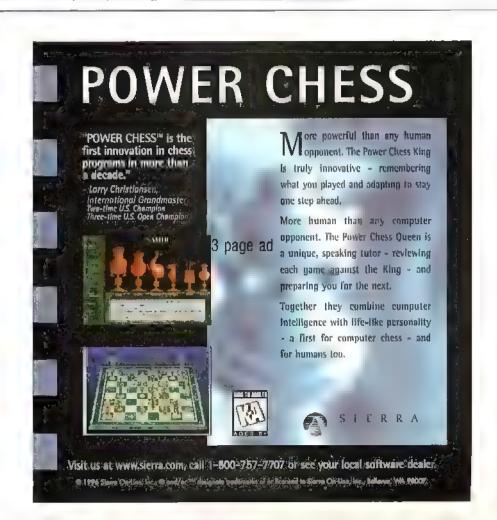

>APPEAL: Real-time commanders looking for fast and fun factical combat.

PPROS: Fun, smart and funny C&C clone with excellent graphics, hilarious animations and battles that are more challenging than they initially look.

►CONS: Campaign game is a bit

short for the bucks; humor may not amuse some; C&C and WARCRAFT fans will be disappointed by the repetitive battles.

## Steel Yourself For Battle

New Campaigns Add Even More Depth To Steel Panthers

by Patrick C. Miller

hat computer war game enables you to pit Yugoslavian partisan cavalry against German Jadgugers, or recreate the battles between the Soviets and the Japanese in China

during the closing days of World War II? STEEL PANTHERS, of course, a war game renowned for its broad scope and great depth. Now this superb game gets even better, with SSEs add-on STEEL PANTHERS CAMPAGN DISS.

The CD contains three new campaigns and 35 scenarios for use with STEEL PANTHERS, as well as the version 1.2 patch. Those who have purchased Novastar scenario disks for STEEL PANTHERS should be aware that only three of the 35 scenarios on the CD are actually new. Most portray European battles, but there are a fair number of Pacific scenarios as well, The more memorable scenarios are the two depicting Oberststurmfulner Michael Wittmann's heroics against British armor at

SMOKE ON THE DACHA The CAMPAIGN Disk contains 35 historical scenarios from such locations as Iwo Jima, Guadaicanal, Amhem, and Normandy.

FIGURE 'EM HELLCAT The CAMPAKIN DISK adds three new challenging campaigns to Steel Panthers, As atways, line health of your core units is key

Villers-Bocage and the battle against American Shermans that ultimately cost him his life. Also included is a hypothetical scenario based on a battle in the movie. Gross of Iron, in which the fictilious. Sergeant Steiner fights his way back to friendly lines though a Soviet onslaught.

The best parts of the CD are the three new historical campaigns: The 1941 Operation Barbarossa, where you lead Germany's invasion of Russia, the Battle for North Africa, where you command the Afrika Corps against the British in June 1942, and Patton's 3rd Army campaign, in which you race the Soviets to Berlin.

### **GREASING THE TREADS**

Before running the installation program, it's a good idea to make copies of any scenarios that you've created or saved in the game's save slots. If you don't do this, some of your scenarios could be overwritten without warning. After installing the CD, you can copy back your saved games and custom scenarios. Be advised that some terrain might not show up properly with the new patch version, since the map editor is altered with patch 1.2

If you have installed previous patches for STEEL, PAN-IHERS, you might want to delete your current version, reinstall version I thand then install the CAMPAGEN DISK. SSI saws this isn't necessary, but I experienced some problems when I didn't do it.

Version 1.2 of STEET

PANTHERS corrects many—
but not all—of the game's
bugs, adds more realism, and
provides improved artificial
intelligence. However, it

doesn't include the modern play option or the VCR replay feature that fans of e-mail play have been demanding. If you need the patch, but not the game, it is available from many online sources

Those who already have the version 1.2 update and many of Novastar's scenarios ringht want to pass on this offering. But if it's been a while stace you played STELL PANTITIES and you're looking for a reason to jump back into CGWs War Came of the Year, the CAMEMON DISK provides a good exense to do just that

►APPEAL: For STEEL PARTHERS fans who want more challenging scenarios and campaigns.

PROS: Adds even more depth and variety to Steel Panthers; updates game to latest version; challenging campaigns and good mix of scenarios.

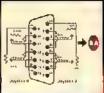

**PCONS:** Most of the scenarios have

been previously released by Novastar, and version 1.2 doesn't fix all of STEEL PANTHERS' bugs, nor does it improve two-player play.

Price: S24 99 System Requirements: STEEL PANTHERS game required, 486/DX33, 8MB RAM, SVGA graphics 2x CD-ROM, mouse, supports most major sound cards # of Players: 1-2 Protection: None (CO) must be in drive) Designers: Novastar and SSI Publisher: SSI Sunnyvale, CA (408) 737-6800 Reader Service #: 343

## A Fine Settlement

Addictive Settlers II Builds On Territory Founded In Serf City

by Tim Carter

haracter is an oft-overlooked quality in computer games these days. It can't be quantified, but character can make the difference between a competently crafted diversion and an all-consuming career threatening obsession, SETTLERS II is a good example At its core is a solid strategy game, but what makes the game funis watching your army of serfs grow as your country expands. Each of these little men conducts a task, be it harvesting gram, carrying goods, or beating up your opponents. Watching the guys go about their duties is also useful, since it helps track how your economy is functioning.

SETTLERS II (SUTTLERS I was released in North American under the title Sina Corn) is an "explore the world, build an empire, and conquer everyone else"-type game. The scale is somewhat smaller than many of the other titles in this genre, as players deal with hundreds of people and

individual buildings, rather than cities or whole planets.

### WHERE'S THE FREAKIN' MANUAL?

SETUTERS II is all about the strategic challenges you face while working with very limited resources. Unfortunately, it seems the game's publisher took this ethos a step further and applied it to the documentation, too. As with a few other recent titles, SETULERS II has an absolutely appalling mannal.

The inadequacy of the documentation is

particularly apparent when you realize that the game is obviously the product of a lot of work. Players may as well resign themselves to playing the first scenario a few times just to get the feel of the con-

trols and figure out how everything works.

Even if you figure out the interface, the complete lack of an explanation for most of the key economic relationships in the game can hamper planning, which is really the key to winning.

To be fair, I did manage to figure most components of the game out through trial and error over a relatively short period of time, and I enjoyed the learning process—but not nearly as much as I would have enjoyed playing the game properly right from the start.

SERF'S UP SETTLERS If is all about building the most powerful economic empire in the world, and the game's cute little seris provide the manpower to do just that,

### IT'S ALL ABOUT MONEY

SETHERS II is more of an economic game than a military one, although final victory fies in the conquest of others. The military side of the game is quite simple: build the necessary economic foundation to recruit and train a number of soldiers and garrison them near the front lines.

Building a sound economy, on the other hand, is no simple task. Raw materials must be guthered (or nuned, harvested, hunted down, etc.), and then processed at least once—and in the case of tools and weapons, twice—before being shipped via your transportation network to locations where they are needed.

Thus, woodcutters are needed to chap down trees, which must then be shipped to a sawmill for conversion into boards. A forester may also be necessary to keep your supply of world from becoming depleted. As most buildings require stone

PH continued from page 314

as well as boards, a quarry or grantle mine must be constructed to supply stone to

the building sites.

Miners require food to work effectively Thus, you must keep fishermen, hunters, or farms near each mining location. Farms only grow wheal, which must either be milled and then baked into bread, or used to feed pigs, which then must be slaughtered elsewhere.

Somewhere along the way you must also make tools, weapons, beer (to keep the troops happy), and gold to pay for military training. Every com-

modity must be transported to the correct location, which can put a burden on your mad system. Delays in the provision of the proper supplies can throw a monkey wrench into even the most comprehensive economy, so some thought must be given to the location of each building

Then, of course, there is the question of termin. Many buildings that you will need are large, and will only fit on flat, empty spaces. The fron, gold, granite and coal accessary to fael your economy must be discovered by a geologist (and will become depleted over time)

Success depends on a combination of careful planning and the ability to keep your economy functioning as raw materials begin to run out. In part, a long-running economy requires some attention to sustainable resources, such as trees. Some raw materials, particularly those requiring

▶ APPEAL: Those who like building realms and have an appreciation of finely detailed economic models will have a lot of fun.

▶PROS: Fun, easy to learn, addictive, has complex economic model.

>CONS: Requires some micromanagement, has atrocious documentation; focus on economics may be too heavy for some pamers.

mines, cannot be kept running indefinitely. You must gain access to new lands and new riches if your economy is to grow

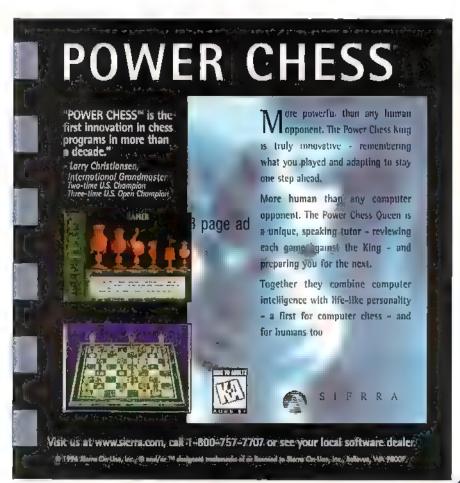

SAIL AWAY Though the game is smaller in scope than the world-spanning Civilization, you'll still need to do some sland hopping to find the resources necessary for growth

Thus, you will likely find yourself at war with your neighbors. If you have planned well, you should have little difficulty defeating the computer's armes. This is not to say that the game is easy. More than once I thought I was progressing quite incely only to be overrun by a massive horde of invaders. Remember, though, that winning or losing is rooted in economics, and it will be hard to compensate for economic weakness with superior military tactics.

Also, winning at SUTTLERS II requires some degree of micromanagement. Transportation and production play an important role in economic development and they have to be managed carefully. This may become boring for those players who would like to fucus solely on conquest and exploitation, although I found the economic controls to be a lot of fun.

All in all, SETTLERS II is a fine strategy game. Its orientation towards economic rather than military action may turn some gamers off, and its truly appalling documentation may cause some people to leave it on the shelves in protest, but basically it delivers what most strategy games should: a fun and engrossing experience which challenges your brain without getting on your nerves.

## Urcs Rule

Eat The Humans For Lunch With These Strategies

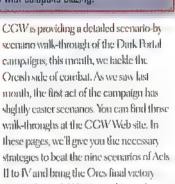

by Elliott Chin

ome would say the Ores in the WARCRAFT II I NEAN-SiON SET have an even tougher challenge than the Humans, After all, the Ores, unlike the sissy Humans, are without bealing and invisibility, two keys spells that allow Human players to seout with impunity and maintain att everlasting army. You've probably already encountered this problem if you've beaten the Human campaign and have progressed to the Orc side. Once again, though,

Before invading a camp, line up your melee units, support them with trolls, and then send one ogre (or a hasted unit) into the camp. When the enemy units start running toward him, turn around and lead them to your line. This is a quick way to whittle down resistance before you merch in with catabalts blazing.

> CCW is providing a detailed scenario-by seenano walk-through of the Dark Portal campaigns; this month, we tackle the Oreish side of combat. As we saw last menth, the first act of the campaign has walk-throughs at the CCW Web site. In these pages, we'll give you the necessary If to IV and bring the Ores final victory against the pitiful Humans of Azeroth.

### SCENARIO 4: THE RIFT AWAKENED

then you first appear in Scenario 4, your lone gobha zeppelin will be under attack by Kul Tiras (green) in the west. Send your forces there Agreat Azeroth fortress (blue) hes directly to your south, but don't attack it right away, Instead, sack the lightly defended Knl Tiras settlement. First use an ogre to lure the enemy units into your cluster of troops outside the village. Then destroy the guard towers with your catapults and waltz ar. Your priority should be building a town hall, farms and a lumber mill. Erect several guard towers as soon as possible to guard entry into your village Use farms to block the way into your camp as well.

Next send a few grants and peops and a catapuli south. Destroy Dalaran (violet) at the southenamost gold mine, and establish a second town hall. Build guard towers and farm blocks to protect it. As your gold starts to accumulate, keep harassing the

Azeroth with "basted" goblin suppers. Also use death keights for hit-and-run attacks with their whirlwind spells. Use both to destroy all the lowers on the west side of the fortiess, since this is where you'll be

attacking from. Then simply gather together rime ogres, east bloodlust on them, enter the fortress, and destroy any remaining towers, barracks and troops. You probably won't succeed with your first wave, so be prepared to send another one or two. You won't run out of gold

# ATHUCHNING.

# REPORTING FOR DUTY ON THE PLAYSTATION GAME CONSOLE!

PANZER GENERAL took the gaming world by storm.
It established an entirely new game category.

prompting Computer Gaming
World to call it, "such fun that
even non-wargamers are likely to
find themselves hooked."

Now, prepare to become an ALLIED GENERAL. Volume II in SSI's premier 5-Star Series" has you in its sights — and this time the battlefield is the state-of-the-art PlayStation game console!

Like its award-winning predecessor, success depends on your effectiveness as a leader

Play 3 campaign games as an American.
British or Russian General against the
German army. Or choose over 35 scenarios that let you play as either the Allied or

Axis side. Watch your forces grow with each victory.

Use new troop types such as Finnish ski troops. Engage in a little conjecture: several what-if scenarios include Churchill's never-realized invasion of Norway — Operation Jupiter

With so many choices, your abilities will be tested as never before! All of this and more await your challenge.

Welcome to the next generation of strategy gaming!

### ALLIED GENERAL. The excellence continues.

### SCENARIO 5: DRAGONS OF BLACKROCK SPIRE

n Scenario 5 you must free Deathwing's dragons. You begin in the southwest corner of the map; the guarded dragon roost lies in the far northeast. To get there, travel in an arc

that spans northward from west to east The southeast quadrant of the map can be completely ignored. Seal off the bot-Hencek east of your camp with farms and towers, and begin boilding a catapalt. When you have a catapult, destroy the guard towers at the wall, kill all the Human troops, and then send in a few peons to establish a town hall near the

second gold mine here. Clusters of human troops await in various pockets in the mountain maze leading to the chagons, as well as several towers. Use your catapults and ogres to destroy these burnans. There is also a Fluman camp in the northwest, but it is easily dispatched. You won't really encounter much resistance otherwise until you arrive at the footsteps of the dragon roost to the northeast. There is a gold mine nearby, so build a town hall and a barracks here so you have

access to troops immediately. Then send in as many bloodkasted ogres as necessary, until all the waiting troops are slain. Then free the dragon roost

Complete strategles for both destroying and defending bases, Plus. scenarios by **CGW** that will really test your skill.

### SCENARIO 7: THE SEAS OF AZEROTH

Include the history of Azeroth (blue) to your south in Scenario 7 is meredibly tough to defeat, but don't worry. All you have to do is hold them off and concentrate on building up a strong navy As soon as you start the scenario, build a horde of peons and upgrade your tower. Then start laying down a wall of farms to your south, with six or so guard towers behind to mow down any oncoming troops from Azeroth. As long as you support this line of defense with a few ground troops, you shouldn't have to worry too much about Azerotla

To the north of this line, start building the rest of your city and a shipyard. Erect two cannon lowers near your first shipyard to provide protection from enemy vessels. Then build two destroyers and escort a tanker to build an oil platform.

When you run out of gold, there is another pune on an island to your west. Use ogre juggernauts to clear away the towers that guard the island, and then slay the knights on the island with drag-

oux. Build the five requisite shipyards, group together eight auggernaufs and a goblin zeppelin, and then go hunting for enemy ships. Also use a group of dragons to search for enemy ships. Between the two units, you should be able to climinate all ships in the scenario

### **SCENARIO 6:**

### NEW STORMWIND

egin Scenario 6 by building guard towers at all three entrances to your camp. Gryphon riders will begin attacking your village in only a few minutes. Build at least four towers on the sonthwest side of your camp, where the gryphons will come from, and then block all entrances with farms so that no Hinman troops can enter. You can keep

one sliver of open space in the northern pass of the forest surrounding your camp.

Build sappers and two or three dragon mosts us soon as possible. Send a few peons north to build a second town hall and a ring of gnard towers around a second gold mine. When you have four sappers, send them west to blow a hole through the mountains protecting the Kul Tiras (green) camp and to demolish any towers standing there. Next send in a wing of nine dragons to decimate the Kul-Tiras camp. Don't worry if guard towers are sniping at you, just concentrate all mine diagons' breath weapons on each lower, one at a time, and you'll destroy them quickly with no more than one or two dragons lost. Claun the gold mane here, as well

Azerath (blue) to the north, has over a dozen paladins in residence and they will all use their healing spells to maximum efficiency, so forgo sending in ground troops and just have your dragons kill them all. When you encounter towers or archers, concentrate fire on them and then return to the task of climinating all paladms. When you've whittled the Azeroth forces down, send in bloodhisted ogres to bat cleamp

## SCENARIO 8: ASSAULT OF KULTIRAS

n Scenario 8, group your warships and a zeppelin together and stand against the onslaught of Kul Tiras ships that attack you at the beginning of the level. At the same time, load up

all your units onto your transports and then escort this naval group with your warships to the easternmost landmass, where you'll find a gold mine and some pig farms to be rescued. Begin building farms so you can train more peous. Build a lamber mill quickly, and then proceed to establish a full base.

Also group your troops into two parities and send them northward toward a second gold mine. Slay the Kul Tiras troops nearby; then send two peons here to build a protective wall of farms, towers and a town hall. Make sure you raise several guard towers in both camps, as gryphon riders will attack periodically.

Beef up your defenses at your northern camp, since this will be attacked the most Build four catapults, assign them an escort party of ogres and trolls, and then proceed northeasterly to take out the Kul Tiras towers one by one. At the same time, build three dragon roosts and start training dragons. When you have a group of mue, send them due north to destroy the gryphon aviaries; then have them lear apart the rest of Kul Tiras. When you've created your second group of dragons, send them m as well. Your ground troops and death knights can mop up after the deadly wyrms.

Look for the Act I walkthrough and lips on how to use spells effectively on our CGW Web site: www. zdnet.com /gaming.

# Legend 6 Gold Mine Prisoners

Oil Patch

Mage Tower

#### SCENARIO 9: THE TOMB OF SARGERAS

n Scenario 9, there is no base building. It's a hunt for a renegade daemon, pure and simple. Because you start out with a small force, it is fairly difficult Preserve your death knight at all costs. His death-and-decay spell is it waluable, and his raise-dead spell can create an instant army for you in a pinch. Move your small band eastward, capture the shipyard, and baild a transport. Send your units east, except for the death knight, and capture the Temple of the Dammed, Next pick up the death knight and head to the eastern forest island to recruit the trolls. With the trolls on board, head to the top of the map, and then unload your troops on the shores to your west. Use your trolls to cut down the elven archers standing guard. Then venture forward slowly and free the captured Ore prisoners. Don't bother with the lower waiting there; just free the troops and run back the way you came.

Fill your transport with grants and ogres, and then sail south and unload at the open shore. Several Azeroth troops will attack you, but your ground troops should be able to take them. Then transport the rest of your force here. Destroy the towers with your death knight's death-

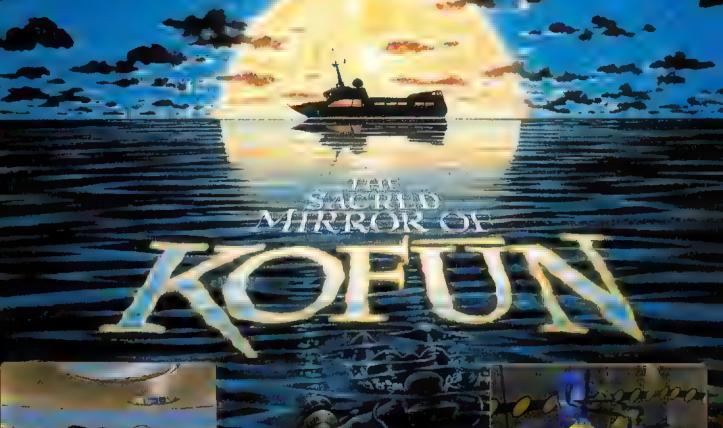

and-decay spell (120 mana will do the job), Free the catapult and blacksmith south of your landing point and proceed westward, hugging the southern mountain range Lead with your ogres-not your death knight, because there are paladins waiting here. You'll meet resistance along the way, but remember to keep your death knight alive. Death coil will replenish his health, so use it if he is running low. Then when the trail turns northward, use death-and-decay and your catapull to take out the waiting towers. Now just rash ahead with your dozen or so ground troops. Your goal, the daemon, is up ahead, but make sure you keep enough trolls alive to kill him.

Always build towers in clusters, and always protect them against enemy attacks with a wall of farms. Guard towers are best because they fire quickly, can attack air units and won't do splash damage to friendlies.

#### **SCENARIO 10:**

#### ALTERAC

cenario 10 is relatively easy. First fight your way through the forest with your knights, ogre and dragons. Then, move your peons to the northern gold mine at the top of the map. Build your camp and erect guard towers and farm walls for protection. Build five or so catapults, and send nine

ogres cast to sack Stromgarde village (red). At this time, send half a dozen peons to a second gold mine (one of the two closest gold mines to the south) and build a second town half, guard towers and some dragon roosts Train nine dragons and send them into the Strongarde Leave them to demolish the camp while you train more dragons to send south into the Lordaeron camp (while).

Around this time, you'll see the Lordaeron peasants (and Stromgarde ones, if they're still alive) making a bec-

tine for a gold mine outside the proteclion of their camp. Send a peon to that gold mine and raise two cannon towers to kill Lordaeron's meome and peasants. Your two groups of dragons should have no trouble laying waste to the two villages. Then have them sink the destroyers in the river surrounding Alteric to the southeast, build a shipyard and oil platform, and then transport the Alterac mage back to the Circle of Power.

#### SCENARIO 11: THE EYE OF DALARAN

nce you enter Secuano 11, group your ships together and counterattack the vessels near you. Load up your four transports, and have your battleships clear the shores due east. Once you've cleared three towers' worth of land, unload your troops and take the Lordaeron gold mine settlement to the northeast, You'll fight Lordaeron (white) troops along the way. Have your peons begin building facus and a town half. Build a lumber mill and towers for protection; then budd a barracks. After Dalaran (violet) has sent several waves at you from the south, mount an expedition. Build three catapults, escort them with nice ogres, and send them south to the Dalaran town. Take it and establish another town hall

Train lots of death knights, and research all your spells. Send a party of two dozen ogres and trolls east to near the Dalaran mage stronghold. Have your death knights east whirlwind to wreak have at the mage compound. Once the whirlwind has softened up the enclave, east death-and-decay to slay some more broops, and then sweep through with your ground troops. Ignore Lordaeron to the southwest

#### SCENARIO 12: THE DARK PORTAL

eenario 12 is simply too hard to beat You definitely start out with a huge number of troops, as well as all your powerful heroes, but they're not enough to defeat this seenario. Use Deathwing to destroy all cannon towers, while Teron Gorefiend and your other death knights cast whirlyind on the guard towers. Croup your strongest ground troops together, and be prepared to meet onslaught after onslaught after onslaught right after you start the mission. Once you've cleared away the towers to your south, send your peons and an escort of nine melee units south and toward the easternmost edge of the map.

At the free gold mine, begin building a limiber mill and town half. Erect as many guard towers as you can, because you will need them to stem the never-ending fide of enemy units pouring into your borders. Build farms around your towers so that melee troops won't be able to reach them Then keep on sending one lone ogre into the Kul Tiras (green) camp to your west, and hare their troops into range of your towers. Repeat this until the Kul Tiras forces are whittled down. Then immediately send in a swarm of goblin sappers to destroy towers and barracks. Building a

second fown hall here will be tough, especially since it is bard to defend. Nevertheless, build many guard and emnon towers so you have a line of defense that will kill oncoming troops. This is the only way I know to be sure of slaying all your enemy's troops; going toe-to-toe with the enemy, camp by earnp, will not work. Only luring them to your towers repeatedly will assure their deaths. I also recom-

mend stationing zeppelins at the enemy borders so you are alerted of any and all invasions.

For Azeroth (which is granding the ocean pass to the Dark Portal), I recommend an air attack with nine dragons, Don't forget to leave enough gold to build a shipyard and foundry. &

## **New World Computing**

# "The Might and Magic series helped to revolutionize the industry."

his is the story of a man, an idea, and a shrink-wrap machine.

Also, not coincidentally, it is the story of the birth of New World

Computing. In 1984, Jon Van Caneghem, now President of New

World Computing was an avid boardgamer and role-playing

adventurer who decided to try his hand at writing a computer role

playing game. He started coding the game on his

Apple He and the result was

MIGHT AND
MAGIC; THE SECRET
OF THE INNER
SANCTUM THE TRAINER

SANCIUM. The game was finished in 1986. Then, lon and two friends pooled their money, bought a heavy-duty shrink-wrap machine, and worked through an entire sleepless weekend, shrink-wrapping the game for shipment the following Monday. In all, 5,000 boxes were wrapped that weekend.

The Might and Magic series helped to revolutionize the industry and now has five installments, Might and Magic: The Secret of the Inner Sanctum was one of the first games to utilize a first-person perspective in its interface, and to adhere to common pen-and-paper roleplaying rules: turn-based combat, experiential skill and level advancement, equipment that enhanced skills, etc. Since then, the series has grown to include: MIGHT AND MAGIC II: GATES TO ANOTHER WORLD. MIGHT AND MAGIC III: ISLES OF TERRA. MIGHT AND MAGIC IV: CLOUDS OF XEEN and MIGHT AND MAGIC V: DARKSIDE OF XEEN. The final two chapters, installed on the same hard drive, allowed the player to experience:a whole new-scenarion called World of XEEN. A second scenario Sworps of Xeen was included in the Might AND MAGIC TRILOGY pack

## New World Computing

# "Heroes of Might and Magic II will expand on the original."

ealizing that gamers were enamored of the entire concept of fantasy worlds, a plan was devised to bring the characters and monsters of the Might and Magic series to the strategy game genre. Heroes of Might and Magic a very slick remake of Jon's earlier The King's Bounty, was the result, and its accolades have been sung far and wide. Computer Gaming World named Game of the Year for 1995, and it won both

It Strategy Game of the Year for 1995, and it won both

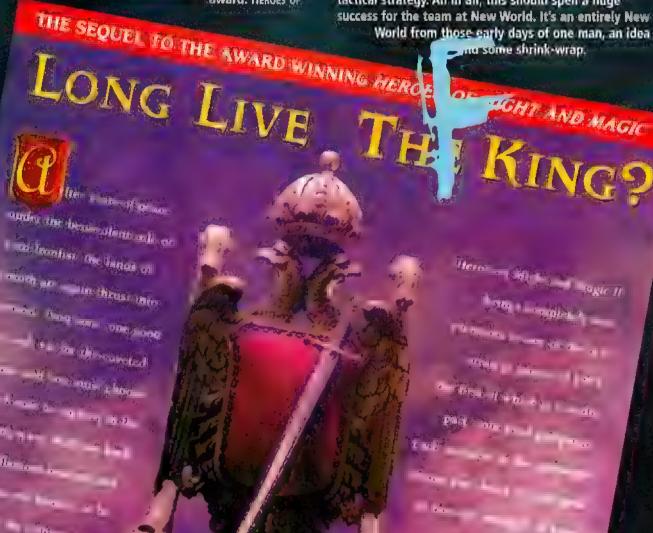

PC Gamer's Editor's Choice award and Computer

Game Review's Golden Triad

award. Heroes or

MIGHT AND MAGIC blends many of the fantasy elements of role-playing with a solid turn-based strategy wargame engine. Plus, it offers a rich and rewarding campaign game.

So, is it any surprise that the folks at New World
Computing are working on a sequel? Of course not.
HEROES OF MIGHT AND MAGIC II will expand on all of the
things that made the original great, while adding new
elements, such as secondary skills and internet
playability. Two new character classes have been added;
all of the artwork has been updated; new monsters,
spells, and artifacts have been created; and the combat
screen has been enlarged to further the elements of
tactical strategy. All in all, this should spell a huge
success for the team at New World. It's an entirely New
World from those early days of one man, an idea.

Accolade

action games with new elements and flair was to find expression in another ongoing series. The original STAR CONTROL was an action/strategy hybrid. In many ways, STAR CONTROL was the original "conquer the galaxy" game. You made strategic decisions about how many

ships to send to what star system. Like GALAXY and REACH FOR THE STARS before it, STAR CONTROL was primarily a strategic space conquest game. But it was more

Where earlier strategic space conquest games merely resolved the factical battles according to various algorithms, 5749 Control let you control your ships in a wild, action melee mode of ship-to-ship action. Even better, no melee was quite the same because the ships of different alien races had different attributes and special attacks. Tactics which worked against one race might be totally ineffective against another. Plus, many of the aliens were just plain funny.

How do you top that? STAR CONTROL II opted for an adventure game wrapping. The aliens were even funnier and the story gave you a reason to fight. Accolade had managed to create an entirely new look and feel for the game without losing the essential element of fun from the original.

Here, at last, is STAR CONTROL 3. Once again, Accolade has been smart enough not to mess with the very successful action elements of the game. Yet, it has a brand new look. Now, 3D spaceships and wild, wacky puppets pull you into a game that has never lost sight of its hour-devouring roots.

"In Star Control, no melee was ever quite the same"

#### Accolade

efore Test Drive, Accolade had ignored a major market segment—simulation. Though some may argue that the original Test Drive was more of an action game than true simulation. Even with its limitation to the highway, optional automatic transmissions, memorizable traffic patterns, and stilted cracked windshields when you were supposed to have fallen off a cliff, it was one of the first computer games to put you

behind the wheel of a high-performance Porsche,
Corvette, or Ferrari. Test Drive was a showcase game—the
kind you'd show your friends, even if they weren't gamers.
Best of all, Test Drive showed that Accolade could do

competitive 3D games and that every simulation didn't need to have guns to be exciting. To be sure, Test Drive opened the door for 3D military games like Steel Thunder (an early tank simulation) and Gunsoat (one of two Vietnam games worth playing), but the company's real success in vehicle simulation came with the Test Drive series. The cars got faster and the graphics got fancier in Test Drive II and you were truly able to leave the road without crashing in Test Drive III. Now, in Test Drive Orr Road, you'll be able to spend all of your time off the road in a Chevy, Jeep, Land Rover or Hummer and love it.

Through the years, Accolade has published a variety of games, but the emphasis has always been on action combined with new elements and flair. That tradition still holds. In fact, with the addition of strategy, it's growing.

## Strategic Simulations, Inc.

"Before Pool of Radiance, SSI was primarily considered a 'wargame company."

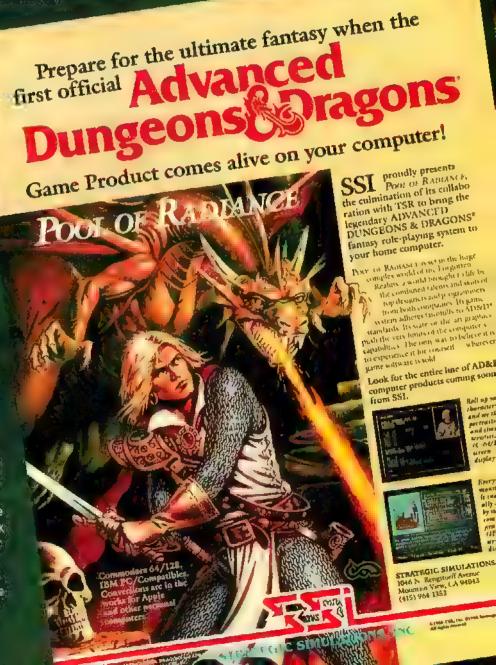

trategic Simulations, Inc. has always had a gaming culture. Its employees didn't just design games, they played them—their games and everyone else's. At first, most of their games were largely computerized versions of board-based wargames they liked to play. Then, they expanded to publish science fiction strategy games like GALACTIC GLADIATORS and COSMIC BALANCE well as roleplaying games like Questron and Phantasie: Yet, until they announced an unprecedented

Hicensing agreement with TSR

publishers of the

Atvanced Dungeons and Dragons system, SSI was still known primarily as a wargame company In 1988, they published POOL OF RADIANCE, the first of the "gold box" designs: which, for several years, became 55I's flagship line. POOL OF RADIANCE was true to the AD&D rules and heavy on combat—just right for the audience in the late '80s." The game engine was so strong that the publisher was able to crank out new games every few months. As the engine aged, SSI published the editor as Unlimited Adventures. oversaw development of the multiplayer online version, Neverwinter Nights for America: Online, and developed new games like the first-person Eve of THE BEHOLDER Series

Today, the original TSR deal is over and SSI is publishing exclusive fantasy games, but they still have one title carrying on the tradition. This year, DARK SUN: CRIMSON SANDS had its debut on the Total Entertainment Network, DARK Sun: Crimson Sands is a multiplayer role-playing game set in a) fascinating universe where mages draw their power directly from the flora and fauna of the land itself.

## Strategic Simulations, Inc.

hough some wargamers were angry at 551's management about the TSR license, a strange twist of fate occurred. For a time, wargames fell out of favor and even some great wargames did disappointing numbers. Fortunately for wargamers, SSI's management were committed enough to creating wargames that there were some years when the TSR-

licensed games carried the ball for the wargames. So staunch was this commitment that SSI continued to publish wargames, even when the genre seemed in danger of dying away.

Then, in 1994, SSI published a wargame that captured the imagination of hardcore wargamer and casual gamer alike-Panzer General. It featured beautiful graphics, a great interface, and well-balanced campaign games, it sold well and continues to sell well! PANZER GENERAL invigorated the wargaming hobby in general, inspired the company to putgreat graphics in even hardcore wargames like STEEL PANTHERS and Age of RIFLES and formed the centerpiece of an entire General series.

ALLIED GENERAL provided the flipside to Panzer General's German perspective. Indeed, it provided three flipsides. since you could now play a British, Russian or U.S. general. Yet, the GENERAL engine proved itself even more versatile with its application to

fantasy realms, Fantasy General, and its upcoming release on science fiction warfare STAR GENERAL. In many ways, PANZER GENERAL may have saved the wargaming hobby. In other ways, it brought SSI back to its roots computer game company that makes the fantasy, sci-fi, and wargames that its employees (and management) like to play

## Lucas Arts Entertainment Company

# "PHM Pegasus and Strike Fleet—Foundation for a Great Sim Tradition."

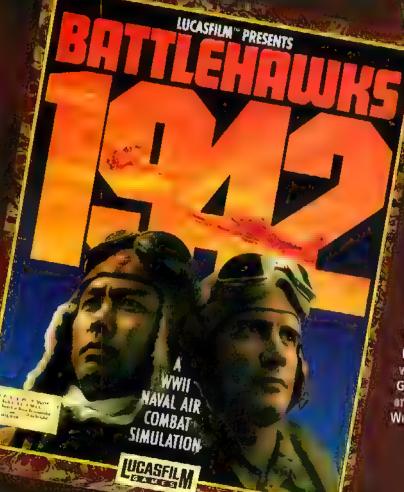

ince George Lucas had already revolutionized motion picture industry technology in bringing the Star Wars trilogy to the screen, it seemed only natural to create a new division for interactive entertainment Lucas visualized the future of interactive entertainment as taking place in an arena "where the digital production tools of filmmaking could be integrated into game development." Early research translated into the fast action of such early LucasArts

Encertainment Company titles as Balculazer and Rescue on Fractalus.

LucasArts' early days brought fantasy games like
LABYRINTH and wargames like the hybrid PHM PEGASUS and
STRIKE FLEET to market, all with fresh perspectives.
PHM PEGASUS and STRIKE FLEET, in particular, broke

to a contract of the contract

ground for LucasArts' phenomenal series of combat flight simulations, building a market for new approaches to wargames. So, they decided to create a WWII flight sim where, for the first time, you could play as a pilot for either the Japanese or American side. Battlehawks 1942. (1988) succeeded so well that the publisher went on to finish the trilogy with Their Fivest Hour (The Battle of Britain) and Secret Wearons of the Luftwarfe (a late WWII "What if?" campaign). They were also eventually able to do the same trick George Lucas had done in Star Wars, transform WWII are dogfights into outer space dogfights with the X-Wing and Tie Fighter games. But that comes later

OF ATLANTIS

he late '80s brought another important genre development at LucasArts. The company quickly perceived that gamers were tired of playing graphic adventures with parser interfaces where they had to type VERB, NOUN to make things happen. So, they created the now legendary SCUMM, Script Creation Utility for Maniac Mansion; system. It may sound disgusting (every acronym in the toolset spells out a body fluid), but its inception was a key event in adventure game history. SCUMM was the first system

The public loved Maniac Mansion, it became an icon for a new style of animated adventures. The interface was intuitive enough that MANIAG Mansion was phenomenally successful on the 8-bit Nintendo system as well as the computer, and the game birthed such memorable characters that it became a live television show on the Family Channel.

The SCUMM system proved its further versatility in 1989 and 1990 when it served as the foundation for two landmark products: Indiana Jones AND THE LAST CRUSADE and LOOM. The Indiana Jones adventure marked the first time LucasArts had ever used one of the film company's marquee licenses to build a game (prior to this, other companies had produced less than sterling Indy and Star Wars products). Loom was the first game to use a musical staff as its interface. These were just the beginning of a story game dynasty.

THE SECRET OF

t the turn of the decade, LucasArts was achieving prominence in the combat flight sim category (THEIR FINEST HOUR: THE BATTLE OF BRITAIN had just released and Secret Weapons of the Luftwarfe was already greatly anticipated) and was so well-known in story games that gamers began to speak of "LucasArts style games." They expanded their adventure game franchise with THE SECRET OF MONKEY ISLAND adventure and its sequel, Monkey Island 2: LeChuck's REVENGE, Both games poked fun at sexual stereotypes and classic swashbuckling adventures. The humor was fresh and such things as the misunderstood "Insert-Disk 256" Joke (the game asked you to do so, but-

there was no Disk 256—the guys were just making fun of the proliferation of 5.25" floppy disks in that era's games) will live forever in computer game history. This great tradition will continue with The Corps of Monkey

ISLAND in 1997.

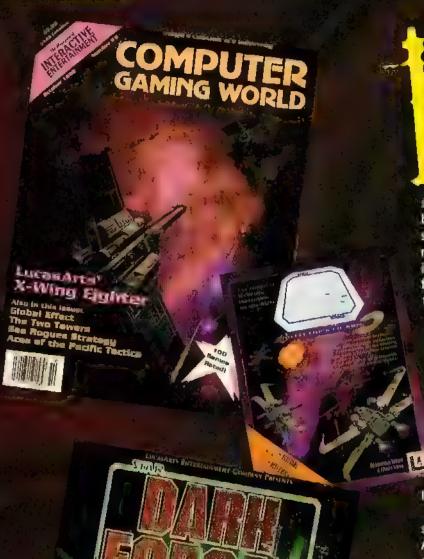

As evidence of the adventure game strongpoint LucasArts tried a bold experiment with INDIANA JONES AND THE FATE OF ATLANTIS. NOT only did the game require the player to: "earn" their interface in one segment, but it was probably the first game to ever adapt itself to the gamer's playing style. As the player made decisions, the game would morph into either puzzle-, action- or cooperation-dominant mode to fit the player. Though it might eventually have been more efficient to produce three separate games, the adventure stands as a watershed to continued design innovation in LucasArts' traditional adventure game strength...

**IUCASFILM** 

"Gamers began to speak of "LucasArts-style' games"

#### Lucas Arts Entertainment Company

### "The *Star Wars* games put you in the middle of the film's universe"

ucasArts was able to create successful properties, both original and licensed, across every viable platform—nimbly moving from one to another as windows of opportunity would open. In

1993, LucasArts brought computer gamers the first LucasArts-designed *Star Wars* computer game, X-

WING. It was a tremendous success as the company, like George Lucas before them, turned their WWII combat sims into mesmerizing space opera. The methodical pace of training, the interweaving of campaign elements and fast paced action itself led to a tremendous sense of being in the middle of a Star Wars movie.

REBEL ASSAULT Was even more phenomenal. The first product for a brand new game engine, "INSANE" (INteractive Streaming Animation Engine), Repet Assault sold more than a million units worldwide. INSANE also supported the animated chase sequences in LucasArts' Full Theorite, a biker adventure that was the first game to use both SCUMM and INSANE.

Both X-Wing and Rebel Assault spawned successful sequels (The Fighter and Rebel Assault II), but DARK FORCES, a first-person shooter with defined mission goals, brought the Stars Wars universe even more up close and personal.

Watch for further Star Wars titles like JEDI KNIGHT, REBELLION, and X-WING VS. TIE FIGHTER IN the future. They'll also publish games like the surprisingly different AFTERLIFE, too. LucasArts has a first-person western shooter, Outlaws; several multiplayer, networkable games; and a STAR WARS strategy game as LucasArts Entertainment Company continues its tradition of excellence.

#### Electronic Arts

an a computer make you cry? This early ad asked a great question, and immediately conveyed the vision that set Electronic Arts apart from the beginning. Founder Trip Hawkins knew that computer games could and would have an emotional impact on individuals and society. To convey this, he viewed the company from the start as equivalent to a music industry publisher and his "electronic artists" as the rock musicians of the future.

Early on, EA had a new perspective which translated into fresh ideas—construction sets, celebrity "designers," affiliated label programs, modern games, fractal landscapes, and sports game interfaces. Even its subsidiaries had fresh ideas: Origin's Wing Commander interactive movies and first-person role-playing games

like ULTIMA UNDERWORLD, as well as builtrog's original "god game," Populous, and their mimitable Syndicate and Theme Park.

EA's success formula was always "simple, hot and deep"—hot enough to attract, simple enough to play and deep enough to retain (and encourage repeat purchases). Over the years of building and distributing these simple, hot and deep products, EA has distributed a Hall of Fame wing full of developers and publishers including: Bethesda, Bullfrog, Dynamix, Interplay, Interstel, LucasArts, New World, Novalogic, Origin, SSI, and Three-Sixty Pacific, among others.

Today, EA is still publishing a wide range of simple, hot and deep products, and expanding its influence into multiplayer online games. And I'll bet they still want to make you cry.

## Sirtech

### "Sirtech is no longer just the Wizardry Company."

cGW is the world's oldest independent software gaming company: Sirtech Software. It all started in 1979 with an Apple II purchased for Fred Sirotek's resin sands business. Robert Woodhead wrote a simple, but effective program to figure cost variances in rail shipment rates in a widdly fluctuating market.

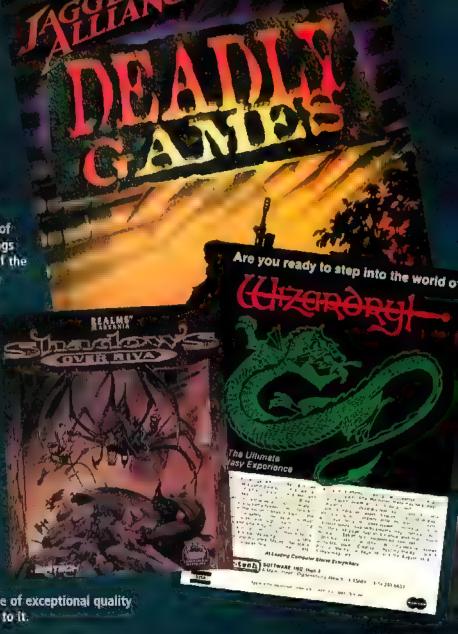

The program paid for the computer in an eye-blink, and as he wrote other business programs, permission was granted to use the company's computer for some of his personal projects. Norman and Robert Sirotek, Fred's sons, noticed the potential in Mr. Woodhead's programs and talked fred into founding Sirtech Software in order to publish their first game, Galactic Attack.

For its first year, Sirtech operated out of 100 square feet. These humble beginnings led to the creation of the first episode of the award-winning Wizakoky series. In 1996, Sirtech is still building on the famed Wizakoky tradition with such slick remakes as Wizakoky Gold.

Today, with comprehensive worldwide distribution via alliances with a host of respected foreign republishers, and new types of games like Jaggen ALLIANCE, DRUID, DEADLY GAMES, NEMESIS; and SHADOWS OVER RIVAL Sirtech is no longer just "the Wizardry Company."

A pioneer in computer software, Sirtech has a dynamic vision for the future of gaming. Upcoming releases such as their internet-driven science fiction action strategy game and their new Wizardry have ambitious goals.

Inherent in all Sirtech games is a promise of exceptional quality and depth of play. And they've lived up to it.

ruce and Roger Carver founded Access Software in 1982 in order to publish action-oriented computer games. Games like Neurnal Zone, an action-space combat game, and Beach Head, an arcade game where: you defended a beach, were the company's forte

until the mid-80s. Then, the company published a golf game called Leader Board that was to foreshadow the company's future success in computer golf games.

This was also when Access began to experiment with new technologies. By 1988, a space combat game called EGILLON offered voice command on the C-64 and shipped with its own custom hardware. Later, 1989's World Class Leader. BOARD used RealSound, Access' proprietary sound technology, to offer commentary on your shots ("Looks like the ball's in the woods, Jim.")...

Then came MEAN STREETS, the first Tex Murphy game. Text Murphy, a futuristic throwback to Raymond Chandler's. hardboiled detectives, started a detective dynasty with Mean Smeers, the first game to fulfill the promise of an interactive movie in this VGA game combined with RealSound. When Tex next appeared, in Martian: MEMORANDUM, he was partnered with full-motion video and fully-synchronized digital speech for the

entire cast... Even-so> Access wasn't satisfied. They wanted Tex to wander through 3D rooms and play scenes with evensmoother video. They even added well-known -professional actors to enhance the movie idea. As a result, UNDER A KILLING MOON was phenomenally successful, and nearly universally acclaimed:

Now, Tex Murphy has

Murphy adventure.

A missing man A torrible accest And Squissed to share

#### Bethesda

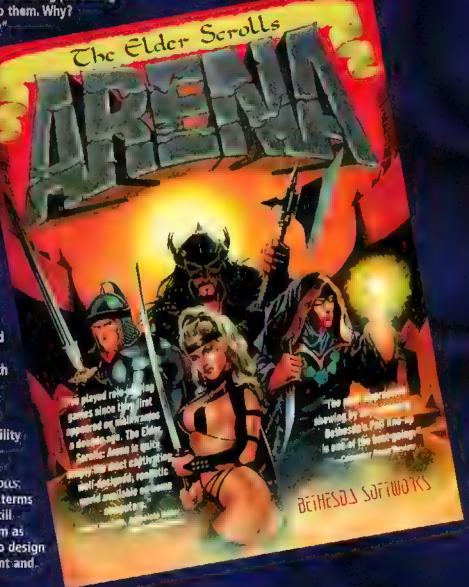

"Call Out—At Bethesda, folks from the CEO down, are scrupulous about reality."

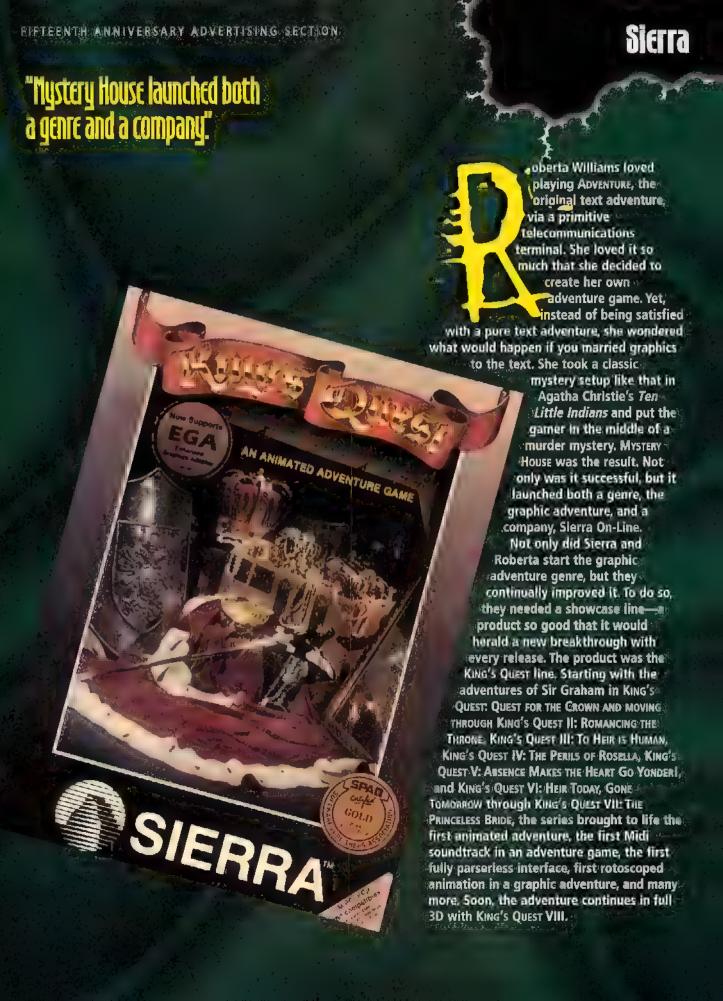

here is a familiar name in the credits for this summer's hottest film, Independence Day. Chris Weaver is the CEO of Bethesda. Not only does Weaver have a Ph.D. in Physics, qualifying him to serve as advisor, but he is working with the special effects geniuses behind independence Day on a game to be called Tenth Planet—a game that reverses an industry trend for space combat sims in that the spaceships actually look better instead of having pixelating textures as you get closer to them. Why?

Because that reflects "reality" and at Bethesda, folks from the CEO down, are scrupulous about reality.

If ever a game publisher has been consistently underestimated, it has been Bethesda Softworks. From GRIDIRON, its physics-based football title on the Amiga, through its innovative overhead playing view in the original Wayne GRETZKY HOCKEY to its X-CAR game of prototype high-performance cars, Bethesda has had a commitment to "getting the model right."

Bethesda is committed to getting the model right in role-playing, too: THE ELDER SCROLLS: ARENA (with its bold advertisement pictured here) introduced a vast and potentially rich gole-playing universe. Its designers... weren't happy with it: They wanted? deeper character interaction, more verisimilitude in terms of accountability and reputation, and more realism interms of 3D terrain and its effect on characters. The sequel, The Elben Schools: DAGGERFALL, delivers just that. And in terms of a realistic game:world? They're still showing their commitment to realism as they've imported Dr. Ken Maynard to design realistic fractal landscapes for current and future projects.

## Sierra

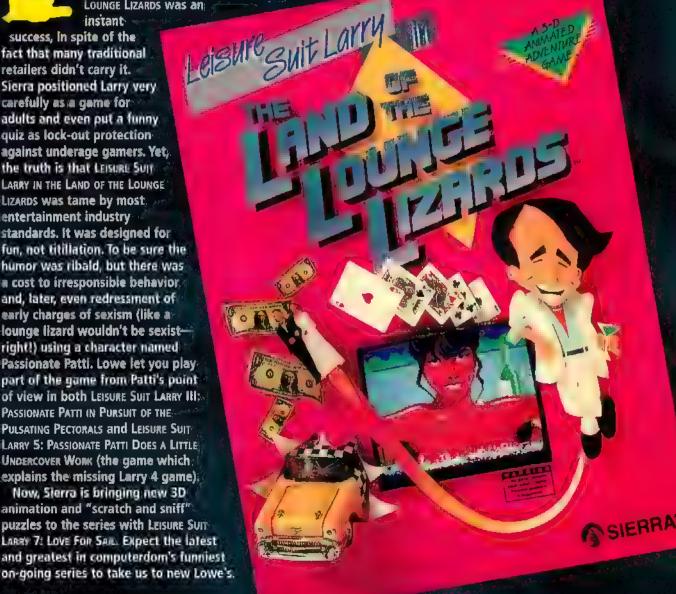

# "Expect leisure Suit larry 7 to take us to new lowe's"

arry Laffer, also known as Leisure Suit Larry, made his graphic adventure debut when Al Lowe, a mildmannered music teacher and brilliant jazz musicologist/musician, decided he needed to do something different (or, as Sierra once put it, they needed to "keep him from the impressionable youth of America").

> LEISURE SUIT LARRY IN THE LAND OF THE Lounge Lizards was an:

instant success, in spite of the fact that many traditional retailers didn't carry it. Sierra positioned Larry very carefully as a game for adults and even put a funny quiz as lock-out protection against underage gamers. Yet: the truth is that Leisure Suit LARRY IN THE LAND OF THE LOUNGE Lizards was tame by most. entertainment industry standards, it was designed for fun, not titillation. To be sure the humor was ribald, but there was a cost to irresponsible behavior. and, later, even redressment of early charges of sexism (like a) lounge lizard wouldn't be sexist right!) using a character named Passionate Patti. Lowe let you play part of the game from Patti's point of view in both Leisure Suit Larry III: PASSIONATE PATTI IN PURSUIT OF THE Pulsating Pectorals and Leisure Suit LARRY 5: PASSIONATE PATTI DOES A LITTLE Undercover Work (the game which:

Now, Sterra is bringing new 3D animation and "scratch and sniff" puzzles to the series with Leisure Sun LARRY 7: Love For Sail. Expect the latest and greatest in computerdom's funniest on-going series to take us to new Lowe's.

Combat Intelligence Modeled After Actual World War I Aces

# "Red Baron is one of the Top 5 computer games of all time"

omputer Gaming World has rated it one of the Top 5 computer games of all time. It is still selling in computerdom's most demanding genre—flight simulation—even though it is five years old. Its technology, 3SPACE, was one of the primary reasons that Sierra acquired Dynamix, Inc. in the first place. It was the first VGA flight simulation with both a decent

frame rate and a realistic flight model.

The game was RED BARON. Developed by
Damon Siye, a guiet University of

Oregon graduate who had honed his skills on 3D action games like ARCTICFOX, SKYFOX and STELLAR 7, it signaled the beginning of a dynasty in combat simulation for Dynamix and Sierra, Aces or-THE PACIFIC, ACES OVER EUROPE and Aces of the Deep were all extensions of the lessons learned and technologies. developed for Rep Baron. The planes were fragile enough to obey physical laws; the rotary, engines were handled perfectly; the sounds were realistic; the 28 aircraft to be flown were meticulously modeled, and there was plenty of excitement whether you chose individual missions or played the campaign tour of duty.

Now, Sierra is preparing Reo
Baron II, a game that is expected to
be more than a cosmetic makeover
of the original masterpiece, more
than a graphic upgrade. Using faster
processors to provide more detailed
graphics and higher frame rate, Reo
Baron II expects to dominate the
category for yet another five years.

## Mindscape

# "Chessmaster is the most successful chess series of all time"

he stagecoach is gone at Mindscape. The frontier symbol which once graced the company's logo has been superceded by a topographical representation of imaginative frontiers. Once, the stagecoach was appropriate, since the history of Mindscape is one of pioneers taking different paths to reach the same unsettled territory. First, Walt Bilofsky built a chess game (MyChess) and adapted The Original Adventure text game for the Heathkit computer. He founded The Software Toolworks in 1980. Then, textbook publisher Scott, Foresman mpany founded the original Mindscape in 1983

and Company founded the original Mindscape in 1983 to make inroads on the educational market.

In contrast, Les Crane was a legitimate celebrity—creating the "Top 40" format for radio, host of TV's The Les Crane Show (mentioned in Good Morning, Vietnam), and Grammy winner for the song/poem, Desiderata, in the '60s. He founded Software Country in 1984, marketing original titles and, in 1985, the first "value pack," Software Golden Oldies, Vol. 1. Then, with the help of Biloisky and current General Manager Mike Duffy, he published the first in the most successful chess series of all time, The Chessmaster 2000. The collaboration was smooth enough on The Chessmaster 2000 that Software

Country and Software Toolworks merged in 1986.

One year later, Mindscape underwent a change when John Purcell and Roger Buoy bought it to make it an entertainment software company. Mindscape's early hits included: BALANCE OF POWER, PAPERBOY, SUPERSTAR ICE HOCKEY, DEJA Vu and some Lucasfilm movie licenses.

The pioneers hadn't all come together, but they were moving in the same direction.

#### Mindscape

oftware Toolworks was on a roll. delivering another franchise product in 1987, Mavis BEACON TEACHES TYPING. This gave Crane the confidence to go public. In 1988, Software Toolworks became the first ntertainment software company to be publicly traded. Some of the new capital was used to acquire Intelligreations. publisher of Alternate Reality, The Hunt for

The original Mindscape; however, was not as healthy. Mindscape overextended itself during the peak of the Nintendo 8-bit phenomenon, focusing on such products as the very successful Papersoy. But the NES. craze was slowing down. So, in 1990, Toolworks acquired Mindscape. The good: relationship with Nintendo carried into the new company and products like Mario is Missing began to appear.

Now, the industry pioneers were together, but in 1994, Software Toolworks was itself acquired by the U.K. conglomerate, Pearson plc, Then, Toolworks acquired Atreid Concept S.A. (now, Mindscape Bordeaux) and industry pioneer, Strategic Simulations, inc. The company was renamed Mindscape, and headed into new frontiers.

In 1995, Mindscape was a leading publisher on the Windows '95 platform: AL UNSER, JR. ARCADE RACING, SU-27 FLANKER, and WARHAMMER: SHADOW OF THE HORNED RAT each: showed off the new OS in different ways.

This expertise should pay big dividends in this year's Chessmaster 5000, Azreal's Tear, MEGARACE 2 and Necrodome, as well as 1997's new Mindscape Sports Authority games (AARON VS. RUTH ALL-TIME SUPERSTARS BASEBALL) AND NCAA BASKETBALL: FINAL FOUR 97), WARRAMMER seguel and potential role-playing blockbuster, DARK EARTH.

The stagecoach is gone, but Mindscape is still pioneering.

# "Spectrum HoloByte has always been synonymous with simulation".

Gilman Louie, had previously published a command simulation of a Star Trek-like spaceship, and joined with cofounder Phil Adam to create a company that would eventually publish the Falcow line; develop flight sim software for military contractor Perceptronics; Import European flight sim hits such as Fught or the Introder and Tormano; publish a realistic WWII submarine sim, GATO; release a simple, accessible PT-boat sim; and build a realistic M-1 tank simulation based on subcontracting

rom its inception in 1982, Spectrum HoloByte has been synonymous with simulation.

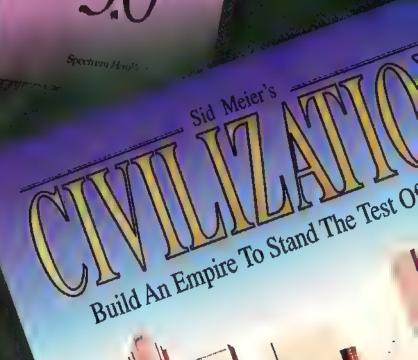

By acquiring MicroProse Software in 1993, Spectrum further established its position as the simulation leader. MicroProse had its own combat flight superstar in the F-15 STRIKE EAGLE line and had experienced success with F-19 STEALTH FIGHTER (eventually F117A STEALTH FIGHTER) and GUISHIP/GUISHIP 2000. Plus, they were preparing to expand it with 1942: PACIFIC AIR WAR. The rich got richer.

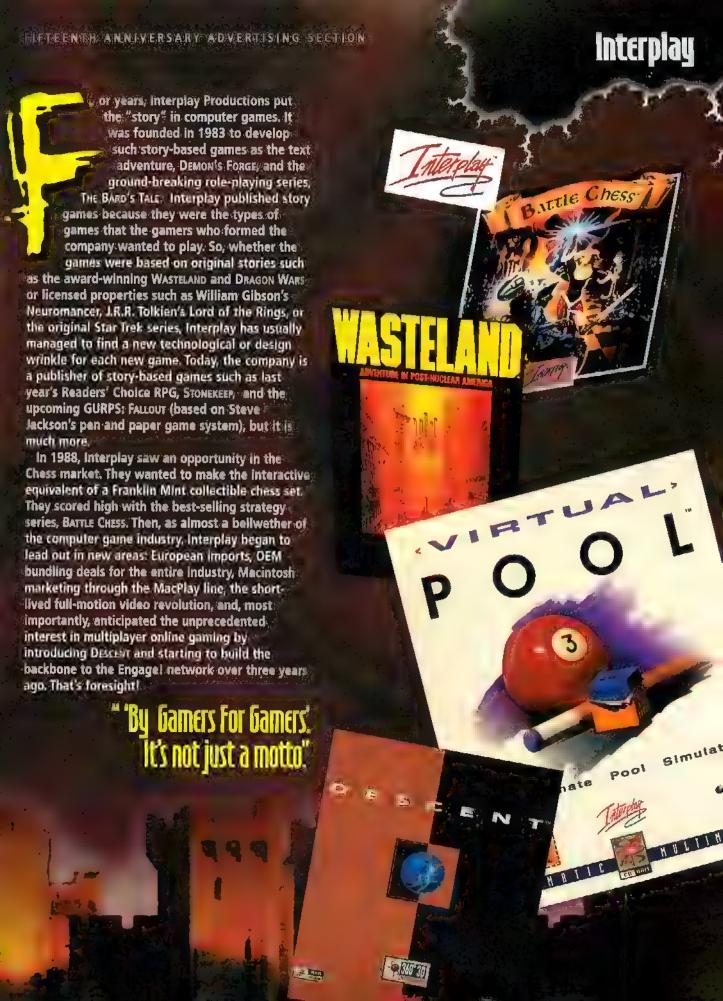

work with SimNet (the military's massive training simulation).

In addition, MicroProse had an entire line of successful strategy games in Sio.

Meier's Railroad Tycoon and Sio Meier's Civilization. Purchasing MicroProse gave. Spectrum immediate credibility in the strategy arena, credibility they would enhance by purchasing SimTex Software (developers of Master of Onion and Master of Magic) in 1995 and signing an agreement with FASA Corporation to develop titles based on BattleTech, MechWarrion and Shadowrun properties.

Today, new and upcoming releases such as Sip Meier's Civilization II, Master of Orion II, Agents of Justice and 1997's real-time BattleTech strategy game are likely to make Spectrum HoloByte as synonymous with strategy as It is with simulation

game that reveals the true origin of humankind, Investigate four mysterious realms in search of legendary relicsguarded by a labyrinth of puzzles and encrypted by the mysticism of Tarot.

## IN THE WAR OF THE GAMING MACHINES, THERE WILL BE NEW ENEMIES THAT DO NOT KNOW HOW TO PLAY THE GAME ...

I guess the thing that strikes people first about the MACH V is how bleeding fest it is

- PC Gemer

bested the other system of the back weasily bested the other system of the dup surpassed the other system of the benchmark the computer Gamery trovid

Best Heroware of the Year [1995] Computer Game Review

"It's top-notch performance is key, but you'll also appreciate the MACH Valittle extres. #CiGames | Rating: A

The MACH V may cost a bit more than other systems, but hard-pore gamers will find it worth the investment." PC Magazine - 4/4 stars

"The system's performance was nothing short of excellent, chewing through every benchmarking program thrown at it, scoring an overall average of 20% better performance than a similarly equipped Gateway 2000 Next Generation -

C199 Ministers, inc. All rights reserved. Mindiands is a coulstered by language and the resident are bridgered at Mindsough, inc. and the Prochainst land and the property of Main respective histories. pilipiania is a iroduniari, et Microsoft Corposition. Pl Coll 1-808-771-3772 für bilannistig on Gener Rating computer game programs have grown so massive and the number of hardware configurations has become so huge that incompatibilities and glitches are frustratingly common.

Software fixes, or "patches," for buggy programs have become a necessary evil, and will be until we reach the golden age of standardized platforms and bug-free programs.

Advanced Tactical Fighters V1.14: A general update filled with many add tions and changes, such as weapons performance, radar enhancements, joystick support, etc.

AH-64D Longbow V.1.08F Updates game to version 1.08, includes many fixes, updates and new features, including updated flight dynamics, easier hovering and autorotation, and new rotor/engine sound.

Back To Baghdad Update: A general fix file.

Battleground: Gettysburg V1.21: A massive update file with numerous fixes.

Battleground: Waterloo V1.02: Update has several fixes, including correcting P8EM replies and other random crashes.

Chaos Overlords V1.1: A general update that fixes some bugs and makes some interface changes such as a new Search Sites page:

Civilization II V2.41: A massive upgrade that revises every prior version of Civili to 2.41.

Conquest Of The New World V1.10: A general update, with the major addition of Play-By-E-Mai

Descent II V1.1: A general update file with many fixes. To install, unzip the "d2ptch11 zip" to get the "d2ptch11.exe," and then run the EXE file, which will install the patch for you.

EF2000 Midlife Upgrade V2.02: A patch that balances the campaign, with improved Al for both the enemy and your wingman. Run the "patchef exe" file to use.

Fighter Duel V1.92: A general update that fixes many bugs and includes additions such as new aircraft and additional joystick support

Flight Simulator 5.0A
Update: Includes several hard
ware and Al improvements including improved flight equations
(including stall and spin models),
Sound Blaster/SB Pro/SB16
improvements, Improved Joystick
response, and 320x200 256 color
VGA mode for laster performance
Fixes the "Error 0039" problem
with Pentiums in VGA mode.

Heroes of Might and Magic for Win95 V1.1: Fixes a few problems in Heroes of Might and Magic 1.0, including anomalies with the cursor and in the Map Editor.

IndyCar Racing II For Windows 95 V1.01: A general update file that includes fixes for system crash while exit ng and modem play bugs. Copy this file into your "c:\sierra\cr2" directory, run the "w95icr11.exe." file, and run the "patch exe" command

Quake V1.01: Updates the fragfest extravaganza to version 1.01; improves the multiplayer code for modems.

Steel Panthers V.1.2: Update file fixes map editor, kills a few bags and improves Al

SVGA Air Warrior V1.16b: Fixes another bug in the macro engine.

TacOps V1.04: General fix fire. See reagme2,wr file after installation

Top Gun: Fire At Will V1.1: A general patch file that fixes a few problems. Examples are, various crash problems, missile dodging is easier, gun kills are harder to get, accurate fuel usage model, and a KEY file for the Suncom F-15E joystick. To install, run the "tgvt1.exe" file in your Top Gun directory, and then type "install" to install the patches. Afterwards, type "clean" to get rid of the unnecessary patch files after installation.

Virtual Snooker V1.1: Fixes a few bugs regarding modem play, and also modifies the Windows setup routine. Just unzip the "snkr\_us.zip" file in the directory where Virtual Snooker was installed, and let it overwrite the necessary files.

Warcraft 2 V1.2: Updates version 1.0 to 1.2. Includes
"war2kali.exe" for netplay using
Kali, and the shareware version of
Kali. Also has IPX network code
optimized for better performance;
fixes the Exorcism speli problem,
and also fixes the error that occurs
when 255 or more PUD files are in
the war2 directory. Just unzip the
"wc2\_12.zip" file, and run the
resulting EXE to install.

be obtained from Individual soft-

ware publisher's websites or

cliract from the publisher with

proof of purchase.

## THE COMPUTER GAMING POLL • A MONTHLY SURVEY OF CGW SUBSCRIBERS

ach month, 2,000 CGW subscribers are selected at random to rate 100 computer games. The results of that poll are combined with the results of previous months to yield a cumulative average for the best plays in gaming. If you receive a ballot please return it with your ratings so that other gamers and game publishers can benefit from your experience.

# It's Been The Best Of Times, And The Worst

Ifteen years ago I
was going crazy in
a one-horse town
in Brit sh
Columbia, and
one of the few
things that kept
me going was

computer and video games. These were the days when an Apple was tike something out of *Forbidden Planet*, and a tabletop Asteriors was the Altar of Infinite Quarter Sacrifice. Computer games were just hilling the market in plastic bags and stored on audio tape, ASCII characters doubled as computer graphics, and the first Star Fleet game was worth hours of amusement. It would be another couple of years before I would see actual graphics on anything other than a cartadge game.

Now it's 15 years later, and I type this on a Pentium 150 with more memory than the mainframe we went to see on junior high school field trips. Somet mes it seems like another world, but there's been a heliuva lot that's gone on in between, so here's a list of my personal highs and lows.

#### THE BEST

- Playing endiess hours of Polaris, a Missile Command clone, on the first Color TRS-80 at a buddy's house.
- Getting my first computer, a Commodore 64 with a real disk drive.
- Playing MULE with some friends and realizing that multiplayer is best.
  - 4 Playing an overhead-view chop-

per game for the C-64, and realizing that areade action could still be intricate and interesting

- 5. Blowing \$200 for a 300 baud modern for the C-64, and thinking what an incredibly cool gadget it was.
- Playing endiess games of IMPERIUM GALACTIUM from SSI. A space war experience that really hasn't been equated by an SF wargame since.
- Selling the C 64 and looking in awe upon the Alari ST I had gone halfers on, with every penny I had.
- Programming my version of Star FLEET BATTLES, and realizing just how fast a 16-bit processor was.
- 9 Watching my girlfriend play LEATHER GODDESSES OF PROBES In female mode and laughing my guls out, little realizing it was one of the last times game developers would give women any credit.
- 10 Becoming addicted to Regue, mapping out Dungeon Master with the help of another gir friend, and endless hours with my friends playing EMPIRE, watching the automated efficiency of FredWorld, all on that old ST.
- Discovering the incredible world of Air Warrior on Genie.
- 12. Seeing Wins Commander running in a software store and knowing that I had to have it. (A year and a half later my wife and I spent every penny to purchase our first IBM, a 386-33—and Wing Commander was ours.)
- My wife coercing me to write a nasty letter to CGW about Mastis Experimental Fighter, and editor Chris

Lombardi liking the style and inviting me to review for the magazine.

- Playing my first cooperative network game of Doom.
- 15. Watching my five-year-old daughter play Toy Story CD on her very own computer, which is a thousand times more powerful than anything I ever dreamed of 15 years ago.

After playing MULE with some friends, I realized that multiplayer was the best. 77

#### THE WORST

- 1 Spending countless hours loading Polaris into that color TRS-80 from a tape deck.
- 2 Realizing that there was no way on earth to network the CBM's in my high school to create a multi-crew position space sim.
- Wasting countless hours of my life watching things load from that C-64 floppy drive, a process only slightly faster than typing the code in yourself.
- 4 Upgrading to the ST and leaving IMPERIUM GALACTIUM behind forever.
- 5. Getting a \$300 VISA bill for playing Air Warrior on GEnie.

- 6. Watching Alari screw over the ST.
- Watching the ever-growing list of extremely cool games coming out for the IBM and accepting that they were never going to be translated to the SX.
- Mantis Experimental Fighter from MicroProse.
- Realizing I was going to have to upgrade my 386-33 before I was even fin shed paying it off, and that I would gel \$25 for line off processor and motherboard, if I were lucky.
- 10. Walching Sid Meler become a design god as he produced one needtessly sing e-player strategy game after another, forgetting what made the early strat games great and setting a trend that has only recently begun to change.
- Almost anything from Merit Software.
- 12. Outpost from Sierra, after they had ruined the game's potential by overriding the designer's cool design, which I had previewed the year before
- 13. Watching a guy from another game magazine get away with giv ing Ascendancy a 92 percent review, just as his Strategy Guide was released
- 14. Watching as one cool SF strategy game after another is delayed or canceled (Pax IMPERIA, MECH LORDS. ).
- 15. Seeing 15 years of advancement in computer gaming reduced to endless, hopelessly adolescent bloodagore ads, until you can't tell us from the much-too-sugary-breakfast-cerear cartridge gaming crowd.

Computer Garning World (ISSN 0744-6667) is published monthly by Ziff-Davis Publishing Division, One Park Avenue New York, NY 10016 Subscription rate is \$27.97 for a one year subscription (12 issues). Canada and all other countries add \$11.00 for postage. Postmaster, Send address changes to Computer Garning World. P.O. Box 57167, Boulder, CO 80322-7167.
